COMPLIANCE AND SUSTAINABILITY ISSUES

(JUTE SECTOR)

Skills for Industry Competitiveness and Innovation Program (SICIP)
Finance Division, Ministry of Finance

COPYRIGHT

The Competency Standards for **Compliance and Sustainability Issues** is designed to guide the development of curricula, teaching materials, and assessment tools. It also serves as the document for providing training consistent with the requirements of the industry for individuals who pass through the set standard via assessment would be qualified and settled for a relevant job.

This document has been developed to use in training under the **Skills for Industry Competitiveness and Innovation Program (SICIP)** to meet the skills requirements of the Jute sector. This document is owned by the Finance Division of the Ministry of Finance of the People's Republic of Bangladesh.

Public and private institutions may use the information contained in this standard for activities benefitting Bangladesh.

Other interested parties must obtain permission from the owner of this document for reproduction of information in any manner in whole or in part of this Skills Standard, in English or other languages.

This document is available at:

INTRODUCTION:

The Skills for Industry Competitiveness and Innovation Program (SICIP) has the overall objective of developing a skilled workforce adept at handling new technologies, especially for emerging industries in Bangladesh. It will expand skills training and strengthen the development of the training ecosystem to address the skills requirements of the SICIP-selected industry sectors. The program aims to (i) increase the technology-oriented skilled workforce across emerging and priority sectors, (ii) promote inclusive skilling and upskilling opportunities for women and socially disadvantaged groups, (iii) incentivize industry-university partnerships to nurture innovation capacity and improve industry competitiveness, and (iv) foster skills for climate-resilient manufacturing processes and green technologies. The program is expected to benefit about 220,000 new and existing workers over a 6-year implementation period from 2024-2029.

The SICIP Program has, therefore, taken the initiative to enhance the employability and productivity of trainees by implementing market-responsive and job-focused training programs through public and private training providers. This will require the development of competency standards for each of the occupations/trades which will provide a structured framework in the learning process to guide training providers, ensure consistent training quality, and create an alignment between the skills provided by the training institutes and the needs of the industry.

The Competency Standard also suggests integration of YouTube or similar platforms or downloaded clips into classroom practice to ensure simulated creation of the contents so that learners are exposed to visual demonstrations before classroom instruction or practical session, which aligns with modern learning preference and supports flipped classroom models.

This competency standard is therefore developed to improve skills following the job roles and skill sets of the occupation and ensure that the required skills are aligned with industry requirements.

The document details the format, sequencing, wording, and layout of the Competency Standard for an occupation which comprises Units of Competence and its corresponding Elements.

OVERVIEW:

A **Competency Standard** is a written specification of the knowledge, skills, and attitudes required for the performance of a job or occupation or trade corresponding to the standard of performance required in the workplace.

Competency standard:

- provides a consistent and reliable set of components for training, recognizing, and assessing people's skills, and may also have optional support materials.
- enables industry-recognized qualifications to be awarded through direct assessment of workplace competencies
- encourages the development and delivery of flexible training that suits individual and industry requirements
- encourages learning and assessment in a work-related environment which leads to verifiable workplace outcomes.

Competency Standards are developed by a working group comprised of national and international process experts and the participation of experts from the industry to identify the competencies required of an occupation in a particular sector.

Competency Standards describe the skills, knowledge, and attitude needed to perform effectively in the workplace. Competency Standards acknowledge that people can achieve vocational and technical competency in many ways by emphasizing what the learner can do, not how or where they learned to do it.

With Competency Standards, assessment and training may be conducted at the workplace, at training organization, during regular work, or through work experience, work placement, work simulation or any combination of these.

A Unit of Competency describes a distinct work activity that would normally be undertaken by one person in accordance with industry standards.

Units of Competency are documented in a standard format that comprises:

- Reference to Industry Sector, Occupational Title and Occupational Description
- Unit code
- Unit title
- Unit descriptor
- Unit of Competency
- Elements and performance criteria
- Variables and range statement
- Evidence guides

Together all the parts of a Unit of Competency:

- Describe a work activity
- Guide the assessor in determining whether the candidate is competent.

