COPYRIGHT

The Competency Standards for **AI Tool Management & Prompt Engineering** is designed to guide the development of curricula, teaching materials, and assessment tools. It also serves as a framework for providing industry-aligned training, ensuring that individuals meeting the prescribed standards through assessments are qualified to secure relevant employment opportunities.

This document has been developed to use in training under the **Skills for Industry Competitiveness and Innovation Program (SICIP)** to meet the skills requirements of the Energy sector. This document is owned by the Finance Division of the Ministry of Finance of the People's Republic of Bangladesh.

While public and private institutions are permitted to use the information from this standard for activities that benefit Bangladesh, other parties must seek prior permission from the document's owner for reproducing its content, either partially or entirely, in English or other languages.

INTRODUCTION:

The Skills for Industry Competitiveness and Innovation Program (SICIP) has the overall objective of developing a skilled workforce adept at handling new technologies, especially for emerging industries in Bangladesh. It will expand skills training and strengthen the development of the training ecosystem to address the skills requirements of the SICIP-selected industry sectors. The program aims to (i) increase the technology-oriented skilled workforce across emerging and priority sectors, (ii) promote inclusive skilling and upskilling opportunities for women and socially disadvantaged groups, (iii) incentivize industry-university partnerships to nurture innovation capacity and improve industry competitiveness, and (iv) foster skills for climate-resilient manufacturing processes and green technologies. The program is expected to benefit about 220,000 new and existing workers over a 6-year implementation period from 2024-2029.

The SICIP Program has, therefore, taken the initiative to enhance the employability and productivity of trainees by implementing market-responsive and job-focused training programs through public and private training providers. This will require the development of competency standards for each of the occupations/trades which will provide a structured framework in the learning process to guide training providers, ensure consistent training quality, and create an alignment between the skills provided by the training institutes and the needs of the industry.

The Competency Standard also suggests integration of YouTube or similar platforms or downloaded clips into classroom practice to ensure simulated creation of the contents so that learners are exposed to visual demonstrations before classroom instruction or practical session, which aligns with modern learning preference and supports flipped classroom models.

This competency standard is therefore developed to improve skills following the job roles and skill sets of the occupation and ensure that the required skills are aligned with industry requirements.

The document details the format, sequencing, wording, and layout of the Competency Standard for an occupation which comprises Units of Competence and its corresponding Elements.

OVERVIEW:

A **Competency Standard** is a written specification of the knowledge, skills, and attitudes required for the performance of a job or occupation or trade corresponding to the standard of performance required in the workplace.

Competency standard:

- provides a consistent and reliable set of components for training, recognizing, and assessing people's skills, and may also have optional support materials.
- enables industry-recognized qualifications to be awarded through direct assessment of workplace competencies
- encourages the development and delivery of flexible training that suits individual and industry requirements
- encourages learning and assessment in a work-related environment which leads to verifiable workplace outcomes.

Competency Standards are developed by a working group comprised of national and international process experts and the participation of experts from the industry to identify the competencies required of an occupation in a particular sector.

Competency Standards describe the skills, knowledge, and attitude needed to perform effectively in the workplace. Competency Standards acknowledge that people can achieve vocational and technical competency in many ways by emphasizing what the learner can do, not how or where they learned to do it.

With Competency Standards, assessment and training may be conducted at the workplace, at training organization, during regular work, or through work experience, work placement, work simulation or any combination of these.

A Unit of Competency describes a distinct work activity that would normally be undertaken by one person in accordance with industry standards.

Units of Competency are documented in a standard format that comprises:

- Reference to Industry Sector, Occupational Title and Occupational Description
- Unit code
- Unit title
- Unit descriptor
- Unit of Competency
- Elements and performance criteria
- Variables and range statement
- Evidence guides

Together all the parts of a Unit of Competency:

- Describe a work activity
- Guide the assessor in determining whether the candidate is competent.

Competency Standard has been developed by a working group comprised of occupation-specific experts from the industry/institution, relevant consultants of SICIP.

The ensuing sections of this document comprise a description of the respective occupation with all the key components of a Unit of Competence:

- An overview of all Units of Competence for the occupation and their corresponding duration required for completion of training.
- The Competency Standards that include the Unit of Competency, Unit Descriptor, Elements and Performance Criteria, Range of Variables, Curricular Content Guide, and Assessment Evidence Guide.

Units & Elements at a Glance:**Generic Competencies (36 hrs.)**

Code	Unit of Competency	Elements of Competency	Duration (Hours)
SICIP-ITC-AIT-01-G	Work in a team environment	1 Identify team goals and processes 2 Communicate and cooperate with team members 3 Work as a team member 4 Solve problems as a team member	12
SICIP-IT-AIT-02-G	Demonstrate Interpersonal and Communication Skills	1 Apply interpersonal skills at the workplace 2 Understand and communicate information and ideas 3 Prepare and present reports and workplace documents	12
SICIP-IT-AIT-03-G	Support Innovation and Manage Change	1 Identify needs for innovation in the workplace 2 Apply creative approach and solution 3 Support flexible and innovative ways of working 4 Adapt to emerging technological changes and opportunities	12
Total Hour			36

Sector Specific Competencies (24 hrs.)

Code	Unit of Competency	Elements of Competency	Duration (Hours)
SICIP-IT-AIT-01-S	Access Information Using Internet and Electronic Mail	1. Access resources from internet 2. Use and manage electronic mail 3. Use audio/video tools for information transfer	12
SICIP-IT-AIT-02-S	Comply to Ethical Standards in IT Workplace	1. Uphold the requirements of clients 2. Deliver quality products and services 3. Maintain professionalism at workplace 4. Maintain workplace code of conduct	12
Total Hour			24

Occupation Specific Competencies (300 hrs.)

Code	Unit of Competency	Elements of Competency	Duration (hours)
SICIP-IT-AIT-01-O	Apply AI Fundamentals and Tool Operations	1. Identify AI concepts and applications 2. Identify appropriate AI tools based on task requirements 3. Interpret AI-generated outputs in context 4. Operate AI platforms following standard procedures 5. Recognize capabilities, limitations, and risks of AI tools	20
SICIP-IT-AIT-02-O	Design and Apply Prompt Engineering Techniques	1. Define task objectives and expected outputs 2. Structure prompts using context, task, and constraints 3. Apply different prompting techniques 4. Develop clear and optimized prompts for various use cases 5. Refine prompts based on AI responses and feedback	50
SICIP-IT-AIT-03-O	Manage AI-Driven Office Operations	1. Integrate AI tools into daily office workflows 2. Automate routine tasks using AI tools 3. Generate documents, reports, and presentations using AI 4. Organize and manage AI-assisted outputs systematically 5. Improve workflow efficiency using multiple AI tools	55
SICIP-IT-AIT-04-O	Produce and Manage AI-Assisted Content and Copywriting	1. Plan content strategies for different platforms 2. Produce AI-assisted written content and copy 3. Apply SEO and content optimization techniques 4. Edit and refine AI-generated content for quality and tone 5. Manage content workflows and publishing processes	50
SICIP-IT-AIT-05-O	Manage AI-Driven social	1. Plan AI-assisted social media strategies	55

Code	Unit of Competency	Elements of Competency	Duration (hours)
	media and Digital Marketing Operations	2. Perform web scraping and data cleaning activities. 3. Create and schedule AI-generated social media content 4. Develop AI-based ads, lead generation, and sales funnels 5. Monitor campaign performance using AI tools 6. Optimize digital marketing outputs based on analytics	
SICIP-IT-AIT-06-O	Develop AI-Based Customer Engagement Systems (Chatbot & CRM)	1. Design AI chatbot workflows and conversation flows 2. Configure AI tools for CRM and customer interaction 3. Automate customer communication and support systems 4. Analyze customer data and engagement performance 5. Improve customer experience using AI insights	50
SICIP-IT-AIT-07-O	Apply Ethical AI Use, Data Management, and Performance Evaluation	1. Apply data privacy, security, and ethical guidelines in AI use 2. Manage AI-generated data and content responsibly 3. Identify risks (bias, misinformation, and misuse) 4. Evaluate performance of AI tools and outputs 5. Improve AI workflows based on feedback and emerging trends	20
Total Hours			00 Hrs.

