Copyright

The Competency Standards for AI Driven Freelancers serve as a foundational document for the development of curricula, teaching materials, and assessment tools specifically tailored for the ICT sector. This document ensures that training activities align with industry requirements, enabling individuals who successfully meet the established standards through assessment to become qualified professionals in relevant roles within the sector.

Developed under the Skills for Industry Competitiveness and Innovation Program (SICIP), this document addresses the skills requirements critical for AI Driven Freelancers. It is owned by the Finance Division of the Ministry of Finance of the People's Republic of Bangladesh.

Public and private institutes may use the information contained in this competency standard for training activities benefitting Bangladesh.

INTRODUCTION

The Skills for Industry Competitiveness and Innovation Program (SICIP) has the overall objective of developing a skilled workforce adept at handling new technologies, especially for emerging industries in Bangladesh. It will expand skills training and strengthen the development of the training ecosystem to address the skills requirements of the SICIP-selected industry sectors. The program aims to (i) increase the technology-oriented skilled workforce across emerging and priority sectors, (ii) promote inclusive skilling and upskilling opportunities for women and socially disadvantaged groups, (iii) incentivize industry-university partnerships to nurture innovation capacity and improve industry competitiveness, and (iv) foster skills for climate-resilient manufacturing processes and green technologies. The program is expected to benefit about 220,000 new and existing workers over a 6-year implementation period from 2024-2029.

The SICIP Program has, therefore, taken the initiative to enhance the employability and productivity of trainees by implementing market-responsive and job-focused training programs through public and private training providers. This will require the development of competency standards for each of the occupations/trades which will provide a structured framework in the learning process to guide training providers, ensure consistent training quality, and create an alignment between the skills provided by the training institutes and the needs of the industry.

This competency standard is therefore developed to improve skills following the job roles and skill sets of the occupation and ensure that the required skills are aligned with industry requirements.

The Competency Standard also suggests integration of YouTube or similar digital platforms or downloaded clips into classroom practice to ensure simulated creation of the contents so that learners are exposed to visual demonstrations before classroom instruction or practical session, which aligns with modern learning preference and supports flipped classroom models.

The document details the format, sequencing, wording, and layout of the Competency Standard for an occupation which comprises Units of Competence and its corresponding Elements.

OVERVIEW:

A **Competency Standard** is a written specification of the knowledge, skills, and attitudes required for the performance of a job or occupation or trade corresponding to the standard of performance required in the workplace.

Competency standard:

- provides a consistent and reliable set of components for training, recognizing, and assessing people's skills, and may also have optional support materials.
- enables industry-recognized qualifications to be awarded through direct assessment of workplace competencies
- encourages the development and delivery of flexible training that suits individual and industry requirements
- encourages learning and assessment in a work-related environment which leads to verifiable workplace outcomes.

Competency Standard has been developed by a working group comprised of occupation-specific experts from the industry/institution and relevant consultants of SICIP.

Competency Standards describe the skills, knowledge, and attitude needed to perform effectively in the workplace. Competency Standards acknowledge that people can achieve vocational and technical competency in many ways by emphasizing what the learner can do, not how or where they learned to do it.

With Competency Standards, assessment and training may be conducted at the workplace, at training organization, during regular work, or through work experience, work placement, work simulation or any combination of these.

A Unit of Competency describes a distinct work activity that would normally be undertaken by one person in accordance with industry standards.

Units of Competency are documented in a standard format that comprises:

- Reference to Industry Sector, Occupational Title and Occupational Description
- Unit code
- Unit title
- Unit descriptor
- Elements and performance criteria
- Variables and range statement
- Evidence guides

Together all the parts of a Unit of Competency:

- Describe a work activity
- Guide the assessor in determining whether the candidate is competent.

Identification and validation of units of competency and elements for each occupation were made by experts from various companies in industry consultative workshops.

The ensuing sections of this document comprise a description of the respective occupation with all the key components of a Unit of Competence:

- An overview of all Units of Competence for the occupation and their corresponding duration required for completion of training.
- The Competency Standards that include the Unit of Competency, Unit Descriptor, Elements and Performance Criteria, Range of Variables, Curricular Content Guide, and Assessment Evidence Guide.

Units & Elements at a Glance:**Generic Competencies (20 hrs.)**

Code	Unit of Competency	Elements of Competency	Duration (Hours)
SICIP-ICT-AIDF-01-G	Demonstrate Interpersonal and Communication Skills	1 Apply interpersonal skills at the workplace 2 Understand and communicate information and ideas 3 Prepare and present reports and workplace documents	10
SICIP-ICT-AIDF-02-G	Support Innovation and Manage Change	1 Identify needs for innovation in the workplace 2 Apply creative approach and solution 3 Support flexible and innovative ways of working 4 Adapt to emerging technological changes and opportunities	10
Total Hour			20 Hrs.

Sector Specific Competencies (20 hrs.)

Code	Unit of Competency	Elements of Competency	Duration (Hours)
SICIP-ICT-AIDF-01-S	Comply with Ethical Standards in IT Workplace	1. Uphold the requirements of clients 2. Deliver quality products and services 3. Maintain professionalism at workplace 4. Maintain workplace code of conduct	20
Total Hour			20 Hrs.

Occupation Specific Competencies (180 hrs.)

Code	Unit of Competency	Elements of Competency	Duration (hours)
SICIP-ICT-AIDF-01-O	Apply Prompt Engineering and Establish AI Workflow Systems for Freelancing	1. Establish AI workflow operating systems for freelancing tasks 2. Configure AI tools and digital work environments 3. Apply prompt engineering frameworks for production work 4. Execute multimodal prompting for text, image, audio, and video generation	20
SICIP-ICT-AIDF-02-O	Produce AI-Assisted Content and Manage Content Operations	1. Plan content production and content operation systems 2. Produce AI-assisted written content 3. Apply SEO and content optimization requirements 4. Manage content workflow and quality control processes 5. Organize, publish, and document content outputs	25
SICIP-ICT-AIDF-03-O	Analyze Business Performance and Deliver Project Insights	1. Collect and prepare performance data from digital platforms 2. Analyze performance using AI-assisted analytics tools 3. Extract insights and interpret analytical findings 4. Prepare business performance reports and dashboards 5. Deliver analytics insights and recommendations to clients	25
SICIP-ICT-AIDF-04-O	Develop AI-Assisted Design, Branding, and Creative Assets	1. Identify visual design and branding requirements 2. Develop AI-assisted brand visual identity elements 3. Create AI-generated graphics and static creative assets 4. Adapt visual assets for different digital platforms 5. Prepare creative assets for final delivery	20
SICIP-ICT-AIDF-05-O	Produce AI-Generated Video Content and UGC Media	1. Plan AI-based video and UGC production workflows 2. Produce AI-generated video content and talking avatar media	45

Code	Unit of Competency	Elements of Competency	Duration (hours)
		3. Edit and enhance AI-generated video outputs 4. Adapt video content for digital platforms and social media 5. Apply professional standards in AI video production	
SICIP-ICT-AIDF-06-O	Develop AI-Driven Websites, Landing Pages, and Digital Commerce Systems	1. Plan web, landing page, and digital commerce solutions 2. Develop conversion-focused websites and landing pages 3. Design UI/UX and build prototype 4. Configure e-commerce and digital product selling systems 5. Test and deploy web and digital commerce systems	25
SICIP-ICT-AIDF-07-O	Carry out Freelancing and Outsourcing Services	1. Identify freelancing and outsourcing market opportunities 2. Develop professional profile and service portfolio 3. Prepare proposals, Gigs, and acquire clients 4. Manage client communication and long-term relationships 5. Plan career growth and continuous professional development	20
Total Hour			0 Hrs.