Competency Standard has been developed by a working group comprised of occupation-specific experts from the industry/institution, relevant consultants of SICIP.

The ensuing sections of this document comprise a description of the respective occupation with all the key components of a Unit of Competence:

- An overview of all Units of Competence for the occupation and their corresponding duration required for completion of training.
- The Competency Standards that include the Unit of Competency, Unit Descriptor, Elements and Performance Criteria, Range of Variables, Curricular Content Guide, and Assessment Evidence Guide.

Units & Elements at a Glance:**Generic Competencies (20 Hrs.)**

Code	Unit of Competency	Elements of Competency	Duration (Hours)
SICIP-JUTE-CSI-01-G	Apply Occupational Health and Safety (OHS) Practices in the Workplace	1. Identify OHS policies and procedures 2. Apply personal health and safety practices 3. Report hazards and risks 4. Respond to emergencies	10
SICIP-JUTE-CSI-02-G	Work in a team environment	1. Identify team goals and processes 2. Communicate and cooperate with team members 3. Work as a team member 4. Solve problems as a team member	10
Total Hour			20 Hrs.

Sector Specific Competencies (20 hrs.)

Code	Unit of Competency	Elements of Competency	Duration (Hours)
SICIP-JUTE-CSI-01-S	Work in the Jute Sector	1. Identify the jute sector and its main activities 2. Understand basic roles in jute production processes 3. Recognize common tools and equipment used 4. Understand simple quality requirements in jute work	10
SICIP-JUTE-CSI-02-S	Apply Green Practices in Jute Sector	1. Interpret green concepts 2. Minimize resources use in the workplace 3. Implement waste management practices	10
Total Hour			20 Hrs.

Occupation Specific Competencies (180 hrs.)

Code	Unit of Competency	Elements of Competency	Duration (hours)
SICIP-JUTE-CSI-01-O	Interpret Compliance Requirements	1. Identify compliance requirements in the jute industry 2. Explain labour laws and regulations 3. Describe environmental sustainability principles 4. Interpret organizational compliance policies	20
SICIP-JUTE-CSI-02-O	Apply Workplace Health and Safety Practices	1. Identify workplace hazards and risks 2. Follow occupational health and safety procedures 3. Use personal protective equipment (PPE) 4. Report accidents unsafe conditions	20
SICIP-JUTE-CSI-03-O	Maintain Labour Rights and Ethical Workplace Practices	1. Identify workers' rights and responsibilities 2. Follow ethical workplace practices 3. Maintain gender equality practices 4. Report workplace harassment and abuse	30
SICIP-JUTE-CSI-04-O	Follow Workplace Compliance Procedures	1. Follow production standard operating procedures (SOPs) 2. Maintain compliance documentation and records 3. Follow organizational compliance guidelines 4. Support workplace compliance activities	50
SICIP-JUTE-CSI-05-O	Support Compliance Monitoring and Reporting	1. Assist compliance inspection activities 2. Identify workplace non-compliance issues 3. Report compliance observations 4. Maintain compliance records and reports	20

Code	Unit of Competency	Elements of Competency	Duration (hours)
SICIP-JUTE-CSI-06-O	Apply Environmental Sustainability Practices	1. Identify environmental impacts operations 2. Follow waste management practices 3. Audit energy and water conservation 4. Maintain environmentally responsible behavior	40
Total Hours			0 Hrs.