COMPETENCY STANDARD: AI TOOL MANAGEMENT & PROMPT ENGINEERING

Generic Competencies

Unit of Competency: WORK IN A TEAM ENVIRONMENT	Nominal Duration: 12 hrs.	Unit Code: SICIP-IT-AIT-01-G
Unit Descriptor: This unit covers the knowledge, skills and attitudes required to work in a team environment. It specifically includes the tasks of identifying team goals and processes, communicating and cooperating with team members, working as a team member and solving problems as a team member.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined>** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Identify team goals and processes	1.1 Team goals and collaborative decision-making processes are identified. 1.2 Role and common goals of the team are defined from available sources of information. 1.3 Team structure, responsibilities and reporting relations are identified from team discussions and other external sources.
2. Communicate and cooperate with team members	2.1 Communication and negotiation skills are applied and maintained in all relevant situations. 2.2 Constructive contributions are made to workplace discussions on such issues as production, quality and safety. 2.3 Goals/ objectives and action plans undertaken in the workplace are communicated promptly. 2.4 Information regarding problems and issues are organized coherently to ensure clear and effective communication. 2.5 Dialogue is initiated with appropriate personnel. 2.6 Communication problems and issues are raised 2.7 Barriers to communication are identified and resolved
3. Work as a team member	3.1 Effective forms of communication are used to interact with team members in discussing team activities and objectives. 3.2 Mutual respect, empathy and active collaboration are demonstrated 3.3 Communication channels are followed as per workplace context.
4. Solve problems as a	4.1 Current and potential problems faced by team are

team member	identified. 4.2 Problems are investigated and analysed. 4.3 Potential solutions of problem are identified. 4.4 Recommendations about possible solutions are developed, documented, ranked and presented to team members for decision.
-------------	---

Range of variables:

Variables	Range (may include but not limited to)
1. Sources of information	1.1 Organizational structures 1.2 Operations Manuals 1.3 Job description 1.4 Standard operating procedures
2. Workplace discussions	2.1 Coordination meetings 2.2 Toolbox discussion 2.3 Peer-to-peer discussion
3. Team members	3.1 Coach / members 3.2 Supervisor / manager 3.3 Peers / colleagues 3.4 Other members /Employee representative of the organization.
4. Workplace context	4.1 National Laws and Statutes 4.2 Standard Operating Procedures 4.3 Workplace Rules and Regulations

Curricular Content Guide

1. Underpinning knowledge	1.1 Sources of information define 1.2 Team structure, role, and responsibility. 1.3 Individual member's roles and responsibilities. 1.4 Effective verbal communication methods 1.5 Communication flow and reporting structures. 1.6 Interpersonal communication skills. 1.7 Organization requirements for written and electronic communication methods 1.8 Communication problems and issues 1.9 Barriers in communication 1.10 Team planning. 1.11 Team meeting procedures. 1.12 Workplace etiquette 1.13 Industry maintenance, service and helpdesk practices, processes and procedures 1.14 Industry standard diagnostic tools 1.15 Malfunctions and resolutions
2. Underpinning skill	2.1 Organizing sources of information 2.2 Identifying the role and responsibility of the team.

	2.3 Identifying roles and responsibilities of individual members. 2.4 Identifying effective verbal communication methods 2.5 Identifying communication flow and reporting structure. 2.6 Identifying interpersonal communication skills 2.7 Complying with organization requirements for the use of written and electronic communication methods 2.8 Negotiation and communication skills 2.9 Participating in team discussion. 2.10 Working as a team member. 2.11 Participating in a variety of workplace discussions 2.12 Effective clarifying and probing skills 2.13 Identifying issues 2.14 Identifying current industry standard diagnostic tools 2.15 Describing common malfunctions and resolutions. 2.16 Determining the root cause of a routine malfunction
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety practices 3.2 Promptness in carrying out activities 3.3 Tidiness and timeliness 3.4 Respect to peers, sub-ordinates and seniors in workplace 3.5 Environmental concern 3.6 Sincerity and honesty
4. Resource implications	The following resources must be provided: 4.1 Workplace (actual or simulated). 4.2 Relevant materials and equipment. 4.3 Relevant specifications or work instructions.

Assessment Evidence Guide

1. Critical aspects of competency	Assessment required evidence that the candidate: 1.1 identified team goals and processes. 1.2 communicated and cooperated with team members 1.3 worked as a team member 1.4 solved problems as a team member
2. Methods of assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical Demonstration 2.3 Oral questioning 2.4 Portfolio (Optional)
3. Context of assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a certified assessor or occupation-specific industry expert.

Unit of Competency: DEMONSTRATE INTERPERSONAL AND COMMUNICATION SKILLS	Nominal Duration: 12 hrs.	Unit Code: SICIP-IT-AIT-02-G
Unit Descriptor: This unit covers the knowledge, skills and attitude required to demonstrate interpersonal and communication skills. It specifically includes the tasks of applying interpersonal skills at the workplace, understanding and communicating information and ideas, preparing and presenting reports and workplace documents.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Apply interpersonal skills at the workplace	1.1 <u>Workplace interpersonal skills</u> are interpreted. 1.2 The impacts of interpersonal skills are described. 1.3 Interpersonal skills are performed in accordance with workplace procedures. 1.4 <u>Ways of improving interpersonal skills</u> are identified and followed.
2. Understand and communicate information and ideas	2.1 <u>Communication tools and equipment</u> are operated, and faults are identified and reported. 2.2 Consultative processes is used to collect and convey information. 2.3 Information systems is used to store, retrieve and update information. 2.4 Information data and information are analyzed and interpreted. 2.5 Information is communicated with individuals and groups.
3. Prepare and present reports and workplace documents	3.1 <u>Workplace documents</u> are interpreted. 3.2 Appropriate format for document is used to meet workplace requirements. 3.3 Document is drafted in accordance with workplace procedures. 3.4 Document is edited and presented in a final version appropriate to task.

Range of variables:

Variables	Range (may include but not limited to)
1. Interpersonal skills	1.1 Effective communication 1.2 Cooperation 1.3 Giving and receiving feedback, feed-forward and professional criticism

	1.4 Pressure handling 1.5 Time management 1.6 Acceptance of diversity 1.7 Supporting and encouraging others 1.8 Inclusiveness 1.9 Problem solving 1.10 Negotiation 1.11 Conflict management
2. Ways of improving interpersonal skills	2.1 Cultivate a positive outlook 2.2 Ask trusted friends or colleagues for constructive criticism 2.3 Control emotions 2.4 Observe other positive interpersonal interactions 2.5 Practice active listening 2.6 Seek out opportunities to build relationships 2.7 Practice empathy
3. Communication tools and equipment	3.1 Telephone 3.2 Internet 3.3 Mobile Phone 3.4 Fax machines 3.5 Two-way radio
4. Workplace documents	4.1 Business Letters 4.2 Business Reports 4.3 Transactional Documents 4.4 Memos 4.5 Forms 4.5.1 Memorandum 4.5.2 Requisitioning Form 4.5.3 Personnel Form 4.6 Safety Report Form

Curricular Content Guide

1. Underpinning knowledge	1.1 Interpersonal skills 1.2 Impacts of interpersonal skills 1.3 Consultative processes 1.4 Workplace documents
2. Underpinning skill	2.1 Demonstrating interpersonal skills 2.2 Collecting workplace information 2.3 Analyzing information and ideas 2.4 Preparing workplace documents 2.5 Presenting workplace documents
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety practices 3.2 Promptness in carrying out activities 3.3 Tidiness and timeliness 3.4 Respect to peers, sub-ordinates and seniors in workplace

	3.5 Environmental concern 3.6 Sincerity and honesty
4. Resource implications	The following resources must be provided: 4.1 Workplace (actual or simulated). 4.2 Relevant materials and equipment. 4.3 Relevant specifications or work instructions.

Assessment Evidence Guide

1. Critical aspects of competency	Assessment required evidence that the candidate: 1.1 applied interpersonal skills at the workplace 1.2 communicated information and ideas 1.3 prepared and presented reports and workplace documents
2. Methods of assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical Demonstration 2.3 Oral Questioning 2.4 Portfolio (Optional)
3. Context of assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a certified assessor or occupation-specific industry expert.

Unit of Competency: SUPPORT INNOVATION AND MANAGE CHANGE	Nominal Duration: 12 hrs.	Unit Code: SICIP-IT-AIT-03-G
Unit Descriptor: This unit covers the knowledge, skills, and attitudes required to support innovation and manage change. It specifically includes the tasks of identifying needs for innovation in the workplace, applying creative approaches and solution, supporting flexible and innovative ways of working and adapting to emerging technological changes and opportunities.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Identify needs for innovation in the workplace	1.1. The need for <u>innovation</u> in scope of work is recognized 1.2. The value of <u>innovative practices</u> in the workplace is recognized 1.3. Existing way of working in the workplace are interpreted. 1.4. Drawbacks of existing way of working are identified. 1.5. Benefits of change are identified to make it consistent with organizational requirements 1.6. Realistic timelines and targets for implementation of changes are set.
2. Apply creative approach and solution	2.1. Opportunities and creative approaches to implement innovation practices are identified 2.2. Creative approaches of coworkers pertaining to work practices are analyzed and incorporated 2.3. Innovation in accordance with organizational requirements changes are implemented
3. Support flexible and innovative ways of working	3.1. Maximum innovative opportunities are promoted. 3.2. Work assignments to facilitate innovative work skills are organized. 3.3. Team members are provided with guidance and coaching on innovation in the workplace. 3.4. Models of innovative work practice are provided and discussed 3.5. Appropriate environment for learning and innovation is maintained.
4. Adapt to emerging technological changes and opportunities	4.1. Usages of different <u>technologies</u> is determined based on job requirements. 4.2. Appropriate technology is selected as per work specifications. 4.3. Relevant technology is effectively used in carrying out

	functions. 4.4. Appropriate implementation tools are used as per task requirement.
--	--

