

COMPETENCY STANDARD
FOR
SWEATER LINKING OPERATION
(RMG SECTOR)

Skills for Industry Competitiveness and Innovation Program (SICIP)
Finance Division, Ministry of Finance

COPYRIGHT

The Competency Standards for **Sweater Linking Operation (RMG Sector)** is a document for the development of curricula, teaching and learning materials, and assessment tools. It also serves as the document for providing training consistent with the requirements of the industry for individuals who pass through the set standard via assessment would be qualified and settled for a relevant job.

The document was developed under the Skills for Employment Investment Program (SEIP) and subsequently reviewed and updated with the engagement of occupation-specific industry experts to use in training under the **Skills for Industry Competitiveness and Innovation Program (SICIP)**. This document is owned by the Finance Division of the Ministry of Finance of the People's Republic of Bangladesh.

Public and private institutions may use the information contained in this standard for activities benefitting Bangladesh.

Other interested parties must obtain permission from the owner of this document for reproduction of information in any manner in whole or in part of this Skills Standard, in English or other languages.

This document is available at:

INTRODUCTION:

The Skills for Industry Competitiveness and Innovation Program (SICIP) has the overall objective of developing a skilled workforce adept at handling new technologies, especially for emerging industries in Bangladesh. It will expand skills training and strengthen the development of the training ecosystem to address the skills requirements of the SICIP-selected industry sectors. The program aims to (i) increase the technology-oriented skilled workforce across emerging and priority sectors, (ii) promote inclusive skilling and upskilling opportunities for women and socially disadvantaged groups, (iii) incentivize industry-university partnerships to nurture innovation capacity and improve industry competitiveness, and (iv) foster skills for climate-resilient manufacturing processes and green technologies. The program is expected to benefit about 220,000 new and existing workers over a 6-year implementation period from 2024-2029.

The SICIP Program has, therefore, taken the initiative to enhance the employability and productivity of trainees by implementing market-responsive and job-focused training programs through public and private training providers. This will require the development of competency standards for each of the occupations/trades which will provide a structured framework in the learning process to guide training providers, ensure consistent training quality, and create an alignment between the skills provided by the training institutes and the needs of the industry.

The Competency Standard also suggests integration of YouTube or similar platforms or downloaded clips into classroom practice to ensure simulated creation of the contents so that learners are exposed to visual demonstrations before classroom instruction or practical session, which aligns with modern learning preference and supports flipped classroom models.

This competency standard is therefore developed to improve skills following the job roles and skill sets of the occupation and ensure that the required skills are aligned with industry requirements.

The document details the format, sequencing, wording, and layout of the Competency Standard for an occupation which comprises Units of Competence and its corresponding Elements.

OVERVIEW:

A **Competency Standard** is a written specification of the knowledge, skills, and attitudes required for the performance of a job or occupation or trade corresponding to the standard of performance required in the workplace.

Competency standard:

- provides a consistent and reliable set of components for training, recognizing, and assessing people's skills, and may also have optional support materials.
- enables industry-recognized qualifications to be awarded through direct assessment of workplace competencies
- encourages the development and delivery of flexible training that suits individual and industry requirements
- encourages learning and assessment in a work-related environment which leads to verifiable workplace outcomes.

Competency Standard has been reviewed and updated by a working group comprised of occupation-specific experts from the industry/institution, relevant consultants of SICIP.

Competency Standards describe the skills, knowledge, and attitude needed to perform effectively in the workplace. Competency Standards acknowledge that people can achieve vocational and technical competency in many ways by emphasizing what the learner can do, not how or where they learned to do it.

With Competency Standards, assessment and training may be conducted at the workplace, at training organization, during regular work, or through work experience, work placement, work simulation or any combination of these.

A Unit of Competency describes a distinct work activity that would normally be undertaken by one person in accordance with industry standards.

Units of Competency are documented in a standard format that comprises:

- Reference to Industry Sector, Occupational Title and Occupational Description
- Unit code
- Unit title
- Unit descriptor
- Unit of Competency
- Elements and performance criteria
- Variables and range statement
- Evidence guides

Together all the parts of a Unit of Competency:

- Describe a work activity
- Guide the assessor in determining whether the candidate is competent.

Identification and validation of units of competency and elements for each occupation were made by experts from in consultative workshop.

The ensuing sections of this document comprise a description of the respective occupation with all the key components of a Unit of Competence:

- An overview of all Units of Competence for the occupation and their corresponding duration required for completion of training.
- The Competency Standards that include the Unit of Competency, Unit Descriptor, Elements and Performance Criteria, Range of Variables, Curricular Content Guide, and Assessment Evidence Guide.

Units & Elements at a Glance:

Generic Competencies (30 Hrs.)

Code	Unit of Competency	Elements of Competency	Duration (Hours)
SICIP-RMG-SLO-01-G	Apply occupational health and safety (OHS) practices at workplace	1. Identify, control and report OHS hazards 2. Conduct work safely 3. Follow emergency response procedures 4. Maintain and improve health and safety in the workplace	10
SICIP-RMG- SLO -02-G	Receive and respond to workplace instructions	1. Interpret and follow verbal Instructions 2. Read and interpret workplace documents 3. Receive and follow written instructions 4. Attend meetings and provide inputs	10
SICIP-RMG- SLO -03-G	Work in a team environment	1. Identify team goals and work processes. 2. Communicate and co-operate with team members. 3. Work as a team member 4. solve problems as a team member	10
Total Hour			30

Sector Specific Competencies (20 hrs.)

Code	Unit of Competency	Elements of Competency	Duration (Hours)
SICIP-RMG- SLO-01-S	Interpret sketch and specifications in manuals	1. Identify information from manual 2. Identify sketch and specifications	10
SICIP-RMG- SLO -02-S	Apply green practices in RMG sector	1. Interpret green concepts 2. Minimize resource use in the workplace 3. Implement waste management practices	10
Total Hour			20

Occupation Specific Competencies (222 hrs.)

