SOCIAL COMPLIANCE AND ENVIRONMENTAL

MANAGEMENT

(RMG SECTOR)

Skills for Industry Competitiveness and Innovation Program (SICIP)
Finance Division, Ministry of Finance

COPYRIGHT

The Competency Standards for **Social Compliance and Environmental Management (RMG sector)** is designed to guide the development of curricula, teaching materials, and assessment tools. It also serves as a framework for providing industry-aligned training, ensuring that individuals meeting the prescribed standards through assessments are qualified to secure relevant employment opportunities.

This document was originally developed under the **Skills for Employment Investment Program (SEIP)** and later reviewed and updated with input from occupation-specific industry experts to be utilized in training initiatives under the **Skills for Industry Competitiveness and Innovation Program (SICIP)**. The document is owned by the Finance Division, Ministry of Finance, People's Republic of Bangladesh.

While public and private institutions are permitted to use the information from this standard for activities that benefit Bangladesh, other parties must seek prior permission from the document's owner for reproducing its content, either partially or entirely, in English or other languages.

INTRODUCTION:

The Skills for Industry Competitiveness and Innovation Program (SICIP) has the overall objective of developing a skilled workforce adept at handling new technologies, especially for emerging industries in Bangladesh. It will expand skills training and strengthen the development of the training ecosystem to address the skills requirements of the SICIP-selected industry sectors. The program aims to (i) increase the technology-oriented skilled workforce across emerging and priority sectors, (ii) promote inclusive skilling and upskilling opportunities for women and socially disadvantaged groups, (iii) incentivize industry-university partnerships to nurture innovation capacity and improve industry competitiveness, and (iv) foster skills for climate-resilient manufacturing processes and green technologies. The program is expected to benefit about 220,000 new and existing workers over a 6-year implementation period from 2024-2029.

The SICIP Program has, therefore, taken the initiative to enhance the employability and productivity of trainees by implementing market-responsive and job-focused training programs through public and private training providers. This will require the development of competency standards for each of the occupations/trades which will provide a structured framework in the learning process to guide training providers, ensure consistent training quality, and create an alignment between the skills provided by the training institutes and the needs of the industry.

The Competency Standard also suggests integration of YouTube or similar platforms or downloaded clips into classroom practice to ensure simulated creation of the contents so that learners are exposed to visual demonstrations before classroom instruction or practical session, which aligns with modern learning preference and supports flipped classroom models.

This competency standard is therefore developed to improve skills following the job roles and skill sets of the occupation and ensure that the required skills are aligned with industry requirements.

The document details the format, sequencing, wording, and layout of the Competency Standard for an occupation which comprises Units of Competence and its corresponding Elements.

OVERVIEW:

A **Competency Standard** is a written specification of the knowledge, skills, and attitudes required for the performance of a job or occupation or trade corresponding to the standard of performance required in the workplace.

Competency standard:

- provides a consistent and reliable set of components for training, recognizing, and assessing people's skills, and may also have optional support materials.
- enables industry-recognized qualifications to be awarded through direct assessment of workplace competencies
- encourages the development and delivery of flexible training that suits individual and industry requirements
- encourages learning and assessment in a work-related environment which leads to verifiable workplace outcomes.

Competency Standards are developed by a working group comprised of national and international process experts and the participation of experts from the industry to identify the competencies required of an occupation in a particular sector.

Competency Standards describe the skills, knowledge, and attitude needed to perform effectively in the workplace. Competency Standards acknowledge that people can achieve vocational and technical competency in many ways by emphasizing what the learner can do, not how or where they learned to do it.

With Competency Standards, assessment and training may be conducted at the workplace, at training organization, during regular work, or through work experience, work placement, work simulation or any combination of these.

A Unit of Competency describes a distinct work activity that would normally be undertaken by one person in accordance with industry standards.

Units of Competency are documented in a standard format that comprises:

- Reference to Industry Sector, Occupational Title and Occupational Description
- Unit code
- Unit title
- Unit descriptor
- Unit of Competency
- Elements and performance criteria
- Variables and range statement
- Evidence guides

Together all the parts of a Unit of Competency:

- Describe a work activity
- Guide the assessor in determining whether the candidate is competent.

Competency Standard has been developed by a working group comprised of occupation-specific experts from the industry/institution, relevant consultants of SICIP.

The ensuing sections of this document comprise a description of the respective occupation with all the key components of a Unit of Competence:

- An overview of all Units of Competence for the occupation and their corresponding duration required for completion of training.
- The Competency Standards that include the Unit of Competency, Unit Descriptor, Elements and Performance Criteria, Range of Variables, Curricular Content Guide, and Assessment Evidence Guide.

Units & Elements at a Glance:**Generic Competencies (30 Hrs.)**

Code	Unit of Competency	Elements of Competency	Duration (Hours)
SICIP-RMG-SCEM-01-G	Carry out workplace interaction	1. Interpret workplace communication and etiquette. 2. Read and understand workplace documents. 3. Participate in workplace meetings and discussions. 4. Practice professional ethics at work.	15
SICIP-RMG-SCEM-02-G	Operate in a team environment	1. Identify team goals and work processes. 2. Identify own role and responsibilities within team. 3. Communicate and co-operate with team members. 4. Practice problem solving within the team.	15
Total Hour			30

Sector Specific Competencies (20 hrs.)

Code	Unit of Competency	Elements of Competency	Duration (Hours)
SICIP-RMG-SCEM-01-S	Carry out measurements and calculations	1. Plan and prepare. 2. Obtain measurements. 3. Perform calculations.	10
SICIP-RMG-SCEM-02-S	Apply green practices in RMG sector	1. Interpret green concepts 2. Minimize resource use in the workplace 3. Implement waste management practices	10
Total Hour			20

Occupation Specific Competencies (222 hrs.)