Range of variables:

Variables	Range (may include but not limited to)
1. Innovative practices	1.1. Self-directed support to implement new ideas 1.2. Collaborative arrangement to apply new method of working 1.3. Making scope of work more efficient to use new technology
2. Innovation	2.1. New ideas 2.2. Different ideas 2.3. New methods of doing work 2.4. Use of new Technology
3. Technologies	3.1. Office technology 3.2. Industrial technology 3.3. System technology 3.4. Information technology 3.5. Training technology

Curricular Content Guide

1. Underpinning knowledge	1.1. Definition of innovation 1.2. Current practice in own scope of work 1.3. Workplace procedures 1.4. Support required to generate creative ideas 1.5. Difference between innovation and creativity 1.6. Common effects of change and innovation in the workplace 1.7. Industrial and organizational context of change 1.8. Organization's policies, plans, procedures and structure 1.9. Knowledge of resources required by the organization's operations 1.10. Awareness on technology and its function 1.11. Operating instructions 1.12. Applicable software 1.13. Company policy in relation to relevant technology 1.14. Technology adaptability
2. Underpinning skill	2.1. Identifying resources required for creativity and innovation 2.2. Contributing to brainstorming session 2.3. Identifying issues and concerns of one's scope of work 2.4. Encouraging co-workers to generate and develop ideas 2.5. Evaluating potential obstacles to and opportunities for creativity and innovation 2.6. Sharing of best practices related to innovation and

	creativity 2.7. Applying relevant technology 2.8. Using update machine and Software 2.9. Acquiring troubleshooting skills Identifying issues 2.10. Identifying current industry standard diagnostic tools 2.11. Describing common malfunctions and resolutions. 2.12. Determining the root cause of a routine malfunction
3. Underpinning Attitudes	3.1. Commitment to occupational health and safety 3.2. Promptness in carrying out activities 3.3. Sincere and honest to duties 3.4. Eagerness to learn 3.5. Tidiness and timeliness 3.6. Environmental concerns 3.7. Respect for rights of peers and seniors at workplace 3.8. Communication with peers and seniors at workplace
4. Resource implications	The following resources must be provided: 4.1. Workplace (actual or simulated). 4.2. Relevant materials and equipment. 4.3. Relevant specifications or work instructions.

Assessment Evidence Guide

1. Critical aspects of competency	Assessment required evidence that the candidate: 1.1 identified need for innovation in the area of work 1.2 applied creative approach and solution 1.3 supported flexible and innovative ways of working 1.4 adapted to emerging technological changes and opportunities
2. Methods of assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical Demonstration 2.3 Oral Questioning 2.4 Portfolio (Optional)
3. Context of assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a certified assessor or occupation-specific industry expert.

The Sector Specific Competencies

Unit of Competency: ACCESS INFORMATION USING INTERNET AND ELECTRONIC MAIL	Nominal Duration: 12 hrs.	Unit Code: SICIP-IT-AIT-01-S
Unit Descriptor: This unit covers the knowledge, skills and attitude required to access information using internet and electronic mail. It specifically includes the tasks of accessing resources from internet, using and managing electronic mail, and using audio/video tools for information transfer.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Access resources from internet	1.1 Appropriate internet <u>browsers</u> are selected and installed. 1.2 Internet browser is opened and web address / URL is written/selected in /from address bar to access <u>information</u> . 1.3 <u>Search engines</u> are used to access information 1.4 Video / Information are Shared /downloaded / uploaded from / to web site/ <u>social media</u> . 1.5 <u>Web based resources</u> are used. 1.6 Etiquette (or web etiquette) principles are searched and followed.
2. Use and manage electronic mail	2.1 <u>Email services</u> are identified and selected to create a new email address 2.2 Mail account is created. 2.3 Document is prepared, attached and sent to different types of recipient. 2.4 Mail is read, forwarded, replied and deleted as per requirement. 2.5 Custom email folders are created and manipulated. 2.6 Mail message is printed.
3. Use audio/video tools for information transfer	3.1 Audio and video tools are identified 3.2 Apps using audio/video tools are identified 3.3 Information is transferred with apps using audio/video tools

Range of Variables

Variable	Range
	May include but not limited to:
1. Browsers	1.1 Mozilla Firefox 1.2 Google chrome 1.3 Internet explorer 1.4 Opera

2. Information	2.1. Text information 2.2. Graphics 2.3. Video
3. Search engines	3.1. Google 3.2. Yahoo 3.3. AltaVista 3.4. Msn 3.5. Bing
4. Social media.	4.1 Face book 4.2 Twitter 4.3 LinkedIn 4.4 YouTube
5. Web based services	5.1 Drive 5.2 Calendar 5.3 Map 5.4 Translator 5.5 Docs 5.6 Search
6. Email services	6.1 Free mail services –Gmail, Yahoo, Hotmail 6.2 Web mail services.

Curricular Content Guide

1. Underpinning Knowledge	1.1 Internet 1.2 www 1.3 web site 1.4 web address 1.5 URL 1.6 Web browsers 1.7 Search engines 1.8 Information 1.9 Social media 1.10 Web based services 1.11 Folder manipulation
2. Underpinning Skills	2.1 Accessing and sharing resources from internet 2.2 Downloading /uploading file, documents and video from /to web sites 2.3 Sending and receiving mail through mail service. 2.4 Using audio/video tools to share information
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincere and honest to duties 3.4 Environmental concerns 3.5 Eagerness to learn 3.6 Tidiness and timeliness 3.7 Respect for rights of peers and seniors in workplace 3.8 Communication with peers, sub-ordinates and

	seniors in workplace
4. Resource Implications	4.1 Relevant tools, Equipment, software and facilities needed to perform the activities. 4.2 Required learning materials.

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1 accessed resources from internet. 1.2 used and managed electronic mail 1.3 used audio/video tools for information transfer
2. Methods of Assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical Demonstration 2.3 Oral Questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a certified assessor or occupation-specific industry expert.

Unit of Competency: COMPLY TO ETHICAL STANDARDS IN IT WORKPLACE	Nominal Duration: 12 hrs.	Unit Code: SICIP-IT-AIT-02-S
Unit Descriptor: This unit covers the knowledge, skills and attitudes required to comply to ethical standards in IT workplace. It specifically includes the tasks of upholding the requirements of clients, delivering quality products and services, maintaining professionalism at workplace and maintaining workplace code of conduct.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Uphold the requirements of clients	1.1 Clients' requirements are identified. 1.2 Confidentiality of information is maintained in accordance with workplace policies/organizational policies/ <u>national legislation</u> . 1.3 Potential conflicts of interest are identified and involved parties of potential conflicts are notified. 1.4 Proprietary rights of client/customer are asserted.
2. Deliver quality products and services	2.1 Products and services are provided according to the clients' requirements. 2.2 Work is completed as per standards. 2.3 Quality processes are implemented when developing products and services.
3. Maintain professionalism at workplace	3.1 Work processes are delivered as per standards. 3.2 Skills, knowledge and qualifications are presented in a professional manner. 3.3 Services and products developed by self and others are delivered as per workplace standard. 3.4 Unbiased and objective information are provided to clients. 3.5 Realistic estimates for time, cost and delivery of outputs are presented during negotiation.
4. Maintain workplace code of conduct.	4.1 Workplace code of conduct are interpreted 4.2 Workplace code of conduct is followed.

Range of Variables

Variable	Range
	May include but not limited to:
1. National legislation	1.1 Industry/sector code of ethics 1.2 International and national guidelines for customer protection 1.3 International and national copyright laws

	1.4 Occupational health and safety requirements 1.5 Intellectual property rights law 1.6 Legal and regulatory policies in the information technology sector 1.7 Fire safety rules and regulations
--	--

Curricular Content Guide

1. Underpinning Knowledge	1.1 Corporate code of confidentiality of information organizational policies, national legislation and workplace policies in relation to IT sector 1.2 Law and regulations pertaining to proprietary rights 1.3 Quality processes for products and services 1.4 Procedure of provided to client information 1.5 Method of estimating for time, cost and delivery products and services 1.6 Workplace code of conduct in IT sector
2. Underpinning Skills	2.1 Upholding confidentiality of information in accordance with organizational policies, national legislation and workplace policies 2.2 Asserting proprietary rights of client/customer 2.3 Completing work in accordance with industry and international standards 2.4 Implementing quality processes when developing products and services 2.5 Delivering correctly services and products developed by self and others 2.6 Providing unbiased and objective information are to clients. 2.7 Presenting realistic estimates for time, cost and delivery of outputs during negotiation 2.8 Following workplace code of conduct
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincere and honest to duties 3.4 Environmental concerns 3.5 Eagerness to learn 3.6 Tidiness and timeliness 3.7 Respect for rights of peers and seniors in workplace 3.8 Communication with peers, sub-ordinates and seniors in workplace
4. Resource Implications	4.1 Workplace (simulated or actual) 4.2 Different types AI tools

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1 uphold the requirements of clients. 1.2 delivered quality products and services 1.3 maintained professionalism at workplace 1.4 maintained workplace code of conduct.
2. Methods of Assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical Demonstration 2.3 Oral Questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a certified assessor or occupation-specific industry expert.

