Skills for Industry Competitiveness and Innovation Program (SICIP)
Finance Division, Ministry of Finance

COPYRIGHT

The Competency Standards for Fashion Design, Product Development and Entrepreneurship is a document for the development of curricula, teaching and learning materials, and assessment tools. It also serves as the document for providing training consistent with the requirements of the industry for individuals who pass through the set standard via assessment would be qualified and settled for a relevant job.

The document was developed under the Skills for Employment Investment Program (SEIP) and subsequently reviewed and updated with the engagement of occupation-specific industry experts to use in training under the **Skills for Industry Competitiveness and Innovation Program (SICIP)**. This document is owned by the Finance Division of the Ministry of Finance of the People's Republic of Bangladesh.

Public and private institutions may use the information contained in this standard for activities benefitting Bangladesh.

Other interested parties must obtain permission from the owner of this document for reproduction of information in any manner in whole or in part of this Skills Standard, in English or other languages.

INTRODUCTION:

The Skills for Industry Competitiveness and Innovation Program (SICIP) has the overall objective of developing a skilled workforce adept at handling new technologies, especially for emerging industries in Bangladesh. It will expand skills training and strengthen the development of the training ecosystem to address the skills requirements of the SICIP-selected industry sectors. The program aims to (i) increase the technology-oriented skilled workforce across emerging and priority sectors, (ii) promote inclusive skilling and upskilling opportunities for women and socially disadvantaged groups, (iii) incentivize industry-university partnerships to nurture innovation capacity and improve industry competitiveness, and (iv) foster skills for climate-resilient manufacturing processes and green technologies. The program is expected to benefit about 220,000 new and existing workers over a 6-year implementation period from 2024-2029.

The SICIP Program has, therefore, taken the initiative to enhance the employability and productivity of trainees by implementing market-responsive and job-focused training programs through public and private training providers. This will require the development of competency standards for each of the occupations/trades which will provide a structured framework in the learning process to guide training providers, ensure consistent training quality, and create an alignment between the skills provided by the training institutes and the needs of the industry.

The Competency Standard also suggests integration of YouTube or similar platforms or downloaded clips into classroom practice to ensure simulated creation of the contents so that learners are exposed to visual demonstrations before classroom instruction or practical session, which aligns with modern learning preference and supports flipped classroom models.

This competency standard is therefore developed to improve skills following the job roles and skill sets of the occupation and ensure that the required skills are aligned with industry requirements.

The document details the format, sequencing, wording, and layout of the Competency Standard for an occupation which comprises Units of Competence and its corresponding Elements.

OVERVIEW:

A **Competency Standard** is a written specification of the knowledge, skills, and attitudes required for the performance of a job or occupation or trade corresponding to the standard of performance required in the workplace.

Competency standard:

- provides a consistent and reliable set of components for training, recognizing, and assessing people's skills, and may also have optional support materials.
- enables industry-recognized qualifications to be awarded through direct assessment of workplace competencies
- encourages the development and delivery of flexible training that suits individual and industry requirements
- encourages learning and assessment in a work-related environment which leads to verifiable workplace outcomes.

Competency Standard has been developed by a working group comprised of occupation-specific experts from the industry/institution, relevant consultants of SICIP.

Competency Standards describe the skills, knowledge, and attitude needed to perform effectively in the workplace. Competency Standards acknowledge that people can achieve vocational and technical competency in many ways by emphasizing what the learner can do, not how or where they learned to do it.

With Competency Standards, assessment and training may be conducted at the workplace, at training organization, during regular work, or through work experience, work placement, work simulation or any combination of these.

A Unit of Competency describes a distinct work activity that would normally be undertaken by one person in accordance with industry standards.

Units of Competency are documented in a standard format that comprises:

- Reference to Industry Sector, Occupational Title and Occupational Description
- Unit code
- Unit title
- Unit descriptor
- Unit of Competency
- Elements and performance criteria
- Variables and range statement
- Evidence guides

Together all the parts of a Unit of Competency:

- Describe a work activity
- Guide the assessor in determining whether the candidate is competent.

Competency Standard has been developed by a working group comprised of occupation-specific experts from the industry/institution, relevant consultants of SICIP.

The ensuing sections of this document comprise a description of the respective occupation with all the key components of a Unit of Competence:

- An overview of all Units of Competence for the occupation and their corresponding duration required for completion of training.
- The Competency Standards that include the Unit of Competency, Unit Descriptor, Elements and Performance Criteria, Range of Variables, Curricular Content Guide, and Assessment Evidence Guide.

Units & Elements at a Glance:

Generic Competencies (20 Hrs.)

Code	Unit of Competency	Elements of Competency	Duration (Hours)
SICIP-RMG-FPE-01-G	Carry out workplace interaction	1. Interpret workplace communication and etiquette. 2. Read and understand workplace documents. 3. Participate in workplace meetings and discussions. 4. Practice professional ethics at work.	10
SICIP-RMG-FPE-02-G	Operate in a team environment	1. Identify team goals and work processes. 2. Identify own role and responsibilities within team. 3. Communicate and co-operate with team members. 4. Practice problem solving within the team.	10
Total Hour			20

Sector Specific Competencies (30 hrs.)

Code	Unit of Competency	Elements of Competency	Duration (Hours)
SICIP-RMG-FPE-01-S	Carry out measurements and calculations	1. Plan and prepare. 2. Obtain measurements. 3. Perform calculations.	10
SICIP-RMG-FPE-02-S	Read and interpret sketches and drawings	1. Interpret information and specifications. 2. Read and interpret sketches and drawings.	10
SICIP-RMG-FPE-03-S	Apply knowledge of business planning	1. Identify business plan. 2. Perform business survey. 3. Identify banking requirements.	10
Total Hour			30

Occupation Specific Competencies (220 hrs.)

Code	Unit of Competency	Elements of Competency	Duration (hours)
SICIP-RMG-FPE-01-O	Apply fundamentals of fashion design and market analysis	1. Interpret principles and elements of fashion design 2. Identify garments, fabrics, trims, and accessories 3. Analyze fashion trends using forecasting tools and sources 4. Interpret design briefs and product specifications 5. Describe color theory to design concepts	20
SICIP-RMG-FPE-02-O	Develop fashion illustrations and technical drawings	1. Use design software to develop fashion visualizations 2. Produce fashion sketches using manual and digital techniques 3. Develop stylized fashion illustrations for production presentation 4. Prepare flat sketches and technical drawings 5. Develop mood boards and concept boards	35
SICIP-RMG-FPE-03-O	Perform pattern making and design development	1. Interpret design concepts into pattern requirements 2. Prepare and use pattern-making tools and equipment 3. Draft basic block patterns 4. Manipulate block patterns to develop style variations 5. Adjust and finalize patterns based on fitting results 6. Prepare technical specification sheets	70
SICIP-RMG-FPE-04-O	Construct garments using sewing and finishing	1. Prepare materials, tools, and workstations for garment construction 2. Perform cutting and	35

Code	Unit of Competency	Elements of Competency	Duration (hours)
	techniques	marking processes 3. Operate sewing machines 4. Develop sample/prototype garments 5. Perform overlocking and seam finishing operations 6. Conduct fitting and implement necessary adjustments	
SICIP-RMG-FPE-05-O	Perform fabric decoration and surface design techniques	1. Prepare fabrics for dyeing, printing, and embroidery 2. Perform basic dyeing techniques 3. Apply screen printing processes 4. Apply block printing techniques 5. Carry out basic embroidery techniques (hand/machine)	20
SICIP-RMG-FPE-06-O	Develop production house	1. Establish business objectives and goals 2. Create an operational plan 3. Set up production facility 4. Develop production plan 5. Develop financial plan 6. Source and manage raw materials	20
SICIP-RMG-FPE-07-O	Establish retail outlet	1. Select a suitable location for the retail outlet 2. Develop operational processes for the retail outlet 3. Source inventory and manage supplier relationships 4. Market the retail outlet to target customers	20
Total Hours			0 Hrs.