Code	Unit of Competency	Elements of Competency	Duration (hours)
SICIP-RMG-SLO-01-O	Demonstrate knowledge on sweater linking operation	1. Recognize fully fashioned knitwear products 2. Interpret sweater manufacturing process 3. Identify sweater linking machine and major parts	10
SICIP-RMG-SLO-02-O	Prepare for sweater linking operation	1. Practice OHS in workplace 2. Collect tools and materials 3. Set and adjust sweater linking machine	20
SICIP-RMG- SLO-03-O	Perform sweater linking machine operation	1. Practice OHS in workplace 2. Operate sweater linking machine 3. Restore tools and workplace maintenance	52
SICIP-RMG- SLO-04-O	Join parts of sweater	1. Practice OHS 2. Identify parts of sweater for linking 3. Perform linking operation of pullover 4. Perform linking operation of cardigan 5. Perform linking operation of trouser and skirt 6. Restore tools and workplace cleanliness	120
SICIP-RMG- SLO-05-O	Maintain production performance	1. Ensure productivity in linking operation 2. Maintain quality in linking operation 3. Perform linking machine maintenance	20
Total Hours			222

COMPETENCY STANDARD: SWEATER LINKING OPERATION

Generic Competencies:

Unit of Competency: APPLY OCCUPATIONAL HEALTH AND SAFETY (OHS) PRACTICES AT WORKPLACE	Nominal Duration: 10 Hrs.	Unit Code: SICIP-RMG-SLO-01-G
Unit Descriptor: This unit covers the knowledge, skills and attitudes required to apply occupational health and safety (OHS) practices at workplace. It specifically includes the tasks of identifying, controlling and reporting OHS hazards, conducting work safely, following emergency response procedures and maintaining and improving health and safety in the workplace.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Identify, control and report OHS hazards	1.1 Work area is routinely checked for Occupational Health and Safety (OHS) hazards prior to commencing and during work. 1.2 <u>Hazards</u> are identified and corrective action is taken within the level of responsibility. 1.3 OSH hazards and incidents are reported to appropriate personnel according to workplace procedures. 1.4 <u>Safety signs and symbols</u> are identified and followed. 1.5 <u>Preventive Control measures</u> are identified in accordance with OSH work standards.
2. Conduct work safely	2.1 OHS practices are applied in the workplace. 2.2 <u>Personal Protective Equipment (PPE)</u> are used.
3. Follow emergency response procedures	3.1 Emergency situations are identified and reported according to workplace requirements. 3.2 Emergency procedures are followed as appropriate to the nature of the emergency and according to workplace procedures. 3.3 <u>Workplace procedures</u> for dealing with accidents, fires and emergencies are followed whenever necessary within scope of responsibilities.
4. Maintain and improve health and safety in the workplace	4.1 Risks are identified and appropriate control measures are implemented in the workplace. 4.2 Recommendations arising from risk assessments are

	implemented within level of responsibility.
4.3	Safety records are maintained according to <u>company policies</u> .

Range of Variables

Variable	Range (May include but not limited to):
1. Hazards	1.1. OHS incidents include near misses, injuries, illnesses and property damage, noise, handling hazardous substances. 1.2. Biological hazards- bacteria, viruses, plants, parasites, mites, molds, fungi, insects 1.3. Chemical hazards – dusts, fibers, mists, fumes, smoke, gasses, vapors 1.4. Ergonomics Hazards 1.5. Physiological factors – monotony, personal relationship, work out cycle 1.6. Safety hazards (unsafe workplace condition) – confined space, excavations, falling objects, gas leaks, electrical, poor storage of materials and waste, spillage, waste and debris 1.7. Unsafe workers’ act (Smoking in off-limited areas, Substance and alcohol abuse at work) 1.8. Working with and near moving equipment / load shifting equipment. 1.9. Broken or damaged equipment or materials.
2. Safety signs and symbols	2.1 Direction signs (exit, emergency exit, etc.) 2.2 First aid signs 2.3 Danger Tags 2.4 Hazard signs 2.5 Safety tags 2.6 Warning signs
3. Personal Protective Equipment (PPE)	3.1 Apron 3.2 Safety Helmet 3.3 Goggles 3.4 Ear muffs 3.5 Ear plugs 3.6 Gloves 3.7 Clothing 3.8 Safety Boots 3.9 Face Protection (Musk & Shield) 3.10 Scarf 3.11 Hair Net/cap/bonnet

	3.12 Hard hat
4. Preventive Control Measures	4.1 Eliminate the hazard (i.e., get rid of the dangerous machine) 4.2 Isolate the hazard (i.e. keep the machine in a closed room and operate it remotely; barricade an unsafe area off) 4.3 Substitute the hazard with a safer alternative (i.e., replace the machine with a safer one) 4.4 Use administrative controls to reduce the risk (i.e. give trainings on how to use equipment safely; OHS-related topics, issue warning signage, rotation/shifting work schedule) 4.5 Use engineering controls to reduce the risk (i.e. use safety guards to machine) 4.6 Use personal protective equipment 4.7 Safety, health and work environment evaluation 4.8 Periodic and/or special medical examinations of workers
5. Workplace Procedures	5.1 Fire fighting 5.2 Medical and first aid 5.3 Evacuation 5.4 Material Safety Data Sheets (MSDSs) and manufacturers' advice
6. Company policies	6.1 Job related Standard Operating Procedures (SOPs). 6.2 Occupational Health and Safety (OHS) specific procedures. Examples of OHS procedures include – consultation and participation, emergency response to specific hazards, incident investigation, risk assessment, reporting arrangement and issue resolution procedures.

Curricular Content Guide

1. Underpinning Knowledge	1.1. OHS Workplace Policies and Procedures. 1.2. Work safety procedures. 1.3. Fire and emergency procedures. 1.4. Types of Hazards (Biological, Chemical and Physical) and their effects. 1.5. PPE types and uses. 1.6. Personal hygiene practices. 1.7. OHS awareness. 1.8. Steps of hazard identification. 1.9. Principles of hazards control. 1.10. Employer's role.
---------------------------	---

	1.11. Supervisor's responsibilities.
2. Underpinning Skills	2.1. Identifying OHS policies and procedures. 2.2. Following personal work safety practices. 2.3. Reporting hazards and risks. 2.4. Responding to emergency procedures. 2.5. Maintaining physical well-being in the workplace. 2.6. Identify tools and equipment related to OHS. 2.7. Improving OHS performance.
3. Underpinning Attitudes	3.1. Commitment to occupational health and safety 3.2. Promptness in carrying out activities 3.3. Sincere and honest to duties 3.4. Eagerness to learn 3.5. Tidiness and timeliness 3.6. Environmental concerns 3.7. Respect for rights of peers and seniors at workplace 3.8. Communication with peers and seniors at workplace
4. Resource Implications	The following resources must be provided: 4.1 Workplace (simulated or actual) 4.2 Workplace procedures 4.3 Manuals 4.4 Workplace documents, signs and symbols 4.5 Relevant specifications or work instructions. 4.6 Tools, equipment and facilities appropriate to the process or activities. 4.7 Materials are relevant to the proposed activity.