The Occupation Specific Competencies

Unit of Competency: APPLY AI FUNDAMENTALS AND TOOL OPERATIONS	Nominal Duration: 20 Hrs.	Unit Code: SICIP-IT-AIT-1-O
Unit Descriptor: This unit of competency covers the essential skills and knowledge required to apply AI fundamentals and tool operations. It specifically includes the tasks of identifying AI concepts and applications, identifying appropriate AI tools based on task requirements, interpreting AI-generated outputs in context, operating AI platforms following standard procedures and recognizing capabilities, limitations and risks of AI tools.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Identify AI concepts and applications	1.1 <u>Fundamental concepts and principles</u> of Artificial Intelligence (AI) are identified. 1.2 <u>Common AI technologies and capabilities</u> are recognized according to their functions. 1.3 AI applications in business, education, communication, and productivity are identified. 1.4 <u>Benefits, limitations, and potential impacts</u> of AI applications are explained.
2. Identify appropriate AI tools based on task requirements	2.1 Task requirements are analyzed to determine appropriate AI tool usage. 2.2 <u>Suitable office productivity tools</u> are identified for documentation, scheduling, and collaboration tasks. 2.3 <u>Content and copywriting tools</u> are identified based on writing and editing needs. 2.4 <u>Social media and marketing tools</u> are identified based on campaign objectives. 2.5 <u>Customer engagement tools</u> are identified based on communication and support needs.
3. Interpret AI-generated outputs in context	3.1 <u>AI-generated content</u> is identified for accuracy and relevance. 3.2 Outputs are interpreted according to task objectives and context. 3.3 Errors, biases, or inconsistencies in outputs are identified. 3.4 Outputs are refined or adjusted based on user requirements. 3.5 Final outputs are validated before use or publication.
4. Operate AI platforms following standard procedures	4.1 AI tools are accessed and configured following standard procedures. 4.2 <u>Inputs (prompts/commands)</u> are entered correctly to generate outputs.

	4.3 Platform features and functions are used efficiently. 4.4 <u>Data privacy and security guidelines</u> are followed during operation. 4.5 Outputs are saved, exported, or integrated into workflows as required.
5. Recognize capabilities, limitations, and risks of AI tools	5.1 <u>Capabilities of AI tools</u> are identified based on features and functions. 5.2 Limitations are recognized. 5.3 Risks related to bias, misinformation, and data privacy are identified. 5.4 <u>Ethical considerations in AI usage</u> are recognized and followed. 5.5 Mitigation strategies are applied to reduce risks in AI-assisted tasks.

Range of Variables

Variable	Range (Includes but not limited to):
1. Fundamental concepts and principles	1.1 Artificial Intelligence (AI) 1.2 Machine Learning (ML) 1.3 Deep Learning 1.4 Natural Language Processing (NLP) 1.5 Computer Vision 1.6 Generative AI
2. Common AI technologies and capabilities	2.1 Content Generation 2.2 Data Analysis 2.3 Image Generation 2.4 Speech Recognition 2.5 Translation 2.6 Automation
3. Benefits, limitations, and potential impacts	Benefits 3.1 Increased Efficiency 3.2 Improved Productivity 3.3 Time Optimization 3.4 Cost Reduction 3.5 Accuracy Improvement 3.6 Faster Decision-Making Limitations 3.7 Data Privacy Risks 3.8 Bias in Outputs 3.9 Dependence on Data Quality 3.10 Potential Inaccuracies Potential Impacts 3.11 Job Transformation 3.12 Improved Service Delivery 3.13 Process Automation 3.14 Digital Transformation

4. Suitable office productivity tools	4.1 Microsoft Copilot 4.2 Google Workspace AI 4.3 Notion AI 4.4 ClickUp AI 4.5 Otter.ai 4.6 Grammarly AI
5. Content and copywriting tools	5.1 ChatGPT 5.2 Claude 5.3 Gemini 5.4 Jasper AI 5.5 Copy.ai 5.6 Grammarly AI
6. Social media and marketing tools	6.1 Canva AI 6.2 Buffer AI 6.3 Hootsuite AI 6.4 HubSpot AI 6.5 Jasper AI 6.6 Predis.ai
7. Customer engagement tools	7.1 ChatGPT 7.2 Intercom AI 7.3 Zendesk AI 7.4 Freshdesk AI 7.5 Salesforce Einstein 7.6 Tidio AI 7.7 Drift AI 7.8 HubSpot AI 7.9 Zoho Zia 7.10 Microsoft Copilot for Service
8. AI-generated content	8.1 Text Content 8.2 Emails 8.3 Reports 8.4 Summaries 8.5 Portfolio 8.6 Social Media Posts 8.7 Marketing Content
9. Inputs (prompts/commands)	9.1 Questions 9.2 Instructions 9.3 Keywords 9.4 Templates 9.5 Role-based Prompts 9.6 Task-specific Commands
10. Data privacy and security guidelines	10.1 Data Confidentiality 10.2 Access Control 10.3 Password Protection 10.4 Secure Data Handling 10.5 Privacy Compliance 10.6 Responsible AI Use

11. Capabilities of AI tools	11.1 Content Generation 11.2 Data Analysis 11.3 Research Assistance 11.4 Translation 11.5 Summarization 11.6 Automation
12. Ethical considerations in AI usage	12.1 Transparency 12.2 Fairness 12.3 Accountability 12.4 Privacy Protection 12.5 Responsible Use 12.6 Human Oversight

Curricular Content Guide

1. Underpinning Knowledge	1.1 Fundamentals of Artificial Intelligence (AI), including concepts, technologies, and common applications. 1.2 Types and functions of AI tools used for productivity, content creation, marketing, and customer engagement. 1.3 Criteria for selecting appropriate AI tools based on task requirements and expected outcomes. 1.4 Principles of prompt input, AI output generation, interpretation, and validation. 1.5 Methods for identifying and correcting errors, biases, and inconsistencies in AI-generated content. 1.6 Standard procedures for operating AI platforms and integrating outputs into work processes. 1.7 Data privacy, cybersecurity, and responsible handling of information when using AI tools. 1.8 Ethical considerations, limitations, risks, and mitigation strategies for responsible AI use.
2. Underpinning Skills	2.1 Applying fundamental AI concepts and understanding common AI applications 2.2 Selecting appropriate AI tools based on task requirements and objectives 2.3 Using AI tools for productivity, content creation, marketing, and customer engagement tasks 2.4 Operating AI platforms using standard procedures and effective prompts 2.5 Applying data privacy and security practices during AI tool operation 2.6 Saving, exporting, and integrating AI-generated outputs into workflows 2.7 Recognizing the capabilities and limitations of AI tools 2.8 Applying risk mitigation strategies to ensure responsible AI use
3. Underpinning Attitudes	3.1. Commitment to occupational health and safety

	3.2. Promptness in carrying out activities 3.3. Sincere and honest to duties 3.4. Environmental concerns 3.5. Eagerness to learn 3.6. Tidiness and timeliness 3.7. Respect for rights of peers and seniors in workplace 3.8. Communication with peers, sub-ordinates and seniors in workplace
4. Resource Implications	4.1 Computer with relevant software installed 4.2 Different types AI tools

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1 identified AI concepts and applications 1.2 identified appropriate AI tools based on task requirements 1.3 interpreted AI-generated outputs in context 1.4 operated AI platforms following standard procedures 1.5 recognized capabilities, limitations, and risks of AI tools
2. Methods of Assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical Demonstration 2.3 Oral Questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a certified assessor or occupation-specific industry expert.

Unit of Competency: DESIGN AND APPLY PROMPT ENGINEERING TECHNIQUES	Nominal Duration: 50 Hrs.	Unit Code: SICIP-IT-AIT-2-O
Unit Descriptor: This unit of competency covers the essential skills and knowledge required to design and apply prompt engineering techniques. It specifically includes the tasks of defining task objectives and expected outputs, structuring prompts using context, task and constraints, applying different prompting techniques, developing clear and optimized prompts for various use cases and refining prompts based on AI responses and feedback.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Define task objectives and expected outputs	1.1 Task requirements and objectives are identified according to user needs. 1.2 <u>Expected outputs</u> are defined based on the intended use of AI-generated content. 1.3 Input requirements and available information are analyzed before prompt development. 1.4 <u>Output expectations</u> are specified clearly. 1.5 Prompt objectives are aligned with task goals and business requirements.
2. Structure prompts using context, task, and constraints	2.1 <u>Relevant context</u> is incorporated into prompts to guide AI responses. 2.2 Tasks and instructions are defined clearly and logically. 2.3 <u>Constraints</u> and output requirements are specified. 2.4 Prompt components are organized to improve response accuracy and relevance. 2.5 Structured prompts are tested to ensure alignment with intended outcomes.
3. Apply different prompting techniques	3.1 <u>Appropriate prompting techniques</u> are selected according to task requirements. 3.2 Examples and reference information are incorporated where required. 3.3 Prompting techniques are adjusted to improve response quality and consistency. 3.4 <u>Outputs evaluation</u> is carried out to determine the effectiveness of the selected technique.
4. Develop clear and optimized prompts for various use cases	4.1 <u>Prompt applications</u> are selected as per requirements. 4.2 Clear instructions and expected outcomes are incorporated into prompts. 4.3 Prompts are optimized to improve relevance, accuracy, and efficiency. 4.4 AI tools are used to test prompts across different use cases.