COMPETENCY STANDARD: FASHION DESIGN, PRODUCT DEVELOPMENT AND ENTREPRENEURSHIP

Generic Competencies

Unit of Competency: CARRY OUT WORKPLACE INTERACTION	Nominal Duration: 10 Hrs.	Unit Code: SICIP-RMG-FPE-01-G
Unit Descriptor: This unit covers the knowledge, skills and attitudes required to Carry out workplace interaction. It specifically includes the tasks of interpreting workplace communication and etiquette, reading and understanding workplace documents, participating in workplace meetings and discussions and practicing professional ethics at work.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Interpret workplace communication and etiquette.	1.1 Workplace codes of conduct are interpreted as per organisational guidelines. 1.2 Appropriate lines of communication are maintained with supervisors and colleagues. 1.3 Workplace interactions are conducted in a <u>courteous manner</u> to gather and convey information. 1.4 <u>Workplace procedures and matters</u> are comprehended.
2. Read and understand workplace documents.	2.1 Workplace documents are interpreted correctly. 2.2 Visual information/symbols/signage are understood correctly and followed. 2.3 Specific and relevant information are accessed from <u>appropriate sources</u> . 2.4 Appropriate medium is used to transfer information and ideas.
3. Participate in workplace meetings and discussions.	3.1 Team meetings are attended on time. 3.2 Meeting procedures and etiquette are followed. 3.3 Active participation is ensured, opinions are expressed and heard. 3.4 Inputs are provided and interpreted in line with the meeting purpose.
4. Practice professional ethics at work.	4.1 Responsibilities as a team member are performed. 4.2 Tasks are performed in accordance with workplace procedures. 4.3 Confidentiality is maintained. 4.4 Inappropriate and conflicting situations are avoided.

Range of Variables

Variable	Range (Includes but not limited to):
1. Courteous manner	1.1. Effective questioning 1.2. Active listening 1.3. Speaking skills 1.4. Writing skill 1.5. Email etiquette
2. Workplace procedures and matters	2.1 Notes 2.2 Arranging a meeting 2.3 Agenda 2.4 Simple reports such as progress and incident reports 2.5 Job sheets 2.6 Operational manuals 2.7 Brochures and promotional material 2.8 Visual and graphic materials 2.9 Standards 2.10 OHS information 2.11 Signs
3. Appropriate sources	3.1 Human Resources (HR) Department 3.2 Managers 3.3 Supervisors 3.4 Management Information System (MIS)

Curricular Content Guide

1. Underpinning Knowledge	1.1. Workplace communication and etiquette 1.2. Workplace documents, signs and symbols 1.3. Meeting procedure and etiquette 1.4. Professional ethics
2. Underpinning Skills	2.1. Demonstrating workplace communication and etiquette 2.2. Interpreting workplace instructions and symbols 2.3. Demonstrating active participation in workplace meeting 2.4. Applying professional ethics at work
3. Underpinning Attitudes	3.1. Commitment to occupational health and safety 3.2. Promptness in carrying out activities 3.3. Sincere and honest to duties 3.4. Environmental concerns 3.5. Eagerness to learn 3.6. Tidiness and timeliness 3.7. Respect for rights of peers and seniors in the workplace 3.8. Communication with peers, subordinates and seniors in the workplace
4. Resource Implications	The following resources must be provided: 4.1 Workplace (simulated or actual)

	4.2 Workplace procedures 4.3 Standard operating procedure 4.4 Workplace documents, signs and symbols 4.5 Codes of conduct 4.6 Tools, equipment and facilities appropriate to the process or activities. 4.7 Materials are relevant to the proposed activity.
--	---

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1 interpreted workplace communication and etiquette 1.2 interpreted workplace instructions and symbols 1.3 performed active participation in workplace meetings
2. Methods of Assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical Demonstration 2.3 Oral Questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

Unit of Competency: OPERATE IN A TEAM ENVIRONMENT	Nominal Duration: 10 Hrs.	Unit Code: SICIP-RMG-FPE-02-G
Unit Descriptor: This unit covers the knowledge, skills and attitudes required to operate in a team environment. It specifically includes the tasks of identify team goals and work processes, identify own role and responsibilities within team, communicating and co-operate with team members and practicing problem solving within the team.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Identify team goals and work processes.	1.1 Roles and objectives of the team are identified and interpreted. 1.2 Roles and responsibilities of team members are identified and interpreted.
2. Identify own role and responsibilities within team.	2.1 Personal role and responsibilities are identified within the team environment. 2.2 Reporting relationships are interpreted within team and external to team.
3. Communicate and co-operate with team members.	3.1 Other teammates' tasks are identified and support provided when requested. 3.2 The team is encouraged through <u>sharing information</u> or expertise, working together to solve problems, and putting team success first. 3.3 Views and opinions of other team members are interpreted and respected.
4. Practice problem solving within the team.	4.1 Problems faced at the individual and team level are identified and showed insight into the root-causes of the problems. 4.2 A range of solutions and courses of action are identified together with benefits, costs, and risks associated with each. 4.3 The good ideas of others to help develop solutions are recognised and advice sought from those who have solved similar problems. 4.4 It is looked beyond the obvious and not stopped at the first answers.

Range of Variables

Variable	Range (Includes but not limited to):
1. Sharing information	1.1. Agenda 1.2. Minutes 1.3. Progress and incident reports 1.4. Operational manuals 1.5. Visual and graphic materials 1.6. Emails and SMS 1.7. Phone directory 1.8. Policy, procedure and standards 1.9. OHS information

Curricular Content Guide

1. Underpinning Knowledge	1.1 Team goals and work processes 1.2 Roles and responsibilities 1.3 Finding problems and solving them
2. Underpinning Skills	2.1 Identifying own role and responsibilities within team 2.2 Communicating and co-operating with team members 2.3 Demonstrating problem solving within the team
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincere and honest to duties 3.4 Environmental concerns 3.5 Eagerness to learn 3.6 Tidiness and timeliness 3.7 Respect for rights of peers and seniors in the workplace 3.8 Communication with peers, subordinates and seniors in the workplace
4. Resource Implications	The following resources must be provided: 4.1 Workplace (simulated or actual) 4.2 Facilities appropriate to the process or activities. 4.3 Materials are relevant to the proposed activity. 4.4 Stationary 4.5 Learning manual

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1. identified own role and responsibilities within team 1.2. communicated and co-operated with team members 1.3. demonstrated problem solving within the team
2. Methods of Assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical Demonstration

	2.3 Oral Questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

Sector Specific Competencies (30 hrs.)

Unit of Competency: CARRY OUT MEASUREMENTS AND CALCULATIONS	Nominal Duration: 10 Hrs.	Unit Code: SICIP-RMG-FPE-01-S
Unit Descriptor: This unit covers the knowledge, skills and attitudes required to carry out measurements and calculations. It specifically includes the tasks of planning and prepare, obtaining measurements and performing calculations.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Plan and prepare.	1.1 Work instructions are confirmed and applied to the job in hand. 1.2 Materials to be measured are identified as per job specification. 1.3 Appropriate <u>measuring device</u> is identified and selected based on materials to be measured. 1.4 Specifications are obtained and verified from relevant <u>documents</u> .
2. Obtain measurements.	2.1 Method of obtaining measurement is selected and applied. 2.2 <u>Measurements</u> are obtained using appropriate device in accordance with job requirement. 2.3 Measurements, including area, volume, tolerance and clearance limits, are confirmed and applied.
3. Perform calculations.	3.1 <u>Calculations</u> , using basic operations, for determining material requirement are taken. 3.2 Appropriate <u>formulas</u> for calculating quantities are selected. 3.3 Quantities are estimated from the calculation taken. 3.4 Material quantities are calculated, confirmed and recorded within tolerances.