COMPETENCY STANDARD: AI DRIVEN FREELANCERS

The Generic Competencies

Unit of Competency: DEMONSTRATE INTERPERSONAL AND COMMUNICATION SKILLS	Nominal Duration: 10 hrs.	Unit Code: SICIP-ICT-AIDF-01-G
Unit Descriptor: This unit covers the knowledge, skills and attitude required to demonstrate interpersonal and communication skills. It specifically includes the tasks of applying interpersonal skills at the workplace, understanding and communicating information and ideas, preparing and presenting reports and workplace documents.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Apply interpersonal skills at the workplace	1.1 <u>Workplace interpersonal skills</u> are interpreted. 1.2 The impacts of interpersonal skills are described. 1.3 Interpersonal skills are performed in accordance with workplace procedures. 1.4 <u>Ways of improving interpersonal skills</u> are identified and followed.
2. Understand and communicate information and ideas	2.1 <u>Communication tools and equipment</u> are operated, and faults are identified and reported. 2.2 Consultative processes is used to collect and convey information. 2.3 Information systems is used to store, retrieve and update information. 2.4 Information data and information are analyzed and interpreted. 2.5 Information is communicated with individuals and groups.
3. Prepare and present reports and workplace documents	3.1 <u>Workplace documents</u> are interpreted. 3.2 Appropriate format for document is used to meet workplace requirements. 3.3 Document is drafted in accordance with workplace procedures. 3.4 Document is edited and presented in a final version appropriate to task.

Range of variables:

Variables	Range (may include but not limited to)
1. Interpersonal skills	1.1 Effective communication 1.2 Cooperation

	1.3 Giving and receiving feedback, feed-forward and professional criticism 1.4 Pressure handling 1.5 Time management 1.6 Acceptance of diversity 1.7 Supporting and encouraging others 1.8 Inclusiveness 1.9 Problem solving 1.10 Negotiation 1.11 Conflict management
2. Ways of improving interpersonal skills	2.1 Cultivate a positive outlook 2.2 Ask trusted friends or colleagues for constructive criticism 2.3 Control emotions 2.4 Observe other positive interpersonal interactions 2.5 Practice active listening 2.6 Seek out opportunities to build relationships 2.7 Practice empathy
3. Communication tools and equipment	3.1 Telephone 3.2 Internet 3.3 Mobile Phone 3.4 Fax machines 3.5 Two-way radio
4. Workplace documents	4.1 Business Letters 4.2 Business Reports 4.3 Transactional Documents 4.4 Memos 4.5 Forms 4.5.1 Memorandum 4.5.2 Requisitioning Form 4.5.3 Personnel Form 4.6 Safety Report Form

Curricular Content Guide

1. Underpinning knowledge	1.1 Interpersonal skills 1.2 Impacts of interpersonal skills 1.3 Consultative processes 1.4 Workplace documents
2. Underpinning skill	2.1 Demonstrating interpersonal skills 2.2 Collecting workplace information 2.3 Analyzing information and ideas 2.4 Preparing workplace documents 2.5 Presenting workplace documents
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety practices 3.2 Promptness in carrying out activities 3.3 Tidiness and timeliness 3.4 Respect to peers, sub-ordinates and seniors in

	workplace 3.5 Environmental concern 3.6 Sincerity and honesty
4. Resource implications	The following resources must be provided: 4.1 Workplace (actual or simulated). 4.2 Relevant materials and equipment. 4.3 Relevant specifications or work instructions.

Assessment Evidence Guide

1. Critical aspects of competency	Assessment required evidence that the candidate: 1.1 applied interpersonal skills at the workplace 1.2 communicated information and ideas 1.3 prepared and presented reports and workplace documents
2. Methods of assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical Demonstration 2.3 Oral Questioning 2.4 Portfolio (Optional)
3. Context of assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a certified assessor or occupation-specific industry expert.

Unit of Competency: SUPPORT INNOVATION AND MANAGE CHANGE	Nominal Duration: 10 hrs.	Unit Code: SICIP-ICT-AIDF-02-G
Unit Descriptor: This unit covers the knowledge, skills, and attitudes required to support innovation and manage change. It specifically includes the tasks of identifying needs for innovation in the workplace, applying creative approaches and solution, supporting flexible and innovative ways of working and adapting to emerging technological changes and opportunities.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Identify needs for innovation in the workplace	1.1. The need for <u>innovation</u> in scope of work is recognized 1.2. The value of <u>innovative practices</u> in the workplace is recognized 1.3. Existing way of working in the workplace are interpreted. 1.4. Drawbacks of existing way of working are identified. 1.5. Benefits of change are identified to make it consistent with organizational requirements 1.6. Realistic timelines and targets for implementation of changes are set.
2. Apply creative approach and solution	2.1. Opportunities and creative approaches to implement innovation practices are identified 2.2. Creative approaches of coworkers pertaining to work practices are analyzed and incorporated 2.3. Innovation in accordance with organizational requirements changes are implemented
3. Support flexible and innovative ways of working	3.1. Maximum innovative opportunities are promoted. 3.2. Work assignments to facilitate innovative work skills are organized. 3.3. Team members are provided with guidance and coaching on innovation in the workplace. 3.4. Models of innovative work practice are provided and discussed 3.5. Appropriate environment for learning and innovation is maintained.
4. Adapt to emerging technological changes and opportunities	4.1. Usages of different <u>technologies</u> is determined based on job requirements. 4.2. Appropriate technology is selected as per work specifications. 4.3. Relevant technology is effectively used in carrying out

	functions. 4.4. Appropriate implementation tools are used as per task requirement.
--	---

Range of variables:

Variables	Range (may include but not limited to)
1. Innovative practices	1.1. Self-directed support to implement new ideas 1.2. Collaborative arrangement to apply new method of working 1.3. Making scope of work more efficient to use new technology
2. Innovation	2.1. New ideas 2.2. Different ideas 2.3. New methods of doing work 2.4. Use of new Technology
3. Technologies	3.1. Office technology 3.2. Industrial technology 3.3. System technology 3.4. Information technology 3.5. Training technology

Curricular Content Guide

1. Underpinning knowledge	1.1. Definition of innovation 1.2. Current practice in own scope of work 1.3. Workplace procedures 1.4. Support required to generate creative ideas 1.5. Difference between innovation and creativity 1.6. Common effects of change and innovation in the workplace 1.7. Industrial and organizational context of change 1.8. Organization's policies, plans, procedures and structure 1.9. Knowledge of resources required by the organization's operations 1.10. Awareness on technology and its function 1.11. Operating instructions 1.12. Applicable software 1.13. Company policy in relation to relevant technology 1.14. Technology adaptability
2. Underpinning skill	2.1. Identifying resources required for creativity and innovation 2.2. Contributing to brainstorming session 2.3. Identifying issues and concerns of one's scope of work 2.4. Encouraging co-workers to generate and develop ideas

	2.5. Evaluating potential obstacles to and opportunities for creativity and innovation 2.6. Sharing of best practices related to innovation and creativity 2.7. Applying relevant technology 2.8. Using update machine and Software 2.9. Acquiring troubleshooting skills Identifying issues 2.10. Identifying current industry standard diagnostic tools 2.11. Describing common malfunctions and resolutions. 2.12. Determining the root cause of a routine malfunction
3. Underpinning Attitudes	3.1. Commitment to occupational health and safety 3.2. Promptness in carrying out activities 3.3. Sincere and honest to duties 3.4. Eagerness to learn 3.5. Tidiness and timeliness 3.6. Environmental concerns 3.7. Respect for rights of peers and seniors at workplace 3.8. Communication with peers and seniors at workplace
4. Resource implications	The following resources must be provided: 4.1. Workplace (actual or simulated). 4.2. Relevant materials and equipment. 4.3. Relevant specifications or work instructions.