	4.5 Optimized prompts are documented and maintained for future use.
5. Refine prompts based on AI responses and feedback	5.1 <u>AI-generated responses</u> are reviewed against task requirements. 5.2 Response quality, accuracy, and completeness are evaluated. 5.3 Prompt wording and structure are modified to improve outputs. 5.4 <u>Feedback and test results</u> are incorporated into prompt revisions. 5.5 Refined prompts are validated to ensure consistent and effective performance.

Range of Variables

Variable	Range (Includes but not limited to):
1. Expected outputs	1.1 Reports 1.2 Emails 1.3 Summaries 1.4 Presentations 1.5 Social Media Content 1.6 Marketing Materials
2. Output expectations	2.1 Format 2.2 Accuracy 2.3 Relevance 2.4 Clarity 2.5 Completeness 2.6 Quality Standards
3. Relevant context	3.1 Business Context 3.2 User Requirements 3.3 Background Information 3.4 Reference Materials 3.5 Target Audience 3.6 Industry-Specific Information
4. Constraints	4.1 Output Format 4.2 Tone 4.3 Length 4.4 Language 4.5 Style Requirements 4.6 Time Limits
5. Appropriate prompting techniques	5.1 Zero-Shot Prompting 5.2 Few-Shot Prompting 5.3 RAG Prompting 5.4 Role-Based Prompting 5.5 Chain-of-Thought Prompting 5.6 Instruction-Based Prompting 5.7 Contextual Prompting

6. Outputs evaluation	6.1 Accuracy 6.2 Relevance 6.3 Consistency 6.4 Completeness 6.5 Clarity 6.6 Quality Standards
7. Prompt applications	7.1 Content Creation 7.2 Research 7.3 Data Analysis 7.4 Business Communication 7.5 Customer Support 7.6 Marketing Tasks
8. AI-generated responses	8.1 Reports 8.2 Emails 8.3 Summaries 8.4 Presentations 8.5 Marketing Contents 8.6 Customer Responses
9. Feedback and test results	9.1 User Feedback 9.2 Peer Review 9.3 Test Outputs 9.4 Quality Assessments 9.5 Performance Results 9.6 Validation Reports

Curricular Content Guide

1. Underpinning Knowledge	1.1 Fundamentals of prompt engineering and the relationship between prompts and AI-generated outputs. 1.2 Principles of defining task objectives, expected outputs, and user requirements. 1.3 Techniques for structuring prompts using context, task, constraints, and output formats. 1.4 Different prompting techniques. 1.5 Methods for optimizing prompts to improve relevance, accuracy, consistency, and efficiency. 1.6 Techniques for evaluating AI responses and identifying gaps, errors, and inconsistencies. 1.7 Procedures for refining prompts through iterative testing, feedback, and continuous improvement. 1.8 Best practices for documenting, organizing, and reusing prompt templates across different AI applications.
2. Underpinning Skills	2.1 Defining task objectives and expected AI-generated outputs 2.2 Structuring prompts using context, tasks, and constraints

	2.3 Applying appropriate prompt engineering techniques for different tasks 2.4 Developing clear, specific, and optimized prompts 2.5 Testing and evaluating prompts to improve AI response quality 2.6 Refining prompts based on AI outputs and user feedback 2.7 Using AI tools to validate prompt effectiveness across different use cases 2.8 Documenting and maintaining reusable prompt templates and libraries 2.9 Applying prompt engineering practices to achieve accurate, relevant, and consistent AI outputs
3. Underpinning Attitudes	3.1. Commitment to occupational health and safety 3.2. Promptness in carrying out activities 3.3. Sincere and honest to duties 3.4. Environmental concerns 3.5. Eagerness to learn 3.6. Tidiness and timeliness 3.7. Respect for rights of peers and seniors in workplace 3.8. Communication with peers, sub-ordinates and seniors in workplace
4. Resource Implications	4.1 Computers with internet access 4.2 Different types AI tools

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1 defined task objectives and expected outputs 1.2 structured prompts using context, task, and constraints 1.3 applied different prompting techniques 1.4 developed clear and optimized prompts for various use cases 1.5 refined prompts based on AI responses and feedback
2. Methods of Assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical Demonstration 2.3 Oral Questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a certified assessor or occupation-specific industry expert.

Unit of Competency: MANAGE AI-DRIVEN OFFICE OPERATIONS	Nominal Duration: 55 Hrs.	Unit Code: SICIP-IT-AIT-3-O
Unit Descriptor: This unit of competency covers the essential skills and knowledge required to manage AI-driven office operations. It specifically includes the tasks of integrating AI tools into daily office workflows, automating routine tasks using AI tools, generating documents, report and presentations using AI, organizing and managing AI-assisted outputs systemically and improving workflow efficiency using multiple AI tools.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Integrate AI tools into daily office workflows	1.1 <u>Office tasks suitable for AI assistance</u> are identified. 1.2 Appropriate AI tools are selected according to task requirements. 1.3 AI tools are incorporated into daily work processes and activities. 1.4 <u>AI-generated outputs</u> are reviewed and verified before use. 1.5 AI-assisted workflows are maintained according to organizational requirements.
2. Automate routine tasks using AI tools	2.1 Repetitive office tasks are identified for automation. 2.2 AI tools and automation features are configured according to workflow requirements. 2.3 <u>Automated processes</u> are tested to ensure expected results. 2.4 Automated outputs are monitored for accuracy and reliability. 2.5 Automation settings are refined to improve task efficiency.
3. Generate documents, reports, and presentations using AI	3.1 AI tools are used to generate business documents and reports. 3.2 AI-generated content is reviewed and edited according to workplace requirements. 3.3 Data and information are organized into structured reports and presentations. 3.4 Presentation materials are prepared using AI-assisted tools and templates. 3.5 Final outputs are verified for accuracy, quality, and completeness before distribution.
4. Organize and manage AI-assisted outputs systematically	4.1 AI-generated files and outputs are categorized according to purpose and project requirements. 4.2 Documents and digital assets are stored using appropriate naming and filing conventions. 4.3 Output versions are managed and updated

	systematically. 4.4 AI-generated content is maintained according to organizational policies and procedures. 4.5 Records and outputs are retrieved and shared efficiently when required.
5. Improve workflow efficiency using multiple AI tools	5.1 Multiple AI tools are selected according to workflow requirements. 5.2 AI tools are combined to complete tasks more efficiently. 5.3 Workflow performance is monitored and evaluated regularly. 5.4 Opportunities for process improvement are identified through AI-assisted activities. 5.5 Workflow practices are refined to improve productivity, quality, and efficiency.

Range of Variables

Variable	Range (Includes but not limited to):
1. Office tasks suitable for AI assistance	1.1 Email Management 1.2 Document Preparation 1.3 Task Scheduling 1.4 Data Entry 1.5 Report Writing 1.6 Meeting Summarization
2. AI-generated outputs	2.1 Emails 2.2 Reports 2.3 Summaries 2.4 Presentations 2.5 Meeting Notes 2.6 Business Documents
3. Automated Processes	3.1 Email Automation 3.2 Data Entry Automation 3.3 Report Generation Automation 3.4 Document Processing Automation 3.5 Workflow Automation 3.6 Task Assignment Automation 3.7 Scheduling Automation 3.8 Notification Automation 3.9 Approval Automation 3.10 File Management Automation