Range of Variables

Variable	Range (Includes but not limited to):
1. Measuring device	1.1. Measuring tape 1.2. Steel rule 1.3. Calculator 1.4. Sets square
2. Documents	2.1 Technical manuals 2.2 Specifications

	2.3 Sketches 2.4 Drawings 2.5 Charts 2.6 Photographs
3. Measurements	3.1 Length 3.2 Width 3.3 Weight 3.4 Tolerance
4. Calculations	4.1 Addition 4.2 Subtraction 4.3 Multiplication 4.4 Division 4.5 Area 4.6 Volume 4.7 Circumference 4.8 CBM (Cubic Meter) 4.9 Volumetric weight
5. Formulas	5.1 Fractions 5.2 Percentages 5.3 Mixed numbers 5.4 Conversions 5.5 Scales

Curricular Content Guide

1. Underpinning Knowledge	1.1 Measuring devices 1.2 Basic mathematical formulas 1.3 Simple calculation techniques 1.4 Garment allowances and tolerances 1.5 Recording data procedures
2. Underpinning Skills	2.1 Identifying appropriate measuring devices 2.2 Carrying out measurements for apparel 2.3 Performing calculations as per job requirement
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincere and honest to duties 3.4 Environmental concerns 3.5 Eagerness to learn 3.6 Tidiness and timeliness 3.7 Respect for rights of peers and seniors in the workplace 3.8 Communication with peers, subordinates and seniors in the workplace
4. Resource Implications	The following resources must be provided: 4.1 Workplace (simulated or actual) 4.2 Tools, equipment and facilities appropriate to the process

	or activities. 4.3 Materials are relevant to the proposed activity. 4.4 Manuals
--	--

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1 identified and selected appropriate measuring devices 1.2 carried out measurements for apparel 1.3 identified and selected correct mathematical formula 1.4 Performed calculations as per job requirement
2. Methods of Assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical Demonstration 2.3 Oral Questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

Unit of Competency: READ AND INTERPRET SKETCHES AND DRAWINGS	Nominal Duration: 10 Hrs.	Unit Code: SICIP-RMG-FPE-02-S
Unit Descriptor: This unit covers the knowledge, skills and attitudes required to read and interpret sketches and drawings. It specifically includes the tasks of interpreting information and specifications, and reading and interpreting sketches and drawings.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Interpret information and specifications.	1.1 Appropriate <u>manuals</u> for work activity are identified and collected. 1.2 Information and <u>specifications</u> in the manuals is interpreted and applied.
2. Read and interpret sketches and drawings.	2.1 Relevant <u>sketches and drawings</u> are identified for job requirement. 2.2 Key <u>terms and abbreviations</u> are identified and interpreted. 2.3 <u>Signs and symbols</u> are identified and interpreted. 2.4 Schedules, dimensions, sketches, drawings and specifications are correctly read and interpreted.

Range of Variables

Variable	Range (Includes but not limited to):
1. Manuals	1.1. Buyer's specification 1.2. Compliance 1.3. Maintenance procedure 1.4. Periodic maintenance 1.5. Quality assurance 1.6. Standard operating procedure (SOP)
2. Sketches and drawings	2.1 Technical 2.2 Measurement 2.3 Design
3. Specifications	3.1 Product 3.2 Performance 3.3 Method
4. Terms and abbreviations	4.1 Refers to all terms and abbreviations associated with the RMG Sector
5. Signs and symbols	5.1 Includes all signs and symbols associated with the RMG Sector

Curricular Content Guide

1. Underpinning Knowledge	1.1 Manuals 1.2 Units of measurement 1.3 Units of conversion 1.4 Sketch, drawings and specifications
2. Underpinning Skills	2.1 Read and identifying information and specifications (from manual) 2.2 Reading and interpreting sketches and drawings
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincere and honest to duties 3.4 Environmental concerns 3.5 Eagerness to learn 3.6 Tidiness and timeliness 3.7 Respect for rights of peers and seniors in the workplace 3.8 Communication with peers, subordinates and seniors in the workplace
4. Resource Implications	The following resources must be provided: 4.1 Workplace (simulated or actual) 4.2 Software 4.3 Sketches and drawings 4.4 Specifications and information 4.5 Equipment and facilities appropriate to the process or activities. 4.6 Materials are relevant to the proposed activity. 4.7 Manuals.

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1 identified information and specifications 1.2 read and interpreted sketches and drawings
2. Methods of Assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical Demonstration 2.3 Oral Questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a nationally certified

	assessor or occupation-specific industry expert.		
Unit of Competency: APPLY KNOWLEDGE OF BUSINESS PLANNING		Nominal Duration: 10 Hrs.	Unit Code: SICIP-RMG-FPE-03-S
Unit Descriptor: This unit covers the knowledge, skills and attitudes required to apply knowledge of business planning. It specifically includes the tasks of identifying business plan, performing business survey and identifying banking requirements.			

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Identify business plan.	1.1 Business planning systems are identified. 1.2 Business <u>planning steps</u> are identified as per marketing plan. 1.3 Business plan is developed and prepared as per marketing plan.
2. Perform business survey.	2.1 <u>Market survey techniques</u> are identified. 2.2 Survey is conducted and information is collected. 2.3 Marketing plan is followed when conducting business survey.
3. Identify banking requirements.	3.1 <u>Banking requirements</u> for apparel business are identified and explained. 3.2 Banking requirements and procedures are finalized. 3.3 Bank account opening process is identified and described. 3.4 Financial requirements and loan process are identified.

Range of Variables

Variable	Range (Includes but not limited to):
1. Planning steps	1.1. Research 1.2. Strategize 1.3. Calculate 1.4. Draft 1.5. Revise 1.6. Proof
2. Market survey techniques	2.1 Focus group 2.2 One-on-one 2.3 Telephone 2.4 Mail 2.5 Online
3. Banking requirements	3.1 Trade license

	3.2 Bank account 3.3 TIN (Tax Identification Number) 3.4 VAT (Value Added Tax) 3.5 Factory license
--	---

Curricular Content Guide

1. Underpinning Knowledge	1.1 Business planning systems 1.2 Business planning steps 1.3 Market survey techniques 1.4 Marketing plans 1.5 Banking requirements 1.6 Financial requirements and loan process
2. Underpinning Skills	2.1 Preparing business plan 2.2 Carrying out business survey 2.3 Identifying banking requirements 2.4 Opening bank account
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincere and honest to duties 3.4 Environmental concerns 3.5 Eagerness to learn 3.6 Tidiness and timeliness 3.7 Respect for rights of peers and seniors in the workplace 3.8 Communication with peers, subordinates and seniors in the workplace
4. Resource Implications	The following resources must be provided: 4.1 Workplace (simulated or actual) 4.2 Equipment and facilities appropriate to the process or activities. 4.3 Materials are relevant to the proposed activity. 4.4 Manuals

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1 identified Business planning steps. 1.2 collected information. 1.3 identified Banking requirements for apparel business.
2. Methods of Assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical Demonstration 2.3 Oral Questioning

	2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

Occupation Specific Competencies (220 hrs.)

