(IT SECTOR)

Skills for Industry Competitiveness and Innovation Program (SICIP)
Finance Division, Ministry of Finance

COPYRIGHT

The Competency Standards for UI/UX DESIGN (IT sector) is a document for the development of curricula, teaching and learning materials, and assessment tools. It also serves as the document for providing training consistent with the requirements of the industry for individuals who pass through the set standard via assessment. Subsequently, they would be qualified and settled for a relevant job.

This document has been developed to use in training under the **Skills for Industry Competitiveness and Innovation Program (SICIP)** to meet the skills requirements of the IT sector. This document is owned by the Finance Division of the Ministry of Finance of the People's Republic of Bangladesh.

Other interested parties must obtain permission from the owner of this document for reproduction of information in any manner in whole or in part of this Skills Standard, in English or other languages.

INTRODUCTION:

The Skills for Industry Competitiveness and Innovation Program (SICIP) has the overall objective of developing a skilled workforce adept at handling new technologies, especially for emerging industries in Bangladesh. It will expand skills training and strengthen the development of the training ecosystem to address the skills requirements of the SICIP-selected industry sectors. The program aims to (i) increase the technology-oriented skilled workforce across emerging and priority sectors, (ii) promote inclusive skilling and upskilling opportunities for women and socially disadvantaged groups, (iii) incentivize industry-university partnerships to nurture innovation capacity and improve industry competitiveness, and (iv) foster skills for climate-resilient manufacturing processes and green technologies. The program is expected to benefit about 220,000 new and existing workers over a 6-year implementation period from 2024-2029.

The SICIP Program has, therefore, taken the initiative to enhance the employability and productivity of trainees by implementing market-responsive and job-focused training programs through public and private training providers. This will require the development of competency standards for each of the occupations/trades which will provide a structured framework in the learning process to guide training providers, ensure consistent training quality, and create an alignment between the skills provided by the training institutes and the needs of the industry.

This competency standard is therefore developed to improve skills following the job roles and skill sets of the occupation and ensure that the required skills are aligned with industry requirements.

The document details the format, sequencing, wording, and layout of the Competency Standard for an occupation which comprises Units of Competence and its corresponding Elements.

OVERVIEW:

A **Competency Standard** is a written specification of the knowledge, skills, and attitudes required for the performance of a job or occupation or trade corresponding to the standard of performance required in the workplace.

Competency standard:

- provides a consistent and reliable set of components for training, recognizing, and assessing people's skills, and may also have optional support materials.
- enables industry-recognized qualifications to be awarded through direct assessment of workplace competencies
- encourages the development and delivery of flexible training that suits individual and industry requirements
- encourages learning and assessment in a work-related environment which leads to verifiable workplace outcomes.

Competency Standard has been developed by a working group comprised of occupation-specific experts from the industry/institution, relevant consultants of SICIP.

Competency Standards describe the skills, knowledge, and attitude needed to perform effectively in the workplace. Competency Standards acknowledge that people can achieve vocational and technical competency in many ways by emphasizing what the learner can do, not how or where they learned to do it.

With Competency Standards, assessment and training may be conducted at the workplace, at training organization, during regular work, or through work experience, work placement, work simulation or any combination of these.

A Unit of Competency describes a distinct work activity that would normally be undertaken by one person in accordance with industry standards.

Units of Competency are documented in a standard format that comprises:

- Reference to Industry Sector, Occupational Title and Occupational Description
- Unit code
- Unit title
- Unit descriptor
- Unit of Competency
- Elements and performance criteria
- Variables and range statement
- Evidence guides

Together all the parts of a Unit of Competency:

- Describe a work activity
- Guide the assessor in determining whether the candidate is competent.

Identification and validation of units of competency and elements for each occupation were made by experts from Shipbuilding industry in consultative workshop.

The ensuing sections of this document comprise a description of the respective occupation with all the key components of a Unit of Competence:

- An overview of all Units of Competence for the occupation and their corresponding duration required for completion of training.
- The Competency Standards that include the Unit of Competency, Unit Descriptor, Elements and Performance Criteria, Range of Variables, Curricular Content Guide, and Assessment Evidence Guide.

Units & Elements at Glance:**Generic Competencies (36 hrs.)**

Code	Unit of Competency	Elements of Competency	Duration (Hours)
SICIP-IT-UIX-01-G	Work in a team environment	1 Identify team goals and processes 2 Communicate and cooperate with team members 3 Work as a team member 4 Solve problems as a team member	12
SICIP-IT-UIX-02-G	Demonstrate Interpersonal and Communication Skills	1 Apply interpersonal skills at the workplace 2 Understand and communicate information and ideas 3 Prepare and present reports and workplace documents	12
SICIP-IT-UIX-03-G	Support Innovation and Manage Change	1 Identify needs for innovation in the workplace 2 Apply creative approach and solution 3 Support flexible and innovative ways of working 4 Adapt to emerging technological changes and opportunities	12
Total Hour			36

Sector Specific Competencies (24 hrs.)

Code	Unit of Competency	Elements of Competency	Duration (Hours)
SICIP-IT-UIX-01-S	Access Information Using Internet and Electronic Mail	1. Access resources from internet 2. Use and manage electronic mail 3. Use audio/video tools for information transfer	12
SICIP-IT-UIX-02-S	Comply to Ethical Standards in IT Workplace	1. Uphold the requirements of clients 2. Deliver quality products and services 3. Maintain professionalism at workplace 4. Maintain workplace code of conduct	12
Total Hour			24

Occupation Specific (Core) Competencies (300 hrs.)

Code	Unit of Competency	Elements of Competency	Duration (hours)
SICIP-IT-UIX-01-O	Design graphical contents	1. Understand basic graphic design concepts 2. Design infographics using vector-based applications 3. Create a banner using raster-based applications	60
SICIP-IT-UIX-02-O	Understand fundamental concepts of UI/UX design	1. Explain the field of UI/UX and career opportunities 2. Describe the UX design process 3. Describe the UI design process 4. Define the testing process	20
SICIP-IT-UIX-03-O	Analyze user requirements	1. Define and understand business goals 2. Conduct user research 3. Analyze functional requirements 4. Analyze technical constraints and feasibility	40
SICIP-IT-UIX-04-O	Develop wireframes for digital interfaces	1. Describe the wireframing process 2. Apply best practices in wireframe design. 3. Create wireframes	60
SICIP-IT-UIX-05-O	Perform UI design	1. Understand visual design and design consistency 2. Create a design system 3. Apply visual hierarchy and accessibility principles 4. Implement layout grid systems and responsiveness 5. Utilize branding and space	80
SICIP-IT-UIX-06-O	Carry out testing & handover the project	1. Understand the prototype process 2. Conduct A/B testing 3. Perform final data collection and revision 4. Handover and deliver the project	40
Total Hours			00