Assessment Evidence Guide

1. Critical aspects of competency	Assessment required evidence that the candidate: 1.1 identified need for innovation in the area of work 1.2 applied creative approach and solution 1.3 supported flexible and innovative ways of working 1.4 adapted to emerging technological changes and opportunities
2. Methods of assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical Demonstration 2.3 Oral Questioning 2.4 Portfolio (Optional)
3. Context of assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a certified assessor or occupation-specific industry expert.

The Sector Specific Competencies

Unit of Competency: COMPLY WITH ETHICAL STANDARDS IN IT WORKPLACE	Nominal Duration: 20 hrs.	Unit Code: SICIP-ICT-AIDF-01-S
Unit Descriptor: This unit covers knowledge, skills and attitudes required to comply with ethical standards in IT workplace. It specifically includes the tasks of upholding the requirements of clients, delivering quality products and services, maintaining professionalism at workplace and maintaining workplace code of conduct.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined>** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Uphold the requirements of clients	1.1 Clients' requirements are identified. 1.2 Confidentiality of information is maintained in accordance with workplace policies/organizational policies/national legislation. 1.3 Potential conflicts of interest are identified and involved parties of potential conflicts are notified. 1.4 Proprietary rights of client/customer are asserted.
2. Deliver quality products and services	2.1. Products and services are provided according to the clients' requirements. 2.2. Work is completed as per standards. 2.3. Quality processes are implemented when developing products and services.
3. Maintain professionalism at workplace	3.1 Work processes are delivered as per standards. 3.2 Skills, knowledge and qualifications are presented in a professional manner. 3.3 Services and products developed by self and others are delivered as per workplace standard. 3.4 Unbiased and objective information are provided to the clients. 3.5 Realistic estimates for time, cost and delivery of outputs are presented during negotiation.
4. Maintain workplace code of conduct	4.1 Workplace code of conduct is interpreted. 4.2 Workplace code of conduct is followed.

Curricular Content Guide:

1. Underpinning Knowledge	1.1 Corporate code of confidentiality of information 1.2 Organizational policies, national legislation and workplace policies in relation to IT sector 1.3 Law and regulations pertaining to proprietary rights 1.4 Quality processes for products and services
---------------------------	--

	1.5 Procedure of provided to client information 1.6 Method of estimating for time, cost and delivery products and services 1.7 Workplace code of conduct in IT sector
2. Underpinning Skills	2.1 Upholding confidentiality of information in accordance with organizational policies, national legislation and workplace policies 2.2 Asserting proprietary rights of clients/customers 2.3 Completing work in accordance with industry and international standards 2.4 Implementing quality processes when developing products and services 2.5 Delivering correctly services and products developed by self and others 2.6 Providing unbiased and objective information to the clients 2.7 Presenting realistic estimates for time, cost and delivery of outputs during negotiation 2.8 Maintaining workplace code of conduct
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincerity and honesty to duties 3.4 Environmental concerns 3.5 Eagerness to learn 3.6 Tidiness and timeliness 3.7 Respect for rights of peers and seniors in the workplace 3.8 Good relationships with peers, sub-ordinates and seniors in the workplace
4. Resource Implications	4.1 Workplace (simulated or actual) 4.2 Computer/laptop 4.3 National legislation in relation to IT sector 4.4 Workplace policies, code of conduct & proprietary rights of clients in IT sector 4.5 Relevant tools, equipment and facilities needed to perform the activities 4.6 Required learning materials

Assessment Evidence Guide:

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1 upheld the requirements of clients/customers 1.2 asserted proprietary rights of clients/customers 1.3 delivered quality products and services 1.4 Implemented quality processes when developing products and services 1.5 maintained professionalism at the workplace 1.6 completed work according to industry and international standards
-----------------------------------	---

	1.7 maintained workplace code of conduct
2. Methods of Assessment	Methods of assessment should include: 2.1 Written test 2.2 Practical demonstration 2.3 Oral question 2.4 Portfolio (optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training 3.2 Assessment should be done by a certified assessor or occupation-specific industry expert.

The Occupation Specific Competencies

Unit of Competency: APPLY PROMPT ENGINEERING AND ESTABLISH AI WORKFLOW SYSTEMS FOR FREELANCING	Nominal Duration: 20 hrs.	Unit Code: SICIP-ICT-AIDF-01-O
Unit Descriptor: This unit covers the knowledge, skills and attitudes required to apply prompt engineering and establish AI workflow systems for freelancing. It specifically includes the tasks of establishing AI workflow operating systems for freelancing tasks, configuring AI tools and digital work environments, applying prompt engineering frameworks for production work, and executing multimodal prompting for text, image, audio, and video generation.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Establish AI workflow operating systems for freelancing tasks	1.1 A standardized folder structure and document system is created for freelance projects. 1.2 A workflow map covering intake, delivery, review and handover is developed. 1.3 Task tracking and client communication routines are defined using <u>Google tools</u> .
2. Configure AI tools and digital work environments	2.1 <u>AI tools and platforms</u> are identified and selected for freelancing tasks. 2.2 <u>User accounts and workspace settings</u> are configured in selected AI tools. 2.3 <u>Digital work environments</u> are organized to support AI-assisted workflows. 2.4 Integration of AI tools with productivity and communication platforms is established. 2.5 Configured tools and environments are tested to ensure smooth operation.
3. Apply prompt engineering frameworks for production work	3.1 Prompts are written using <u>Prompt Engineering Frameworks</u> and output formats in Cross-AI Tools. 3.2 Prompts are iterated using evaluation criteria to improve quality. 3.1 Reusable prompt templates and prompt libraries are created for frequent tasks.
4. Execute multimodal prompting for text, image, audio, and video generation	4.1 Multimodal prompts are applied for text, image, audio or web outputs as required. 4.2 Outputs are validated for accuracy, relevance, tone and compliance. 4.3 Final deliverables are packaged and documented for client handover and reuse.

Range of Variables

Variable	Range May include but not limited to:
1. Google Tools	1.1 Gemini 1.2 Google AI Studio (text, image, voice, agents) 1.3 Google Workspace: Docs, Sheets, Slides, Drive, Gmail, Google Calendar, Google Tasks, Google Keep, Google Meet, Google Sites (project portals if required)
2. AI tools and platforms	2.1 ChatGPT 2.2 Claude 2.3 Perplexity 2.4 DeepSeek 2.5 Grok
3. User accounts and workspace settings	3.1 Creation of new user accounts in AI tools or platforms 3.2 Configuration of user profiles, roles, and access permissions 3.3 Setup of workspace environments or project spaces 3.4 Adjustment of tool preferences and system settings 3.5 Integration with cloud storage or collaboration platforms 3.6 Management of API keys, authentication, and security settings 3.7 Configuration of notification, language, and interface preferences 3.8 Linking with other productivity tools (e.g., Google Workspace, project management tools)
4. Digital work environments	4.1 Google Workspace 4.2 Notion 4.3 Slack 4.4 Trello 4.5 Microsoft Teams 4.6 Zoom (online platform) 4.7 ClickUp 4.8 Airtable 4.9 Dropbox 4.10 Stripe 4.11 Payoneer
5. Prompt Engineering Frameworks	5.1 Role-Task-Context-Tone (RTCT) 5.2 RACE (Role, Action, Context, Expected Output) 5.3 ABCD (Action, Branding, Context, Desired outcome) 5.4 Zero-shot prompting 5.5 Few-shot prompting 5.6 Chain-of-thought prompting 5.7 Rubric-based evaluation prompts