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1 used Personal Protective Equipment (PPE). 1.2 identified hazards. 1.3 took corrective action of different hazards. 1.4 took corrective action for emergency procedure. 1.5 reported emergency situation to the Supervisor / Manager. 1.6 satisfied requirements mentioned in the performance criteria and range of variables.
2. Methods of Assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical demonstration 2.3 Oral questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated

	work place after completion of the training.
	3.2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

Unit of Competency: RECEIVE AND RESPOND TO WORKPLACE INSTRUCTIONS	Nominal Duration: 10 Hrs.	Unit Code: SICIP-RMG-SLO-02-G
Unit Descriptor: This unit covers the knowledge, skills and attitudes required to receive and respond to workplace instructions. It specifically includes the tasks of interpreting and following verbal Instructions, reading and interpreting workplace documents, receiving and following written instructions and attending meetings and provide inputs.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Interpret and follow verbal Instructions	1.1 Verbal Instructions are interpreted. 1.2 Questions are asked to clarify understanding or obtaining more information. 1.3 Instructions are followed as per understanding. 1.4 Information/ instruction is recorded.
2. Read and interpret workplace documents.	2.1 <u>Written instructions</u> are read and interpreted in accordance with <u>workplace guidelines</u> . 2.2 Work <u>signage</u> are interpreted.
3. Receive and follow written instructions	3.1 Written instructions are interpreted. 3.2 Routine written instructions are followed in sequence. 3.3 Feedback is given to workplace supervisor based on workplace guidelines.
4. Attend meetings and provide inputs	4.1 Meetings are attended regularly and on time following well-disseminated agenda. 4.2 Proper <u>communication</u> methods are used to transmit instructions 4.3 Appropriate non-verbal communication is used. 4.4 Inputs are provided consistent with the meeting purpose. 4.5 Opinions are expressed without interruption. 4.6 Meeting outputs are implemented.

Range of Variables

Variable	Range (May include but not limited to):
1. Written instructions	1.1 Supervisor's / Manager's Instructions 1.2 Memoranda 1.3 Rules and regulations 1.4 Signage 1.5 Approved work plan 1.6 External communications
2. Workplace guidelines	2.1 Labor policies and guidelines 2.2 Written instructions 2.3 Operations manual 2.4 Organizational manuals 2.5 Quality assurance handbook
3. Signage	3.1 On-site direction signs 3.2 Common site warnings 3.3 Location signs 3.4 Traffic signs
4. Communication	4.1 Verbal instructions 4.2 Written instructions 4.3 Online communication

Curricular Content Guide

1. Underpinning Knowledge	1.1 Workplace communication policies, standards and procedures. 1.2 Verbal and non-verbal communication. 1.3 Modes of communication
2. Underpinning Skills	2.1 Receiving verbal instructions 2.2 Interpreting verbal and written information/ instruction 2.3 Conveying instructions using verbal and 2.4 Written forms of communication 2.5 Participating in work place meetings and discussion.
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincere and honest to duties 3.4 Eagerness to learn 3.5 Tidiness and timeliness 3.6 Environmental concerns 3.7 Respect for rights of peers and seniors at workplace 3.8 Communication with peers and seniors at workplace
4. Resource Implications	The following resources must be provided: 4.1 Workplace (simulated or actual) 4.2 Writing materials. 4.3 Workplace documents, signs and symbols

	4.4 Tools, equipment and facilities appropriate to the process or activities.
	4.5 Materials are relevant to the proposed activity.

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1 interpreted verbal Instructions. 1.2 interpreted written instructions are read. 1.3 followed routine written instructions in sequence. 1.4 used proper communication methods to transmit instructions.
2. Methods of Assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical demonstration 2.3 Oral questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

Unit of Competency: WORK IN A TEAM ENVIRONMENT	Nominal Duration: 10 Hrs.	Unit Code: SICIP-RMG-SLO-03-G
Unit Descriptor: This unit covers the knowledge, skills and attitudes required to work in a team environment. It specifically includes the tasks of Identifying team goals and processes, communicating and cooperating with team members, working as a team member and solving problems as a team member.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Identify team goals and work processes.	1.1. Team goals and collaborative decision-making processes are identified.

	1.2. Role and common goals of the team are defined from available <u>sources of information.</u> 1.3. Team structure, responsibilities and reporting relations are identified from team discussions and other external sources.
2. Communicate and co-operate with team members.	2.1 Communication and negotiation skills are applied and maintained in all relevant situations. 2.2 Constructive contributions are made to <u>workplace discussions</u> on such issues as production, quality and safety. 2.3 Goals/ objectives and action plans undertaken in the workplace are communicated promptly. 2.4 Information regarding problems and issues are organized coherently to ensure clear and effective communication. 2.5 Dialogue is initiated with appropriate personnel. 2.6 Communication problems and issues are raised 2.7 Barriers to communication are identified and resolved
3. Work as a team member	3.1 Effective forms of communication are used to interact with <u>team members</u> in discussing team activities and objectives. 3.2 Mutual respect, empathy and active collaboration are demonstrated 3.3 Communication channels are followed as per <u>workplace context.</u>
4. Solve problems as a team member	4.1 Current and potential problems faced by team are identified 4.2 Problems are investigated and analyzed 4.3 Potential solutions of problem are identified 4.4 Recommendations about possible solutions are developed, documented, ranked and presented to team members for decision.

Range of Variables

Variable	Range (May include but not limited to):
1. Sources of information	1.1. Organizational structures 1.2. Operations Manuals 1.3. Job description 1.4. Standard operating procedures
2. Workplace discussions	2.1 Coordination meetings 2.2 Toolbox discussion 2.3 Peer-to-peer discussion
3. Team members	3.1 Coach / members

	3.2 Supervisor / manager 3.3 Peers / colleagues 3.4 Other members /Employee representative of the organization.
4. Workplace context	4.1 National laws and statutes 4.2 Standard operating procedures 4.3 Workplace rules and regulations

Curricular Content Guide

1. Underpinning Knowledge	1.1. Sources of information define 1.2. Team structure, role, and responsibility. 1.3. Individual member's roles and responsibilities. 1.4. Effective verbal communication methods 1.5. Communication flow and reporting structures. 1.6. Interpersonal communication skills. 1.7. Organization requirements for written and electronic communication methods 1.8. Communication problems and issues 1.9. Barriers in communication 1.10. Team planning. 1.11. Team meeting procedures. 1.12. Workplace etiquette 1.13. Industry maintenance, service and helpdesk practices, processes and procedures 1.14. Industry standard diagnostic tools 1.15. Malfunctions and resolutions
2. Underpinning Skills	2.1 Organizing sources of information 2.2 Identifying the role and responsibility of the team. 2.3 Identifying roles and responsibilities of individual members. 2.4 Identifying effective verbal communication methods 2.5 Identifying communication flow and reporting structure. 2.6 Identifying interpersonal communication skills 2.7 Complying with organization requirements for the use of written and electronic communication methods 2.8 Negotiation and communication skills 2.9 Participating in team discussion. 2.10 Working as a team member. 2.11 Participating in a variety of workplace discussions 2.12 Effective clarifying and probing skills 2.13 Identifying issues 2.14 Identifying current industry standard diagnostic tools 2.15 Describing common malfunctions and resolutions.