Curricular Content Guide

1. Underpinning Knowledge	1.1 Principles of AI-assisted office productivity and workflow management. 1.2 Types and applications of AI tools for document creation, communication, scheduling, and office
---------------------------	--

	automation. 1.3 Methods for identifying and automating repetitive office tasks using AI technologies. 1.4 Best practices for generating, reviewing, editing, and validating AI-generated documents, reports, and presentations. 1.5 Principles of digital document management, file organization, naming conventions, and version control. 1.6 Techniques for integrating multiple AI tools into end-to-end office workflows. 1.7 Methods for monitoring workflow performance, evaluating AI-assisted outputs, and ensuring quality. 1.8 Continuous improvement practices, including process optimization, productivity enhancement, and compliance with organizational policies.
2. Underpinning Skills	2.1 Integrating AI tools into daily office workflows and business processes 2.2 Selecting appropriate AI tools based on task and workflow requirements 2.3 Automating routine office tasks using AI features and workflows 2.4 Generating documents, reports, and presentations using AI tools 2.5 Reviewing and validating AI-generated outputs for accuracy and quality 2.6 Organizing, storing, and managing AI-generated files systematically 2.7 Applying version control and document management practices for AI outputs 2.8 Combining multiple AI tools to improve workflow efficiency and productivity 2.9 Monitoring and refining AI-assisted workflows for continuous improvement
3. Underpinning Attitudes	3.1. Commitment to occupational health and safety 3.2. Promptness in carrying out activities 3.3. Sincere and honest to duties 3.4. Environmental concerns 3.5. Eagerness to learn 3.6. Tidiness and timeliness 3.7. Respect for rights of peers and seniors in workplace 3.8. Communication with peers, sub-ordinates and seniors in workplace
3 Resource Implications	3.1 Computers with internet access 3.2 Different types of AI tools 3.3 Office application software

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1 integrated AI tools into daily office workflows 1.2 automated routine tasks using AI tools 1.3 generated documents, reports, and presentations using AI 1.4 organized and managed AI-assisted outputs systematically 1.5 improved workflow efficiency using multiple AI tools
2. Methods of Assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical Demonstration 2.3 Oral Questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a certified assessor or occupation-specific industry expert.

Unit of Competency: PRODUCE AND MANAGE AI-ASSISTED CONTENT AND COPYWRITING	Nominal Duration: 50 Hrs.	Unit Code: SICIP-IT-AIT-4-O
Unit Descriptor: This unit of competency covers the essential skills and knowledge required to produce and manage AI-assisted content and copywriting. It specifically includes the tasks of planning content strategies for different platforms, producing AI-assisted written content and copy, applying SEO and content optimization techniques, editing and refining AI-generated content for quality and tone and managing content workflows and publishing processes.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Plan content strategies for different platforms	1.1 <u>Content objectives</u> and <u>target audiences</u> are identified according to business requirements. 1.2 Platform-specific content requirements are analyzed before content creation. 1.3 Content topics, themes, and key messages are planned according to communication goals. 1.4 Content calendars and publishing schedules are prepared. 1.5 Content strategies are aligned with branding and marketing objectives.
2. Produce AI-assisted written content and copy	2.1 AI tools are used to generate content ideas, drafts, and copy. 2.2 Prompts are developed according to content requirements and objectives. 2.3 Written content is created for blogs, websites, social media, emails, and marketing campaigns. 2.4 AI-generated content is reviewed for relevance and accuracy. 2.5 Final content is prepared according to platform and audience requirements.
3. Apply SEO and content optimization techniques	3.1 Relevant keywords are identified and incorporated into content. 3.2 Content structure, headings, and metadata are optimized for search visibility. 3.3 <u>SEO tools</u> and AI-assisted optimization features are used to improve content performance. 3.4 Content readability and user engagement factors are evaluated and improved. 3.5 Optimized content is reviewed against SEO and publishing requirements.
4. Edit and refine AI-generated content for quality and tone	4.1 AI-generated content is reviewed for accuracy, clarity, and completeness. 4.2 Grammar, spelling, and formatting issues are corrected.

	4.3 Tone, style, and brand voice are adjusted according to content requirements. 4.4 Redundant, inaccurate, or inappropriate content is revised or removed. 4.5 Final content quality is verified before publication.
5. Manage content workflows and publishing processes	5.1 Content creation tasks are organized according to workflow requirements. 5.2 Content files, drafts, and assets are managed systematically. 5.3 Publishing schedules and approval processes are followed. 5.4 Content is published using appropriate platforms and tools. 5.5 Content performance and publishing outcomes are monitored for continuous improvement.

Range of Variables

Variable	Range (Includes but not limited to):
1. Content objectives	1.1 Brand Awareness 1.2 Lead Generation 1.3 Customer Engagement 1.4 Sales Promotion 1.5 Education and Information 1.6 Website Traffic Growth
2. Target audiences	2.1 Customers 2.2 Prospective Customers 2.3 Business Clients 2.4 Students 2.5 Professionals 2.6 General Public
3. SEO tools	3.1 Semrush AI 3.2 Ahrefs AI 3.3 Surfer SEO 3.4 Clearscope 3.5 Frase 3.6 MarketMuse 3.7 SE Ranking AI 3.8 WriterZen 3.9 Rank Math AI 3.10 Yoast SEO AI

Curricular Content Guide

1. Underpinning Knowledge	1.1 Principles of content strategy, audience analysis, and platform-specific content planning.
---------------------------	--

	1.2 Fundamentals of AI-assisted content creation, copywriting, and prompt development techniques. 1.3 Content writing principles for blogs, websites, social media, email, and marketing campaigns. 1.4 SEO concepts, including keyword research, metadata, content structure, and search optimization. 1.5 Techniques for evaluating readability, user engagement, and content performance. 1.6 Methods for editing AI-generated content to ensure accuracy, clarity, grammar, brand voice, and quality. 1.7 Content workflow management, including content calendars, approval processes, and publishing practices. 1.8 Best practices for organizing digital content assets, monitoring publishing outcomes, and continuous content improvement.
2. Underpinning Skills	2.1 Planning content strategies based on audience, platform, and business objectives 2.2 Developing effective prompts to generate high-quality AI content 2.3 Applying SEO techniques to optimize content visibility and engagement 2.4 Editing and refining AI-generated content for accuracy, clarity, and brand consistency 2.5 Reviewing content quality, grammar, tone, and formatting before publication 2.6 Organizing content files, drafts, and digital assets systematically 2.7 Managing content publishing workflows, schedules, and approval processes 2.8 Monitoring content performance and improving strategies through continuous optimization
3. Underpinning Attitudes	3.1. Commitment to occupational health and safety 3.2. Promptness in carrying out activities 3.3. Sincere and honest to duties 3.4. Environmental concerns 3.5. Eagerness to learn 3.6. Tidiness and timeliness 3.7. Respect for rights of peers and seniors in workplace 3.8. Communication with peers, sub-ordinates and seniors in workplace
4. Resource Implications	4.1 Computers with internet access 4.2 Different types of AI tools 4.3 SEO content sample

Assessment Evidence Guide

1. Critical Aspects of	Assessment required evidence that the candidate:
------------------------	--

Competency	1.1 planned content strategies for different platforms 1.2 produced AI-assisted written content and copy 1.3 applied SEO and content optimization techniques 1.4 edited and refine AI-generated content for quality and tone 1.5 managed content workflows and publishing processes
2. Methods of Assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical Demonstration 2.3 Oral Questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a certified assessor or occupation-specific industry expert.

Unit of Competency: MANAGE AI-DRIVEN SOCIAL MEDIA AND DIGITAL MARKETING OPERATIONS	Nominal Duration: 55 Hrs.	Unit Code: SICIP-IT-AIT-5-O
Unit Descriptor: This unit of competency covers the essential skills and knowledge required to manage AI-driven social media and digital marketing operations. It specifically includes the tasks of planning AI-assisted social media strategies, performing web scraping and data cleaning activities, creating and scheduling AI-generated social media content, developing AI-based ads, lead generation and sales funnels, monitoring campaign performance using AI tools and optimizing digital marketing outputs based on analytics.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Plan AI-assisted social media strategies	1.1 Social media goals and target audiences are identified according to business objectives. 1.2 AI tools are used to research trends, audience interests, and content opportunities. 1.3 Content themes and campaign strategies are planned for different platforms. 1.4 Content calendars and posting schedules are developed using AI-assisted planning tools. 1.5 Social media strategies are aligned with branding and marketing objectives.
2. Perform web scraping and data cleaning activities.	2.1 Data privacy, copyright and ethical guidelines are followed. 2.2 Data is collected from websites for organizational requirements. 2.3 Extracted data is reviewed for completeness and relevance. 2.4 Duplicate, incomplete, and inconsistent data is identified and corrected. 2.5 Data is organized and formatted according to business requirements. 2.6 Cleaned data is validated to ensure accuracy and usability.
3. Create and schedule AI-generated social media content	3.1 AI tools are used to generate social media content and creative ideas. 3.2 <u>Promotional contents</u> are developed. 3.3 Content is reviewed and refined to ensure quality and brand consistency. 3.4 Social media posts are scheduled using appropriate content management tools. 3.5 Published content is managed according to campaign schedules and objectives.
4. Develop AI-based ads,	4.1 AI tools are used to create advertising content and

lead generation, and sales funnels	campaign assets. 4.2 Target audiences and customer segments are defined for advertising campaigns. 4.3 <u>Lead generation strategies</u> are developed using AI-assisted tools. 4.4 Sales funnel stages and customer journeys are designed according to campaign objectives. 4.5 Advertising and lead generation activities are implemented and monitored.
5. Monitor campaign performance using AI tools	5.1 Campaign performance data is collected using AI-powered tools. 5.2 <u>Key performance indicators (KPIs)</u> are monitored and analyzed. 5.3 Audience engagement, reach, conversions, and campaign effectiveness are evaluated. 5.4 AI-generated insights and recommendations are reviewed for decision-making. 5.5 Campaign issues and performance gaps are identified and reported.
6. Optimize digital marketing outputs based on analytics	6.1 Campaign analytics and performance reports are reviewed regularly. 6.2 Content, advertisements, and targeting strategies are adjusted based on performance data. 6.3 AI recommendations are applied to improve marketing outcomes. 6.4 <u>A/B testing</u> and optimization activities are conducted where required. 6.5 Digital marketing performance is continuously improved to achieve campaign objectives.