Unit of Competency: APPLY FUNDAMENTALS OF FASHION DESIGN AND MARKET ANALYSIS	Nominal Duration: 20 Hrs.	Unit Code: SICIP-RMG-FPE-01-O
Unit Descriptor: This unit covers the knowledge, skills and attitudes required to understand basics of fashion design and product development. It specifically includes the tasks of understanding fashion design principles, analyzing fashion trends and consumer preferences, describing the fashion product development process and applying knowledge of garments and materials in fashion design.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Understand fashion design principles	1.1 <u>Fashion design principles</u> are understood and recognized. 1.2 Color theory is understood. 1.3 The <u>elements of design</u> are understood. 1.4 <u>Fabric selection principles</u> are understood. 1.5 The <u>fashion design process</u> is understood.
2. Analyze fashion trends and consumer preferences	2.1 <u>Fashion trends</u> are identified. 2.2 Consumer preferences are understood through market research, surveys, and customer feedback. 2.3 Seasonal trends are identified. 2.4 Cultural influences on fashion preferences are identified.
3. Describe the fashion product development process	3.1 Fashion concept is interpreted. 3.2 <u>Product development process</u> is identified and explained. 3.3 <u>Technical package</u> is understood. 3.4 Design sketches are identified. 3.5 Prototyping is identified.
4. Apply knowledge of garments and materials in fashion design	4.1 Garment construction is identified. 4.2 <u>Materials in fashion design</u> is recognized. 4.3 Fabric properties are described. 4.4 Pattern making process is identified. 4.5 Technical knowledge of garment stitching and finishing is identified.

Range of Variables

Variable	Range (Includes but not limited to):
1. Fashion design principles	1.1. Balance 1.2. Proportion 1.3. Emphasis 1.4. Harmony 1.5. Rhythm
2. Elements of design	2.1 Line 2.2 Shape 2.3 Texture 2.4 Space 2.5 Color 2.6 Form
3. Fabric selection principles	3.1 Design 3.2 Structure 3.3 Durability 3.4 Comfort of the finished product.
4. Fashion design process	4.1 Concept development 4.2 Sketching 4.3 Pattern making 4.4 Prototype creation
5. Fashion trends	5.1 Current market data 5.2 Runway shows 5.3 Fashion publications 5.4 Social media
6. Product development process	6.1 Tech pack 6.2 Analysis 6.3 Pattern making 6.4 Sample making 6.5 Fit and adjustment 6.6 Approval
7. Technical packages	7.1 Color combination 7.2 Fabric details 7.3 Trims and accessories details 7.4 Stitching and garments construction 7.5 Graphic or print 7.6 Embroidery or beading 7.7 Washing 7.8 Measurement and size chart
8. Materials in fashion design	8.1 Main materials 8.1.1 Fabrics 8.1.2 Braids

	8.2 Sub materials 8.2.1.1 Trims 8.3 Accessories
--	---

Curricular Content Guide

1. Underpinning Knowledge	1.1 Fashion design principles and basic design elements. 1.2 Fabric selection principles. 1.3 Fashion design process. 1.4 Fashion trends and impact of cultural, social, and seasonal. 1.5 Describe fashion design concepts/factors clearly using appropriate terminology. 1.6 Process of fashion product development. 1.7 Types of fabrics and materials commonly used in fashion. 1.8 Properties of fabric. 1.9 Garment construction techniques and finishing. 1.10 Material selection based on design and function.
2. Underpinning Skills	2.1 Applying basic design principles. 2.2 Analyzing fashion trend data and consumer preferences. 2.3 Outlining product development steps. 2.4 Selecting appropriate materials and garment techniques for specific designs.
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincere and honest to duties 3.4 Environmental concerns 3.5 Eagerness to learn 3.6 Tidiness and timeliness 3.7 Respect for rights of peers and seniors in the workplace 3.8 Communication with peers, subordinates and seniors in the workplace
4. Resource Implications	The following resources must be provided: 4.1 Workplace (simulated or actual) 4.2 Equipment and facilities appropriate to the process or activities. 4.3 Materials are relevant to the proposed activity. 4.4 Computer/laptop/notebook 4.5 Software 4.6 Manual

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1 understood fashion design principles. 1.2 analyzed fashion trends and consumer preferences. 1.3 described the fashion product development process. 1.4 applied knowledge of garments and materials in fashion design.
2. Methods of Assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical Demonstration 2.3 Oral Questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

Unit of Competency: DEVELOP FASHION ILLUSTRATIONS AND TECHNICAL DRAWINGS	Nominal Duration: 35 Hrs.	Unit Code: SICIP-RMG-FPE-02-O
Unit Descriptor: This unit covers the knowledge, skills and attitudes required to develop fashion illustrations and technical drawings. It specifically includes the tasks of using design software to develop fashion visualizations, producing fashion sketches using manual and digital techniques, developing stylized fashion illustrations for production presentation, preparing flat sketches and technical drawings (front/back views) and developing mood boards and concept boards.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Use design software to develop fashion visualizations	1. 1 Appropriate design software is selected according to the fashion design requirements. 1. 2 <u>Basic tools and features</u> of the design software are used to create fashion sketches and layouts. 1. 3 Fashion visualizations are developed using suitable colors, patterns, textures, and design elements. 1. 4 Design details are edited and refined according to style, proportion, and presentation requirements. 1. 5 Final fashion visualizations are saved and presented in the required file format for review or submission.
2. Produce fashion sketches using manual and digital techniques	2. 1 Fashion sketches are created using both manual and digital techniques as appropriate for the design brief. 2. 2 Manual sketches are produced with accurate proportions, line quality, and detailing of the fashion design. 2. 3 Digital sketches are developed using design software, ensuring clarity, precision, and adherence to the original concept. 2. 4 <u>Design elements</u> are clearly represented in both manual and digital sketches. 2. 5 Completed sketches are reviewed for accuracy and completeness before submission or presentation.
3. Develop stylized fashion illustrations for production presentation	3.1 Stylized fashion illustrations are created using <u>appropriate design techniques</u> and alignment with the design concept. 3.2 The illustration style is chosen to effectively communicate the fashion design's aesthetic, mood, and intended target audience. 3.3 Accurate details of garment construction, fabrics, colors, and accessories are included in the fashion illustrations. 3.4 The correct proportion, posture, and figure rendering techniques are applied to enhance the visual impact of

	the illustrations. 3.5 The completed fashion illustrations are refined and presented in a professional format.
4. Prepare flat sketches and technical drawings (front/back views)	4.1 Flat sketches are prepared according to the given design requirements. 4.2 Front and back views are drawn clearly and accurately. 4.3 Garment details are shown using proper lines, shapes, and proportions. 4.4 Technical features such as seams, stitches, pockets, openings, and trims are indicated correctly. 4.5 Drawings are checked and finalized according to production presentation standards.
5. Develop mood boards and concept boards	5.1 Mood boards are created using appropriate color schemes, textures, and imagery. 5.2 Concept boards are developed to visually represent the design theme and ideas. 5.3 Design elements are arranged on the boards to reflect the intended aesthetic. 5.4 Relevant materials, fabrics, and accessories are included to support the concept. 5.5 Boards are reviewed and adjusted to align with the overall design direction.

Range of Variables

Variable	Range (Includes but not limited to):
1. Basic tools and features	1. 1 Drawing and Sketching Tools 1. 2 Color Management Tools 1. 3 Layering and Grouping Tools 1. 4 Text Tools 1. 5 Transform Tools 1. 6 Path and Shape Editing Tools 1. 7 Effect and Filter Tools 1. 8 Export and File Management Tools
2. Design elements	2.1 Colors 2.2 Patterns 2.3 Textures 2.4 Fabrics
3. Appropriate design techniques	3. 1 Sketching Techniques 3. 2 Line Quality and Rendering 3. 3 Color Application 3. 4 Fabric and Texture Representation 3. 5 Proportions and Figure Drawing 3. 6 Styling and Detailing