COMPETENCY STANDARD: COMPLIANCE AND SUSTAINABILITY ISSUES

Generic Competencies

Unit of Competency: APPLY OCCUPATIONAL HEALTH AND SAFETY (OHS) PRACTICES IN THE WORKPLACE	Nominal Duration: 10 hrs.	Unit Code: SICIP-JUTE-CSI-01-G
Unit Descriptor: This unit covers the knowledge, skills and attitudes required to apply Occupational Health and Safety (OH&S) practices in the workplace. It specifically includes the tasks of identifying OHS policies and procedures; applying personal health and safety practices; reporting hazards and risks; and responding to emergencies.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Identify OHS policies and procedures	1.1 <u>OHS policies</u> and safe operating procedures are read and understood. 1.2 Safety signs and symbols are identified and followed. 1.3 Emergency response, evacuation procedures and other contingency measures are determined.
2. Apply personal health and safety practices	2.1 OHS policies and procedures are followed and practiced. 2.2 <u>Personal Protective Equipment (PPE)</u> is selected and used. 2.3 Personal hygiene is maintained.
3. Report hazards and risks	3.1 <u>Hazards and risks</u> are identified, assessed and controlled. 3.2 Incidents arising from hazards and risks are reported to authority. 3.3 Corrective actions are implemented to correct unsafe conditions in the workplace.
4. Respond to emergencies	4.1 Alarms and warning devices are responded. 4.2 <u>Emergency response plans and procedures</u> are implemented. 4.3 <u>First aid procedure</u> is applied during emergency situations.

Range of Variables

Variable	Range
	May include but not limited to:
1. OHS policies	1.1 International OHS requirements 1.2 Bangladesh standards for OHS 1.3 Building Code

	1.4 Fire Safety Rules and Regulations 1.5 Industry Guidelines
2. Personal Protective Equipment (PPE)	2.1 Apron 2.2 Gas Mask 2.3 Gloves 2.4 Safety shoes 2.5 Helmet 2.6 Face mask 2.7 Overalls 2.8 Goggles and safety glasses 2.9 Ear plugs 2.10 Sun block 2.11 Chemical/Gas masks
3. Hazards and risks	3.1 Chemical hazards. 3.2 Biological hazards. 3.3 Physical Hazards. 3.3.1 Machine hazards. 3.3.2 Materials hazards. 3.3.3 Tools and Equipment hazards.
4. Emergency response plans and procedures	4.1 Firefighting procedures 4.2 Earthquake response procedures 4.3 Evacuation procedures 4.4 Medical and first aid
5. First aid procedure	5.1 Washing of open wound 5.2 Washing chemically infected area 5.3 Applying bandage 5.4 Tourniquet 5.5 Applying CPR (Cardiopulmonary Resuscitation) 5.6 Taking appropriate medicine

Curricular Evidence Guide:

1. Underpinning Knowledge	1.1 OHS workplace policies and procedures. 1.2 Work safety procedures. 1.3 Emergency procedures. 1.3.1 Firefighting. 1.3.2 Earthquake response. 1.3.3 Explosion response. 1.3.4 Accident response. 1.4 Types of (biological, chemical and physical) and their effects. 1.5 PPE types and uses. 1.6 Personal hygiene practices. 1.7 OHS awareness.
2. Underpinning Skills	2.1 Identifying OHS policies and procedures 2.2 Following personal work safety practices 2.3 Reporting hazards and risks

	2.4 Responding to emergency procedures 2.5 Maintaining physical well-being in the workplace 2.6 Performing first aid. 2.7 Performing basic firefighting accessories using fire extinguishers 2.8 Applying basic first aid procedures
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety practices 3.2 Communication with peers, sub-ordinates and seniors in workplace. 3.3 Promptness in carrying out activities 3.4 Tidiness and timeliness 3.5 Respect of peers, sub-ordinates and seniors in workplace 3.6 Environmental concern 3.7 Sincere and honest to duties
4. Resource Implications	4.1 Workplace (simulated or actual) 4.2 PPEs 4.3 Firefighting equipment 4.4 Emergency response manual 4.5 First aid kits

Assessment Evidence Guide:

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1 Followed OHS policies and procedures. 1.2 Selected and used personal protective equipment (PPE). 1.3 Reported incidents arising from hazards and risks to authority. 1.4 Emergency response plans and procedures are implemented. 1.5 Applied basic first aid procedure.
2. Methods of Assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical Demonstration 2.3 Oral Questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

Unit of Competency: WORK IN A TEAM ENVIRONMENT	Nominal Duration: 10 hrs.	Unit Code: SICIP-JUTE-CSI-02-G
Unit Descriptor:		

This unit covers the skills, knowledge and attitudes required to work in a team environment. It specifically includes the tasks of identifying team goals and processes, communicating and cooperating with team members, working as a team member and solving problems as a team member.