	2.16 Determining the root cause of a routine malfunction
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincere and honest to duties 3.4 Eagerness to learn 3.5 Tidiness and timeliness 3.6 Environmental concerns 3.7 Respect for rights of peers and seniors at workplace 3.8 Communication with peers and seniors at workplace
4. Resource Implications	The following resources must be provided: 4.1 Workplace (simulated or actual) 4.2 Standard operating procedure 4.3 Relevant specifications or work instructions. 4.4 Tools, equipment and facilities appropriate to the process or activities. 4.5 Materials are relevant to the proposed activity.

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1 identified team goals and work processes 1.2 identified own role and responsibilities within team 1.5 communicated and cooperated with team members 1.6 practice problem solving within the team
2. Methods of Assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical demonstration 2.3 Oral questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

Sector Specific Competencies (20 Hrs.)

Unit of Competency: INTERPRET SKETCH AND SPECIFICATIONS IN MANUALS	Nominal Duration: 10 Hrs.	Unit Code: SICIP-RMG-SLO-01-S
Unit Descriptor: This unit covers the knowledge, skills and attitudes required to interpret sketch and specifications in manuals. It specifically includes the tasks of identifying information from manual and identifying sketch and specifications.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Identify information from manual	1.1. Appropriate <u>manuals</u> are collected as per sample. 1.2. Importance of manuals is recognized. 1.3. Required information are collected from manuals.
2. Identify sketch and specifications	2.1 Relevant <u>sketch</u> and <u>specifications</u> are identified. 2.2 Key <u>terms and abbreviations</u> are identified. 2.3 <u>Signs and symbols</u> are identified. 2.4 Schedules, dimensions, drawings and specifications are interpreted.

Range of Variables

Variable	Range (May include but not limited to):
1. Manuals	1.1 Buyer's specification manual 1.2 Compliance manual 1.3 Maintenance procedure manual 1.4 Periodic maintenance manual 1.5 Quality manual 1.6 Signs and symbols, instruction manuals
2. Sketch	2.1 Technical sketch 2.2 Measurement sketch
3. Specifications	3.1 Product specifications 3.2 Performance specifications 3.3 Method specifications
4. Terms and abbreviations	4.1 Refers to all terms and abbreviations associated with the RMG sector
5. Signs and symbols	5.1 Include all signs and symbols associated with the RMG sector

	5.2 OHS sign
--	--------------

Curricular Content Guide

1. Underpinning Knowledge	1.1 Themes on various types of RMG manuals 1.2 Schedules, dimensions and specifications contained in sketch 1.3 Units of conversion 1.4 Rules of sketch, drawings and specifications 1.5 Sketch and specifications 1.6 Signs and symbols 1.7 Terms and abbreviations used
2. Underpinning Skills	2.1 Recognising importance of manual 2.2 Selecting appropriate manuals as per sample 2.3 Collecting information from manual as per sample 2.4 Identifying signs and symbols 2.5 Identifying drawings and specifications 2.6 Interpreting schedules, dimensions, drawings and specifications
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincere and honest to duties 3.4 Environmental concerns 3.5 Eagerness to learn 3.6 Tidiness and timeliness 3.7 Respect for rights of peers and seniors in workplace 3.8 Communication with peers, sub-ordinates and seniors in workplace
4. Resource Implications	The following resources must be provided: 4.1 Workplace (simulated or actual) 4.2 Manuals 4.3 Workplace documents, signs and symbols 4.4 Sketch and specifications 4.5 Tools, equipment and facilities appropriate to the process or activities. 4.6 Materials are relevant to the proposed activity.

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1 collected information from manual as per sample 1.2 Identified relevant drawings and specifications 1.3 identified signs and symbols 1.4 identified terms and abbreviations
-----------------------------------	--

	1.5 identified sketches and specifications as per sample
2. Methods of Assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical demonstration 2.3 Oral questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

Unit of Competency: APPLY GREEN PRACTICES IN RMG SECTOR	Nominal Duration: 10 hrs.	Unit Code: SICIP-RMG-SLO-02-S
Unit Descriptor: This unit covers the skills, knowledge and attitudes required for apply green practices in RMG sector. It specifically includes the tasks of interpreting green concepts, minimizing resources use in the workplace and implementing waste management practices.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Interpret green concepts	1.1 <u>Principles of green practices in RMG (Ready-Made Garment)</u> manufacturing are explained. 1.2 Key terms and symbols in RMG production processes are identified. 1.3 <u>Sources of environmental impacts</u> during RMG manufacturing activities are identified. 1.4 RMG manufacturing activities use are explained. 1.5 <u>Ways of mitigating environmental impacts</u> in RMG manufacturing are explained.
2. Minimize resources use in the workplace	2.1 Water, energy, and raw material consumption in RMG manufacturing are documented. 2.2 <u>Recyclable and non-recyclable items</u> in RMG production processes are identified. 2.3 Procedures to reduce resource consumption in RMG

	manufacturing are implemented. 2.4 Sustainable alternatives in RMG manufacturing are explored and applied.
3. Implement waste management practices	3.1 <u>Different types of waste in RMG manufacturing</u> are identified. 3.2 Hazardous waste in RMG production is disposed of according to environmental regulations. 3.3 Green habits to reduce waste in personal and professional life are practiced.

Range of Variables

Variable	Range (May include but not limited to):
1. Principles of green practices in RMG (Ready-Made Garment)	1.1 Reducing energy consumption in RMG manufacturing processes. 1.2 6R for waste management in RMG production: 1.2.1 Refuse unnecessary materials and processes. 1.2.2 Reduce resource consumption and waste generation. 1.2.3 Reuse materials within the production process. 1.2.4 Recycle materials for future use in RMG manufacturing. 1.2.5 Recover usable resources from waste. 1.2.6 Repair damaged products or materials instead of discarding them. 1.3 Use of sustainable materials in RMG production with low environmental impact. 1.4 Recycling of materials used in the RMG manufacturing process. 1.5 Sustainable transportation methods for moving goods and materials within the RMG sector.
2. Sources of environmental impacts	2.1 Air pollution in RMG manufacturing 2.2 Water pollution in RMG manufacturing 2.3 Soil degradation in RMG manufacturing 2.4 Noise pollution in RMG manufacturing 2.5 Waste generation in RMG manufacturing 2.6 Resource depletion in RMG manufacturing
3. Ways of mitigating environmental impacts	3.1 Utilizing energy-efficient equipment in RMG production processes. 3.2 Adopting renewable energy sources for RMG manufacturing operations. 3.3 Implementing site protection measures to prevent pollution and reduce environmental. 3.4 Using reusable materials in production processes.