COMPETENCY STANDARD: UI/UX DESIGN

Generic Competencies

Unit of Competency: WORK IN A TEAM ENVIRONMENT	Nominal Duration: 12 hrs.	Unit Code: SICIP-IT-UIX-01-G
Unit Descriptor: This unit covers the knowledge, skills and attitudes required to work in a team environment. It specifically includes the tasks of identifying team goals and processes, communicating and cooperating with team members, working as a team member and solving problems as a team member.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined>** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Identify team goals and processes	1.1 Team goals and collaborative decision-making processes are identified. 1.2 Role and common goals of the team are defined from available sources of information. 1.3 Team structure, responsibilities and reporting relations are identified from team discussions and other external sources.
2. Communicate and cooperate with team members	1.4 Communication and negotiation skills are applied and maintained in all relevant situations. 1.5 Constructive contributions are made to workplace discussions on such issues as production, quality and safety. 1.6 Goals/ objectives and action plans undertaken in the workplace are communicated promptly. 1.7 Information regarding problems and issues are organized coherently to ensure clear and effective communication. 1.8 Dialogue is initiated with appropriate personnel. 1.9 Communication problems and issues are raised 1.10 Barriers to communication are identified and resolved
3. Work as a team member	1.1 Effective forms of communication are used to interact with team members in discussing team activities and objectives. 1.2 Mutual respect, empathy and active collaboration are demonstrated 1.3 Communication channels are followed as per workplace context.
4. Solve problems as a	1.1 Current and potential problems faced by team are

team member	identified. 1.2 Problems are investigated and analysed. 1.3 Potential solutions of problem are identified. 1.4 Recommendations about possible solutions are developed, documented, ranked and presented to team members for decision.
-------------	---

Range of variables:

Variables	Range (may include but not limited to)
1. Sources of information	1.1 Organizational structures 1.2 Operations Manuals 1.3 Job description 1.4 Standard operating procedures
2. Workplace discussions	1.1 Coordination meetings 1.2 Toolbox discussion 1.3 Peer-to-peer discussion
3. Team members	1.1 Coach / members 1.2 Supervisor / manager 1.3 Peers / colleagues 1.4 Other members /Employee representative of the organization.
4. Workplace context	1.1 National Laws and Statutes 1.2 Standard Operating Procedures 1.3 Workplace Rules and Regulations

Curricular Content Guide

1. Underpinning knowledge	1.1 Sources of information define 1.2 Team structure, role, and responsibility. 1.3 Individual member's roles and responsibilities. 1.4 Effective verbal communication methods 1.5 Communication flow and reporting structures. 1.6 Interpersonal communication skills. 1.7 Organization requirements for written and electronic communication methods 1.8 Communication problems and issues 1.9 Barriers in communication 1.10 Team planning. 1.11 Team meeting procedures. 1.12 Workplace etiquette 1.13 Industry maintenance, service and helpdesk practices, processes and procedures 1.14 Industry standard diagnostic tools 1.15 Malfunctions and resolutions
2. Underpinning skill	1.16 Organizing sources of information 1.17 Identifying the role and responsibility of the team.

	1.18 Identifying roles and responsibilities of individual members. 1.19 Identifying effective verbal communication methods 1.20 Identifying communication flow and reporting structure. 1.21 Identifying interpersonal communication skills 1.22 Complying with organization requirements for the use of written and electronic communication methods 1.23 Negotiation and communication skills 1.24 Participating in team discussion. 1.25 Working as a team member. 1.26 Participating in a variety of workplace discussions 1.27 Effective clarifying and probing skills 1.28 Identifying issues 1.29 Identifying current industry standard diagnostic tools 1.30 Describing common malfunctions and resolutions. 1.31 Determining the root cause of a routine malfunction
3. Underpinning Attitudes	1.32 Commitment to occupational health and safety practices 1.33 Promptness in carrying out activities 1.34 Tidiness and timeliness 1.35 Respect to peers, sub-ordinates and seniors in workplace 1.36 Environmental concern 1.37 Sincerity and honesty
4. Resource implications	The following resources must be provided: 1.38 Workplace (actual or simulated). 1.39 Relevant materials and equipment. 1.40 Relevant specifications or work instructions.

Assessment Evidence Guide

1. Critical aspects of competency	Assessment required evidence that the candidate: 1.1 identified team goals and processes. 1.2 communicated and cooperated with team members 1.3 worked as a team member 1.4 solved problems as a team member
2. Methods of assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical Demonstration 2.3 Oral questioning 2.4 Portfolio (Optional)
3. Context of assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a certified assessor or occupation-specific industry expert.

Unit of Competency: DEMONSTRATE INTERPERSONAL AND COMMUNICATION SKILLS	Nominal Duration: 12 hrs.	Unit Code: SICIP-IT-UIX-02-G
Unit Descriptor: This unit covers the knowledge, skills and attitude required to demonstrate interpersonal and communication skills. It specifically includes the tasks of applying interpersonal skills at the workplace, understanding and communicating information and ideas, preparing and presenting reports and workplace documents.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Apply interpersonal skills at the workplace	1.1 <u>Workplace interpersonal skills</u> are interpreted. 1.2 The impacts of interpersonal skills are described. 1.3 Interpersonal skills are performed in accordance with workplace procedures. 1.4 <u>Ways of improving interpersonal skills</u> are identified and followed.
2. Understand and communicate information and ideas	2.1 <u>Communication tools and equipment</u> are operated, and faults are identified and reported. 2.2 Consultative processes is used to collect and convey information. 2.3 Information systems is used to store, retrieve and update information. 2.4 Information data and information are analyzed and interpreted. 2.5 Information is communicated with individuals and groups.
3. Prepare and present reports and workplace documents	3.1 <u>Workplace documents</u> are interpreted. 3.2 Appropriate format for document is used to meet workplace requirements. 3.3 Document is drafted in accordance with workplace procedures. 3.4 Document is edited and presented in a final version appropriate to task.