Code	Unit of Competency	Elements of Competency	Duration (hours)
SICIP-RMG-SCEM-01-O	Understand social compliance principles	1. Interpret labour rights and regulations. 2. Identify anti-discrimination and equal opportunity practice. 3. Interpret ethical sourcing and fair-trade principles. 4. Describe social compliance issues	20
SICIP-RMG-SCEM-02-O	Manage health and safety issues	1. Identify health and safety hazards in the RMG workplace 2. Assess the impact of identified health and safety issues 3. Monitor the work environment for health and safety compliance 4. Report identified health and safety concern 5. Promote safety awareness among workers	30
SICIP-RMG-SCEM-03-O	Implement Employment and Welfare Provisions	1. Explain service and employment conditions 2. Identify employment benefits 3. Implement the provisions on employee welfare facilities 4. Carry out provisions for maternity leave and benefits	42
SICIP-RMG-SCEM-04-O	Ensure environmental requirements	1. Identify environmental issues, regulations and standards. 2. Explain water, energy and chemical management practices 3. Describe greening practices in RMG industries	80

Code	Unit of Competency	Elements of Competency	Duration (hours)
		4. Understand pollution control measures 5. Promote sustainable practices within the workplace	
SICIP-RMG-SCEM-05-O	Understand international standards and audit requirements	1. Identify relevant international standards for RMG sector 2. Identify audit frameworks and methodologies 3. Ensure compliance with social and ethical standards 4. Prepare reports and documentation	50
Total Hours			222

COMPETENCY STANDARD: SOCIAL COMPLIANCE AND ENVIRONMENTAL MANAGEMENT

Generic Competencies

UNIT OF COMPETENCY: CARRY OUT WORKPLACE INTERACTION	Nominal Duration: 15 hrs.	Unit Code: SICIP-RMG-SCEM-01-G
Unit Descriptor: This unit covers the skills, knowledge and attitudes required to carry out workplace interaction. It specifically includes task of interpreting workplace communication and etiquette, Reading and understanding workplace documents, practicing in workplace meetings and discussions and practicing professional ethics at work.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Interpret workplace communication and etiquette	1.1 Workplace codes of conduct are interpreted as per organizational guidelines. 1.2 Appropriate lines of communication are maintained with supervisors and colleagues. 1.3 Workplace interactions are conducted in a <u>courteous manner</u> to gather and convey information. 1.4 <u>Workplace procedures and matters</u> are comprehended.
2. Read and understand workplace documents	2.1 Workplace documents are interpreted correctly. 2.2 Visual information/symbols/signage are understood correctly and followed. 2.3 Specific and relevant information are accessed from <u>appropriate sources</u> . 2.4 Appropriate medium is used to transfer information and ideas.
3. Participate in workplace meetings and discussions	3.1 Team meetings are attended on time. 3.2 Meeting procedures and etiquette are followed. 3.3 Active participation is ensured, opinions are expressed and heard. 3.4 Inputs are provided and interpreted in line with the meeting purpose.
4. Practice professional ethics at work	4.1 Responsibilities as a team member are performed. 4.2 Tasks are performed in accordance with workplace procedures. 4.3 Confidentiality is maintained. 4.4 Inappropriate and conflicting situations are avoided.

Range of variables:

Variables	Range (may include but not limited to)
1. Courteous manner	1.1 Effective questioning 1.2 Active listening 1.3 Speaking skills 1.4 Writing skill 1.5 Email etiquette
2. Workplace procedures and matters	1.6 Notes 1.7 Arranging a meeting 1.8 Agenda 1.9 Simple reports such as progress and incident reports 1.10 Job sheets 1.11 Operational manuals 1.12 Brochures and promotional material 1.13 Visual and graphic materials 1.14 Standards 1.15 OHS information 1.16 Signs
3. Appropriate sources	1.17 Human Resources (HR) Department 1.18 Managers 1.19 Supervisors 1.20 Management Information System (MIS)

Curricular Content Guide

1. Underpinning knowledge	1.1 Workplace codes of conduct 1.2 Workplace communication and etiquette 1.3 Workplace documents, signs and symbols 1.4 Meeting procedure and etiquette 1.5 Professional ethics 1.6 Responsibilities of team member
2. Underpinning skill	1.7 Demonstrating workplace communication and etiquette 1.8 Interpreting workplace instructions and symbols 1.9 Performing responsibilities of a team member 1.10 Demonstrating active participation in workplace meeting 1.11 Applying professional ethics at work
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincere and honest to duties 3.4 Environmental concerns 3.5 Eagerness to learn 3.6 Tidiness and timeliness 3.7 Respect for rights of peers and seniors in the workplace 3.8 Communication with peers, subordinates and seniors in the workplace
4. Resource implications	The following resources must be provided:

	1.1 Workplace (simulated or actual) 1.2 Workplace procedures 1.3 Standard operating procedure 1.4 Workplace documents, signs and symbols 1.5 Projector 1.6 Learning manual
--	---

Assessment Evidence Guide

1. Critical aspects of competency	Assessment required evidence that the candidate: 1.1 Interpreted workplace communication and etiquette 1.2 Interpreted workplace instructions and symbols 1.3 Performed active participation in workplace meetings 1.4 Performed responsibilities of a team member
2. Methods of assessment	Competency should be assessed by: 1.5 Written test 1.6 Practical Demonstration 1.7 Oral Questioning 1.8 Portfolio (Optional)
3. Context of assessment	1.9 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 1.10 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

Unit of Competency: OPERATE IN A TEAM ENVIRONMENT	Nominal Duration: 15 hrs.	Unit Code: SICIP-RMG-SCEM-02-G
Unit Descriptor: This unit covers the skills, knowledge and attitudes required to operate in a team environment. It specifically includes the task of identifying team goals and work processes, identifying own role and responsibilities within team, communicating and cooperating with team members and practicing problem solving within the team.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Identify team goals and work processes	1.1. Roles and objectives of the team are identified and interpreted. 1.2. Roles and responsibilities of team members are identified and interpreted.
2. Identify own role and responsibilities within team	2.1 Personal role and responsibilities are identified within the team environment. 2.2 Reporting relationships are interpreted within team and external to team.
3. Communicate and cooperate with team members	3.1 Other teammates' tasks are identified and support provided when requested. 3.2 The team is encouraged through <u>sharing information</u> or expertise, working together to solve problems, and putting team success first. 3.3 Views and opinions of other team members are interpreted and respected.
4. Practice problem solving within the team	4.1 Problems faced at the individual and team level are identified and showed insight into the root causes of the problems. 4.2 A range of solutions and courses of action are identified together with benefits, costs, and risks associated with each. 4.3 The good ideas of others to help develop solutions are recognized and advice sought from those who have solved similar problems. 4.4 It is looked beyond the obvious and not stopped at the first answers.