Curricular Content Guide

1. Underpinning Knowledge	1.1 Principles of AI-assisted freelance workflow management and project organization. 1.2 Standard practices for folder structures, documentation systems, and workflow mapping. 1.3 Use of digital productivity and communication tools for task tracking and client coordination. 1.4 Selection, configuration, and integration of AI tools for different freelancing tasks. 1.5 Fundamentals of prompt engineering frameworks and structured prompt design techniques. 1.6 Methods for iterative prompting, evaluation, and optimization of AI-generated outputs. 1.7 Concepts of multimodal prompting for text, image, audio, video, and web content generation. 1.8 Techniques for validating, packaging, documenting, and delivering AI-assisted outputs professionally.
2. Underpinning Skills	2.1 Establishing organized AI workflow systems for freelance project management 2.2 Developing workflow processes for task intake, review, delivery, and handover 2.3 Using digital tools for task tracking and client communication management 2.4 Selecting and configuring AI tools and platforms for freelancing tasks 2.5 Integrating AI tools with communication and productivity platforms 2.6 Testing configured tools and workflows to ensure smooth operation 2.7 Applying prompt engineering frameworks to generate high-quality outputs 2.8 Creating reusable prompt templates and prompt libraries for recurring tasks 2.9 Packaging and documenting final deliverables for client handover and future reuse
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincerity and honesty to duties 3.4 Environmental concerns 3.5 Eagerness to learn 3.6 Tidiness and timeliness 3.7 Respect for rights of peers and seniors in the workplace 3.8 Good relationships with peers, sub-ordinates and

	seniors in the workplace
4. Resource Implications	The following resources must be provided: 4.1 Workplace (simulated or actual) 4.2 Computer/laptop/notebook 4.3 Relevant tools 4.4 Facilities needed to perform the activities 4.5 Required learning materials

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment must evidence that the candidate: 1.1 established AI workflow operating systems for freelancing tasks 1.2 configured AI tools and digital work environments 1.3 applied prompt engineering frameworks for production work 1.4 executed multimodal prompting for text, image, audio, and video generation
2. Methods of Assessment	Methods of assessment should include: 2.1 Written test 2.2 Practical demonstration 2.3 Oral questioning 2.4 Portfolio (optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

Unit of Competency: PRODUCE AI-ASSISTED CONTENT AND MANAGE CONTENT OPERATIONS	Nominal Duration: 25 hrs.	Unit Code: SICIP-ICT-AIDF-02-O
Unit Descriptor: This unit covers the knowledge, skills and attitudes required to produce AI-assisted content and manage content operations. It specifically includes the tasks of planning content production and content operation systems, producing AI-assisted written content, producing AI-assisted written content, applying SEO and content optimization requirements, managing content workflow and quality control processes and organizing, publishing and documenting content outputs.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Plan content production and content operation systems	1.1 <u>Content objectives</u> are defined according to project goals. 1.2 <u>Blogs and SEO article topics</u> are identified based on target audience and keywords. 1.3 <u>Content scope, volume, and publishing frequency</u> are determined. 1.4 A <u>content operations workflow</u> covering planning, writing, editing, and publishing is established. 1.5 Required tools and resources for content production are identified. 1.6 Content production plan is reviewed and confirmed.
2. Produce AI-assisted written content	2.1 <u>AI-assisted written content</u> is generated using appropriate AI tools. 2.2 <u>Blogs and SEO articles</u> are produced according to content plans. 2.3 Required structure and formatting standards are applied. 2.4 Keywords and topics are aligned with <u>SEO requirements</u> . 2.5 Generated content is reviewed against defined requirements. 2.6 Final written content outputs are completed and prepared for delivery.
3. Apply SEO and content optimization requirements	3.1 SEO requirements are applied to the content. 3.2 Headings, keywords, and metadata are optimized according to SEO guidelines. 3.3 Content readability and logical flow are ensured. 3.4 Internal links and content structure are validated. 3.5 Optimization accuracy is reviewed against SEO

	standards. 3.6 Optimized content is approved for publishing or delivery.
4. Manage content workflow and quality control processes	4.1 <u>Content quality standards</u> are applied during content production. 4.2 Content outputs are reviewed and revised where necessary. 4.3 <u>Content versions</u> are managed and updated systematically. 4.4 Content status and updates are tracked throughout the workflow. 4.5 Finalized content is approved for publication or delivery. 4.6 Quality checks and review records are documented.
5. Organize, publish, and document content outputs	5.1 Content is prepared for publishing platforms according to requirements. 5.2 <u>Publishing readiness</u> is confirmed before release. 5.3 Content files and related assets are organized systematically. 5.4 Content is published or delivered through appropriate channels. 5.5 Content operation activities are documented for record purposes. 5.6 Content production tasks are closed after completion.

Range of Variables

Variable	Range May include but not limited to:
1. Content objectives	1.1 Brand awareness 1.2 Lead generation 1.3 Search visibility 1.4 Audience education 1.5 Engagement improvement 1.6 Content authority building
2. Blogs and SEO articles topics	2.1 Informational blogs 2.2 How-to articles 2.3 Listicle articles 2.4 Long-form SEO articles 2.5 Evergreen content 2.6 Campaign-based articles
3. Content scope, volume, and publishing frequency	3.1 Single-article scope 3.2 Batch content scope 3.3 Daily publishing 3.4 Weekly publishing 3.5 Monthly publishing 3.6 Campaign-based frequency

4. Content operations workflow	4.1 Planning workflow 4.2 Drafting workflow 4.3 Review workflow 4.4 Optimization workflow 4.5 Publishing workflow 4.6 Archiving workflow
5. AI-assisted written content	5.1 AI-generated drafts 5.2 AI-assisted outlines 5.3 AI-refined content 5.4 Human-reviewed AI content 5.5 Multilingual AI content 5.6 Topic-cluster content
6. SEO requirements	6.1 Keyword placement 6.2 Heading hierarchy 6.3 Meta data 6.4 Internal linking 6.5 URL structure 6.6 Content length
7. Content quality standards	7.1 Accuracy 7.2 Originality 7.3 Readability 7.4 Brand alignment 7.5 Consistency 7.6 Brief compliance
8. Content versions	8.1 Draft versions 8.2 Revised versions 8.3 Optimized versions 8.4 Approved versions 8.5 Published versions 8.6 Archived versions
9. Publishing readiness	9.1 Platform formatting complete 9.2 SEO checks complete 9.3 Final review approved 9.4 Assets ready 9.5 Delivery checklist 9.6 Client approval

Curricular Content Guide

1. Underpinning Knowledge	1.1 Principles of content planning, content operations, and workflow management. 1.2 Fundamentals of blog writing, SEO article development, and audience-focused content creation. 1.3 Use of AI tools for generating, editing, and refining
---------------------------	--

	written content. 1.4 Standards for content formatting, readability, logical flow, and internal linking. 1.5 Content quality assurance, review procedures, and version control practices. 1.6 Methods for organizing, publishing, and managing digital content assets systematically. 1.7 Documentation, tracking, and reporting practices for content production and publishing activities.
2. Underpinning Skills	2.1 Planning content production workflows based on project goals and audience requirements 2.2 Organizing content scope, publishing schedules, and operational workflows 2.3 Producing AI-assisted written content according to content plans and standards 2.4 Applying proper structure, formatting, and SEO requirements in written content 2.5 Validating internal links, logical flow, and content structure before publishing 2.6 Reviewing and revising content to maintain quality and accuracy 2.7 Preparing and organizing content for publishing across appropriate platforms 2.8 Conducting quality checks and maintaining records of content production activities
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincerity and honesty to duties 3.4 Environmental concerns 3.5 Eagerness to learn 3.6 Tidiness and timeliness 3.7 Respect for rights of peers and seniors in the workplace 3.8 Good relationships with peers, sub-ordinates and seniors in the workplace
4. Resource Implications	The following resources must be provided: 4.1 Workplace (simulated or actual) 4.2 Computer/laptop/notebook 4.3 Multimedia 4.4 Tools (content writing, graphic design, video creation) 4.5 Required learning materials 4.6 Specifications and work instructions