Range of variables:

Variables	Range (may include but not limited to)
1. Interpersonal skills	1.1 Effective communication 1.2 Cooperation 1.3 Giving and receiving feedback, feed-forward and professional criticism

	1.4 Pressure handling 1.5 Time management 1.6 Acceptance of diversity 1.7 Supporting and encouraging others 1.8 Inclusiveness 1.9 Problem solving 1.10 Negotiation 1.11 Conflict management
2. Ways of improving interpersonal skills	1.1 Cultivate a positive outlook 1.2 Ask trusted friends or colleagues for constructive criticism 1.3 Control emotions 1.4 Observe other positive interpersonal interactions 1.5 Practice active listening 1.6 Seek out opportunities to build relationships 1.7 Practice empathy
3. Communication tools and equipment	1.1 Telephone 1.2 Internet 1.3 Mobile Phone 1.4 Fax machines 1.5 Two-way radio
4. Workplace documents	1.1 Business Letters 1.2 Business Reports 1.3 Transactional Documents 1.4 Memos 1.5 Forms 1.5.1 Memorandum 1.5.2 Requisitioning Form 1.5.3 Personnel Form 1.6 Safety Report Form

Curricular Content Guide

1. Underpinning knowledge	1.1 Interpersonal skills 1.2 Impacts of interpersonal skills 1.3 Consultative processes 1.4 Workplace documents
2. Underpinning skill	1.5 Demonstrating interpersonal skills 1.6 Collecting workplace information 1.7 Analyzing information and ideas 1.8 Preparing workplace documents 1.9 Presenting workplace documents
3. Underpinning Attitudes	1.10 Commitment to occupational health and safety practices 1.11 Promptness in carrying out activities 1.12 Tidiness and timeliness 1.13 Respect to peers, sub-ordinates and seniors in workplace

	1.14 Environmental concern 1.15 Sincerity and honesty
4. Resource implications	The following resources must be provided: 1.1 Workplace (actual or simulated). 1.2 Relevant materials and equipment. 1.3 Relevant specifications or work instructions.

Assessment Evidence Guide

1. Critical aspects of competency	Assessment required evidence that the candidate: 1.1 applied interpersonal skills at the workplace 1.2 communicated information and ideas 1.3 prepared and presented reports and workplace documents
2. Methods of assessment	Competency should be assessed by: 1.4 Written test 1.5 Practical Demonstration 1.6 Oral Questioning 1.7 Portfolio (Optional)
3. Context of assessment	1.8 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 1.9 Assessment should be done by a certified assessor or occupation-specific industry expert.

Unit of Competency: SUPPORT INNOVATION AND MANAGE CHANGE	Nominal Duration: 12 hrs.	Unit Code: SICIP-IT-UIX-03-G
Unit Descriptor: This unit covers the knowledge, skills, and attitudes required to support innovation and manage change. It specifically includes the tasks of identifying needs for innovation in the workplace, applying creative approaches and solution, supporting flexible and innovative ways of working and adapting to emerging technological changes and opportunities.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Identify needs for innovation in the workplace	1.1. The need for <u>innovation</u> in scope of work is recognized 1.2. The value of <u>innovative practices</u> in the workplace is recognized 1.3. Existing way of working in the workplace are interpreted. 1.4. Drawbacks of existing way of working are identified. 1.5. Benefits of change are identified to make it consistent with organizational requirements 1.6. Realistic timelines and targets for implementation of changes are set.
2. Apply creative approach and solution	2.1. Opportunities and creative approaches to implement innovation practices are identified 2.2. Creative approaches of coworkers pertaining to work practices are analyzed and incorporated 2.3. Innovation in accordance with organizational requirements changes are implemented
3. Support flexible and innovative ways of working	3.1. Maximum innovative opportunities are promoted. 3.2. Work assignments to facilitate innovative work skills are organized. 3.3. Team members are provided with guidance and coaching on innovation in the workplace. 3.4. Models of innovative work practice are provided and discussed 3.5. Appropriate environment for learning and innovation is maintained.
4. Adapt to emerging technological changes and opportunities	4.1. Usages of different <u>technologies</u> is determined based on job requirements. 4.2. Appropriate technology is selected as per work specifications. 4.3. Relevant technology is effectively used in carrying out

	functions. 4.4. Appropriate implementation tools are used as per task requirement.
--	--

Range of variables:

Variables	Range (may include but not limited to)
1. Innovative practices	1.1. Self-directed support to implement new ideas 1.2. Collaborative arrangement to apply new method of working 1.3. Making scope of work more efficient to use new technology
2. Innovation	1.4. New ideas 1.5. Different ideas 1.6. New methods of doing work 1.7. Use of new Technology
3. Technologies	1.8. Office technology 1.9. Industrial technology 1.10. System technology 1.11. Information technology 1.12. Training technology

Curricular Content Guide

1. Underpinning knowledge	1.1. Definition of innovation 1.2. Current practice in own scope of work 1.3. Workplace procedures 1.4. Support required to generate creative ideas 1.5. Difference between innovation and creativity 1.6. Common effects of change and innovation in the workplace 1.7. Industrial and organizational context of change 1.8. Organization's policies, plans, procedures and structure 1.9. Knowledge of resources required by the organization's operations 1.10. Awareness on technology and its function 1.11. Operating instructions 1.12. Applicable software 1.13. Company policy in relation to relevant technology 1.14. Technology adaptability
2. Underpinning skill	1.1. Identifying resources required for creativity and innovation 1.2. Contributing to brainstorming session 1.3. Identifying issues and concerns of one's scope of work 1.4. Encouraging co-workers to generate and develop ideas 1.5. Evaluating potential obstacles to and opportunities for creativity and innovation 1.6. Sharing of best practices related to innovation and

	creativity 1.7. Applying relevant technology 1.8. Using update machine and Software 1.9. Acquiring troubleshooting skills Identifying issues 1.10. Identifying current industry standard diagnostic tools 1.11. Describing common malfunctions and resolutions. 1.12. Determining the root cause of a routine malfunction
3. Underpinning Attitudes	1.13. Commitment to occupational health and safety 1.14. Promptness in carrying out activities 1.15. Sincere and honest to duties 1.16. Eagerness to learn 1.17. Tidiness and timeliness 1.18. Environmental concerns 1.19. Respect for rights of peers and seniors at workplace 1.20. Communication with peers and seniors at workplace
4. Resource implications	The following resources must be provided: 1.21. Workplace (actual or simulated). 1.22. Relevant materials and equipment. 1.23. Relevant specifications or work instructions.

Assessment Evidence Guide

1. Critical aspects of competency	Assessment required evidence that the candidate: 1.1 identified need for innovation in the area of work 1.2 applied creative approach and solution 1.3 supported flexible and innovative ways of working 1.4 adapted to emerging technological changes and opportunities
2. Methods of assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical Demonstration 2.3 Oral Questioning 2.4 Portfolio (Optional)
3. Context of assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a certified assessor or occupation-specific industry expert.