Range of Variables

Variable	Range (Includes but not limited to):
1. Promotional content	1.1 Text 1.2 Images 1.3 Captions 1.4 Hashtags
2. Lead generation strategies	2.1 Content Marketing 2.2 Social Media Marketing 2.3 Email Marketing 2.4 Search Engine Optimization (SEO) 2.5 Search Engine Marketing (SEM) 2.6 Landing Pages 2.7 Lead Magnets 2.8 Referral Marketing 2.9 Webinar Marketing 2.10 Paid Advertising

3. Key performance indicators (KPIs)	3.1 Click-Through Rate (CTR) 3.2 Conversion Rate 3.3 Cost Per Click (CPC) 3.4 Cost Per Lead (CPL) 3.5 Return on Investment (ROI) 3.6 Engagement Rate 3.7 Lead Generation Rate 3.8 Sales Revenue
4. A/B testing	4.1 Ad Testing 4.2 Headline Testing 4.3 CTA Testing 4.4 Landing Page Testing 4.5 Email Testing 4.6 Audience Testing 4.7 Content Testing 4.8 Creative Testing 4.9 Design Testing 4.10 Campaign Testing

Curricular Content Guide

1. Underpinning Knowledge	1.1 Principles of social media strategy, audience analysis, and AI-assisted campaign planning. 1.2 Fundamentals of web scraping, data cleaning, data privacy, copyright, and ethical data collection practices. 1.3 AI-assisted content creation, content scheduling, and social media management techniques. 1.4 Digital advertising concepts, including audience segmentation, lead generation, and sales funnel development. 1.5 Key digital marketing metrics (KPIs), campaign analytics, and AI-powered performance monitoring. 1.6 Methods for interpreting marketing data and using AI-generated insights for decision-making. 1.7 Techniques for campaign optimization, including A/B testing, audience targeting, and content improvement. 1.8 Best practices for continuous performance evaluation, reporting, and achieving digital marketing objectives.
2. Underpinning Skills	2.1 Planning AI-assisted social media and digital marketing strategies 2.2 Using AI tools for audience research, trend analysis, and campaign planning 2.3 Performing ethical web scraping, data cleaning, and data validation activities 2.4 Creating, reviewing, and scheduling AI-generated social media content 2.5 Developing AI-based advertising campaigns, lead

	generation, and sales funnels 2.6 Monitoring campaign performance using AI analytics and key performance indicators (KPIs) 2.7 Optimizing content, advertisements, and targeting through analytics and A/B testing 2.8 Improving digital marketing performance through continuous AI-driven optimization
3. Underpinning Attitudes	3.1. Commitment to occupational health and safety 3.2. Promptness in carrying out activities 3.3. Sincere and honest to duties 3.4. Environmental concerns 3.5. Eagerness to learn 3.6. Tidiness and timeliness 3.7. Respect for rights of peers and seniors in workplace 3.8. Communication with peers, sub-ordinates and seniors in workplace
4. Resource Implications	4.1 Computers with internet access 4.2 Social media content (sample) 4.3 AI tools

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1 planned AI-assisted social media strategies 1.2 performed web scraping and data cleaning activities. 1.3 created and scheduled AI-generated social media content 1.4 developed AI-based ads, lead generation, and sales funnels 1.5 monitored campaign performance using AI tools 1.6 optimized digital marketing outputs based on analytics
2. Methods of Assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical Demonstration 2.3 Oral Questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a certified assessor or occupation-specific industry expert.

Unit of Competency: DEVELOP AI-BASED CUSTOMER ENGAGEMENT SYSTEMS (CHATBOT & CRM)	Nominal Duration: 50 Hrs.	Unit Code: SICIP-IT-AIT-6-O
Unit Descriptor: This unit of competency covers the essential skills and knowledge required to develop AI-based customer engagement systems (Chatbot & CRM). It specifically includes the tasks of designing AI chatbot workflows and conversation flows, configuring AI tools for CRM and customer interaction, automating customer communication and support systems, analyzing customer data and engagement performance and improving customer experience using AI insights.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Design AI chatbot workflows and conversation flows	1.1 Customer interaction requirements and business objectives are identified. 1.2 Chatbot conversation flows are designed according to user needs and use cases. 1.3 Responses and user interaction paths are defined for chatbot operations. 1.4 <u>Chatbot workflows</u> are structured to handle common customer inquiries and tasks. 1.5 Conversation flows are tested and refined to improve user engagement and response accuracy.
2. Configure AI tools for CRM and customer interaction	2.1 CRM and AI tools are selected according to business requirements. 2.2 Customer data fields, workflows, and interaction settings are configured. 2.3 <u>AI-powered features</u> are integrated into CRM systems to support customer management. 2.4 Customer records are connected to the CRM platform. 2.5 CRM configurations are tested to ensure proper operation and data accuracy.
3. Automate customer communication and support systems	3.1 Customer communication tasks suitable for automation are identified. 3.2 Automated responses, notifications, and follow-up workflows are configured. 3.3 AI chatbots and support tools are deployed to handle routine customer interactions. 3.4 Automated communications are monitored for accuracy and effectiveness. 3.5 Customer support processes are maintained according to organizational requirements.
4. Analyze customer data and engagement	4.1 Customer interaction data is collected from chatbot and CRM systems.

performance	4.2 Customer behaviour, engagement, and communication trends are analyzed. 4.3 AI-powered tools are used to generate customer insights and reports. 4.4 <u>Key customer engagement metrics</u> are monitored and evaluated. 4.5 Findings are documented and reported to support business decisions.
5. Improve customer experience using AI insights	5.1 Customer feedback and engagement data are reviewed regularly. 5.2 <u>AI-generated insights</u> are used to identify service improvement opportunities. 5.3 Chatbot responses, workflows, and customer communication activities are refined. 5.4 Customer support processes are adjusted based on performance analysis. 5.5 Continuous improvement practices are applied to enhance customer satisfaction and engagement.

Range of Variables

Variable	Range (Includes but not limited to):
1. Chatbot workflows	1.1 FAQ Workflow 1.2 Customer Support Workflow 1.3 Lead Capture Workflow 1.4 Appointment Booking Workflow 1.5 Order Tracking Workflow 1.6 Complaint Handling Workflow 1.7 Feedback Collection Workflow 1.8 Escalation Workflow 1.9 Assistance Workflow
2. AI-powered features	2.1 Lead Scoring 2.2 Chatbots 2.3 Sales Forecasting 2.4 Customer Insights 2.5 Automated Responses 2.6 Predictive Analytics
3. Key customer engagement metrics	3.1 Customer Satisfaction (CSAT) 3.2 Net Promoter Score (NPS) 3.3 Response Time 3.4 Resolution Rate 3.5 Engagement Rate 3.6 Customer Retention Rate
4. AI-generated insights	4.1 Customer Preferences 4.2 Customer Behaviour Patterns 4.3 Engagement Trends 4.4 Sentiment Analysis

	4.5 Customer Satisfaction Insights 4.6 Service Improvement Opportunities 4.7 Predictive Recommendations 4.8 Performance Insights
--	---

Curricular Content Guide

1. Underpinning Knowledge	1.1 Fundamentals of AI-powered chatbots, CRM systems, and customer engagement concepts. 1.2 Principles of chatbot conversation design, user journeys, and workflow development. 1.3 CRM configuration concepts, including customer data management, workflows, and AI integration. 1.4 Techniques for automating customer communication, notifications, and support processes. 1.5 Methods for collecting, analyzing, and interpreting customer interaction and engagement data. 1.6 Key customer engagement metrics, reporting techniques, and AI-generated business insights. 1.7 Best practices for optimizing chatbot performance, CRM workflows, and customer experience. 1.8 Data privacy, security, ethical AI practices, and continuous improvement in AI-assisted customer service.
2. Underpinning Skills	2.1 Designing AI chatbot workflows and customer conversation flows 2.2 Configuring AI tools and CRM systems for customer interaction management 2.3 Automating customer communication, notifications, and support processes 2.4 Deploying and monitoring AI chatbots for routine customer interactions 2.5 Collecting and analyzing customer engagement and interaction data 2.6 Using AI-powered analytics to generate customer insights and performance reports 2.7 Refining chatbot workflows and customer support processes using AI insights 2.8 Applying continuous improvement practices to enhance customer experience and satisfaction
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincere and honest to duties 3.4 Environmental concerns 3.5 Eagerness to learn 3.6 Tidiness and timeliness 3.7 Respect for rights of peers and seniors in workplace 3.8 Communication with peers, sub-ordinates and seniors in workplace

4. Resource Implications	4.1 Computers with internet access 4.2 AI tools 4.3 Chatbot workflows 4.4 AI insights
--------------------------	--

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1 designed AI chatbot workflows and conversation flows 1.2 configured AI tools for CRM and customer interaction 1.3 automated customer communication and support systems 1.4 analyzed customer data and engagement performance 1.5 improved customer experience using AI insights
2. Methods of Assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical Demonstration 2.3 Oral Questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a certified assessor or occupation-specific industry expert.