Range of variables:

Variables	Range (may include but not limited to)
------------------	---

1. Sharing information	1.1. Agenda 1.2. Minutes 1.3. progress and incident reports 1.4. Operational manuals 1.5. Visual and graphic materials 1.6. Emails and SMS 1.7. Phone directory 1.8. Policy, procedure and standards 1.9. OHS information
------------------------	---

Curricular Content Guide

1. Underpinning knowledge	1.1. Team goals and work processes 1.2. Roles and responsibilities of team members 1.3. Personal role and responsibilities 1.4. Sharing information 1.5. Views and opinions 1.6. Problem solving within the team
2. Underpinning skill	1.1. Identifying team goals and work processes 1.2. Identifying own role and responsibilities within team 1.3. Communicating and cooperating with team members 1.4. Practicing problem solving within the team
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincere and honest to duties 3.4 Eagerness to learn 3.5 Tidiness and timeliness 3.6 Environmental concerns 3.7 Respect for rights of peers and seniors at workplace 3.8 Communication with peers and seniors at workplace
4. Resource implications	The following resources must be provided: 4.1 Workplace (simulated or actual) 4.2 Projector 4.3 Stationery 4.4 Learning manual

Assessment Evidence Guide

1. Critical aspects of competency	Assessment required evidence that the candidate: 1.1 Identified team goals and work processes 1.2 Identified own role and responsibilities within team 1.3 Communicated and cooperated with team members 1.4 Practice problem solving within the team
-----------------------------------	---

2. Methods of assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical Demonstration 2.3 Oral Questioning 2.4 Portfolio (Optional)
3. Context of assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

The Sector Specific Competencies

Unit of Competency: CARRY OUT MEASUREMENTS AND CALCULATIONS	Nominal Duration: 10 hrs.	Unit Code: SICIP-RMG-SCM-01-S
Unit Descriptor: This unit covers the skills, knowledge and attitudes required for carry out measurements and calculations. It specifically includes the task of planning and preparing, obtaining measurements and performing calculations.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Plan and prepare	1.1. Work instructions are confirmed and applied to the job in hand. 1.2. Materials to be measured are identified as per job specification. 1.3. Appropriate <u>measuring device</u> is identified and selected based on materials to be measured. 1.4. Specifications are obtained and verified from relevant <u>documents</u> .
2. Obtain measurements	2.1 Method of obtaining measurement is selected and applied. 2.2 <u>Measurements</u> are obtained using appropriate device in accordance with job requirement. 2.3 Measurements, including area, volume, tolerance and clearance limits, are confirmed and applied
3. Perform calculations	3.1 <u>Calculations</u> , using basic operations, for determining material requirement are taken. 3.2 Appropriate <u>formulas</u> for calculating quantities are selected. 3.3 Quantities are estimated from the calculation taken. 3.4 Material quantities are calculated, confirmed and recorded within tolerances.

Range of Variables

Variable	Range
	May include but not limited to:
1. Measuring device	1.1 Measuring tape 1.2 Steel rule 1.3 Calculator 1.4 Sets square
2. Documents	2.1. Technical manuals

	2.2. Specifications 2.3. Sketches 2.4. Drawings 2.5. Charts 2.6. Photographs
3. Measurements	3.1. Length 3.2. Width 3.3. Weight 3.4. Tolerance
4. Calculations	4.1 Addition 4.2 Subtraction 4.3 Multiplication 4.4 Division 4.5 Area 4.6 Volume 4.7 Circumference 4.8 Cubic meter 4.9 Volumetric weight
5. Formulas	5.1 Fractions 5.2 Percentages 5.3 Mixed numbers 5.4 Conversions 5.5 Scales

Curricular Content Guide

1. Underpinning Knowledge	1.1 Measuring devices 1.2 Measurements 1.3 Simple calculation techniques 1.4 Appropriate formulas 1.5 Estimating quantities
2. Underpinning Skills	2.1 Identifying appropriate measuring devices 2.2 Carrying out measurements for appropriate device 2.3 Performing calculations using appropriate formulas
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincere and honest to duties 3.4 Environmental concerns 3.5 Eagerness to learn 3.6 Tidiness and timeliness 3.7 Respect for rights of peers and seniors in workplace 3.8 Communication with peers, sub-ordinates and seniors in workplace
4. Resource Implications	4.1 Workplace (simulated or actual) 4.2 Map/globe 4.3 Projector 4.4 Stationery 4.5 Learning manual.

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1 Identified and selected appropriate measuring devices 1.2 Carried out measurements for appropriate device 1.3 Identified and selected correct mathematical formula 1.4 Performed calculations using appropriate formulas
2. Methods of Assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical Demonstration 2.3 Oral Questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

Unit of Competency: APPLY GREEN PRACTICES IN RMG SECTOR	Nominal Duration: 10 hrs.	Unit Code: SICIP-RMG-SCEM-02-S
Unit Descriptor: This unit covers the skills, knowledge and attitudes required for apply green practices in RMG sector. It specifically includes the tasks of interpreting green concepts, minimizing resources use in the workplace and implementing waste management practices.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Interpret green concepts	1.1 <u>Principles of green practices in RMG (Ready-Made Garment)</u> manufacturing are explained. 1.2 Key terms and symbols in RMG production processes are identified. 1.3 <u>Sources of environmental impacts</u> during RMG manufacturing activities are identified. 1.4 RMG manufacturing activities use are explained. 1.5 <u>Ways of mitigating environmental impacts</u> in RMG manufacturing are explained.
2. Minimize resources use in the workplace	2.1 Water, energy, and raw material consumption in RMG manufacturing are documented. 2.2 <u>Recyclable and non-recyclable items</u> in RMG production processes are identified. 2.3 Procedures to reduce resource consumption in RMG manufacturing are implemented. 2.4 Sustainable alternatives in RMG manufacturing are explored and applied.
3. Implement waste management practices	3.1 <u>Different types of waste in RMG manufacturing</u> are identified. 3.2 Hazardous waste in RMG production is disposed of according to environmental regulations. 3.3 Green habits to reduce waste in personal and professional life are practiced.