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Identify team goals and processes	1.1 Team goals and collaborative decision-making processes are identified. 1.2 Roles and responsibilities of team members are identified. 1.3 Relationships within team and with other workers are identified.
2. Communicate and cooperate with team members	2.1 Effective interpersonal skills are used to interact with team members and to contribute to activities and objectives. 2.2 Formal and informal <u>forms of communication</u> are used effectively to support team achievement. 2.3 Diversity in character is respected and valued in team functioning. 2.4 Views and opinions of other team members are understood and valued. 2.5 Workplace terminology is used correctly to assist communication.
3. Work as a team member	3.1 Duties, responsibilities, authorities, objectives and task requirements are identified and clarified with team. 3.2 Tasks are performed in accordance with organizational and team requirements, specifications, and workplace procedures. 3.3 Team member's support with other members is made to ensure team achieves goals, awareness, and requirements. 3.4 Agreed reporting lines are followed using standard operating procedure.
4. Solve problems as a team member	4.1 Current and potential problems faced by team are identified. 4.2 A solution to the problem is identified. 4.3 Problems are solved effectively and the outcome of the implemented solution is evaluated.

Range of variables:

Variables	Range (may include but not limited to)
-----------	--

1. Forms of communication	1.1	Agenda
	1.2	Simple reports such as progress and incident reports
	1.3	Job sheets
	1.4	Operational manuals
	1.5	Brochures and promotional material
	1.6	Visual and graphic materials
	1.7	Standards
	1.8	OSH information
	1.9	Signs

Curricular Content Guide

1. Underpinning Knowledge	1.1	Team goals and collaborative decision-making processes
	1.2	Roles and responsibilities of team members
	1.3	Relationships within team and with other workers
	1.4	Effective interpersonal skills to interact with team members
	1.5	Effective formal and informal forms of communication
	1.6	Value of diversity in team functioning.
	1.7	Correct use of workplace terminology
	1.8	Team's duties, responsibilities, authorities, objectives, and task requirements
	1.9	Support mechanism to other members of team to ensure achievements of goals.
	1.10	Methods of identifying current and potential problems faced by a team
	1.11	Effective problem-solving methods and evaluation of outcomes
2. Underpinning Skills	2.1	Identifying team goals and collaborative decision-making processes
	2.2	Identifying roles and responsibilities of team members
	2.3	Identifying relationships within team and with other workers
	2.4	Using effective interpersonal skills to interact with team members and to contribute to activities and objectives
	2.5	Using formal and informal forms of communication
	2.6	Understanding and valuing views and opinions of other team members
	2.7	Performing tasks in accordance with organizational and team requirements, specifications, and workplace procedures.
	2.8	Supporting other members of the team to ensure team achieves goals, awareness, and requirements.
	2.9	Identifying current and potential problems faced by the team
	2.10	Identifying solutions to the problem
	2.11	Solving problems effectively and evaluating the outcome of the implemented solution
3. Underpinning Attitudes	3.1	Commitment to occupational health and safety
	3.2	Promptness in carrying out activities
	3.3	Sincere and honest to duties

	3.4 Environmental concerns 3.5 Eagerness to learn 3.6 Tidiness and timeliness 3.7 Respect for rights of peers and seniors in the workplace 3.8 Communication with peers, subordinates, and seniors in the workplace
4. Resource implications	The following resources must be provided: 4.1 Workplace (simulated or actual) 4.2 Manuals/Guidelines 4.3 Pens 4.4 Papers 4.5 Workbooks

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1 identified team goals and work processes 1.2 communicated and cooperated with team members. 1.3 worked as a team member 1.4 solved problems as a team member
2. Methods of assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical Demonstration 2.3 Oral Questioning 2.4 Portfolio (Optional)
3. Context of assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated workplace after completion of the training. 3.2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