	3.5 Choosing sustainable materials with low environmental impact for garment production. 3.6 Using noise-reducing equipment and scheduling production work. 3.7 Optimizing logistics and delivery to reduce transportation emissions and improve overall supply chain efficiency.
4. Recyclable and non-recyclable items	4.1 Recyclable Items in RMG Manufacturing 4.1.1 Metal components. 4.1.2 Wooden materials. 4.1.3 Fabric scraps and textile fibers. 4.1.4 Plastic items, including buttons, tags, and packaging materials. 4.2 Non-Recyclable Items in RMG Manufacturing 4.2.1 Paints, coatings, and dyes. 4.2.2 Contaminated materials. 4.2.3 Treated wood and other materials.
5. Different types of waste in RMG manufacturing	5.1 Fabric waste from cutting and trimming processes. 5.2 Wood waste from packaging or display materials. 5.3 Metal waste from trims, buttons, zippers, and other hardware. 5.4 Textile waste, including scraps from garment production and defective products. 5.5 Plastic waste, such as packaging materials, labels, and plastic buttons. 5.6 Solid waste from chemical treatments or dyeing processes. 5.7 Packaging waste from raw materials and finished products.

Curricular Content Guide

1. Underpinning Knowledge	1.1 Principles of green practices in RMG (Ready-Made Garment) manufacturing. 1.2 Sources of environmental impacts. 1.3 Ways of mitigating environmental impacts 1.4 Recyclable and non-recyclable items 1.5 Different types of waste in RMG manufacturing 1.6 Hazardous waste in RMG production 1.7 Green habits to reduce waste
2. Underpinning Skills	2.1 Explaining principles of green practices in RMG manufacturing 2.2 Identifying sources of environmental impacts 2.3 Explaining re-cyclable and non-recyclable items 2.4 Minimizing resources use in the workplace 2.5 Identifying different types of waste in RMG

	manufacturing 2.6 Disposing hazardous waste in RMG production 2.7 Practicing green habits to reduce waste
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincere and honest to duties 3.4 Environmental concerns 3.5 Eagerness to learn 3.6 Tidiness and timeliness 3.7 Respect for rights of peers and seniors in the workplace 3.8 Communication with peers, subordinates and seniors in the workplace
4. Resource Implications	The following resources must be provided: 4.1 Workplace (simulated or actual) 4.2 Standard operating procedure 4.3 Workplace documents, signs and symbols 4.4 Codes of conduct 4.5 Tools, equipment and facilities appropriate to the process or activities. 4.6 Materials are relevant to the proposed activity.

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1 interpreted green concepts 1.2 minimized resources use in the workplace 1.3 implemented waste management practices
2. Methods of Assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical demonstration 2.3 Oral questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

Occupation Specific Competencies (222 Hrs.)

Unit of Competency: DEMONSTRATE KNOWLEDGE ON SWEATER LINKING OPERATION	Nominal Duration: 10 Hrs.	Unit Code: SICIP-RMG-SLO-01-O
Unit Descriptor: This unit covers the knowledge, skills and attitudes required to demonstrate knowledge on sweater linking operation. It specifically includes the tasks of recognizing fully fashioned knitwear products, interpreting sweater manufacturing process and identifying sweater linking machine and major parts.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in bold and underlined are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Recognize fully fashioned knitwear products	1.1 <u>Fully fashioned knitwear products</u> are identified based on their structural design and manufacturing technique. 1.2 <u>Types of sweaters</u> are identified according to style and use. 1.3 <u>Fabric types</u> and <u>yarns</u> are identified.
2. Interpret sweater manufacturing process	2.1. <u>Sweater manufacturing process</u> are recognized and explained. 2.2. <u>Linking process/steps</u> are identified and interpreted. 2.3. Relationship between knitting and linking operations is described.
3. Identify sweater linking machine and major parts	3.1 <u>Sweater linking machine</u> is identified and classified according to job requirements. 3.2 Appropriate <u>machine gauge</u> is identified based on the fabric type. 3.3 <u>Major parts of the sweater linking machine</u> are identified and their functions described. 3.4 Safety features and operational controls of the linking machine are identified and explained.

Range of Variables

Variable	Range (May include but not limited to):
1. Fully fashioned knitwear products	1.1 Sweater 1.1.1 Pullover

	1.1.2 Cardigan 1.1.3 Hoodie 1.2 Trouser 1.3 Skirt 1.4 Scarf 1.5 Cap 1.6 Monkey cap 1.7 Hand gloves 1.8 Head Band
2. Types of sweaters	2.1 Pullover 2.1.1 Round neck 2.1.2 V-neck 2.1.3 Turtleneck 2.1.4 Mock neck 2.1.5 Vest type 2.1.6 Polo type 2.2 Cardigan 2.2.1 Open cardigan 2.2.2 Zipper cardigan 2.2.3 Button cardigan
3. Fabric types	3.1 Jersey knit 3.2 Cable knit 3.3 Rib knit 3.4 Jacquard 3.5 Fleece
4. Yarns	4.1 Cotton 4.2 Wool 4.3 Viscose 4.4 Alpaca 4.5 Cashmere 4.6 Linen 4.7 Acrylic 4.8 Polyester 4.9 Nylon
5. Sweater manufacturing process	5.1 Winding 5.2 Sampling 5.3 Knitting 5.4 Linking 5.5 Trimming 5.6 Mending 5.7 Washing 5.8 Embellishment 5.9 Sewing 5.10 Ironing

	5.11 Packing
6. Linking process/steps	6.1 Distribution 6.2 Linking 6.3 Over lock 6.4 Inspection
7. Sweater linking machine	7.1 Dial linking 7.2 Super dial 7.3 Cup seam
8. Machine gauge	8.1 3 gauge 8.2 5 gauge 8.3 6 gauge 8.4 8 gauge 8.5 12 gauge 8.6 14 gauge 8.7 16 gauge
9. Major parts of the sweater linking machine	9.1 Dial 9.2 Bed (or Needles Bed) 9.3 Needle (Size- 3mm, 4mm, 5mm, 6mm, 7mm, 8mm) 9.4 Regulator spring 9.5 Belt 9.6 Pulley 9.7 Bearing 9.8 Motor 9.9 Roller 9.10 Paddle

Curricular Content Guide

1. Underpinning Knowledge	1.1 Characteristics of fully fashioned knitwear 1.2 Types of sweaters and their construction techniques 1.3 Sequence of sweater production process and steps 1.4 Role of linking operation in the full process 1.5 Different between knitting and linking operations 1.6 Types of linking machines 1.7 Major components of sweater linking machine and their use 1.8 Different fabric and yarn types and gauges 1.9 Safety mechanisms and maintenance requirements
2. Underpinning Skills	2.1 Identifying components of fully fashioned knitwear 2.2 Interpreting technical specifications or production sheets 2.3 Following step-by-step sweater production process 2.4 Identifying linking's position and role in workflow 2.5 Naming and locating main parts of the linking machine 2.6 Setting up and adjusting machine parameters for different sweater styles

	2.7 Performing routine cleaning and lubrication
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincere and honest to duties 3.4 Environmental concerns 3.5 Eagerness to learn 3.6 Tidiness and timeliness 3.7 Respect for rights of peers and seniors in the workplace 3.8 Communication with peers, subordinates and seniors in the workplace
4. Resource Implications	The following resources must be provided: 4.1 Workplace (simulated or actual) 4.2 Standard operating procedure 4.3 Workplace documents, signs and symbols 4.4 Tools, equipment and facilities appropriate to the process or activities. 4.5 Materials are relevant to the proposed activity.