	3. 7 Presentation Techniques
--	------------------------------

Curricular Content Guide

1. Underpinning Knowledge	1. 1 Understand design software for fashion design requirements. 1. 2 Basic Software tools and features. 1. 3 Understand design software to create fashion visualizations. 1. 4 Manual and Digital Sketching Techniques 1. 5 The importance of accurate proportions, line quality, and detailing 1. 6 Stylized Fashion Illustration Techniques 1. 7 Understand Technical Drawing Requirements
2. Underpinning Skills	2.1 Selecting Design Software 2.2 Using the basic tools and features of design software. 2.3 Developing fashion visualizations. 2.4 Editing and refining design details in fashion visualizations. 2.5 Sketching with Manual and Digital Techniques 2.6 Developing digital sketches with precision. 2.7 Creating stylized fashion illustrations. 2.8 Preparing accurate flat sketches and technical drawings.
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincere and honest to duties 3.4 Environmental concerns 3.5 Eagerness to learn 3.6 Tidiness and timeliness 3.7 Respect for rights of peers and seniors in the workplace 3.8 Communication with peers, subordinates and seniors in the workplace
4. Resource Implications	The following resources must be provided: 4.1 Workplace (simulated or actual) 4.2 Materials are relevant to the proposed activity. 4.3 Technical sketch sheets 4.4 Measurement sheets 4.5 Manuals

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1 used design software to develop fashion visualizations
-----------------------------------	--

	1.2 produced fashion sketches using manual and digital techniques 1.3 developed stylized fashion illustrations for production presentation 1.4 prepared flat sketches and technical drawings (front/back views) 1.5 developed mood boards and concept boards.
2. Methods of Assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical Demonstration 2.3 Oral Questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

Unit of Competency: PERFORM PATTERN MAKING AND DESIGN DEVELOPMENT	Nominal Duration: 70 Hrs.	Unit Code: SICIP-RMG-FPE-03-O
Unit Descriptor: This unit covers the knowledge, skills and attitudes required perform pattern making and design development. It specifically includes the tasks of interpreting design concepts into pattern requirements, preparing and using pattern-making tools and equipment, drafting basic block patterns (bodice, sleeve, skirt, trouser), manipulating block patterns to develop style variations, adjusting and finalizing patterns based on fitting results and preparing technical specification sheets (tech pack).		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Design Interpret design concepts into pattern requirements	1. 1 <u>Design concepts</u> are analyzed to identify pattern requirements. 1. 2 <u>Pattern specifications</u> are developed based on the design concepts. 1. 3 <u>Technical details</u> are incorporated into the pattern requirements accurately. 1. 4 <u>Design elements</u> are translated into pattern shapes, sizes, and proportions. 1. 5 Pattern requirements are reviewed and adjusted to ensure alignment with design intent.
2. Set Prepare and use pattern-making tools and equipment	2.1 <u>Pattern-making tools</u> and equipment are prepared and checked for proper functioning. 2.2 Tools and equipment are used safely and efficiently during pattern-making tasks. 2.3 Appropriate tools are selected based on the requirements of the pattern-making process. 2.4 Equipment is cleaned and maintained after use to ensure longevity and performance. 2.5 Safety guidelines are followed while using pattern-making tools and equipment.
3. Draft basic block patterns (bodice, sleeve, skirt, trouser)	3.1 Basic block patterns for bodice, sleeve, skirt, and trouser are drafted accurately. 3.2 Measurements and proportions are applied correctly to ensure proper fit. 3.3 Pattern blocks are created using appropriate drafting techniques. 3.4 Drafted patterns are checked for accuracy and consistency. 3.5 Necessary adjustments are made to ensure the patterns

	meet design specifications.
4. Test Manipulate block patterns to develop style variations	4.1 Block patterns are manipulated to create style variations as per design requirements. 4.2 Adjustments to the block patterns are made to modify shape, fit, and style elements. 4.3 New style variations are tested for fit and proportion using the manipulated patterns. 4.4 Modifications are made to ensure that style variations align with design concepts. 4.5 Results of the manipulated block patterns are reviewed and refined as needed.
5. Adjust and finalize patterns based on fitting results	5.1 Patterns are adjusted based on fitting results to achieve proper fit and proportions. 5.2 Necessary changes are made to pattern measurements and shapes following fitting feedback. 5.3 Adjustments are made to correct any fit issues such as ease, length, or width. 5.4 Finalized patterns are checked for accuracy and alignment with design specifications. 5.5 Patterns are confirmed to meet fit and design requirements before finalization.
6. Prepare technical specification sheets (tech pack)	6.1 Technical specification sheets (tech packs) are prepared with accurate garment details. 6.2 <u>Design information</u>, is clearly documented. 6.3 Technical drawings and illustrations are included to support the design specifications. 6.4 Fabric swatches, trims, and labeling details are incorporated into the tech pack. 6.5 The tech pack is reviewed for completeness and accuracy before submission.

Range of Variables

Variable	Range (Includes but not limited to):
1. Design Concepts	1.1. Sketches 1.2. Mood Boards 1.3. Reference Images
2. Pattern Specifications	2.1 Size 2.2 Seam Allowance 2.3 Ease 2.4 Fitting Details
3. Technical Details	3.1 Grainline 3.2 Notches 3.3 Cutting Instructions
4. Design Elements	4.1 Silhouette 4.2 Proportion 4.3 Fullness

	4.4 Fit
5. Pattern-making tools and equipment	5.1 Rulers 5.2 Tracing Wheel 5.3 Notchers 5.4 Scissors 5.5 Rotary Cutter 5.6 Measuring Tape 5.7 Calipers 5.8 Yardstick or Measuring Stick 5.9 Electric Cutting Tools 5.10 Chalk Pencils 5.11 Fabric Markers 5.12 Dressmaker's Carbon Paper
6. Design information	6.1 Materials 6.2 Measurements 6.3 Construction details

Curricular Content Guide

1 Underpinning Knowledge	1.1 Interpretation of design concepts and pattern requirements 1.2 Pattern Specification Development process. 1.3 Understanding the technical details (such as stitching methods, seam allowances, and finishes). 1.4 Pattern Shape and Proportions 1.5 Process of reviewing and adjusting patterns 1.6 Preparation of pattern-making tools and equipment. 1.7 The importance of using tools and equipment safely and efficiently. 1.8 Pattern drafting techniques. 1.9 Pattern Manipulation technique. 1.10 Tech Pack Preparation
2 Underpinning Skills	2.1 Analyzing design concepts for garment construction. 2.2 Developing precise pattern specifications based on design concepts. 2.3 Integrating technical details (e.g., stitching methods, finishes) into pattern requirements. 2.4 Translating design elements into appropriate. 2.5 Reviewing and adjusting patterns meet design intent. 2.6 Preparing pattern-making tools and equipment. 2.7 Using pattern-making tools and equipment safely and efficiently. 2.8 Applying correct measurements, proportions, and drafting techniques.

	2.9 Manipulating basic block patterns to create varied styles. 2.10 Creating comprehensive and accurate tech packs.
3 Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincere and honest to duties 3.4 Environmental concerns 3.5 Eagerness to learn 3.6 Tidiness and timeliness 3.7 Respect for rights of peers and seniors in the workplace 3.8 Communication with peers, subordinates and seniors in the workplace
4 Resource Implications	The following resources must be provided: 4.1 Workplace (simulated or actual) 4.2 Job specifications 4.3 Pattern designs 4.4 Tools, equipment and facilities appropriate to the process or activities. 4.5 Materials are relevant to the proposed activity. 4.6 Manuals.