The Sector Specific Competencies

Unit of Competency: ACCESS INFORMATION USING INTERNET AND ELECTRONIC MAIL	Nominal Duration: 12 hrs.	Unit Code: SICIP-IT-UIX-01-S
Unit Descriptor: This unit covers the knowledge, skills and attitude required to access information using internet and electronic mail. It specifically includes the tasks of accessing resources from internet, using and managing electronic mail, and using audio/video tools for information transfer.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Access resources from internet	1.1 Appropriate internet <u>browsers</u> are selected and installed. 1.2 Internet browser is opened and web address / URL is written/selected in /from address bar to access <u>information.</u> 1.3 <u>Search engines</u> are used to access information 1.4 Video / Information are Shared /downloaded / uploaded from / to web site/ <u>social media.</u> 1.5 <u>Web based resources</u> are used. 1.6 Etiquette (or web etiquette) principles are searched and followed.
2. Use and manage electronic mail	2.1 <u>Email services</u> are identified and selected to create a new email address 2.2 Mail account is created. 2.3 Document is prepared, attached and sent to different types of recipient. 2.4 Mail is read, forwarded, replied and deleted as per requirement. 2.5 Custom email folders are created and manipulated. 2.6 Mail message is printed.
2. Use audio/video tools for information transfer	2.1 Audio and video tools are identified 2.2 Apps using audio/video tools are identified 2.3 Information is transferred with apps using audio/video tools

Range of Variables

Variable	Range May include but not limited to:
-----------------	---

1. Browsers	1.1 Mozilla Firefox 1.2 Google chrome 1.3 Internet explorer 1.4 Opera
2. Information	2.1. Text information 2.2. Graphics 2.3. Video
3. Search engines	3.1. Google 3.2. Yahoo 3.3. AltaVista 3.4. Msn 3.5. Bing
4. Social media.	4.1 Face book 4.2 Twitter 4.3 LinkedIn 4.4 YouTube
5. Web based services	5.1 Drive 5.2 Calendar 5.3 Map 5.4 Translator 5.5 Docs 5.6 Search
6. Email services	6.1 Free mail services –Gmail, Yahoo, Hotmail 6.2 Web mail services.

Curricular Content Guide

1. Underpinning Knowledge	1.1 Internet 1.2 www 1.3 web site 1.4 web address 1.5 URL 1.6 Web browsers 1.7 Search engines 1.8 Information 1.9 Social media 1.10 Web based services 1.11 Folder manipulation
2. Underpinning Skills	2.1 Accessing and sharing resources from internet 2.2 Downloading /uploading file, documents and video from /to web sites 2.3 Sending and receiving mail through mail service. 2.4 Using audio/video tools to share information
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincere and honest to duties 3.4 Environmental concerns

	3.5 Eagerness to learn 3.6 Tidiness and timeliness 3.7 Respect for rights of peers and seniors in workplace 3.8 Communication with peers, sub-ordinates and seniors in workplace
4. Resource Implications	4.1 Relevant tools, Equipment, software and facilities needed to perform the activities. 4.2 Required learning materials.

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1 accessed resources from internet. 1.2 used and managed electronic mail 1.3 used audio/video tools for information transfer
2. Methods of Assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical Demonstration 2.3 Oral Questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a certified assessor or occupation-specific industry expert.

Unit of Competency: COMPLY TO ETHICAL STANDARDS IN IT WORKPLACE	Nominal Duration: 12 hrs.	Unit Code: SICIP-IT-UIX-02-S
Unit Descriptor: This unit covers the knowledge, skills and attitudes required to comply to ethical standards in IT workplace. It specifically includes the tasks of upholding the requirements of clients, delivering quality products and services, maintaining professionalism at workplace and maintaining workplace code of conduct.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Uphold the requirements of clients	1.1 Clients' requirements are identified. 1.2 Confidentiality of information is maintained in accordance with workplace policies/organizational policies/ <u>national legislation</u> . 1.3 Potential conflicts of interest are identified and involved parties of potential conflicts are notified. 1.4 Proprietary rights of client/customer are asserted.
2. Deliver quality products and services	2.1 Products and services are provided according to the clients' requirements. 2.2 Work is completed as per standards. 2.3 Quality processes are implemented when developing products and services.
3. Maintain professionalism at workplace	3.1 Work processes are delivered as per standards. 3.2 Skills, knowledge and qualifications are presented in a professional manner. 3.3 Services and products developed by self and others are delivered as per workplace standard. 3.4 Unbiased and objective information are provided to clients. 3.5 Realistic estimates for time, cost and delivery of outputs are presented during negotiation.
4. Maintain workplace code of conduct.	4.1 Workplace code of conduct are interpreted 4.2 Workplace code of conduct is followed.

Range of Variables

Variable	Range
	May include but not limited to:
1. National legislation	1.1 Industry/sector code of ethics 1.2 International and national guidelines for customer protection 1.3 International and national copyright laws

	1.4 Occupational health and safety requirements 1.5 Intellectual property rights law 1.6 Legal and regulatory policies in the information technology sector 1.7 Fire safety rules and regulations
--	--

Curricular Content Guide

1. Underpinning Knowledge	1.1 Corporate code of confidentiality of information organizational policies, national legislation and workplace policies in relation to IT sector 1.2 Law and regulations pertaining to proprietary rights 1.3 Quality processes for products and services 1.4 Procedure of provided to client information 1.5 Method of estimating for time, cost and delivery products and services 1.6 Workplace code of conduct in IT sector
2. Underpinning Skills	2.1 Upholding confidentiality of information in accordance with organizational policies, national legislation and workplace policies 2.2 Asserting proprietary rights of client/customer 2.3 Completing work in accordance with industry and international standards 2.4 Implementing quality processes when developing products and services 2.5 Delivering correctly services and products developed by self and others 2.6 Providing unbiased and objective information are to clients. 2.7 Presenting realistic estimates for time, cost and delivery of outputs during negotiation 2.8 Following workplace code of conduct
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety practices 3.2 Environmental concerns 3.3 Eagerness to learn 3.4 Tidiness and timeliness 3.5 Concern to proper use of tools 3.6 Orderliness
4. Resource Implications	4.1 Workplace (simulated or actual) 4.2 Pens 4.3 Papers 4.4 Work books 4.5 Operation and maintenance manuals

Assessment Evidence Guide

1. Critical Aspects of	Assessment required evidence that the candidate:
------------------------	--

Competency	1.1 uphold the requirements of clients. 1.2 delivered quality products and services 1.3 maintained professionalism at workplace 1.4 maintained workplace code of conduct.
2. Methods of Assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical Demonstration 2.3 Oral Questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a certified assessor or occupation-specific industry expert.