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1 identified fully fashioned knitwear products. 1.2 identified fabric types and yarns 1.3 identified linking process/steps 1.4 identified machine gauge based on the fabric type. 1.5 identified major parts of the sweater linking machine
2. Methods of Assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical demonstration 2.3 Oral questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

Unit of Competency:	Nominal	Unit Code:
----------------------------	----------------	-------------------

PREPARE FOR SWEATER LINKING OPERATION	Duration: 20 Hrs.	SICIP-RMG-SLO-02-O
Unit Descriptor: This unit covers the knowledge, skills and attitudes required to prepare for sweater linking operation. It specifically includes the tasks of practicing OHS in workplace, collecting tools and materials and setting and adjusting sweater linking machine.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Practice OHS in workplace	1.1 <u>Personal Protective Equipment (PPE)</u> is collected and used as per job requirement. 1.2 Occupational Health and Safety (OHS) are followed as per job requirement. 1.3 Machines and equipment are cleaned, inspected, and checked to ensure safe operation.
2. Collect tools and materials	2.1 <u>Tools and materials</u> are selected and collected according to job requirements. 2.2 Materials are arranged in the work area as required. 2.3 Quality and quantity of collected tools and materials are checked to meet the job.
3. Set and adjust sweater linking machine	3.1 <u>Safety guards</u> on the sweater linking machine are inspected. 3.2 Machine parts are checked and adjusted or replaced as necessary. 3.3 Stitch tension is checked and adjusted to maintain consistent and quality linking. 3.4 Machine settings are calibrated to optimize performance and product quality.

Range of Variables

Variable	Range (May include but not limited to):
1. Personal protective equipment (PPE)	1.1 Face mask 1.2 Apron 1.3 Scarf/cap 1.4 Needle guard
2. Tools	2.1 Measuring tape

	2.2 Scissor/trimmer 2.3 Stitch opener 2.4 Screw driver
3. Materials	3.1 Knitting part/panel 3.2 Linking yarn 3.3 Shoulder/Ma billon tape
4. Safety guards	4.1 Rubber pad 4.2 Safety goggles

Curricular Content Guide

1. Underpinning Knowledge	1.1 Purpose and importance of Occupational Health and Safety (OHS) 1.2 Common workplace hazards in a linking section 1.3 Routine cleaning and lubrication techniques 1.4 Types of tools used in linking operation 1.5 Types of materials used 1.6 Function of main machine components 1.7 Procedures for adjusting machine parts and stitch tension. 1.8 Machine settings based on garment type, stitch count, and gauge
2. Underpinning Skills	2.1 Wearing appropriate PPE 2.2 Maintaining machine, clean and organized safe operation 2.3 Identifying and collecting correct tools for specific sweater types 2.4 Organizing materials systematically for efficient operation 2.5 Inspecting tools and materials to reduce the damage or defects 2.6 Calibrating machine settings
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincere and honest to duties 3.4 Environmental concerns 3.5 Eagerness to learn 3.6 Tidiness and timeliness 3.7 Respect for rights of peers and seniors in the workplace 3.8 Communication with peers, subordinates and seniors in the workplace
4. Resource Implications	The following resources must be provided: 4.1 Workplace (simulated or actual) 4.2 Workplace procedures 4.3 Standard operating procedure 4.4 Workplace documents, signs and symbols

	4.5 Tools, equipment and facilities appropriate to the process or activities.
	4.6 Materials are relevant to the proposed activity.

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1 practiced OHS at workplace. 1.2 checked machines and equipment to ensure safe operation. 1.3 collected tools and materials for job requirements. 1.4 checked and adjusted machine parts. 1.5 checked and adjusted stitch tension to maintain consistent and quality linking.
2. Methods of Assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical demonstration 2.3 Oral questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

Unit of Competency: PERFORM SWEATER LINKING MACHINE OPERATION	Nominal Duration: 52 Hrs.	Unit Code: SICIP-RMG-SLO-03-O
Unit Descriptor: This unit covers the knowledge, skills and attitudes required to perform sweater linking machine operation. It specifically includes the tasks of practicing OHS in workplace, operating sweater linking machine and restoring tools and workplace maintenance.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Practice OHS at workplace	1.1 <u>Personal protective equipment (PPE)</u> is collected and used as per job requirement. 1.2 Occupational health and safety (OHS) are followed as per job requirement. 1.3 Machines and equipment are cleaned, inspected, and checked to ensure safe operation.
2. Operate sweater linking machine	2.1. Threading is performed as per job requirements. 2.2. Machine speed and stitch settings are adjusted as per job requirements. 2.3. <u>Knitted panel</u> are positioned and aligned on the linking machine for accurate stitching. 2.4. Sweater linking machine is operated according to standard operating procedures. 2.5. Linking operation is monitored to detect any defects or irregularities. 2.6. Linked garments are inspected for stitch consistency and quality standards.
3. Restore tools and workplace maintenance	3.1 Waste materials are collected and disposed of according to workplace standard operating procedures (SOP). 3.2 Tools and equipment are cleaned and restored. 3.3 Machines are cleaned, maintained, and covered. 3.4 Workplace area is cleaned and organized following established workplace procedures.