Range of Variables

Variable	Range
	May include but not limited to:
1. Principles of green practices in RMG (Ready-Made Garment)	1.1 Reducing energy consumption in RMG manufacturing processes. 1.2 6R for waste management in RMG production: 1.2.1 Refuse unnecessary materials and processes. 1.2.2 Reduce resource consumption and waste

	generation. 1.2.3 Reuse materials within the production process. 1.2.4 Recycle materials for future use in RMG manufacturing. 1.2.5 Recover usable resources from waste. 1.2.6 Repair damaged products or materials instead of discarding them. 1.3 Use of sustainable materials in RMG production with low environmental impact. 1.4 Recycling of materials used in the RMG manufacturing process. 1.5 Sustainable transportation methods for moving goods and materials within the RMG sector.
2. Sources of environmental impacts	2.1 Air Pollution in RMG Manufacturing 2.2 Water Pollution in RMG Manufacturing 2.3 Soil Degradation in RMG Manufacturing 2.4 Noise Pollution in RMG Manufacturing 2.5 Waste Generation in RMG Manufacturing 2.6 Resource Depletion in RMG Manufacturing
3. Ways of mitigating environmental impacts	3.1 Utilizing energy-efficient equipment in RMG production processes. 3.2 Adopting renewable energy sources for RMG manufacturing operations. 3.3 Implementing site protection measures to prevent pollution and reduce environmental. 3.4 Using reusable materials in production processes. 3.5 Choosing sustainable materials with low environmental impact for garment production. 3.6 Using noise-reducing equipment and scheduling production work. 3.7 Optimizing logistics and delivery to reduce transportation emissions and improve overall supply chain efficiency.
4. Recyclable and non-recyclable items	4.1 Recyclable Items in RMG Manufacturing 4.1.1 Metal components. 4.1.2 Wooden materials. 4.1.3 Fabric scraps and textile fibers. 4.1.4 Plastic items, including buttons, tags, and packaging materials. 4.2 Non-Recyclable Items in RMG Manufacturing 4.2.1 Paints, coatings, and dyes. 4.2.2 Contaminated materials. 4.2.3 Treated wood and other materials.
5. Different types of waste in RMG manufacturing	5.1 Fabric waste from cutting and trimming processes. 5.2 Wood waste from packaging or display materials. 5.3 Metal waste from trims, buttons, zippers, and other hardware. 5.4 Textile waste, including scraps from garment production

	and defective products. 5.5 Plastic waste, such as packaging materials, labels, and plastic buttons. 5.6 Solid waste from chemical treatments or dyeing processes. 5.7 Packaging waste from raw materials and finished products.
--	--

Curricular Content Guide

1. Underpinning Knowledge	1.1 Principles of green practices in RMG (Ready-Made Garment) manufacturing. 1.2 Sources of environmental impacts. 1.3 Ways of mitigating environmental impacts 1.4 Recyclable and non-recyclable items 1.5 Different types of waste in RMG manufacturing 1.6 Hazardous waste in RMG production 1.7 Green habits to reduce waste
2. Underpinning Skills	2.1 Explaining principles of green practices in RMG manufacturing 2.2 Identifying sources of environmental impacts 2.3 Explaining re-cyclable and non-recyclable items 2.4 Minimizing resources use in the workplace 2.5 Identifying different types of waste in RMG manufacturing 2.6 Disposing hazardous waste in RMG production 2.7 Practicing green habits to reduce waste
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincere and honest to duties 3.4 Environmental concerns 3.5 Eagerness to learn 3.6 Tidiness and timeliness 3.7 Respect for rights of peers and seniors in the workplace 3.8 Communication with peers, subordinates and seniors in the workplace
4. Resource Implications	4.1 Workplace (simulated or actual) 4.2 Projector 4.3 Stationery 4.4 Learning manual

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1 interpreted green concepts
-----------------------------------	---

	1.2 minimizing resources use in the workplace 1.3 implementing waste management practices
2. Methods of Assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical Demonstration 2.3 Oral Questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

The Occupation Specific Competencies

Unit of Competency: UNDERSTAND SOCIAL COMPLIANCE PRINCIPLES	Nominal Duration: 20 Hrs.	Unit Code: SICIP-RMG-SCM-01-O
Unit Descriptor: This unit covers the skills, knowledge and attitudes required to understand social compliance principles. It specifically includes the task of interpreting labour rights and regulations, identifying anti-discrimination and equal opportunity practice, interpreting ethical sourcing and fair-trade principles and describing social compliance issues.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Interpret labor rights and regulations	1.1 <u>Relevant sections of Bangladesh Labour Law 2006 (with all amendments)</u> and Bangladesh Labor Rules 2015 (with all amendments) are interpreted. 1.2 <u>Organizational policies</u> are identified and described. 1.3 <u>ILO conventions</u> are identified and interpreted. 1.4 Major issues of ILO conventions in social compliance practice are identified.
2. Identify anti-discrimination and equal opportunity practice	2.1 <u>Anti-discrimination practices</u> are identified and described. 2.2 Equal opportunity practices are identified and promoted. 2.3 Complaints or instances of discrimination are reported and investigated. 2.4 Awareness program on anti-discrimination is practiced in the workplace.
3. Interpret ethical sourcing and fair-trade principles	3.1 Ethical sourcing and fair-trade principles are reviewed and understood. 3.2 Fair-trade standards are recognized and interpreted. 3.3 Supplier practices are evaluated to confirm with ethical sourcing standards. 3.4 The impact of unethical sourcing on the industrial environment is explained.
4. Describe social compliance issues	4.1 Social compliance within the RMG Sector is interpreted. 4.2 <u>Aspects of social compliance</u> are identified and described. 4.3 <u>Functions of compliance department</u> are identified. 4.4 <u>Role and responsibilities of compliance officer</u> are identified.