The Occupation Specific Competencies

Unit of Competency: DESIGN GRAPHICAL CONTENTS	Nominal Duration: 60 Hrs.	Unit Code: SICIP-IT-UIX-1-O
Unit Descriptor: This unit of competency covers the essential skills and knowledge required to design graphical contents. It specifically includes the tasks of understanding basic graphic design concepts, designing infographics using vector-based applications and creating a banners using raster-based applications.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Understand basic graphic design concepts	1.1 The <u>fundamental principles of graphic design</u> are identified and explained in relation to UI/UX design. 1.2 The application of design principles is explained in UI/UX contexts. 1.3 Design concepts are explained in user interfaces and web design. 1.4 Design elements are explained in different mediums to maintain consistency and meet design objectives.
2. Design infographics using vector-based applications	2.1 <u>Infographic component</u> is selected, ensuring it suits the audience and purpose. 2.2 <u>Vector-based application</u> is effectively used to create the infographic. 2.3 Data is gathered and organized ensuring it is accurate and suitable for the infographic's objective. 2.4 The infographic layout is planned and designed. 2.5 A suitable color palette is selected to enhance the <u>visual elements</u> and readability of the infographic. 2.6 The infographic is reviewed to ensure it is effective and visually engaging.
3. Create a banner using raster-based applications	3.1 The purpose and dimensions of the <u>banner type</u> are defined based on the intended platform. 3.2 The document is set up correctly in a <u>raster-based application</u> to match the banner's specifications. 3.3 Necessary assets for the banner design are gathered and prepared for use. 3.4 The layout of the banner is designed, ensuring visual balance and alignment with the brand guidelines. 3.5 Text and graphics are added appropriately to communicate the message clearly and attractively. 3.6 The banner is refined and optimized for its intended use, ensuring it is ready for digital output.

Range of Variables

Variable	Range (Includes but not limited to):
1. Principles of graphic design	1.1 Balance 1.2 Contrast 1.3 Hierarchy 1.4 Alignment 1.5 Proximity 1.6 Repetition
2. Infographic Components	2.1 Icons 2.2 Charts 2.3 Text 2.4 Color Schemes 2.5 Typography 2.6 Lettering
3. Vector-Based Application	3.1 Adobe Illustrator 3.2 InDesign 3.3 Figma
4. Visual elements	4.1 Shape 4.2 Color 4.3 Text
5. Banner Type	5.1 Web Banners 5.2 Social Media Banners 5.3 Promotional Banners
6. Raster-Based Application	6.1 Adobe Photoshop 6.2 GIMP 6.3 Affinity Photo

Curricular Content Guide

1. Underpinning Knowledge	1.1 Basic graphic design principles and their application in UI/UX 1.2 Differences between vector and raster graphics 1.3 File formats for digital design (JPEG, PNG, SVG, PSD, AI, etc.) 1.4 Color theory and typography for visual communication 1.5 Infographic design principles and best practices 1.6 Banner design techniques and optimization strategies
2. Underpinning Skills	2.1 Applying fundamental design principles 2.2 Using vector-based applications to create infographics 2.3 Using raster-based applications to create banners 2.4 Selecting appropriate colors, typography, and visual hierarchy 2.5 Refining and optimizing graphical content
3. Underpinning Attitudes	3.1 Creativity and attention to detail 3.2 Eagerness to experiment and iterate

	3.3 Patience and precision in design work 3.4 Commitment to maintaining high design standards
4 Resource Implications	4.1 Computer with relevant software installed 4.2 Access to vector-based and raster-based applications 4.3 Design briefs and project guidelines 4.4 Digital assets (icons, images, fonts)

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1 understand basic graphic design principles 1.2 designed infographics using vector-based applications 1.3 created a banner using raster-based applications
2. Methods of Assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical Demonstration 2.3 Oral Questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a certified assessor or occupation-specific industry expert.

Unit of Competency: UNDERSTAND FUNDAMENTAL CONCEPTS OF UI/UX DESIGN	Nominal Duration: 20 Hrs.	Unit Code: SICIP-IT-UIX-2-O
Unit Descriptor: This unit of competency covers the understand the fundamental concepts of UI/UX Design. It specifically includes the tasks of explaining the field of UI/UX and career opportunities, describing the UX design process, describing the UI design process and defining the testing process.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Explain the field of UI/UX and career opportunities	1.1 The concept and significance of UI/UX are explained. 1.2 <u>Career opportunities</u> in UI/UX design are identified. 1.3 The fundamental principles of UI/UX are described. 1.4 The role of UI/UX in product development is explained. 1.5 The difference between UI and UX is explained with examples.
2. Describe the UX design process	2.1 Common <u>methodologies used in UI/UX design</u> are described, highlighting their importance in the design process. 2.2 The thinking process in UX design is described. 2.3 Existing web and mobile applications are interpreted for usability, ensuring ease of navigation and user satisfaction. 2.4 <u>User research methods</u> are described to gather valuable insights for design improvements. 2.5 The <u>Human-Centered Design approach</u> is explained, emphasizing its focus on designing solutions that meet user needs and goals.
3. Describe the UI design process	3.1 The thinking process in the <u>UI design component</u> is described, focusing on the stages of conceptualization, visual design, and implementation. 3.2 Content accessibility principles are explained. 3.3 Current trends and industry best practices in UI design are described. 3.4 <u>Color and typography principles</u> are explained in UI design.
4. Define the testing process	4.1 The concept of <u>prototyping tools</u> in UI design is defined. 4.2 The <u>testing methods</u> for usability are described. 4.3 Data collection is described, ensuring that it is gathered through methods. 4.4 <u>Types of feedback</u> are identified, including qualitative feedback and quantitative feedback.

Range of Variables

Variable	Range (Includes but not limited to):
1. Career opportunities	1.1 UI Designer 1.2 UX Researcher 1.3 UX Developer
2. Methodologies used in UI/UX design	2.1 Design Thinking 2.2 Lean UX 2.3 Agile UX 2.4 Double Diamond Model
3. User Research Methods	3.1 Surveys 3.2 Interviews 3.3 Usability Testing 3.4 Analytics 3.5 Heatmaps
4. Human-Centered Design approach	4.1 Empathy 4.2 Define 4.3 Ideate 4.4 Prototype 4.5 Test
5. UI Design Components	5.1 Layout 5.2 Navigation 5.3 Buttons 5.4 Forms 5.5 Icons 5.6 Images
6. Color and Typography Principles	6.1 Contrast 6.2 Readability 6.3 Accessibility 6.4 Branding
7. Prototyping Tools	7.1 Figma 7.2 Adobe XD 7.3 Sketch 7.4 InVision
8. Testing Methods	8.1 A/B Testing 8.2 Usability Testing 8.3 Eye Tracking 8.4 Feedback Surveys
9. Types of feedback	9.1 Refinement and iteration 9.2 Finalize feedback

Curricular Content Guide

1. Underpinning Knowledge	1.1 Basic concepts and importance of UI/UX design 1.2 Differences and relationship between UI and UX 1.3 UI/UX design methodologies and best practices 1.4 Human-Centered Design (HCD) approach 1.5 UX design process: research, ideation, wireframing,
---------------------------	---

	prototyping 1.6 UI design process: layout, typography, color theory, accessibility 1.7 Industry trends and evolving best practices 1.8 Usability testing and data collection techniques
2. Underpinning Skills	2.1 Identifying career opportunities in UI/UX design 2.2 Differentiating between UI and UX roles 2.3 Conducting user research and analysis 2.4 Applying design thinking principles 2.5 Creating UI elements with color and typography principles 2.6 Performing usability testing and analyzing feedback
3. Underpinning Attitudes	3.1 Curiosity and willingness to learn 3.2 User-focused problem-solving mindset 3.3 Attention to detail in design and testing 3.4 Adaptability to industry trends and feedback
4 Resource Implications	4.1 Computers with internet access 4.2 UI/UX design software (Figma, Adobe XD, Sketch, InVision) 4.3 Access to existing web and mobile applications for analysis 4.4 User testing tools (Hotjar, Google Analytics, Maze)

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1 explained the field of UI/UX and career opportunities 1.2 described the UX design process 1.3 described the UI design process 1.4 defined the testing process
2. Methods of Assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical Demonstration 2.3 Oral Questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a certified assessor or occupation-specific industry expert.