Range of Variables

Variable	Range (May include but not limited to):
----------	--

1. Personal protective equipment (PPE)	1.1 Face mask 1.2 Apron 1.3 Scarf/cap
2. Knitted panel	2.1 Front part 2.2 Back part 2.3 Sleeve part

Curricular Content Guide

1. Underpinning Knowledge	1.1 Use of Personal Protective Equipment (PPE) 1.2 Linking machine operation procedure 1.3 Yarn feeding and needle control mechanisms 1.4 Fabric alignment techniques and tension control 1.5 Waste management and housekeeping procedures 1.6 Standard cleaning procedures for sweater linking machines 1.7 Tool storage protocols and labeling systems 1.8 Lubrication schedules and machine care routines.
2. Underpinning Skills	2.1 Following OHS 2.2 Checking proper operating condition of machines 2.3 Identifying and collecting tools and materials 2.4 Setting up machine parameters for different sweater styles 2.5 Aligning knitted panels accurately on the linking plate 2.6 Monitoring linking quality during production 2.7 Cleaning machine parts and tools & equipment after use 2.8 Returning tools to designated storage areas 2.9 Disposing of waste materials properly
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincere and honest to duties 3.4 Environmental concerns 3.5 Eagerness to learn 3.6 Tidiness and timeliness 3.7 Respect for rights of peers and seniors in the workplace 3.8 Communication with peers, subordinates and seniors in the workplace
4. Resource Implications	The following resources must be provided: 4.1 Workplace (simulated or actual) 4.2 Standard operating procedure 4.3 Workplace documents, signs and symbols 4.4 Tools, equipment and facilities appropriate to the process or activities. 4.5 Materials are relevant to the proposed activity.

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1 maintained OHS at workplace. 1.2 prepared for knit machine operation. 1.3 adjusted machine speed and stitch settings. 1.4 monitored linking operation to detect any defects or irregularities. 1.5 maintained workplace cleanliness and restored tools.
2. Methods of Assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical demonstration 2.3 Oral questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

Unit of Competency: JOIN PARTS OF SWEATER	Nominal Duration: 120 Hrs.	Unit Code: SICIP-RMG-SLO-04-O
Unit Descriptor: This unit covers the knowledge, skills and attitudes required to join parts of sweater. It specifically includes the tasks of practicing OHS in workplace, identifying parts of sweater for linking, performing linking operation of pullover, performing linking operation of cardigan, performing linking operation of trouser and skirt and restoring tools and workplace cleanliness.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Practice OHS in workplace	1.1 <u>Personal protective equipment (PPE)</u> is collected and used as per job requirement. 1.2 Occupational health and safety (OHS) is followed as per job requirement. 1.3 Machines and equipment are cleaned, inspected, and checked to ensure safe operation.
2. Identify parts of sweater for linking	2.1 Workplace requirements are identified according to organizational standards. 2.2 <u>Parts of the sweater</u> are identified as per sample. 2.3 The technical sheet related to the sweater sample is interpreted. 2.4 Assembling operation of sweater parts is interpreted and understood. 2.5 Quality and specifications of each part are verified against sample standards.
3. Perform linking operation of pullover	3.1 The technical sheet is collected and reviewed to guide the linking operation. 3.2 <u>Pullover sweater parts</u> are collected as specified in the job requirements. 3.3 Different parts of the pullover sweater are linked as per technical sheet. 3.4 Linking quality is checked and compared against the sample standards. 3.5 <u>Faults or defects in linking</u> are identified and corrective actions are taken as necessary.
4. Perform linking operation of cardigan	4.1 The technical sheet is collected and reviewed to guide the linking operation. 4.2 <u>Cardigan sweater parts</u> are collected as specified in the

	job requirements. 4.3 Different parts of the cardigan sweater are linked as per technical sheet. 4.4 Linking quality is checked and compared against the sample standards.
5. Perform linking operation of trouser and skirt	5.1 The technical sheet is collected and reviewed to guide the linking operation. 5.2 <u>Trouser and skirt sweater parts</u> are collected as specified in the job requirements. 5.3 Different parts of the trouser and skirt sweater are linked as per technical sheet. 5.4 Linking quality is checked and compared against the sample standards.
6. Restore tools and workplace cleanliness	6.1 Waste materials are collected and disposed of according to workplace standard operating procedures (SOP). 6.2 Tools and equipment are cleaned, inspected, and restored to designated storage locations. 6.3 Machines are cleaned, maintained, and covered to protect from dust and damage. 6.4 Workplace are cleaned following organizational guidelines.

Range of Variables

Variable	Range (May include but not limited to):
1. Personal protective equipment (PPE)	1.1 Face mask 1.2 Apron 1.3 Scarf/cap 1.4 Safety glasses
2. Parts of sweater	2.1 Front part 2.2 Back part 2.3 Sleeve 2.4 Neck 2.5 Piping 2.6 Cuff 2.7 Hood 2.8 Pocket 2.9 Placket 2.10 Bottom
3. Pullover sweater parts	3.1 Front Part 3.2 Back part 3.3 Sleeve 3.4 Neck

	3.5 Pocket 3.6 Cuff 3.7 Bottom
4. Faults or defects in linking	4.1 Broken stitch 4.2 Puckering stitch 4.3 Loose stitch 4.4 Non stretching stitch 4.5 Wrinkles 4.6 Skip stitch (Machine stitch gap) 4.7 Floating stitch 4.8 Uneven stitch join 4.9 Up Down parts 4.10 Stripe unmatching 4.11 Needle drop stitch 4.12 Incorrect neck shape 4.13 Uneven grain line 4.14 Contrast color graining 4.15 Incorrect measurement
5. Cardigan sweater parts	5.1 Front part (Left and Right) 5.2 Back part 5.3 Sleeve 5.4 Neck 5.5 Pocket 5.6 Placket 5.7 Piping 5.8 Cuff 5.9 Bottom
6. Trouser and skirt sweater parts	6.1 Trouser 6.1.1 Leg panel 6.1.2 Waist band 6.1.3 Bottom 6.2 Skirt 6.2.1 Front part 6.2.2 Back part 6.2.3 Waist band

Curricular Content Guide

1. Underpinning Knowledge	1.1 OHS procedures 1.2 Importance of machine and equipment pre cleaning and inspections. 1.3 Structure and components of different sweater 1.4 Sweater parts assembling operation procedure 1.5 Understand pullover, cardigan, trouser and skirt construction
---------------------------	---

	1.6 Linking techniques 1.7 Describe faults or defects in linking operation 1.8 Tool, equipment clean and maintenance technique 1.9 Waste disposal, housekeeping procedure. 1.10 Workplace cleaning procedures
2. Underpinning Skills	2.1 Following safety guidelines while operating machines 2.2 Sorting and organizing sweater components correctly 2.3 Preparing and aligning pieces for linking 2.4 Reviewing technical sheet to guide the linking operation. 2.5 Setting machine parameters for pullover, cardigan, trouser and skirt styles 2.6 Linking technique of sweater parts. 2.7 Inspecting for common defects and correcting misalignment 2.8 Cleaning tools after operation 2.9 Maintaining workplace cleanliness
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincere and honest to duties 3.4 Environmental concerns 3.5 Eagerness to learn 3.6 Tidiness and timeliness 3.7 Respect for rights of peers and seniors in the workplace 3.8 Communication with peers, subordinates and seniors in the workplace
4. Resource Implications	The following resources must be provided: 4.1 Workplace (simulated or actual) 4.2 Different parts of sweater 4.3 Standard operating procedure 4.4 Linking machine 4.5 Tools, equipment and facilities appropriate to the process or activities. 4.6 Materials are relevant to the proposed activity.