Range of Variables

Variable	Range (Includes but not limited to):
1. Relevant sections of Bangladesh Labor Law 2006 (with all amendments)	1.1 Conditions of employment and services (chapter-2) 1.2 Child and adolescents (chapter-3) 1.3 Maternity benefits (chapter-4) 1.4 Health and hygiene (chapter-5) 1.5 Safety (chapter-6) 1.6 Special provisions relating to health hygiene and safety (chapter-7) 1.7 Welfare measures (chapter-8) 1.8 Working hours and leave (chapter-9) 1.9 Wages and payment thereof (chapter-10)
2. Organizational policies	2.1 Recruitment 2.2 Health and safety 2.3 Welfare 2.4 Grievance Redress Management 2.5 Non-discrimination 2.6 Harassment
3. ILO conventions	3.1 Freedom of Association and Protection of the Right to Organise Convention, 1948 (No. 87) 3.2 Right to Organise and Collective Bargaining Convention, 1949 (No. 98) 3.3 Forced Labour Convention, 1930 (No. 29) 3.4 Abolition of Forced Labour Convention, 1957 (No. 105) 3.5 Minimum Age Convention, 1973 (No. 138) 3.6 Worst Forms of Child Labour Convention, 1999 (No. 182) 3.7 Equal Remuneration Convention, 1951 (No. 100) 3.8 Discrimination (Employment and Occupation) Convention, 1958 (No. 111) 3.9 The violence and harassment, 2019 (No.190)
4. Anti-discrimination practices	4.1 Gender 4.2 Religion 4.3 Ethnic minority
5. Aspects of social compliance	5.1 Child labour 5.2 Forced labour 5.3 Working hour 5.4 Compensation and benefits 5.5 Discrimination 5.6 Harassment and abuse 5.7 Health and safety 5.8 Welfare and social benefits 5.9 Freedom of association 5.10 Environment 5.11 Buyer code of conduct
6. Functions of	6.1 Legal issues

compliance department	6.2 Workplace safety 6.3 Workers' welfare 6.4 Job security validation 6.5 Training and development
7. Role and responsibilities of compliance officer	7.1 Workplace health and safety 7.2 Awareness training 7.3 Grievance handling 7.4 Social compliance audit 7.5 Audit documentation 7.6 Welfare issues

Curricular Content Guide

1. Underpinning Knowledge	1.1 Labour rights and regulations 1.2 Organisational policies 1.3 ILO conventions 1.4 Anti-discrimination practices 1.5 Ethical sourcing and fair-trade principles 1.6 Social compliance within the RMG Sector
2. Underpinning Skills	2.1. Interpreting Labour rights and regulations 2.2. Identifying Organisational policies 2.3. Interpreting ILO conventions 2.4. Identifying Anti-discrimination practices 2.5. Understanding Ethical sourcing and fair-trade principles 2.6. Interpreting Social compliance within the RMG Sector
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincere and honest to duties 3.4 Environmental concerns 3.5 Eagerness to learn 3.6 Tidiness and timeliness 3.7 Respect for rights of peers and seniors in the workplace 3.8 Communication with peers, subordinates and seniors in the workplace
4 Resource Implications	4.1 Workplace (simulated or actual) 4.2 Fabric (samples) 4.3 Garment (samples) 4.4 Trims and accessories 4.5 Bill of Materials (samples)

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1 interpreted Labor rights and regulations 1.2 identified Organizational policies 1.3 interpreted ILO conventions 1.4 identified Anti-discrimination practices
-----------------------------------	---

	1.5 understood Ethical sourcing and fair-trade principles 1.6 interpreted Social compliance within the RMG Sector
2. Methods of Assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical Demonstration 2.3 Oral Questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by nationally certified assessor or occupation-specific industry expert.

Unit of Competency: MANAGE HEALTH AND SAFETY ISSUES	Nominal Duration: 30 Hrs.	Unit Code: SICIP-RMG-CEM-02-O
Unit Descriptor: This unit covers the skills, knowledge and attitudes required to manage health and safety issues. It specifically includes the task of identifying health and safety hazards in the RMG workplace, assessing the impact of identified health and safety issues, monitoring the work environment for health and safety compliance, reporting identified health and safety concern and promoting safety awareness among workers.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Identify health and safety hazards in the RMG workplace	1.1 Potential <u>hazards</u> are recognized in accordance with workplace safety regulations. 1.2 Safety risks related to manual handling and workplace layout are evaluated and addressed. 1.3 <u>Emergency procedures</u> are understood and communicated.
2. Assess the impact of identified health and safety issues	2.1 Potential impact of identified health and safety issues is identified. 2.2 Financial, legal, and reputational consequences of health and safety issues are considered. 2.3 Recommendations for corrective actions are provided based on the assessment.
3. Monitor the work environment for health and safety compliance	3.1 Safety checks and inspections are conducted. 3.2 Health and safety records are reviewed periodically to track compliance and identify areas for improvement. 3.3 Any violations or deviations from health and safety standards are reported. 3.4 Work environment is regularly monitored.
4. Report identified health and safety concern	4.1 Appropriate personnel are notified of the identified health and safety concern. 4.2 The severity of the health and safety concern are communicated. 4.3 <u>Incident reports</u> and safety concerns are submitted. 4.4 Follow-up actions are recommended and tracked.
5. Promote safety awareness among workers	5.1 Workers are regularly trained on safety procedures, risk identification. 5.2 <u>Safety information</u> is demonstrated prominently throughout the workplace. 5.3 Regular safety meetings are conducted to foster a culture of safety.