Unit of Competency: ANALYZE USER REQUIREMENTS	Nominal Duration: 40 Hrs.	Unit Code: SICIP-IT-UIX-3-O
Unit Descriptor: This unit of competency covers the essential skills and knowledge required to analyze user requirements for UI/UX design. It specifically includes the tasks of defining and understanding business goals, conducting user research, analyzing functional requirements, and analyzing technical constraints and feasibility.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Define and understand business goals	1.1 <u>Business goals</u> are defined in relation to UI/UX projects, ensuring they align with company objectives and user needs. 1.2 Key characteristics of effective business goals are described. 1.3 The significance of business goals in UI/UX design is explained.
2. Conduct user research	2.1 <u>User research methods</u> are selected and applied to gather relevant insights from target users. 2.2 Data from user research is collected and organized appropriately. 2.3 User personal and user journey maps are created based on research findings. 2.4 The needs and behaviors of users are identified and analyzed to inform UI/UX design strategies. 2.5 Findings from user research are documented and shared with relevant stakeholders.
3. Analyze functional requirements	3.1 <u>Functional requirements</u> and <u>Non-functional requirements</u> are identified and defined. 3.2 Use cases and user stories are analyzed to determine key functional features. 3.3 Priorities for functional requirements are set based on user impact, feasibility, and business objectives. 3.4 The relationship between functional requirements and UI/UX design is understood. 3.5 Feedback from stakeholders is gathered and used to refine and validate the functional requirements.
4. Analyze technical constraints and feasibility	4.1 <u>Technical constraints</u> are identified and evaluated to ensure alignment with design goals. 4.2 The feasibility of implementing design solutions is analyzed. 4.3 Stakeholder input is considered to assess the technical requirements. 4.4 The impact of technical constraints on user experience

	is assessed to ensure that user needs are balanced with <u>technical limitations</u> .
	4.5 Solutions are proposed to overcome technical constraints.

Range of Variables

Variable	Range (Includes but not limited to):
1. Business Goals	1.1 User Engagement 1.2 Brand Awareness 1.3 Conversion Rates 1.4 Revenue Growth
2. User Research Methods	2.1 Surveys 2.2 Interviews 2.3 Focus Groups 2.4 User Testing 2.5 Analytics
3. Functional Requirements	3.1 Navigation 3.2 Forms 3.3 User Authentication 3.4 Search Functionality
4. Non-Functional Requirements	4.1 Performance 4.2 Security 4.3 Usability 4.4 Accessibility
5. Technical Constraints	5.1 Platform Limitations 5.2 Application Processing Interface (API) Restrictions 5.3 Budget 5.4 Development Time
6. Technical Limitations	6.1 Software Compatibility 6.2 Hardware Requirements 6.3 Scalability 6.4 Maintenance

Curricular Content Guide

1. Underpinning Knowledge	1.1 Importance of business goals in UI/UX 1.2 SWOT analysis 1.3 Different types of business goals and their impact on design 1.4 User research methods and best practices 1.5 Differences between functional and non-functional requirements 1.6 Understanding of technical constraints in digital products 1.7 Technical feasibility assessment and its importance
2. Underpinning Skills	2.1 Identifying and analyzing business goals

	2.2 Conducting user research using appropriate methods 2.3 Defining and documenting functional requirements 2.4 Assessing technical constraints and feasibility 2.5 Communicating research findings and technical limitations
3. Underpinning Attitudes	3.1 Analytical thinking and problem-solving mindset 3.2 User-centered approach to requirement gathering 3.3 Attention to detail in research and analysis 3.4 Pro-activeness in identifying feasibility challenges
4 Resource Implications	4.1 Computers with internet access 4.2 User research tools (Google Forms, Typeform, Hotjar, Maze) 4.3 Project management tools (JIRA, Trello, Notion) 4.4 Access to business case studies and technical reports

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1 defined and understand business goals 1.2 conducted user research 1.3 analyzed functional requirements 1.4 analyzed technical constraints and feasibility
2. Methods of Assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical Demonstration 2.3 Oral Questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a certified assessor or occupation-specific industry expert.

Unit of Competency: DEVELOP WIREFRAMES FOR DIGITAL INTERFACES	Nominal Duration: 60 Hrs.	Unit Code: SICIP-IT-UIX-4-O
Unit Descriptor: This unit of competency covers the essential skills and knowledge required to develop wireframes for digital interfaces. It specifically includes the tasks of describing the wireframing process, applying best practices in wireframe design and creating wireframes.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Describe the wireframing process	1.1 The importance of understanding user goals in wireframing is explained, ensuring that the wireframe aligns with user needs and expectations. 1.2 Clickable interactions are explained to simulate user navigation. 1.3 Prototypes for user flows and usability are identified. 1.4 Wireframes are identified for usability and efficiency. 1.5 A <u>responsive process</u> is identified, ensuring that wireframes adapt to different devices and screen sizes.
2. Apply best practices in the wireframe design.	2.1 Best practices in wireframe design are applied to ensure effective user interaction. 2.2 Design consistency is maintained across wireframes by using standard layout grids, typography, and color schemes. 2.3 Hierarchy and visual flow are applied in wireframe design. 2.4 Feedback mechanisms are incorporated into wireframes to simulate real user interactions. 2.5 Responsive design principles are applied to different devices and screen sizes. 2.6 <u>Wireframe components</u> are designed to be responsive across different screen sizes.
3. Create wireframes	3.1 User <u>goals and functional requirements</u> are gathered and documented. 3.2 The concept and purpose of different <u>wireframe types</u> are explained. 3.3 Basic wireframe structures are sketched using the <u>appropriate method</u> to visualize the design concept. 3.4 Low-fidelity wireframes are created to outline user flows and layouts. 3.5 <u>Digital tools</u> are used to create detailed wireframes with accurate spacing, typography, and design elements to represent the interface clearly. 3.6 Interactive elements are added to wireframes to create

	functional prototypes.
--	------------------------

Range of Variables

Variable	Range (Includes but not limited to):
1. Responsive process	1.1 Grid layout • 8 columns • 9 columns • 12 columns 1.2 Manual • Ruler • Smart guides
2. Wireframe Components	2.1 Headers 2.2 Footers 2.3 Navigation Menus 2.4 Buttons 2.5 Forms 2.6 Grids
3. User goals and functional requirements	3.1 Navigation Flow 3.2 Content Placement 3.3 Call-to-Action (CTA)
4. Wireframe Types	4.1 Low-fidelity wireframes 4.2 High-fidelity wireframes 4.3 Clickable prototypes
5. Appropriate method	5.1 Manually 5.2 Digitally
6. Digital Tools	6.1 Miro 6.2 MindMeister 6.3 Figma