The Sector Specific Competencies

Unit of Competency: WORK IN THE JUTE SECTOR	Nominal Duration: 10 hrs.	Unit Code: SICIP-JUTE-CSI-01-S
Unit Descriptor: This unit covers the skills, knowledge and attitudes required for work in the jute sector. It specifically includes the tasks of identifying the jute sector and its main activities, understanding basic roles in jute production processes, recognizing common tools and equipment used and understanding simple quality requirements in jute work.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Identify the jute sector and its main activities	1.1 The jute sector is identified within the context of national and global industries. 1.2 <u>Main activities</u> are recognized. 1.3 <u>Different stages of jute value chain</u> are described in simple terms. 1.4 Key workplaces in the jute sector are identified. 1.5 Importance of the jute sector in the economy and environment is understood.
2. Understand basic roles in jute production processes	2.1 <u>Basic job roles in jute production</u> are identified and described. 2.2 Simple production workflows and task sequences are understood. 2.3 Teamwork and coordination in production processes are identified. 2.4 Workplace safety roles and responsibilities are understood and followed.
3. Recognize common tools and equipment used	3.1 <u>Common tools used in jute processing</u> are identified correctly. 3.2 <u>Basic machines and equipment used in production</u> are recognized. 3.3 Functions of tools and equipment are understood in simple terms. 3.4 Basic maintenance needs of tools and equipment are recognized.
4. Understand simple quality requirements in jute work	4.1 Basic quality standards in jute work are identified. 4.2 <u>Simple defects in jute products</u> are recognized. 4.3 Importance of maintaining quality during production is understood. 4.4 Work output is checked against basic quality expectations. 4.5 Good workmanship practices are followed to ensure

	quality.
--	----------

Range of Variables

Variable	Range May include but not limited to:
1. Main activities	1.1 Cultivation and harvesting of jute 1.2 Retting and fibre extraction 1.3 Baling and grading 1.4 Spinning and yarn production 1.5 Weaving and fabric production 1.6 Dyeing, printing, and finishing 1.7 Packaging and export
2. Different stages of jute value chain	2.1 Raw jute production (farm level) 2.2 Fibre processing (retting, stripping, drying) 2.3 Baling and grading 2.4 Spinning into yarn 2.5 Weaving/knitting into fabric 2.6 Finishing and value addition 2.7 Distribution and export
3. Basic job roles in jute production	3.1 Raw jute handler 3.2 Machine operator 3.3 Quality checker/inspector 3.4 Dyeing and finishing worker 3.5 Packing and store assistant 3.6 Supervisor or line in-charge
4. Common tools used in jute processing	4.1 Scissors and cutting knives 4.2 Measuring tape and rulers 4.3 Hand hooks and tongs 4.4 Weighing scale 4.5 Hand brushes
5. Basic machines and equipment used in production	5.1 Carding machine 5.2 Drawing machine 5.3 Spinning machine 5.4 Looms (handloom/power loom) 5.5 Dyeing vats or tanks 5.6 Baling press machine
6. Simple defects in jute products	6.1 Uneven thickness or slub in yarn 6.2 Broken fibres or yarn ends 6.3 Colour variation or patchiness 6.4 Holes or tears in fabric 6.5 Mis weave or weaving faults

Curricular Content Guide

1. Underpinning Knowledge	1.1 Overview of the jute sector within national and global industry context. 1.2 Main activities and stages of the jute value chain from
---------------------------	---