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment must evidence that the candidate:
-----------------------------------	--

	1.1 planned content production and content operation systems 1.2 produced AI-assisted written content 1.3 applied SEO and content optimization requirements 1.4 managed content workflow and quality control processes 1.5 organized, published, and documented content outputs
2. Methods of Assessment	Methods of assessment should include: 2.1 Written test 2.2 Practical demonstration 2.3 Oral questioning 2.4 Portfolio (optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

Unit of Competency: ANALYZE BUSINESS PERFORMANCE AND DELIVER PROJECT INSIGHTS	Nominal Duration: 25 hrs.	Unit Code: SICIP-ICT-AIDF-03-O
Unit Descriptor: This unit of competency covers the knowledge, skills and attitudes required to analyze business performance and deliver project insights. It specifically includes the tasks of collecting and preparing performance data from digital platforms, analyzing performance using AI-assisted analytics tools, extracting insights and interpreting analytical findings, preparing business performance reports and dashboards, and delivering analytical insights and recommendations to clients.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Collect and prepare performance data from digital platforms	1.1 <u>Data sources</u> from digital platforms are identified. 1.2 Relevant <u>performance metrics</u> are identified according to analysis needs. 1.3 Data are collected from approved digital sources. 1.4 <u>Data cleaning procedures</u> are applied to remove errors and duplicates. 1.5 Data accuracy and completeness are validated. 1.6 Clean datasets are prepared for analysis.
2. Analyze performance using AI-assisted analytics tools	2.1 <u>AI-assisted analysis</u> techniques are applied to performance data. 2.2 <u>Performance trends</u> and patterns are identified. 2.3 Performance results are compared across different time periods. 2.4 Anomalies or deviations in data are detected. 2.5 Analytical outputs are generated using AI tools. 2.6 Analysis results are reviewed for accuracy and relevance.
3. Extract insights and interpret analytical findings	3.1 <u>Insight summaries</u> are developed from analytical outputs. 3.2 Key patterns and performance indicators are identified from data. 3.3 Analytical findings are interpreted to understand business performance. 3.4 Significant trends and issues are highlighted in the analysis. 3.5 Interpreted insights are documented for reporting and decision-making.
4. Prepare business performance reports and dashboards	4.1 Analytical outputs are interpreted to identify key insights. 4.2 Appropriate <u>reporting formats</u> and dashboard layouts are selected.

	4.3 Client reports are prepared based on analyzed data. 4.4 Report data and visual elements are validated for accuracy. 4.5 Final reporting materials are completed and prepared for presentation.
5. Deliver analytics insights and recommendations to clients	5.1 Reports are presented to clients through appropriate communication channels. 5.2 Key insights and findings are explained clearly. 5.3 Client queries and clarification requests are addressed. 5.4 Client feedback is applied to revise reports where required. 5.5 Finalized reports are delivered to clients. 5.6 Analytics records and reports are archived for future reference.

Range of Variables

Variable	Range
	May include but not limited to:
1. Data sources	1.1 Website analytics platforms 1.2 Social media analytics 1.3 Advertising dashboards 1.4 CRM and email systems 1.5 E-commerce platforms 1.6 Client-provided datasets
2. Performance metrics	2.1 Traffic metrics 2.2 Engagement metrics 2.3 Conversion metrics 2.4 Revenue-related metrics 2.5 Retention metrics 2.6 Campaign performance indicators
3. Data cleaning requirements	3.1 Removal of duplicates 3.2 Handling missing values 3.3 Data normalization 3.4 Date and time alignment 3.5 Formatting consistency 3.6 Validation checks
4. AI-assisted analysis	4.1 Trend detection 4.2 Pattern recognition 4.3 Comparative analysis 4.4 Anomaly detection 4.5 Automated summaries 4.6 Visual analytics generation
5. Performance trends	5.1 Growth trends 5.2 Decline trends 5.3 Seasonal patterns 5.4 Platform-specific trends

	5.5 Campaign-level trends 5.6 Content-level trends
6. Insight summaries	6.1 Key findings 6.2 Notable changes 6.3 Performance highlights 6.4 Performance gaps 6.5 Supporting evidence 6.6 Summary narratives
7. Reporting formats	7.1 PDF reports 7.2 Slide decks 7.3 Spreadsheet reports 7.4 Interactive dashboards 7.5 Visual summaries 7.6 Client-specific formats
8. Client reports	8.1 Performance reports 8.2 Dashboard summaries 8.3 Slide presentations 8.4 Written reports 8.5 Periodic updates 8.6 Final project reports

Curricular Content Guide

1. Underpinning Knowledge	1.1 Fundamentals of digital performance data collection and data source identification. 1.2 Key performance metrics, data validation, and data cleaning techniques. 1.3 Principles of AI-assisted analytics and automated data analysis methods. 1.4 Techniques for identifying trends, patterns, anomalies, and performance comparisons. 1.5 Principles of business reporting, dashboard creation, and data visualization. 1.6 Professional communication techniques for presenting analytics findings and recommendations. 1.7 Documentation, report archiving, and record management practices for analytics activities.
2. Underpinning Skills	2.1 Collecting and preparing performance data from approved digital platforms 2.2 Applying data cleaning techniques to ensure accuracy and completeness 2.3 Validating and organizing datasets for effective analysis 2.4 Using AI-assisted analytics tools to analyze performance data and trends 2.5 Extracting insights and interpreting analytical findings for business performance evaluation 2.6 Highlighting significant trends, issues, and key performance indicators from data

	2.7 Preparing business reports and dashboards using appropriate formats and visuals 2.8 Presenting analytics insights and recommendations clearly to clients 2.9 Delivering finalized reports and maintaining analytics records for future reference
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincerity and honesty to duties 3.4 Environmental concerns 3.5 Eagerness to learn 3.6 Tidiness and timeliness 3.7 Respect for rights of peers and seniors in the workplace 3.8 Good relationships with peers, sub-ordinates and seniors in the workplace
4. Resource Implications	The following resources must be provided: 4.1 Workplace (simulated or actual) 4.2 Computer/laptop 4.3 Specifications and work instructions 4.4 Learning materials

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment must evidence that the candidate: 1.1 Collected and prepared performance data from digital platforms 1.2 Analyzed performance using AI-assisted analytics tools 1.3 Extracted insights and interpret analytical findings 1.4 Prepared business performance reports and dashboards 1.5 Delivered analytics insights and recommendations to clients
2. Methods of Assessment	Methods of assessment should include: 2.1 Written test 2.2 Practical demonstration 2.3 Oral questioning 2.4 Portfolio (optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