	5.4 Best practices on safety are followed and promoted. 5.5 Feedback from workers regarding safety concerns is encouraged and addressed.
--	---

Range of Variables

Variable	Range (Includes but not limited to):
1. Hazards	1.1 Chemical 1.2 Physical 1.3 Ergonomic
2. Emergency procedures	2.1 Activate alarm system 2.2 Evacuate through emergency exits 2.3 Use fire extinguishers (if trained) 2.4 Administer basic first aid 2.5 Call emergency services 2.6 Report to assembly point 2.7 Isolate the hazard area 2.8 Notify supervisor or safety officer 2.9 Use appropriate PPE 2.10 Follow emergency response plan
3. Incident reports	3.1 Fire incidents 3.2 Machinery-related injuries 3.3 Chemical spills or exposure 3.4 Electrical accidents 3.5 Lack of or improper use of PPE 3.6 Blocked emergency exits 3.7 Inadequate lighting or ventilation 3.8 Heat stress or dehydration 3.9 Absence of first aid or medical support
4. Safety information	4.1 Hazard signs 4.2 Safety posters 4.3 Safety data sheet (SDS) 4.4 Guidelines

Curricular Content Guide

1. Underpinning Knowledge	1.1 Potential hazards 1.2 Emergency procedures 1.3 Financial, legal, and reputational consequences of health and safety issues 1.4 Safety checks and inspections 1.5 Incident reports and safety concerns 1.6 Safety information 1.7 Best practises on safety
2. Underpinning Skills	2.1 Recognizing potential hazards 2.2 Understanding emergency procedures 2.3 Considering financial, legal, and reputational consequences of health and safety issues

	2.4 Conducting safety checks and inspections 2.5 Submitted. Incident reports and safety concerns 2.6 Demonstrating safety information 2.7 Following and promoting best practices on safety
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincere and honest to duties 3.4 Environmental concerns 3.5 Eagerness to learn 3.6 Tidiness and timeliness 3.7 Respect for rights of peers and seniors in the workplace 3.8 Communication with peers, subordinates and seniors in the workplace
4 Resource Implications	4.1 Workplace (simulated or actual) 4.2 Computer/laptop/notebook 4.3 Calculator 4.4 Projector 4.5 Stationery 4.6 Learning manual

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1 Recognized potential hazards 1.2 Understood emergency procedures 1.3 Considered. financial, legal, and reputational consequences of health and safety issues 1.4 Conducted safety checks and inspections 1.5 Submitted. Incident reports and safety concerns 1.6 Demonstrated safety information 1.7 Followed and promoted best practices on safety
2. Methods of Assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical Demonstration 2.3 Oral Questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

Unit of Competency: IMPLEMENT EMPLOYMENT AND WELFARE PROVISIONS	Nominal Duration: 42 Hrs.	Unit Code: SICIP-RMG-SCEM-03-O
Unit Descriptor: This unit covers the skills, knowledge and attitudes required to implement employment and welfare provisions. It specifically includes the task of explaining service and employment conditions, identifying employment benefits, implementing the provisions on employee welfare facilities and carrying out provisions for maternity leave and benefits.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Explain service and employment conditions	1.1 Service and employment conditions in accordance with Bangladesh Labor Law and Rules are reviewed and understood. 1.2 The <u>rights of workers</u> are explained as per legal requirements. 1.3 Employment contracts are discussed including job roles, responsibilities, and benefits. 1.4 Legal provisions for workplace safety are clarified in line with Bangladesh's labor regulations. 1.5 Dispute resolution processes are explained in accordance with the Labor Law. 1.6 The protection of workers' is outlined according to the guidelines set by Bangladesh Labor Law and Rules.
2. Identify employment benefits	2.1 Employment benefits are identified according to Bangladesh Labor Law and company policies. 2.2 Workers' entitlement to <u>benefits</u> is clarified in accordance with legal provisions. 2.3 Health and safety benefits are explained as per the regulations.
3. Implement the provisions on employee welfare facilities	3.1 The provisions for employee welfare facilities are identified and understood. 3.2 <u>Facilities</u> are provided to ensure employees' comfort and well-being. 3.3 Necessary provisions for employees with special needs are identified to ensure inclusivity.
4. Carry out provisions for maternity leave and benefits	4.1 Provisions for maternity leave and benefits are identified and understood to Bangladesh Labor Law and company policies. 4.2 <u>Health and financial benefits</u> are provided to eligible employees. 4.3 Calculation of maternity benefits are understood. 4.4 Maternity-related health records are properly

	documented and maintained.
--	----------------------------

Range of Variables

Variable	Range (Includes but not limited to):
1. Rights of workers	1.1 Paid leave 1.2 Overtime 1.3 Termination procedures 1.4 Job separation benefits 1.5 Service benefits
2. Benefits	2.1 Paid leave 2.2 Maternity/paternity leave 2.3 Public holidays 2.4 Festival Bonus 2.5 Retirement 2.6 In-kind
3. Facilities	3.1 Clean restrooms 3.2 Drinking water 3.3 Break areas 3.4 Health and Medical 3.5 Transportation 3.6 Day care 3.7 Dinning 3.8 Canteen
4. Health and financial benefits	4.1 Paid leave 4.2 Medical allowances 4.3 Job protection

Curricular Content Guide

1. Underpinning Knowledge	1.1 Bangladesh Labor Law and Rules 1.2 Rights of workers 1.3 Job roles, responsibilities, and benefits. 1.4 Legal provisions for workplace safety 1.5 The protection of workers' 1.6 Employment benefits 1.7 Employee welfare facilities 1.8 Provisions for maternity leave and benefits 1.9 Health and financial benefits
2. Underpinning Skills	2.1. Explaining rights of workers 2.2. Discussing Job roles, responsibilities, and benefits. 2.3. Clarifying legal provisions for workplace safety 2.4. Outlining the protection of workers' 2.5. Identifying employment benefits 2.6. Providing employee welfare facilities 2.7. Identifying provisions for maternity leave and benefits 2.8. Providing health and financial benefits
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety

	3.2 Promptness in carrying out activities 3.3 Sincere and honest to duties 3.4 Environmental concerns 3.5 Eagerness to learn 3.6 Tidiness and timeliness 3.7 Respect for rights of peers and seniors in the workplace 3.8 Communication with peers, subordinates and seniors in the workplace
4 Resource Implications	4.1 Workplace (simulated or actual) 4.2 Standard operating procedure (samples) 4.3 Projector 4.4 Stationery 4.5 Learning manual