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1 maintained OHS at workplace. 1.2 interpreted the technical sheet related to the sweater sample. 1.3 verified quality and specifications of each part against sample standards. 1.4 prepared for machine operation. 1.5 linked different parts of the pullover, cardigan, trouser and
-----------------------------------	--

	skirt sweater as per technical sheet. 1.6 checked linking quality. 1.7 maintained workplace cleanliness and restored tools 1.8 collected and disposed waste materials of according to workplace standard operating procedures
2. Methods of Assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical demonstration 2.3 Oral questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

Unit of Competency: MAINTAIN PRODUCTION PERFORMANCE	Nominal Duration: 20 Hrs.	Unit Code: SICIP-RMG-SLO-05-O
Unit Descriptor: This unit covers the knowledge, skills and attitudes required to maintain production performance. It specifically includes the tasks of ensuring productivity in linking operation, maintaining quality in linking operation and performing linking machine maintenance.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Ensure productivity in linking operation	1.1 Productivity is defined in linking operations. 1.2 <u>Different types of productivity</u> are identified and described. 1.3 Importance of improving productivity in linking operations is explained. 1.4 <u>Techniques for productivity improvement</u> are applied
2. Maintain quality in linking operation	2.1 Quality standards for linking operations are understood. 2.2 <u>Linking defects</u> are identified and addressed by the operator following standard procedures. 2.3 Linked garments are inspected by the operator to ensure

	they meet quality specifications.
3. Perform linking machine maintenance	3.1 <u>Routine cleaning of the linking machine</u> is performed. 3.2 Machine parts are inspected for wear and damage. 3.3 Minor adjustments and replacements are carried out by the operator if required. 3.4 Lubrication points are identified and lubricants are applied according to maintenance schedules.

Range of Variables

Variable	Range (May include but not limited to):
1. Types of productivity	1.1 Process 1.1.1 Reduce time 1.1.2 Improve efficiency 1.2 Quality 1.2.1 Ensure material quality 1.2.2 Cut defects 1.3 Labor 1.3.1 Boost worker efficiency 1.4 Material 1.4.1 Use materials optimally 1.4.2 Reduce waste 1.5 Defect 1.5.1 Minimize defects for better performance
2. Techniques of productivity improvement	2.1 Proper workstation arrangement 2.2 Use of appropriate tools and equipment 2.3 Standard operating procedures (SOPs) 2.4 Time management 2.5 Quality control 2.6 Workload balancing 2.7 Minimizing interruptions
3. Linking defects	3.1 Gathering 3.2 Broken stitch 3.3 Puckering 3.4 Loose stitch 3.5 Wrinkles 3.6 Skip stitch (Machine stitch gap) 3.7 Floating stitch 3.8 Uneven stitch join 3.9 Up Down parts 3.10 Slipped stitch
4. Routine cleaning of the linking machine	4.1 Dial check 4.2 Needle check

	4.3 Belt check 4.4 Belt cover check 4.5 Pulley cover check 4.6 Roller check 4.7 Paddle check
--	--

Curricular Content Guide

1. Underpinning Knowledge	1.1 Definition of productivity and key performance indicators (KPIs) in sweater production 1.2 Define techniques for production improvement 1.3 Quality standards in sweater linking 1.4 Common defects in linking operations and their causes 1.5 Visual inspection methods for linked garments 1.6 Quality control procedures 1.7 Basic mechanical components of linking machines 1.8 Types of maintenance: routine, preventive, and minor repairs 1.9 Lubrication schedules and tools required for maintenance
2. Underpinning Skills	2.1 Meeting daily production targets efficiently 2.2 Identifying linking defects 2.3 Performing self-inspection during operation 2.4 Inspecting machine parts for wear and damage 2.5 Adjusting tension, stitch count, and alignment to improve quality 2.6 Cleaning and lubricating machine parts according to maintenance log
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincere and honest to duties 3.4 Environmental concerns 3.5 Eagerness to learn 3.6 Tidiness and timeliness 3.7 Respect for rights of peers and seniors in the workplace 3.8 Communication with peers, subordinates and seniors in the workplace
4. Resource Implications	The following resources must be provided: 4.1 Workplace (simulated or actual) 4.2 Tools, equipment and facilities appropriate to the process or activities. 4.3 Materials are relevant to the proposed activity.

Assessment Evidence Guide

1. Critical Aspects of	Assessment required evidence that the candidate:
------------------------	--

Competency	1.1 identified different types of productivity. 1.2 understood quality standards for linking operations. 1.3 identified linking defects. 1.4 performed routine cleaning of the linking machine.
2. Methods of Assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical demonstration 2.3 Oral questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

End of the Competency Standard

Workshop/Lab Facility Standard

Course Name:	Sweater Linking Operation
Number of Trainees:	30

Course-wise Training Space (Theoretical Classroom, Workshop/ Lab/ Classroom cum Workshop):

- Classroom – 350 sft (33 sqm)
- Workshop/ lab – 800 sft (75 sqm)
- OR
- Classroom cum workshop – 1000 sft (93 sqm)

Major Training Equipment and Training Facilities:

S.N	Major Equipment and Training facilities	Required facilities
1.	Computer/Laptops	01
2.	Multimedia projector & screen	01
3.	Internet connectivity	01
4.	White board	01
5.	Display board with sweater parts and samples	01
6.	Sweater Linking Machine (Dial)	30
7.	Sweater Linking Machine (Cup seam)	01
8.	Sweater Linking Machine (Super dial)	01

The following conditions must be fulfilled –

- The institute shall not use the same facilities for any other projects/organizations offering a similar course.
- The institute must provide sufficient evidence to prove ownership of the proposed training equipment.

The list denotes the minimum training equipment and facility required to effectively conduct training for a specific course. Additionally, the institute must ensure that all other necessary

training tools, equipment, and furniture are available to meet the requirement of competency standards (CS) provided by SICIP.

For the operation of training course on **Sweater Linking Operation (RMG sector)** the institute must ensure the availability of at least 80% of the major training equipment and training facilities (according to the CS) to be eligible for SICIP training delivery. If the score is below 80%, the remaining equipment and facilities need to be installed before the commencement of the training.

The institute will also provide all other hand tools and power tools as per CS for 30 trainees. Also, they will arrange adequate seating arrangement and classroom setup for the 30 trainees.