Unit of Competency: APPLY ETHICAL AI USE, DATA MANAGEMENT, AND PERFORMANCE EVALUATION	Nominal Duration: 20 Hrs.	Unit Code: SICIP-IT-AIT-07-O
Unit Descriptor: This unit of competency covers the essential skills and knowledge required to apply ethical AI use, data management and performance evaluation. It specifically includes the tasks of applying data privacy, security, and ethical guidelines in AI use, managing AI-generated data and content responsibly, identifying risks (bias, misinformation, and misuse), evaluating performance of AI tools and outputs, improving AI workflows based on feedback and emerging trends.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Apply data privacy, security, and ethical guidelines in AI use	1.1 <u>Data privacy and security requirements</u> are identified before using AI tools. 1.2 <u>Organizational policies and ethical guidelines</u> are followed during AI-assisted activities. 1.3 Sensitive and confidential information is handled according to data protection requirements. 1.4 AI tools are used in compliance with legal, ethical, and workplace standards. 1.5 <u>Data security risks and privacy concerns</u> are identified and reported appropriately.
2. Manage AI-generated data and content responsibly	2.1 AI-generated data and content are reviewed before use or distribution. 2.2 Information is organized, stored, and managed according to workplace requirements. 2.3 Content accuracy, relevance, and reliability are verified before publication. 2.4 AI-generated outputs are documented and maintained systematically. 2.5 Data and content are used responsibly to support business objectives.
3. Identify risks (bias, misinformation, and misuse)	3.1 AI-generated outputs are reviewed to identify bias, misinformation, inaccuracies, and misleading content. 3.2 Potential risks and ethical concerns associated with AI use are identified and assessed. 3.3 Harmful, inappropriate, or unreliable outputs are corrected or excluded from use. 3.4 AI misuse, ethical issues, and risk incidents are reported according to workplace procedures. 3.5 Preventive measures are applied to minimize AI-related risks and ensure responsible use.
4. Evaluate performance	4.1 AI outputs are evaluated against defined objectives and

of AI tools and outputs	quality requirements. 4.2 <u>Performance indicators</u> are used to measure the effectiveness of AI tools. 4.3 Accuracy, consistency, and relevance of AI-generated results are assessed. 4.4 <u>Performance findings</u> are documented and communicated to relevant stakeholders. 4.5 Improvement opportunities are identified based on evaluation results.
5. Improve AI workflows based on feedback and emerging trends	5.1 User feedback and performance results are collected and reviewed. 5.2 AI workflows and prompt strategies are refined based on evaluation outcomes. 5.3 New AI tools, features, and industry trends are monitored regularly. 5.4 Workflow improvements are implemented to enhance efficiency and output quality. 5.5 Continuous improvement practices are applied to maintain effective AI operations.

Range of Variables

Variable	Range (Includes but not limited to):
1. Data privacy and security requirements	1.1 Data Confidentiality 1.2 Access Control 1.3 Password Protection 1.4 Data Encryption 1.5 Secure Storage 1.6 Data Protection Policies
2. Organizational policies and ethical guidelines	2.1 AI Usage Policy 2.2 Code of Conduct 2.3 Data Protection Policy 2.4 Ethical AI Guidelines 2.5 Compliance Requirements
3. Data security risks and privacy concerns	3.1 Data Breaches 3.2 Unauthorized Access 3.3 Data Leakage 3.4 Personally Identifiable Information (PII) 3.5 Cybersecurity Threats 3.6 AI Misuse Risks
4. Performance indicators	4.1 Accuracy Rate 4.2 Relevance Score 4.3 Consistency Level 4.4 Response Time 4.5 User Satisfaction 4.6 Productivity Improvement
5. Performance findings	5.1 Evaluation Reports

	5.2 Performance Dashboards 5.3 Analysis Results 5.4 Recommendations 5.5 Feedback Reports 5.6 Improvement Reports

Curricular Content Guide

1. Underpinning Knowledge	1.1 Principles of ethical AI use, responsible AI practices, and organizational AI governance. 1.2 Data privacy, cybersecurity, confidentiality, and legal requirements for AI-assisted work. 1.3 Methods for managing, organizing, storing, and documenting AI-generated data and content. 1.4 Techniques for verifying the accuracy, reliability, relevance, and quality of AI-generated outputs. 1.5 Types of AI risks, including bias, misinformation, hallucinations, misuse, and mitigation strategies. 1.6 Performance evaluation methods, quality indicators, and effectiveness measurement of AI tools. 1.7 Principles of workflow optimization through feedback, prompt refinement, and continuous improvement. 1.8 Awareness of emerging AI technologies, industry trends, and best practices for sustainable AI adoption.
2. Underpinning Skills	4.1 Applying data privacy, security, and ethical principles in AI-assisted work 4.2 Managing AI-generated data and content responsibly according to workplace requirements 4.3 Verifying the accuracy, reliability, and relevance of AI-generated outputs before use 4.4 Applying preventive measures to minimize AI risks and ensure responsible use 4.5 Evaluating AI tools and outputs against quality and performance requirements 4.6 Assessing AI output accuracy, consistency, and effectiveness using performance indicators 4.7 Refining AI workflows and prompt strategies based on feedback and evaluation results 4.8 Monitoring emerging AI tools, trends, and technologies to support continuous improvement
3. Underpinning Attitudes	3.1. Commitment to occupational health and safety 3.2. Promptness in carrying out activities 3.3. Sincere and honest to duties 3.4. Environmental concerns 3.5. Eagerness to learn 3.6. Tidiness and timeliness 3.7. Respect for rights of peers and seniors in workplace 3.8. Communication with peers, sub-ordinates and seniors

	in workplace
4. Resource Implications	4.1 Computers with internet access 4.2 Ethical guidelines 4.3 AI tools

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1 applied data privacy, security, and ethical guidelines in AI use 1.2 managed AI-generated data and content responsibly 1.3 identified risks (bias, misinformation, and misuse) 1.4 evaluated performance of AI tools and outputs 1.5 improved AI workflows based on feedback and emerging trends
2. Methods of Assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical Demonstration 2.3 Oral Questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a certified assessor or occupation-specific industry expert.

End of the Competency Standard

Workshop/Lab Facility Standard

Course Name:	AI Tool Management & Prompt Engineering
Number of Trainees:	25

Course-wise Training Space (Theoretical Classroom, Workshop/ Lab/ Classroom cum Workshop):

- Classroom cum workshop – 500 sft

Major Training Equipment and Training Facilities:

Sl. No.	Major Equipment and Training facilities	Required facilities
1.	Computer/Laptop	01
2.	Printer	01
3.	Scanner	01
4.	Computers/Laptop: (Minimum Intel Core i5 processor (8 th Gen), 8GB RAM (16GB preferred), 256GB SSD/HDD storage, High-resolution monitors (19/20-inch minimum, with color accuracy).	25
5.	Projector: High-resolution projector (HD or 4K) for instructor presentations, large screen for the room to ensure visibility for all trainees.	01
6.	High-Speed Internet Router	01
7.	LAN Networking System (Cables and Ports)	01
8.	UPS (Uninterruptible Power Supply)	25
9.	External Hard Drive / Backup Storage	02
10.	Projection Screen	01
11.	Whiteboard / Smart Board	01
12.	Computer Tables	25
13.	Computer Chairs	25
14.	Trainer Table and Chair	02

The following conditions must be fulfilled –

- The institute shall not use the same facilities for any other projects/organizations offering a similar course.
- The institute must provide sufficient evidence to prove ownership of the proposed training equipment.

The list denotes the minimum training equipment and facility required to effectively conduct training for a specific course. Additionally, the institute must ensure that all other necessary

training tools, equipment, and furniture are available to meet the requirement of competency standards (CS) provided by SICIP.

For the operation of training course on AI Tool Management & Prompt Engineering, the institute must ensure the availability of at least 80% of the major training equipment and training facilities (according to the CS) to be eligible for SICIP training delivery. If the score is below 80%, the remaining equipment and facilities need to be installed before the commencement of the training.

The institute will also provide all other hand tools and power tools as per CS for 25 trainees. Also, they will arrange adequate seating arrangement and classroom setup for the 25 trainees.