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1 understood Bangladesh Labor Law and Rules 1.2 explained rights of workers 1.3 discussed Job roles, responsibilities, and benefits. 1.4 clarified legal provisions for workplace safety 1.5 outlines the protection of workers' 1.6 identified employment benefits 1.7 provided employee welfare facilities 1.8 identified provisions for maternity leave and benefits 1.9 provided health and financial benefits
2. Methods of Assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical Demonstration 2.3 Oral Questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

Unit of Competency: ENSURE ENVIRONMENTAL REQUIREMENTS	Nominal Duration: 80 Hrs.	Unit Code: SICIP-RMG-SCEM-04-O
Unit Descriptor: This unit covers the skills, knowledge and attitudes required to ensure environmental requirements. It specifically includes the task of identifying environmental issues, regulations and standards, explaining water, energy and chemical management practices, describing greening practices in RMG industries, understanding pollution control measures and promoting sustainable practices within the workplace.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Identify environmental issues, regulations and standards	1.1 <u>Environmental issues</u> to the RMG sector are understood. 1.2 Bangladesh Environmental Conservation Act 1995 is described. 1.3 Environmental compliance requirements and legislative requirements are recognized. 1.4 Environmental risks associated with manufacturing processes are identified. 1.5 Strategies for reducing the <u>environmental footprint</u> of RMG operations are identified. 1.6 Environmental aspects, impact and mitigation plan is understood.
2. Explain water, energy and chemical management practices	2.1 <u>Water management practices</u> are explained according to industry standards. 2.2 <u>Energy management practices</u> are described in accordance with Bangladesh's environmental regulations. 2.3 <u>Strategies for minimizing energy</u> consumption are explained to enhance sustainability in the workplace. 2.4 <u>Chemical management programs</u> are explained to prevent environmental contamination and ensure worker safety. 2.5 Wastewater treatment system is comprehended.
3. Describe greening practices in RMG industries	3.1 <u>Greening practices</u> in the RMG sector are described in accordance with sustainability standards. 3.2 <u>Waste management practices</u> are understood. 3.3 The use of sustainable materials, including organic fabrics and eco-friendly dyes, is discussed to minimize environmental impact. 3.4 <u>Green certifications</u> are explained.
4. Understand pollution control measures	4.1 <u>Pollution control measures</u> are understood and explained according to environmental regulations.

	4.2 <u>Solid waste management practices</u> are understood. 4.3 The use of eco-friendly materials and processes to minimize pollution in production activities is identified. 4.4 Regulatory frameworks for pollution control are understood to ensure adherence to legal requirements.
5. Promote sustainable practices within the workplace	5.1 <u>Workplace Sustainable practices</u> are understood. 5.2 The use of <u>sustainable materials</u> is identified. 5.3 Training sessions on sustainability and eco-friendly practices are conducted. 5.4 Recycling programs are implemented, and waste segregation is followed.

Range of Variables

Variable	Range (Includes but not limited to):
1. Environmental issues	1.1 Waste management (hazardous and non-hazardous) 1.2 Water 1.3 Air pollution (Greenhouse gas emission) 1.4 Energy consumption 1.5 Chemical
2. Environmental footprint	2.1 Waste reduction 2.2 Water conservation 2.3 Energy efficiency
3. Water management practices	3.1 Water conservation 3.2 Recycling 3.3 Treatment procedures
4. Energy management practices	4.1 Energy-efficient technologies 4.2 Renewable energy use 4.3 Optimization of energy consumption
5. Strategies for minimizing energy	5.1 Use of energy-saving equipment 5.2 Proper maintenance of machinery 5.3 Use of renewable energy (Solar)
6. Chemical management programs	6.1 Proper labeling 6.2 Handling procedures 6.3 Disposal procedures 6.4 Zero discharge of hazardous chemical (ZDHC) 6.5 Higg/Worldly 6.6 Oeko-Tex
7. Greening practices	7.1 Environmentally friendly technologies and processes 7.2 Science Based Target Initiative (SBTi) 7.3 Science Based Target Network (SBTn)
8. Waste management practices	8.1 Reducing waste materials 8.2 Reusing 8.3 Recycling

9. Green certifications	9.1 LEED (Leadership in Energy and Environmental Design) 9.2 ISO 14001 (Environmental Management System) 9.3 ISO 50001 (Energy Management System)
10. Pollution control measures	10.1 Techniques for managing air 10.2 Techniques for managing water 10.3 Techniques for managing soil pollution
11. Solid waste management practices	11.1 Proper disposal 11.2 Recycling 11.3 Waste reduction strategies
12. Workplace Sustainable practices	12.1 Reducing waste 12.2 Conserving energy, 12.3 Minimizing water usage.
13. Sustainable materials	13.1 Recyclable 13.2 Biodegradable products. 13.3 Low carbon foot print materials

Curricular Content Guide

1. Underpinning Knowledge	1.1 Environmental issues to the RMG sector 1.2 environmental footprint of RMG operations 1.3 Water management practices 1.4 Energy management practices 1.5 Strategies for minimizing energy 1.6 Chemical management programs 1.7 Greening practices in the RMG sector 1.8 Waste management practices 1.9 Green certifications 1.10 Pollution control measures
2. Underpinning Skills	2.1. Identifying environmental issues, regulations and standards 2.2. Explaining water, energy and chemical management practices 2.3. Describing greening practices in RMG industries 2.4. Understanding pollution control measures 2.5. Promoting sustainable practices within the workplace 2.6. Explaining strategies for minimizing energy consumption 2.7. Explaining chemical management programs 2.8. Understanding waste management practices 2.9. Explaining green certifications
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincere and honest to duties 3.4 Environmental concerns 3.5 Eagerness to learn 3.6 Tidiness and timeliness 3.7 Respect for rights of peers and seniors in the

	workplace 3.8 Communication with peers, subordinates and seniors in the workplace
4 Resource Implications	4.1 Workplace (simulated or actual) 4.2 Computer/laptop/notebook 4.3 Projector 4.4 Stationery 4.5 Learning manual

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1 understood environmental issues to the RMG sector 1.2 identified environmental footprint of RMG operations 1.3 explained water management practices 1.4 described Energy management practices 1.5 explained strategies for minimizing energy consumption 1.6 explained chemical management programs 1.7 described greening practices in the RMG sector 1.8 understood waste management practices 1.9 explained green certifications 1.10 understood Pollution control measures
2. Methods of Assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical Demonstration 2.3 Oral Questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