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1. 1 interpreted design concepts into pattern requirements 1. 2 prepared and use pattern-making tools and equipment 1. 3 drafted basic block patterns (bodice, sleeve, skirt, trouser) 1. 4 manipulated block patterns to develop style variations 1. 5 adjusted and finalize patterns based on fitting results 1. 6 prepared technical specification sheets (tech pack)
2. Methods of Assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical Demonstration 2.3 Oral Questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

Unit of Competency: CONSTRUCT GARMENTS USING SEWING AND FINISHING TECHNIQUES	Nominal Duration: 35 Hrs.	Unit Code: SICIP-RMG-FPE-04-O
Unit Descriptor: This unit covers the knowledge, skills and attitudes required to construct garments using sewing and finishing techniques. It specifically includes the tasks of preparing materials, tools, and workstations for garment construction, performing cutting and marking processes, operating sewing machines, developing sample/prototype garments, performing overlocking and seam finishing operations and conducting fitting and implement necessary adjustments.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Prepare materials, tools, and workstations for garment construction	1.1 <u>Materials</u> required for garment construction are gathered and prepared for use. 1.2 Tools and equipment are selected and checked for proper functioning. 1.3 Workstations are set up to ensure an organized and efficient workspace. 1.4 Safety measures are implemented at the workstation to ensure a safe working environment. 1.5 Materials, tools, and workstations are reviewed to confirm they meet garment construction requirements.
2. Perform cutting and marking processes	2.1 Fabrics are accurately measured and marked for cutting based on pattern specifications. 2.2 Cutting processes are performed using the appropriate tools and techniques for clean edges. 2.3 Markings for seam allowances, notches, and other construction details are clearly visible on the fabric. 2.4 Cutting and marking are done efficiently, ensuring minimal fabric wastage. 2.5 The final cut pieces are checked for accuracy against the pattern and design requirements.
3. Operate sewing machines	3.1 Sewing machines are set up and adjusted according to garment construction requirements. 3.2 Proper sewing techniques are applied to ensure clean, consistent stitching. 3.3 <u>Machine settings</u> , such as thread tension and stitch length, are adjusted for fabric type and design. 3.4 Sewing machines are operated safely, following standard safety protocols. 3.5 The sewing process is monitored to ensure quality and consistency throughout.

4. Develop sample/prototype garments	4.1 Sample garments are developed according to design and pattern requirements. 4.2 Prototype pieces are assembled using appropriate construction techniques. 4.3 Fabrics, trims, and accessories are used according to the sample specification. 4.4 Fit, shape, and construction quality are checked during sample development. 4.5 Sample garments are reviewed and corrected before final approval.
5. Perform overlocking and seam finishing operations	5.1 Overlocking and seam finishing operations are performed using the appropriate machines and techniques. 5.2 Seams are finished securely to prevent fraying and ensure durability. 5.3 Proper stitch types and thread tension are applied for neat and consistent seam finishes. 5.4 The quality of overlocking and seam finishes is checked to meet garment specifications. 5.5 Operations are performed efficiently while maintaining safety and quality standards.
6. Conduct fitting and implement necessary adjustments	6.1 Fittings are conducted to assess the fit and structure of the garment. 6.2 Necessary adjustments are made to correct issues such as fit, proportions, or design details. 6.3 Changes are applied to ensure the garment meets design specifications and comfort requirements. 6.4 Fit issues are resolved, and adjustments are documented for future reference. 6.5 The garment is rechecked after adjustments to confirm proper fit and alignment with the design.

Range of Variables

Variable	Range (Includes but not limited to):
1. Materials	1.1 Natural Fabrics 1.2 Synthetic Fabrics 1.3 Blended Fabrics 1.4 Lining Materials 1.5 Threads 1.6 Fasteners 1.7 Elastic and Cords 1.8 Padding and Quilting Materials 1.9 Trimmings and Decorative Elements
2. Machine settings	2.1 Stitch Type 2.2 Stitch Length 2.3 Stitch Width

	2.4 Tension Settings 2.5 Presser Foot Pressure 2.6 Needle Type and Size 2.7 Feed Dog Settings 2.8 Needle Position 2.9 Speed Control 2.10 Reverse Stitching 2.11 Automatic Thread Cutter 2.12 Feed Mechanism 2.13 Bobbin Winding Mechanism 2.14 Thread Guide and Path
--	--

Curricular Content Guide

1. Underpinning Knowledge	1. 1 Understanding the types of materials required for garment construction 1. 2 Knowledge of the tools and equipment necessary for garment construction and proper functioning. 1. 3 The importance of setting up a workstation 1. 4 Safety Protocols 1. 5 The process of reviewing materials, tools, and workstations 1. 6 Methods for measuring and marking fabrics 1. 7 Understanding the tools and techniques used for fabric cutting. 1. 8 Set up, adjust, and operate sewing machines for consistent stitching. 1. 9 The steps to develop sample garments or prototypes
2. Underpinning Skills	2. 1 Gathering and preparing materials for garment construction. 2. 2 Selecting the right tools and check them for proper functioning. 2. 3 Setting up workstations. 2. 4 Implementing safety measures in the workplace 2. 5 Measuring and marking fabrics accurately. 2. 6 Cutting fabric using the appropriate tools and techniques. 2. 7 Setting up and adjusting sewing machines. 2. 8 Developing sample garments based on design requirements. 2. 9 Performing overlocking and seam finishing operations with the appropriate machines. 2. 10 Conducting fittings to assess the garment's fit and structure.
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincere and honest to duties 3.4 Environmental concerns

	3.5 Eagerness to learn 3.6 Tidiness and timeliness 3.7 Respect for rights of peers and seniors in the workplace 3.8 Communication with peers, subordinates and seniors in the workplace
4. Resource Implications	The following resources must be provided: 4.1 Workplace (simulated or actual) 4.2 Equipment and facilities appropriate to the process or activities. 4.3 Materials are relevant to the proposed activity. 4.4 Stationary 4.5 Manuals

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1 prepared materials, tools, and workstations for garment construction 1.2 performed cutting and marking processes 1.3 operated sewing machines 1.4 developed sample/prototype garments 1.5 performed overlocking and seam finishing operations 1.6 conducted fitting and implement necessary adjustments
2. Methods of Assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical Demonstration 2.3 Oral Questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

Unit of Competency: PERFORM FABRIC DECORATION AND	Nominal Duration:	Unit Code: SICIP-RMG-FPE-05-O
--	--------------------------	---

SURFACE DESIGN TECHNIQUES	20 Hrs.	
Unit Descriptor: This unit covers the knowledge, skills and attitudes required to perform fabric decoration and surface design techniques. It specifically includes the tasks of preparing fabrics for dyeing, printing, and embroidery, performing basic dyeing techniques, applying screen printing processes, applying block printing techniques and carrying out basic embroidery techniques (hand/machine).		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Prepare fabrics for dyeing, printing, and embroidery	1.1 Fabrics are selected and prepared according to the dyeing, printing, or embroidery requirements. 1.2 Fabrics are pre-treated, such as washing or scouring, to ensure proper absorption of dyes or inks. 1.3 <u>Design techniques</u> and <u>materials</u> are chosen for dyeing, printing, or embroidery processes. 1.4 Fabrics are inspected for defects or inconsistencies before processing. 1.5 Preparation steps are completed in alignment with quality control standards for each technique.
2. Perform basic dyeing techniques	2. 1 <u>Basic dyeing techniques</u> are performed using appropriate dyes and materials. 2. 2 Fabrics are dyed according to the specified color and process requirements. 2. 3 Dyeing processes are monitored to ensure even color distribution. 2. 4 Dyeing results are checked for consistency and quality. 2. 5 Necessary adjustments are made to achieve the desired color outcome.
3. Apply screen printing processes	3. 1 Screen printing processes are applied using the correct screens, inks, and materials. 3. 2 Design patterns are accurately transferred onto fabric through the screen-printing method. 3. 3 Printing equipment is set up and adjusted to ensure proper ink coverage and alignment. 3. 4 Printed fabrics are checked for consistency in color and design. 3. 5 Screen printing processes are performed efficiently while maintaining quality standards.
4. Apply block printing	4.1 <u>Block printing techniques</u> are applied using the

techniques	appropriate blocks, inks, and materials. 4.2 Design patterns are transferred onto fabric with accuracy and consistency. 4.3 Printing blocks are properly aligned to ensure even and clear prints. 4.4 Block printing is monitored to maintain color consistency and design clarity. 4.5 Final prints are checked for quality and any necessary adjustments are made.
5. Carry out basic embroidery techniques (hand/machine)	5. 1 Basic embroidery techniques (hand or machine) are carried out using appropriate threads and tools. 5. 2 Embroidery designs are created according to specified patterns and design requirements. 5. 3 Proper stitching techniques are applied to ensure neat and consistent embroidery. 5. 4 The embroidery process is monitored to ensure the design is correctly executed. 5. 5 Finished embroidery is checked for quality, with adjustments made as needed for accuracy