Unit of Competency: DEVELOP AI-ASSISTED DESIGN, BRANDING, AND CREATIVE ASSETS	Nominal Duration: 20 hrs.	Unit Code: SICIP-ICT-AIDF-04-O
Unit Descriptor: This unit covers the knowledge, skills and attitudes required to develop AI-assisted design, branding and creative assets. It specifically includes the tasks of identifying visual design and branding requirements, developing AI-assisted brand visual identity elements, creating AI-generated graphics and static creative assets, adapting visual assets for different digital platforms and preparing creative assets for final delivery.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Identify visual design and branding requirements	1.1 Client brief and requirements are collected and clarified using appropriate <u>communication methods</u> . 1.2 Purpose of the design is identified based on client needs. 1.3 Target audience characteristics are determined in the Bangladesh and global context. 1.4 <u>Brand elements</u> and tone are identified or analyzed. 1.5 Platform-specific requirements are identified and documented. 1.6 Relevant market trends and competitor designs are reviewed to inform design direction. 1.7 <u>Suitable AI tools for design and branding tasks</u> are identified based on requirements.
2. Develop AI-assisted brand visual identity elements	2.1 Design requirements are converted into effective prompts for AI tools. 2.2 AI tools are used to generate logo, color palette, and typography options. 2.3 Multiple design concepts are reviewed and shortlisted based on relevance. 2.4 Selected designs are refined to ensure consistency with brand identity. 2.5 Final visual identity elements are prepared in appropriate formats for use.
3. Create AI-generated graphics and static creative assets	3.1 Design requirements are interpreted to determine required graphics and asset types. 3.2 Appropriate AI tools and prompts are used to generate visual content. 3.3 AI-generated graphics are created according to specifications and platform needs. 3.4 Outputs are refined using design software to ensure quality and consistency. 3.5 Final assets are exported in suitable formats and sizes

	for intended use.
4. Adapt visual assets for different digital platforms	4.1 Platform requirements are identified for each channel. 4.2 Visual assets are resized and reformatted according to platform specifications. 4.3 Layout and content are adjusted to maintain clarity and visual impact. 4.4 Brand consistency is maintained across all adapted versions. 4.5 Final assets are optimized and exported for respective digital platforms.
5. Prepare creative assets for final delivery	5.1 Final assets are reviewed against client requirements and branding guidelines. 5.2 Required formats, sizes, and versions are prepared for delivery. 5.3 Files are organized, named, and packaged systematically. 5.4 Quality checks are completed to ensure usability and consistency. 5.5 Assets are delivered through appropriate digital platforms.

Range of Variables

Variable	Range May include but not limited to:
1. Communication methods	1.1 Verbal communication 1.1.1 Client meetings 1.1.2 Calls 1.1.3 Presentations 1.2 Written communication 1.2.1 Emails 1.2.2 Proposals 1.2.3 Reports 1.3 Digital communication 1.3.1 Chat platforms 1.3.2 Freelancing marketplaces 1.4 Visual communication 1.4.1 Design mockups 1.4.2 Presentations 1.4.3 Infographics
2. Brand elements	2.1 Logo and brand marks 2.2 Color palette and schemes 2.3 Typography (fonts and text styles) 2.4 Visual style (images, icons, graphics) 2.5 Tone of voice and messaging style
3. Suitable AI tools for design and branding tasks	3.1 AI tools for graphic design and layout creation 3.1.1 Canva AI

	3.1.2 Adobe Express 3.1.3 Figma AI 3.1.4 VistaCreate 3.2 AI tools for logo and brand identity generation 3.2.1 Looka 3.2.2 Brandmark 3.2.3 Hatchful 3.2.4 LogoAI 3.3 AI tools for image generation and editing 3.3.1 Midjourney 3.3.2 Nano-Banana 3.3.3 Image-2 3.3.4 DALL·E 3.3.5 Adobe Firefly 3.4 AI tools for content and copywriting support 3.4.1 ChatGPT 3.4.2 Jasper AI 3.4.3 Copy.ai 3.4.4 Writesonic 3.5 AI tools for presentation and visual asset development 3.5.1 Gamma 3.5.2 NoteGPT 3.5.3 Prezi 3.5.4 Canva AI
--	---

Curricular Content Guide

1. Underpinning Knowledge	1.1 Fundamentals of visual design, branding principles, and client requirement analysis. 1.2 Understanding target audience characteristics, market trends, and competitor design analysis. 1.3 Knowledge of brand identity elements including logos, color palettes, typography, and brand tone. 1.4 Principles of prompt design for AI-assisted visual content generation. 1.5 Platform-specific design requirements, asset sizing, formatting, and optimization techniques. 1.6 Methods for maintaining visual consistency and brand identity across digital platforms. 1.7 Procedures for quality checking, organizing, packaging, and delivering digital creative assets.
2. Underpinning Skills	2.1 Analyzing target audience characteristics in Bangladesh and global markets 2.2 Reviewing brand elements, market trends, and competitor designs to guide visual direction

	2.3 Developing effective prompts for generating AI-assisted visual identity elements 2.4 Creating logos, color palettes, and typography options using AI tools 2.5 Creating graphics and static creative assets according to platform requirements 2.6 Adapting visual assets for different digital platforms through resizing and reformatting 2.7 Preparing, organizing, and exporting creative assets in required formats and sizes 2.8 Conducting quality checks and delivering final assets through appropriate digital platforms
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincerity and honesty to duties 3.4 Environmental concerns 3.5 Eagerness to learn 3.6 Tidiness and timeliness 3.7 Respect for rights of peers and seniors in workplace 3.8 Good relationships with peers, sub-ordinates and seniors in workplace
4. Resource Implications	The Following resources must be provided: 4.1 Workplace (simulated or actual) 4.2 Computer/laptop 4.3 Job specifications and work instructions 4.4 Relevant tools, equipment and facilities 4.5 Required learning materials

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment must evidence that the candidate: 1.1 identified visual design and branding requirements 1.2 developed AI-assisted brand visual identity elements 1.3 created AI-generated graphics and static creative assets 1.4 adapted visual assets for different digital platforms 1.5 prepared creative assets for final delivery
2. Methods of Assessment	Methods of assessment should include: 2.1 Written test 2.2 Practical demonstration 2.3 Oral questioning 2.4 Portfolio (optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training.

	3.2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.	
Unit of Competency: PRODUCE AI-GENERATED VIDEO CONTENT AND UGC MEDIA	Nominal Duration: 45 hrs.	Unit Code: SICIP-ICT-AIDF-05-O
Unit Descriptor: This unit of competency covers the knowledge, skills and attitudes required to produced AI-generated video content and UGC media. It specifically includes the tasks of planning AI-based video and UGC production workflows, producing AI-generated video content and talking avatar media, editing and enhancing AI-generated video outputs, adapting video content for digital platforms and social media and applying professional standards in AI video production.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Plan AI-based video and UGC production workflows	1.1 Content objectives, target audience, and platform requirements are identified. 1.2 <u>Suitable AI tools and resources for video and UGC production</u> are selected as per job requirement. 1.3 <u>Workflow steps</u> are planned systematically. 1.4 Content ideas and scripts are developed using AI support. 1.5 Timeline and output requirements are defined for efficient production.
2. Produce AI-generated video content and talking avatar media	2.1 Scripts and prompts are applied to produce accurate and relevant outputs. 2.2 Voice, visuals, and avatar elements are customized as required. 2.3 Multiple versions are generated and reviewed for quality. 2.4 Outputs are selected based on alignment with content objectives.
3. Edit and enhance AI-generated video outputs	3.1 Generated videos are imported into editing tools for refinement. 3.2 Visuals, audio, subtitles, and transitions are adjusted for clarity. 3.3 Errors and inconsistencies are identified and corrected. 3.4 Branding elements are added to maintain consistency. 3.5 Final video quality is enhanced for professional presentation.
4. Adapt video content for digital platforms	4.1 <u>Platform-specific requirements</u> are identified.

and social media	4.2 Videos are resized and reformatted for different platforms. 4.3 Captions, thumbnails, and overlays are adjusted for engagement. 4.4 Content is optimized for mobile and online viewing. 4.5 Final outputs are prepared according to platform standards.
5. Apply professional standards in AI video production	5.1 <u>Ethical considerations</u> are maintained. 5.2 <u>Content quality and accuracy</u> are ensured throughout production. 5.3 Client or platform guidelines are followed consistently. 5.4 Files and assets are managed with proper organization and version control. 5.5 Final outputs are reviewed and delivered in a professional manner.