Unit of Competency: UNDERSTAND INTERNATIONAL STANDARDS AND AUDIT REQUIREMENTS	Nominal Duration: 50 Hrs.	Unit Code: SICIP-RMG-SCM-05-O
Unit Descriptor: This unit covers the skills, knowledge and attitudes required to understand international standards and audit requirements. It specifically includes the task of identifying relevant international standards for RMG sector, identifying audit frameworks and methodologies, ensuring compliance with social and ethical standards and preparing reports and documentation.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Identify relevant international standards for RMG sector	1.1 <u>Relevant international standards for the RMG sector</u> are identified and understood. 1.2 <u>Environmental regulations</u> and best practices are understood. 1.3 <u>Code of conduct of major retailers and brands</u> are understood.
2. Identify audit frameworks and methodologies	2.1 Industry-specific audit standards are understood. 2.2 Audit (internal and external) frameworks and methodologies are identified and understood. 2.3 The role of third-party audits and certifications is identified.
3. Ensure compliance with social and ethical standards	3.1 Key ethical frameworks (UN Guiding Principles) are understood. 3.2 <u>Ethical sourcing and fair-trade practices</u> are identified and explained.
4. Prepare reports and documentation	4.1 Reports and documentation are identified in accordance with organizational standards. 4.2 A Corrective Action Plan (CAP) is identified in the report. 4.3 A CAP and other template of reporting is understood. 4.4 <u>Supporting documentation</u> are identified. 4.5 Reports and CAP documentation are prepared for accuracy, completeness. 4.6 The final report and CAP are submitted to relevant stakeholders for review and approval.

Range of Variables

Variable	Range (Includes but not limited to):
1. Relevant international standards for the RMG sector	1.1 ISO 14001 (Environmental Management) 1.2 ISO 9001 (Quality Management) 1.3 ISO 45001 (Occupational Safety and Health)
2. Environmental regulations	2.1 Global Reporting Initiative (GRI) 2.2 European sustainability reporting standards (ESRS) 2.3 European union green deal (EUGD) 2.4 Corporate sustainability reporting directive (CSRD)
3. Code of conduct of major retailers and brands	3.1 Business Social Compliance Initiative (BSCI) 3.2 Ethical Trading Initiative (ETI)-SEDEX 3.3 Initiative Clause Sociale (ICS) 3.4 Worldwide Responsible Accredited Production (WRAP)
4. Ethical sourcing and fair-trade practice	4.1 Fair Trade Certified 4.2 SA8000 (Social Accountability) standard
5. Supporting documentation	5.1 Inspection reports 5.2 Audit results 5.3 Incident logs 5.4 Lab test report

Curricular Content Guide

1. Underpinning Knowledge	1.1 Relevant international standards for RMG sector 1.2 Environmental regulations and best practices 1.3 Audit frameworks and methodologies 1.4 The role of third-party audits and certifications 1.5 Ensure compliance with social and ethical standards 1.6 Prepare reports and documentation 1.7 A Corrective Action Plan (CAP)
2. Underpinning Skills	2.1 Identifying relevant international standards for RMG sector 2.2 Understanding environmental regulations and best practices 2.3 Identifying audit frameworks and methodologies 2.4 Identifying the role of third-party audits and certifications 2.5 Ensuring compliance with social and ethical standards 2.6 Preparing reports and documentation 2.7 Identifying a corrective Action Plan (CAP)
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincere and honest to duties 3.4 Environmental concerns 3.5 Eagerness to learn 3.6 Tidiness and timeliness

	3.7 Respect for rights of peers and seniors in the workplace 3.8 Communication with peers, subordinates and seniors in the workplace
4 Resource Implications	4.1 Workplace (simulated or actual) 4.2 Basic tools of quality (sheets, diagrams, charts) 4.3 Garments (defective samples) 4.4 Work sheets

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1 identified relevant international standards for RMG sector 1.2 identified audit frameworks and methodologies 1.3 ensured compliance with social and ethical standards 1.4 prepared to reports and documentation
2. Methods of Assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical Demonstration 2.3 Oral Questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

End of the Competency Standard

Workshop/Lab Facility Standard

Course Name:	Social Compliance and Environmental Management
Number of Trainees:	20

Course-wise Training Space (Theoretical Classroom, Workshop/ Lab/ Classroom cum Workshop):

- Classroom – 350 sft (33 sqm)
- Workshop/ lab – 800 sft (75 sqm) OR
- Classroom cum workshop – 1000 sft (93 sqm)

Major Training Equipment and Training Facilities:

S.N.	Major Equipment and Training facilities	Required facilities
The following machines are required to set up a sewing line as per industry standard		
1.	Computer/Laptops	1
2.	Multimedia projector & screen	1
3.	Scanner	1
4.	Printer	1
5.	First Aid Box	5
6.	Lux meter	5
7.	Noise level meter	5
8.	Fire Extinguisher (water, foam, CO2, powder)	5
9.	Smoke or heat detector	5
10.	Rubbermaid Recycling Bins	5
11.	Water Testing Kits	5
12.	Air Quality Testing Kits	5

The following conditions must be fulfilled –

- The institute shall not use the same facilities for any other projects/organizations offering a similar course.
- The institute must provide sufficient evidence to prove ownership of the proposed training equipment.

The list denotes the minimum training equipment and facility required to effectively conduct training for a specific course. Additionally, the institute must ensure that all other necessary training tools, equipment, and furniture are available to meet the requirement of competency standards (CS) provided by SICIP.

For the operation of training course on **Social Compliance and Environmental Management** the institute must ensure the availability of at least 80% of the major training equipment and training facilities (according to the CS) to be eligible for SICIP training delivery. If the score is below 80%, the remaining equipment and facilities need to be installed before the commencement of the training.

The institute will also provide all other hand tools and power tools as per CS for 20 trainees. Also, they will arrange adequate seating arrangement and classroom setup for the 20 trainees.