Range of Variables

Variable	Range (Includes but not limited to):
1. Design techniques	1. 1 Sketching and Conceptualizing 1. 2 Pattern Creation 1. 3 Textile Manipulation Techniques 1. 4 Color Theory and Application 1. 5 Motif and Theme Development 1. 6 Fabric Selection
2. Materials	2. 1 Dyeing Materials 2. 2 Printing Materials 2. 3 Embroidery Materials
3. Basic dyeing techniques	3. 1 Immersion Dyeing 3. 2 Tie-Dye 3. 3 Dip Dyeing 3. 4 Shibori Dyeing 3. 5 Hand Painting or Brushing
4. Block printing techniques	4.1 Traditional Hand Block Printing 4.2 Relief Block Printing 4.3 Engraving Block Printing 4.4 Multi-Block Printing 4.5 Continuous Block Printing

Curricular Content Guide

1. Underpinning Knowledge	1. 1 Understand the necessary fabric preparation steps 1. 2 Different dyeing, printing, and embroidery techniques 1. 3 Understand the quality control standards 1. 4 Inspection fabrics for defects or inconsistencies 1. 5 The principles of dyeing, printing, and embroidery
2. Underpinning Skills	2. 1 Performing basic dyeing techniques using the appropriate dyes and materials. 2. 2 Setting up and applying screen printing techniques on fabrics. 2. 3 Applying block printing techniques. 2. 4 Performing basic hand or machine embroidery. 2. 5 Monitoring all processes (dyeing, printing, and embroidery).
3. Underpinning Attitudes	3. 1 Commitment to occupational health and safety 3. 2 Promptness in carrying out activities 3. 3 Sincere and honest to duties 3. 4 Environmental concerns 3. 5 Eagerness to learn 3. 6 Tidiness and timeliness 3. 7 Respect for rights of peers and seniors in the workplace 3. 8 Communication with peers, subordinates and seniors in the workplace
4. Resource Implications	The following resources must be provided: 4. 1 Workplace (simulated or actual) 4. 2 Equipment and facilities appropriate to the process or activities. 4. 3 Materials are relevant to the proposed activity. 4. 4 Stationary 4. 5 Manuals

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1. 1 prepared fabrics for dyeing, printing, and embroidery 1. 2 performed basic dyeing techniques 1. 3 applied screen printing processes 1. 4 applied block printing techniques 1. 5 carried out basic embroidery techniques (hand/machine)
2. Methods of Assessment	Competency should be assessed by: 2. 1 Written test 2. 2 Practical Demonstration 2. 3 Oral Questioning 2. 4 Portfolio (Optional)
3. Context of	3. 1 Competency assessment must be done in an

Assessment	assessment/training center or in an actual or simulated work place after completion of the training. 3. 2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

Unit of Competency: DEVELOP PRODUCTION HOUSE	Nominal Duration: 20 Hrs.	Unit Code: SICIP-RMG-FPE-06-O
---	-------------------------------------	---

Unit Descriptor:

This unit covers the knowledge, skills and attitudes required to develop production house. It specifically includes the tasks of establishing business objectives and goals, creating an operational plan, setting up production facility, developing production plan and sourcing and managing raw materials.

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Establish business objectives and goals	1.1 Business objectives are described. 1.2 Short-term goals are identified with measurable and time-bound targets. 1.3 Long-term goals are identified. 1.4 Sales targets and revenue goals are described. 1.5 <u>Market positioning</u> and <u>target audience</u> are identified. 1.6 Product development goals are recognized.
2. Create an operational plan	2.1 Business objectives and goals are prepared. 2.2 <u>Key operational functions</u> are identified. 2.3 Resources are identified and allocated to support the successful implementation of the plan. 2.4 Timeline and milestones are established. 2.5 Budget and financial planning are prepared. 2.6 Operational plan is prepared and reviewed.
3. Set up production facility	3.1 Production equipment and machinery are selected and installed for proper functionality. 3.2 <u>Legal documents</u> are identified to ensure proper production facility. 3.3 Workstations are organized and set up with equipment, tools, and materials. 3.4 Utility systems are set up to ensure a comfortable and efficient working environment for the staff. 3.5 Storage areas for raw materials, finished products, and tools are designated. 3.6 <u>Personnel</u> are assigned to relevant roles on equipment operation, safety protocols, and production processes
4. Develop production plan	4.1 Production capacity is assessed, ensuring that the resources, including equipment and personnel, are sufficient to meet production goals. 4.2 Resource allocation is planned, ensuring that all necessary materials, labor, and equipment are available to support the production process. 4.3 Production schedules are created.

	4.4 Budget allocation is done, ensuring that sufficient funds are earmarked for production costs. 4.5 Revenue projections are developed, estimating sales and income based on the production output.
5. Develop financial plan	5. 1 Financial objectives are identified and documented based on business goals. 5. 2 Relevant financial data are collected and reviewed. 5. 3 Budget estimates are prepared and reviewed. 5. 4 Financial risks are assessed, and contingency plans are developed. 5. 5 Financial reports and plans are documented clearly.
6. Source and manage raw materials	6. 1 Sourcing of raw materials are described. 6. 2 Procurement processes are developed. 6. 3 Inventory management systems are set up. 6. 4 Inventory management systems are reviewed.

Range of Variables

Variable	Range (Includes but not limited to):
1. Market positioning	1. 1 Price segment 1. 2 Product type focus 1. 3 Brand identity 1. 4 Competitor landscape 1. 5 Distribution channels 1. 6 Quality standards
2. Target audience	2. 1 Demographic characteristics 2. 2 Industry segments 2. 3 Buyer type 2. 4 Seasonal demand 2. 5 Cultural or regional preferences
3. Key operational functions	3. 1 Production planning and scheduling 3. 2 Sourcing raw materials and trims 3. 3 Quality control processes 3. 4 Machine and equipment management 3. 5 Inventory management 3. 6 Workforce management 3. 7 Cost control and budgeting
4. Legal documents	4. 1 Business registration documents 4. 2 Tax registration and compliance (TIN, VAT) 4. 3 Labor law compliance documents 4. 4 Environmental permits and certifications 4. 5 Safety and fire permits 4. 6 Intellectual property registrations (trademarks, designs)
5. Personnel	5. 1 Types of Employees (Manager, supervisor, quality

	inspector, operator) 5. 2 Staffing numbers based on scale 5. 3 Roles and responsibilities 5. 4 Employee contract types (permanent, temporary, contractual) 5. 5 Health and safety training requirements
6. Relevant financial data	6. 1 Startup costs 6. 2 Operating expenses 6. 3 Revenue projections

Curricular Content Guide

1. Underpinning Knowledge	1. 1 Concepts of market positioning strategies. 1. 2 Understand competitor. 1. 3 Define long term and short-term goals. 1. 4 Business operational plan and methodology. 1. 5 Resources of implementation plan. 1. 6 Business registration processes and VAT and income tax obligations. 1. 7 Organizational structures and roles in production houses. 1. 8 Process of budget allocation and financial risks identify. 1. 9 Sourcing and procurement processes for raw materials. 1. 10 Inventory management concepts including stock control.
2. Underpinning Skills	2. 1 Analyzing market trends to identify suitable market position. 2. 2 Assessing target audience needs and preferences. 2. 3 Developing operational plans and schedules. 2. 4 Setting up production related equipment and machinery. 2. 5 Preparing legal and operational document. 2. 6 Creating production schedules. 2. 7 Organizing procurement of raw materials. 2. 8 Preparing budgets and control operational costs. 2. 9 Setting up inventory management system.
3. Underpinning Attitudes	3. 1 Commitment to occupational health and safety 3. 2 Promptness in carrying out activities 3. 3 Sincere and honest to duties 3. 4 Environmental concerns 3. 5 Eagerness to learn 3. 6 Tidiness and timeliness 3. 7 Respect for rights of peers and seniors in the workplace