Range of Variables

Variable	Range May include but not limited to:
1. Suitable AI tools and resources for video and UGC production	1.1 AI tools for video creation and editing 1.1.1 CapCut 1.1.2 VEO-3 1.1.3 Higgsfield AI 1.1.4 Wan AI 1.1.5 InVideo 1.1.6 Pictory 1.1.7 Runway ML 1.2 AI tools for text-to-video and script-based video generation 1.2.1 Synthesia 1.2.2 Lumen5 1.2.3 HeyGen 1.3 AI tools for voiceover and audio generation 1.3.1 ElevenLabs 1.3.2 Murf AI 1.3.3 Google AI Studio 1.3.4 Descript 1.4 AI tools for UGC-style content and short-form videos 1.4.1 TikTok 1.4.2 Instagram (Reels AI features) 1.4.3 YouTube Shorts
2. Workflow steps	2.1 Script 2.2 Generation 2.3 Editing 2.4 Delivery
3. Platform-specific	3.1 Content format and aspect ratio

requirements	3.2 Video duration and file size 3.3 Resolution and quality 3.4 Platform guidelines and policies 3.5 Captions, hashtags, and metadata 3.6 Audience engagement features
4. Ethical considerations	4.1 Copyright 4.2 Consent 4.3 Authenticity
5. Content quality and accuracy	5.1 Correct and relevant information 5.2 Clear visuals and audio 5.3 Proper grammar and language 5.4 Consistency with brand/message 5.5 Error-free and fact-checked content

Curricular Content Guide

1. Underpinning Knowledge	1.1 Fundamentals of AI-based video production workflows and content planning. 1.2 Understanding content objectives, audience requirements, and platform-specific video standards. 1.3 Knowledge of AI tools used for video generation, talking avatars, voice, and multimedia production. 1.4 Principles of script writing, prompt development, and AI-assisted content generation. 1.5 Techniques for video editing, subtitle integration, audio enhancement, and visual refinement. 1.6 Branding consistency, mobile optimization, and audience engagement techniques in video content.
2. Underpinning Skills	2.1 Planning AI-based video and UGC production workflows according to content objectives and platform needs 2.2 Developing content ideas, scripts, and workflow steps using AI support 2.3 Customizing voice, visuals, and avatar elements based on project requirements 2.4 Editing AI-generated videos to improve visuals, audio, subtitles, and transitions 2.5 Applying branding elements to maintain consistency across video content 2.6 Adapting videos for different digital platforms through resizing and reformatting 2.7 Following ethical standards, platform guidelines, and quality requirements in video production 2.8 Managing files, assets, and version control systematically during production
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety

	3.2 Promptness in carrying out activities 3.3 Sincerity and honesty to duties 3.4 Environmental concerns 3.5 Eagerness to learn 3.6 Tidiness and timeliness 3.7 Respect for rights of peers and seniors in the workplace 3.8 Good relationships with peers, subordinates and seniors in the workplace
4. Resource Implications	The following resources must be provided: 4.1 Workplace (simulated or actual) 4.2 Computer/laptop 4.3 Learning materials 4.4 Specifications and work instructions 4.5 Relevant tools, equipment and facilities

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment must evidence that the candidate: 1.1 planned AI-based video and UGC production workflows 1.2 produced AI-generated video content and talking avatar media 1.3 edited and enhanced AI-generated video outputs 1.4 adapted video content for digital platforms and social media 1.5 applied professional standards in AI video production
2. Methods of Assessment	Methods of assessment should include: 2.1 Written test 2.2 Practical demonstration 2.3 Oral questioning 2.4 Portfolio (optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

Unit of Competency: DEVELOP AI-DRIVEN WEBSITES, LANDING PAGES, AND DIGITAL COMMERCE SYSTEMS	Nominal Duration: 25 hrs.	Unit Code: SICIP-ICT-AIDF-06-O
Unit Descriptor: This unit of competency covers the knowledge, skills and attitudes required to develop AI-driven websites, landing pages and digital commerce systems. It specifically includes the tasks of planning web, landing page and digital commerce solutions, developing conversion-focused websites and landing pages, designing e-commerce and digital product selling systems and testing and deploying web and digital commerce systems.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Plan web, landing page, and digital commerce solutions	1.1 Business goals, target users, and platform requirements are identified. 1.2 <u>Suitable tools, platforms</u> , and AI solutions are selected. 1.3 Content structure and page flow are outlined. 1.4 <u>Key features</u> are defined. 1.5 Timeline and deliverables are planned.
2. Develop conversion-focused websites and landing pages	2.1 Website or landing page is developed using appropriate tools. 2.2 AI-generated content and visuals are integrated. 2.3 <u>Call-to-action elements</u> are designed for user engagement. 2.4 Layout is optimized for conversion and usability. 2.5 Pages are structured for fast loading and responsiveness.
3. Design UI/UX and build prototype	3.1 User interface elements are designed based on user needs. 3.2 Wireframes or prototypes are created using <u>design tools</u> . 3.3 Navigation and user flow are structured logically. 3.4 Visual consistency and branding are maintained. 3.5 Prototype is reviewed and refined.
4. Configure e-commerce and digital product selling systems	4.1 Product listings and pricing are set up. 4.2 <u>Payment gateways</u> and checkout systems are configured. 4.3 Digital product delivery or access systems are integrated.

	4.4 Security and basic settings are applied. 4.5 System functionality is verified.
5. Test and deploy web and digital commerce systems	5.1 Website and features are tested for functionality. 5.2 Errors and issues are identified and fixed. 5.3 Performance and responsiveness are checked. 5.4 Final system is deployed to live environment. 5.5 Post-deployment verification is completed.

Range of Variables

Variable	Range
	May include but not limited to:
1. Suitable tools, platforms	1.1 WordPress 1.2 Google AI studio 1.3 Lovable 1.4 Bolt 1.5 Replit
2. Key features	2.1 Forms 2.2 Payment 2.3 Product display
3. Call-to-action elements	3.1 Buttons (Buy Now, Sign Up, Contact) 3.2 Forms and lead capture fields 3.3 Links and clickable banners 3.4 Pop-ups and prompts 3.5 Engagement messages or offers
4. Design tools	4.1 Figma 4.2 Canva 4.3 Webflow 4.4 Google stitch
5. Payment gateways	5.1 bKash 5.2 Nagad 5.3 SSLCOMMERZ 5.4 Stripe 5.5 Payoneer

Curricular Content Guide

1. Underpinning Knowledge	1.1 Fundamentals of website planning, landing page development, and digital commerce solutions. 1.2 Understanding business goals, user requirements, and platform selection for web projects. 1.3 Knowledge of AI tools, website builders, and digital commerce platforms. 1.4 Principles of conversion-focused design, call-to-action (CTA), and user engagement strategies.
---------------------------	--

	1.5 Fundamentals of UI/UX design, wireframing, prototyping, and user flow development. 1.6 Product setup, payment gateways, checkout systems, and digital delivery. 1.7 Web performance, responsiveness, usability, and security best practices. 1.8 Testing, troubleshooting, deployment, and post-deployment verification procedures for web systems.
2. Underpinning Skills	2.1 Planning web, landing page, and digital commerce solutions based on business goals and user needs 2.2 Organizing content structure, page flow, features, timelines, and deliverables 2.3 Developing conversion-focused websites and landing pages using appropriate tools 2.4 Optimizing layouts for usability, responsiveness, and conversion performance 2.5 Designing UI/UX elements based on user behavior and branding requirements 2.6 Reviewing and refining prototypes to improve user experience and consistency 2.7 Integrating digital product delivery systems and applying security settings 2.8 Performing post-deployment verification to ensure proper operation and usability
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincerity and honesty to duties 3.4 Environmental concerns 3.5 Eagerness to learn 3.6 Tidiness and timeliness 3.7 Respect for rights of peers and seniors in the workplace 3.8 Good relationships with peers, subordinates and seniors in the workplace
4. Resource Implications	The following resources must be provided: 4.1 Workplace (simulated or actual) 4.2 Computer/laptop 4.3 Specifications and work instructions 4.4 Relevant tools, equipment and facilities 4.5 Required learning materials