Curricular Content Guide

1. Underpinning Knowledge	1.1 Importance of wireframes in UI/UX design 1.2 Differences between low-fidelity and high-fidelity wireframes 1.3 Wireframing tools and their usage 1.4 UX/UI principles applied in wireframing 1.5 Prototyping and interactive wireframe concepts 1.6 Best practices for designing effective wireframes
2. Underpinning Skills	2.1 Sketching low-fidelity wireframes 2.2 Creating digital wireframes using industry tools 2.3 Adding interactive elements to prototypes 2.4 Evaluating and iterating wireframe designs 2.5 Ensuring responsive design for different devices
3. Underpinning Attitudes	3.1 Attention to detail in wireframe design 3.2 User-centered approach to structuring interfaces

	3.3 Willingness to iterate and improve based on feedback 3.4 Commitment to following design best practices
4 Resource Implications	4.1 Computers with internet access 4.2 Wireframing and prototyping tools (Figma, Adobe XD, Sketch, Balsamiq) 4.3 Access to user personas and project briefs 4.4 Paper and sketching materials for initial layouts

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1 described the wireframing process 1.2 applied best practices in the wireframes design 1.3 created wireframes
2. Methods of Assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical Demonstration 2.3 Oral Questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a certified assessor or occupation-specific industry expert.

Unit of Competency: PERFORM UI DESIGN	Nominal Duration: 80 Hrs.	Unit Code: SICIP-UIUX-DES-5-O
Unit Descriptor: This unit of competency covers the essential skills and knowledge required to perform UI (User Interface) design. It specifically includes the tasks of understanding visual design and design consistency, creating a design system, applying visual hierarchy and accessibility principles, implemented layout grid systems and responsiveness, utilizing branding and spaces.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Understand visual design and design consistency	1.1 The concept of <u>visual design</u> is defined. 1.2 The importance of design consistency in UI is explained, emphasizing its role in user experience and usability. 1.3 The relationship between visual design and design consistency is described.
2. Create a design system	2.1 The concept of a <u>design system</u> is defined. 2.2 The benefits of creating a design system are explained, highlighting consistency, efficiency, and scalability in UI design. 2.3 The <u>key steps</u> to creating a design system are outlined. 2.4 Key considerations in developing a design system are discussed.
3. Apply visual hierarchy and accessibility principles	3.1 The concept of <u>visual hierarchy</u> is defined, focusing on the arrangement of elements such. 3.2 The importance of <u>accessibility in UI design</u> is explained. 3.3 The relationship between visual hierarchy and accessibility is described. 3.4 <u>Accessibility features</u> are integrated with visual hierarchy to ensure a seamless and inclusive user experience. 3.5 Best practices for <u>ensuring accessibility</u> are applied to optimize the design for diverse users.
4. Implement layout grid systems and responsiveness	4.1 The concept of <u>layout grid systems</u> is defined to structure content and maintain design consistency. 4.2 The importance of <u>responsiveness in UI design</u> is explained to improve usability. 4.3 The relationship between layout grid systems and responsiveness is analyzed. 4.4 Responsive design principles are applied to various devices and user contexts.

	4.5 Testing and validation are performed to ensure that layout grid systems.
5. Utilize branding and spaces	5.1 The concept of <u>branding in UI design</u> is defined to reflect a company's identity. 5.2 The importance of <u>white space and negative space</u> is explained. 5.3 The relationship between branding, white space, and negative space is described to user-friendly design. 5.4 Best practices for incorporating branding and space are applied to create a visually balanced, consistent, and engaging user experience.

Range of Variables

Variable	Range (Includes but not limited to):
1. Visual Design	1.1 Color Theory 1.2 Typography 1.3 Contrast 1.4 Alignment 1.5 Consistency
2. Design System	2.1 UI Components 2.2 Design Tokens 2.3 Typography Guidelines 2.4 Color Palette
3. Key steps	3.1 Research 3.2 Component creation 3.3 Documentation
4. Visual Hierarchy	4.1 Contrast 4.2 Scale 4.3 Spacing 4.4 Typography Weight 4.5 Color Emphasis
5. Accessibility in UI design	5.1 Web Content Accessibility Guidelines (WCAG) Standards 5.2 Color Contrast 5.3 Readability 5.4 Keyboard Navigation
6. Accessibility features	6.1 Keyboard navigation 6.2 Screen reader compatibility
7. Ensuring accessibility	7.1 High contrast colors 7.2 Clear fonts 7.3 Responsive design
8. Layout Grid Systems	8.1 Fixed Grid 8.2 Fluid Grid 8.3 Modular Grid 8.4 Column-based Grid
9. Responsiveness in UI	9.1 Flexible Layouts

design	9.2 Media Queries 9.3 Adaptive Design 9.4 Breakpoints
10. Branding in UI Design	10.1 Logo 10.2 Color Scheme 10.3 Typography 10.4 Brand Identity
11. White Space & Negative Space	11.1 Margins 11.2 Paddings 11.3 Line Spacing 11.4 Content Spacing

Curricular Content Guide

1. Underpinning Knowledge	1.1 Principles of visual design and UI consistency 1.2 Importance and benefits of design systems 1.3 Visual hierarchy techniques for UI 1.4 Accessibility standards and best practices 1.5 Layout grid systems and responsive UI principles 1.6 Branding and its role in user interface design 1.7 Effective use of white space and negative space
2. Underpinning Skills	2.1 Applying design principles to UI components 2.2 Creating and implementing a design system 2.3 Enhancing accessibility through UI choices 2.4 Designing with layout grids for structure and responsiveness 2.5 Balancing branding elements with white space for a clean UI
3. Underpinning Attitudes	3.1 Attention to detail in UI design 3.2 User-centered approach to accessibility and branding 3.3 Commitment to maintaining design consistency 3.4 Awareness of industry trends and best practices
4 Resource Implications	4.1 Computers with internet access 4.2 UI design software (Figma, Adobe XD, Sketch) 4.3 Access to design system libraries and UI guidelines 4.4 Case studies of UI design systems

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1 understand visual design and design consistency 1.2 created a design system 1.3 applied visual hierarchy and accessibility principles 1.4 implemented layout grid systems and responsiveness 1.5 utilized branding and spaces
2. Methods of Assessment	Competency should be assessed by:

	2.1 Written test 2.2 Practical Demonstration 2.3 Oral Questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a certified assessor or occupation-specific industry expert.