	3. 8 Communication with peers, subordinates and seniors in the workplace
4. Resource Implications	The following resources must be provided: 4. 1 Workplace (simulated or actual) 4. 2 Equipment and facilities appropriate to the process or activities. 4. 3 Materials are relevant to the proposed activity. 4. 4 Stationary 4. 5 Manuals

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1. 1 established business objectives and goals. 1. 2 created an operational plan 1. 3 set up production facility 1. 4 developed production plan 1. 5 developed financial plan 1. 6 sourced and managed raw materials
2. Methods of Assessment	Competency should be assessed by: 2. 1 Written test 2. 2 Practical Demonstration 2. 3 Oral Questioning 2. 4 Portfolio (Optional)
3. Context of Assessment	3. 1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3. 2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

Unit of Competency: ESTABLISH RETAIL OUTLET	Nominal Duration:	Unit Code: SICIP-RMG-FPE-07-O
--	--------------------------	---

	20 Hrs.	
Unit Descriptor: This unit covers the knowledge, skills and attitudes required to establish retail outlet. It specifically includes the tasks of selecting a suitable location for the retail outlet, developing operational processes for the retail outlet, sourcing inventory and manage supplier relationships and marketing the retail outlet to target customers.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Select a suitable location for the retail outlet	1.1 Potential retail locations are identified and evaluated. 1.2 Market research is conducted to assess the demand for products in various locations. 1.3 Safety and security are considered. 1.4 Transport facilities are analysed. 1.5 Competition analysis is conducted to assess the number and proximity of competitors. 1.6 Potential store layout is assessed, ensuring the space is suitable.
2. Develop operational processes for the retail outlet	2.1 Operational procedures are identified. 2.2 Staff roles and responsibilities are defined. 2.3 Sales processes are developed ensuring a smooth and accurate checkout experience. 2.4 Customer service protocols are created. 2.5 Visual merchandise (product display) processes are developed. 2.6 Cash handling and financial processes are established. 2.7 Technology and POS systems are integrated into the operational processes. 2.8 Operational performance metrics are set.
3. Source inventory and manage supplier relationships	3.1 Inventory requirements are identified based on retail demand analysis. 3.2 Supplier options are evaluated according to quality, price, and reliability criteria. 3.3 Inventory deliveries are monitored and discrepancies are reported. 3.4 Supplier performance is assessed and feedback is provided to maintain quality 3.5 Communication with suppliers is maintained to support ongoing business relationships.
4. Market the retail outlet to target customers	4.1 <u>Branding and promotional materials</u> are developed.

	4.2 Advertising strategies are implemented. 4.3 Social media marketing campaigns are launched. 4.4 Email marketing campaigns are created. 4.5 Marketing performance metrics are tracked. 4.6 Online presence is optimized through the website and e-commerce platform.

Range of Variables

Variable	Range (Includes but not limited to):
1. Branding and promotional materials	1.1 Logo design and placement 1.2 Printed materials (flyers, brochures, posters) 1.3 Digital content (social media posts, email campaigns) 1.4 Packaging materials (bags, tags, labels) 1.5 Seasonal sales campaigns 1.6 Loyalty programs and discounts, special offers

Curricular Content Guide

1. Underpinning Knowledge	1.1 Factors influencing retail location selection. 1.2 Demographic and socio-economic features of potential locations 1.3 Safety and security aspects of the location. 1.4 Operational processes for the retail outlet. 1.5 Inventory management principles and stock control techniques. 1.6 Supplier identification and evaluation methods. 1.7 Branding and promotional strategies specific to retail. 1.8 Advertising channels and digital marketing tools. 1.9 Marketing fundamentals and the marketing mix (4Ps).
2. Underpinning Skills	2.1 Analyzing market data and customer demographics to select location. 2.2 Planning site visits and conduct feasibility studies for location selection. 2.3 Developing sales processes. 2.4 Establishing cash handling and financial processes. 2.5 Assessing supplier options and inventory needs. 2.6 Interpreting marketing data to promotions. 2.7 Organizing marketing campaigns and promotional events. 2.8 Preparing marketing and promotional materials. 2.9 Implementing inventory control tools and supplier databases.
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities

	3.3 Sincere and honest to duties 3.4 Environmental concerns 3.5 Eagerness to learn 3.6 Tidiness and timeliness 3.7 Respect for rights of peers and seniors in the workplace 3.8 Communication with peers, subordinates and seniors in the workplace
4. Resource Implications	The following resources must be provided: 4.1 Workplace (simulated or actual) 4.2 Equipment and facilities appropriate to the process or activities. 4.3 Materials are relevant to the proposed activity. 4.4 Manuals

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1 selected a suitable location for the retail outlet 1.2 developed operational processes for the retail outlet 1.3 sourced inventory and manage supplier relationships 1.4 marketed the retail outlet to target customers
2. Methods of Assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical Demonstration 2.3 Oral Questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

Workshop/Lab Facility Standard

Course Name:	Fashion Design, Product Development and Entrepreneurship
Number of Trainees:	25

Course-wise Training Space (Theoretical Classroom, Workshop/ Lab/ Classroom cum Workshop):

- Classroom – 350 sft (33 sqm)
- Workshop/ lab – 800 sft (75 sqm)
- OR
- Classroom cum workshop – 1000 sft (93 sqm)

Major Training Equipment and Training Facilities:

S.N.	Major Equipment and Training facilities	Required facilities
1.	Computer / Laptop (with relevant design software)	5
2.	Multimedia Projector & Screen (HD quality, HDMI support)	1
3.	Printer	1
4.	Single Needle Lock Stitch Machine (Industrial/Domestic)	25
5.	Overlock Machine (3 or 4 threads)	2
6.	Embroidery Machine (Manual/Computerized)	1
7.	Button Hole Machine	1
8.	Button Stitch Machine	1
9.	Cutting Table (Standard size: min. 5ft - 60"x50")	2
10.	Pattern Making & Printing Table (Min 5ft)	3
11.	Mannequins / Dress Forms (Male, Female, and Child standard sizes)	5
12.	Electric Steam Iron with Ironing Table	1
13.	Burner for Dyeing and Printing	2
14.	Tracing Wheels	25
15.	Sets of Pattern Making Curves (French curve, Hip curve, etc.)	25

16.	Fabric Cutting Scissors (10"-12")	25
17.	Different Screen for Printing	10
18.	Different Dices for Block Printing	15
19.	Sewing Tool Box (Measuring tape, tailor's chalk, needles, etc.)	25

The following conditions must be fulfilled –

- The institute shall not use the same facilities for any other projects/organizations offering a similar course.
- The institute must provide sufficient evidence to prove ownership of the proposed training equipment.

The list denotes the minimum training equipment and facility required to effectively conduct training for a specific course. Additionally, the institute must ensure that all other necessary training tools, equipment, and furniture are available to meet the requirement of competency standards (CS) provided by SICIP.

For the operation of training course on **Fashion Design, Product Development and Entrepreneurship**, the institute must ensure the availability of at least 80% of the major training equipment and training facilities (according to the CS) to be eligible for SICIP training delivery. If the score is below 80%, the remaining equipment and facilities need to be installed before the commencement of the training.

The institute will also provide all other hand tools and power tools as per CS for 25 trainees. Also, they will arrange adequate seating arrangement and classroom setup for the 25 trainees.