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment must evidence that the candidate: 1.1 planned web, landing page, and digital commerce
-----------------------------------	--

	solutions 1.2 developed conversion-focused websites and landing pages 1.3 designed UI/UX and build prototype 1.4 configured e-commerce and digital product selling systems 1.5 tested and deployed web and digital commerce systems
2. Methods of Assessment	Methods of assessment may include but is not limited to: 2.1 Written test 2.2 Practical demonstration 2.3 Oral questioning 2.4 Portfolio (optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

Unit of Competency: CARRY OUT FREELANCING AND OUTSOURCING SERVICES	Nominal Duration: 20 hrs.	Unit Code: SICIP-ICT-AIDF-07-O
Unit Descriptor: This unit of competency covers the knowledge, skills and attitudes required to develop freelancing and outsourcing services. It specifically includes the tasks of identifying freelancing and outsourcing market opportunities, developing professional profile and service portfolio, preparing proposals, Gigs, and acquire clients, managing client communication and long-term relationships, and planning career growth and continuous professional development.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Identify freelancing and outsourcing market opportunities	1.1 <u>Freelancing and outsourcing markets</u> are researched to identify demands and opportunities. 1.2 Competition and pricing strategies in the market are analyzed. 1.3 Profitable niches and service areas are identified. 1.4 Required skills and competencies for outsourcing work are identified. 1.5 Client needs and market trends are reviewed. 1.6 Potential market opportunities are documented for service positioning.
2. Develop professional profile and service portfolio	2.1 A professional profile is created on relevant freelancing platforms. 2.2 Skills, qualifications, and work experience are presented in the profile. 2.3 A profile introduction video is prepared to present services and capabilities. 2.4 A service portfolio is developed to showcase completed work and skills. 2.5 Portfolio items and profile information are reviewed and updated regularly.
3. Prepare proposals, Gigs, and acquire clients	3.1 Service gigs are created and published on freelancing platforms. 3.2 Gig descriptions, pricing, and <u>service packages</u> are clearly defined. 3.3 Client profiles and ratings are reviewed before responding to job postings. 3.4 Job requirements are analyzed before preparing proposals. 3.5 Client proposals are prepared and submitted through

	appropriate freelancing platforms. 3.6 Client communications are maintained to secure projects and build trust.
4. Manage client communication and long-term relationships	4.1 Client communications are conducted through appropriate channels. 4.2 Client requirements and feedback are received and documented. 4.3 Project updates and service information are communicated regularly. 4.4 Client concerns or issues are addressed promptly. 4.5 Long-term client relationships are maintained through professional service and follow-up.
5. Plan career growth and continuous professional development	5.1 <u>Career goals and development needs</u> are identified and documented. 5.2 Required skills and competencies are reviewed against market demands. 5.3 Learning and training opportunities are identified for skill improvement. 5.4 <u>Professional development activities</u> are planned and scheduled.

Range of Variables

Variable	Range May include but not limited to:
1. Freelancing and outsourcing markets	1.1 Upwork 1.2 Fiverr 1.3 Freelancer 1.4 PeoplePerHour 1.5 Toptal 1.6 Guru 1.7 Truelancer 1.8 LinkedIn Marketplace / LinkedIn Services
2. Service packages	2.1 Basic service package 2.2 Standard service package 2.3 Premium service package 2.4 Custom service package 2.5 Hourly service package 2.6 Project-based service package 2.7 Monthly retainer package 2.8 Enterprise or advanced service package
3. Career goals and development needs	3.1 Short-term career goals 3.2 Long-term career goals 3.3 Technical skill development needs

	3.4 Industry certification goals 3.5 Training and learning priorities 3.6 Career progression or promotion goals 3.7 Personal development objectives
4. Professional development activities	4.1 Skills training and upskilling programs 4.2 Professional certification preparation 4.3 Networking and professional community participation 4.4 Knowledge sharing and peer learning 4.5 Industry research and self-study 4.6 Career planning and performance review activities

Curricular Content Guide

1. Underpinning Knowledge	1.1 Concept of freelancing and outsourcing markets and global service demand. 1.2 Identify market opportunities, profitable niches, and client needs. 1.3 Understand competition, pricing strategies, and market trends in freelancing platforms. 1.4 Concept of professional profiles and service portfolios for online platforms. 1.5 Identify client requirements and project expectations before submitting proposals. 1.6 Concept of professional client communication and relationship management. 1.7 Understand strategies for building long-term client relationships and trust. 1.8 Concept of career planning and continuous professional development in freelancing.
2. Underpinning Skills	2.1 Researching and analyzing freelancing and outsourcing markets to identify service opportunities. 2.2 Evaluating competition, pricing strategies, and profitable service niches. 2.3 Developing professional profiles and service portfolios on freelancing platforms. 2.4 Presenting skills, experience, and services through profile content and introduction videos. 2.5 Creating and publishing service gigs, pricing packages, and service descriptions. 2.6 Communicating and negotiating with clients to secure projects and build trust. 2.7 Managing client communication, feedback, and long-term professional relationships. 2.8 Planning and pursuing continuous learning and professional development for career growth.

3. END OF COMPETENCY STANDARD

Workshop/Lab Facility Standard

Course Name:	AI Driven Freelancers
Number of Trainees:	25

Course-wise Training Space (Theoretical Classroom, Workshop/ Lab/ Classroom cum Workshop):

- Classroom cum workshop – 500 sft

Major Training Equipment and Training Facilities:

Sl. No.	Major Equipment and Training facilities	Required facilities
1.	Computer/Laptop	01
2.	Printer	01
3.	Scanner	01
4.	Computers/Laptop: (Minimum Intel Core i3 processor (8 th Gen), 8GB RAM (16GB preferred), 256GB SSD/HDD storage, High-resolution monitors (19/20-inch minimum, with color accuracy).	25
5.	Projector: High-resolution projector (HD or 4K) for instructor presentations, large screen for the room to ensure visibility for all trainees.	01
6.	High-Speed Internet Router	01
7.	LAN Networking System (Cables and Ports)	01
8.	UPS (Uninterruptible Power Supply)	25
9.	External Hard Drive / Backup Storage	02
10.	Projection Screen	01
11.	Whiteboard / Smart Board	01
12.	Computer Tables	25
13.	Computer Chairs	25
14.	Trainer Table and Chair	02

The following conditions must be fulfilled –

- The institute shall not use the same facilities for any other projects/organizations offering a similar course.
- The institute must provide sufficient evidence to prove ownership of the proposed training equipment.

The list denotes the minimum training equipment and facility required to effectively conduct training for a specific course. Additionally, the institute must ensure that all other necessary

training tools, equipment, and furniture are available to meet the requirement of competency standards (CS) provided by SICIP. For the operation of training course on AI Driven Freelancers, the institute must ensure the availability of at least 80% of the major training equipment and training facilities (according to the CS) to be eligible for SICIP training delivery. If the score is below 80%, the remaining equipment and facilities need to be installed before the commencement of the training.

The institute will also provide all other hand tools and power tools as per CS for 25 trainees. Also, they will arrange adequate seating arrangement and classroom setup for the 25 trainees.