Unit of Competency: CARRY OUT TESTING & HANDOVER THE PROJECT	Nominal Duration: 40 Hrs.	Unit Code: SICIP-IT-UIX-6-O
Unit Descriptor: This unit of competency covers the essential skills and knowledge required to carry out testing and handover the project. It specifically includes the tasks of understanding the prototyping process, conducting A/B testing, perform final data collection and revision and handover and deliver the project.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Understand the prototyping process	1.1 The purposes of prototyping in UI/UX design are described. 1.2 <u>Prototyping tools</u> are identified, emphasizing their role in creating interactive prototypes for testing and user engagement. 1.3 <u>Prototyping techniques</u> are described to test ideas and concepts. 1.4 The benefits of using interactive prototypes in UI/UX design are explained.
2. Conduct A/B testing	2.1 <u>A/B testing elements</u> are identified. 2.2 The A/B testing process is outlined, focusing on steps like hypothesis creation, test design, data collection, and result analysis. 2.3 Key elements suitable are identified for A/B testing to evaluate their impact on user engagement and conversion rates. 2.4 The benefits of A/B testing for improving UI/UX are described. 2.5 Key considerations in A/B testing are discussed to ensure valid and reliable results for effective decision-making.
3. Perform final data collection and revision	3.1 <u>Final data collection methods</u> are identified and described to gather relevant feedback and insights for design improvement. 3.2 The necessity of revision in UI/UX design is comprehended. 3.3 The relationship between final data collection and revision is explained. 3.4 Applications of collection methods are analyzed to identify revisions required. 3.5 Revision feedback is implemented, ensuring that changes are made effectively.
4. Handover and deliver the project	4.1 Logistics and supply chain considerations for UI/UX projects are discussed.

	4.2 <u>Project management strategies</u> for UI/UX project delivery are explained to ensure smooth handover and delivery. 4.3 Software and technology <u>delivery considerations</u> for project handover are discussed.
--	--

Range of Variables

Variable	Range (Includes but not limited to):
1. Prototyping Tools	1.1 Figma 1.2 Adobe XD 1.3 Sketch 1.4 InVision 1.5 Axure RP
2. Prototype techniques	2.1 Low-fidelity 2.2 High-fidelity 2.3 Interactive
3. A/B Testing Elements	3.1 Buttons 3.2 Colors 3.3 Typography 3.4 Layout 3.5 Call-to-Action (CTA)
4. Final Data Collection Methods	4.1 User Feedback 4.2 Usability Testing 4.3 Analytics 4.4 Heatmaps
5. Project Management strategies	5.1 Trello 5.2 Asana 5.3 JIRA 5.4 Notion 5.5 Monday.com
6. Delivery Considerations	6.1 Documentation 6.2 Training 6.3 Deployment 6.4 Handover Meetings

Curricular Content Guide

1. Underpinning Knowledge	1.1 Importance of prototyping in UI/UX 1.2 Different types of prototypes and their applications 1.3 A/B testing principles and best practices 1.4 Final data collection methods for usability evaluation 1.5 Revision strategies for UI/UX improvements 1.6 Project handover and delivery considerations 1.7 Software, logistics, and training needs for UI/UX project deployment
2. Underpinning Skills	2.1 Creating and refining UI/UX prototypes

	2.2 Conducting A/B testing and analyzing results 2.3 Collecting and interpreting final usability data 2.4 Revising designs based on collected data 2.5 Preparing UI/UX projects for final delivery and handover
3. Underpinning Attitudes	3.1 Data-driven decision-making approach 3.2 Willingness to iterate and improve UI/UX designs 3.3 Attention to detail in testing and revision 3.4 Commitment to delivering high-quality user experiences
4 Resource Implications	4.1 Computers with internet access 4.2 UI/UX testing and prototyping tools (Figma, Adobe XD, Sketch, InVision) 4.3 A/B testing platforms (Google Optimize, Optimizely, VWO) 4.4 Access to user testing and data analytics tools

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1 understand the prototyping process 1.2 conducted A/B testing 1.3 performed final data collection and revision 1.4 handover and delivered the project
2. Methods of Assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical Demonstration 2.3 Oral Questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a certified assessor or occupation-specific industry expert.

End of the Competency Standard

Workshop/Lab Facility Standard

Course Name:	UI/UX Design (IT Sector)
Number of Trainees:	25

Course-wise Training Space (Theoretical Classroom, Workshop/ Lab/ Classroom cum Workshop):

- Classroom – 350 sft (33 sqm)
- Workshop/ lab – 800 sft (75 sqm)
- OR
- Classroom cum workshop – 1000 sft (93 sqm)

Major Training Equipment and Training Facilities:

SI. No.	Major Equipment and Training facilities	Required facilities
1.	Wiring Boards/Trainer Board	01
2.	Computers/Laptop: (Minimum Intel Core i5 processor, 8GB RAM (16GB preferred), 500GB SSD storage (1TB preferred), High-resolution monitors (24-inch minimum, with color accuracy).	25
3.	Projector: High-resolution projector (HD or 4K) for instructor presentations, Large screen for the room to ensure visibility for all trainees.	01
4.	UI/UX Design Tools: Adobe XD or Sketch (latest version), Figma (cloud-based for collaboration), InVision or Axure RP for prototyping.	03
5.	Adobe Photoshop, Illustrator (latest version).	01
6.	Wireframing Tools: Balsamiq or similar.	01
7.	Web Development Tools (optional): Sublime Text, Visual Studio Code for basic front-end coding (HTML, CSS, JavaScript).	01

The following conditions must be fulfilled –

- The institute shall not use the same facilities for any other projects/organizations offering a similar course.
- The institute must provide sufficient evidence to prove ownership of the proposed training equipment.

The list denotes the minimum training equipment and facility required to effectively conduct training for a specific course. Additionally, the institute must ensure that all other necessary

training tools, equipment, and furniture are available to meet the requirement of competency standards (CS) provided by SICIP.

For the operation of training course on UI/UX (IT Sector), the institute must ensure the availability of at least 80% of the major training equipment and training facilities (according to the CS) to be eligible for SICIP training delivery. If the score is below 80%, the remaining equipment and facilities need to be installed before the commencement of the training.

The institute will also provide all other hand tools and power tools as per CS for 25 trainees. Also, they will arrange adequate seating arrangement and classroom setup for the 25 trainees.