	raw material to finished products. 1.3 Basic job roles, responsibilities, and workflows in jute production processes. 1.4 Importance of teamwork, coordination, and workplace safety in production settings. 1.5 Identification and functions of common tools, machines, and equipment used in jute work. 1.6 Basic maintenance awareness for tools and equipment used in production. 1.7 Understanding of basic quality standards, product defects, and quality expectations. 1.8 Principles of good workmanship and maintaining quality during jute production processes.
2. Underpinning Skills	2.1 Understanding basic job roles and responsibilities in jute production processes 2.2 Following simple production workflows, task sequences, and teamwork practices 2.3 Applying workplace safety roles and responsibilities in production activities 2.4 Understanding basic functions and maintenance needs of tools and equipment 2.5 Applying quality awareness during production to meet expected standards 2.6 Checking work output against basic quality requirements 2.7 Following good workmanship practices to ensure consistent quality output
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincere and honest to duties 3.4 Environmental concerns 3.5 Eagerness to learn 3.6 Tidiness and timeliness 3.7 Respect for rights of peers and seniors in the workplace 3.8 Communication with peers, subordinates and seniors in the workplace
4. Resource Implications	4.1 Workplace (simulated or actual) 4.2 Projector 4.3 Stationery 4.4 Learning manual

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1 identified the jute sector and its main activities
-----------------------------------	---

	1.2 understood basic roles in jute production processes 1.3 recognized common tools and equipment used 1.4 understood simple quality requirements in jute work
2. Methods of Assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical Demonstration 2.3 Oral Questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated workplace after completion of the training. 3.2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

Unit of Competency: APPLY GREEN PRACTICES IN JUTE SECTOR	Nominal Duration: 10 hrs.	Unit Code: SICIP-JUTE-CSI-02-S
Unit Descriptor: This unit covers the skills, knowledge and attitudes required for apply green practices in Jute sector. It specifically includes the tasks of interpreting green concepts, minimizing resources use in the workplace and implementing waste management practices.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Interpret green concepts	1.1 Basic concepts of environmental sustainability and green practices are explained clearly. 1.2 <u>Environmental impacts of jute production</u> processes are identified. 1.3 <u>Resource efficiency concepts</u> are interpreted. 1.4 Waste reduction, reuse, and recycling principles are described in relation to jute operations. 1.5 <u>Eco-friendly practices in the jute sector</u> are recognized and related to workplace activities.
2. Minimize resources use in the workplace	2.1 Water, energy, and raw materials are used efficiently according to workplace requirements. 2.2 <u>Unnecessary consumption of resources</u> is identified and avoided during operations. 2.3 Machines and equipment are operated in energy-efficient modes where applicable. 2.4 Material wastage is minimized through careful handling and accurate measurement. 2.5 <u>Resource-saving practices</u> are applied where possible. 2.6 Leakage, spillage, and wastage of materials are promptly controlled and reported. 2.7 <u>Workplace practices</u> are followed.
3. Implement waste management practices	3.1 <u>Types of waste</u> generated in jute operations are identified correctly. 3.2 Waste materials are segregated according to workplace and environmental requirements. 3.3 <u>Reusable and recyclable materials</u> are separated from non-recyclable waste. 3.4 Waste is stored safely in designated containers or areas. 3.5 Waste disposal is carried out following environmental rules and organizational procedures.

	3.6 Hazardous or chemical waste is handled carefully according to safety guidelines. 3.7 Waste reduction practices are applied to minimize environmental impact during operations.
--	---

Range of Variables

Variable	Range (May include but not limited to):
1. Environmental impacts of jute production	1.1 Water pollution from retting and washing 1.2 Chemical discharge from dyeing and finishing 1.3 Solid waste generation (jute dust, fibre waste) 1.4 Air pollution from boilers and machines 1.5 Energy consumption impacts
2. Resource efficiency concepts	2.1 Water conservation techniques 2.2 Energy-efficient machine operation 2.3 Optimized chemical usage 2.4 Material loss reduction 2.5 Process efficiency improvement
3. Eco-friendly practices in the jute sector	3.1 Use of natural dyes or low-impact dyes 3.2 Biodegradable materials use 3.3 Compliance with environmental regulations 3.4 Proper effluent treatment practices 3.5 Energy-saving production methods
4. Unnecessary consumption of resources	4.1 Overuse of water or chemicals 4.2 Idle machine running 4.3 Excess raw material usage 4.4 Poor process planning or duplication of work
5. Resource-saving practices	5.1 Reuse of rinse water where applicable 5.2 Recycling of jute waste and scraps 5.3 Reusing packaging materials 5.4 Recovery of usable materials from waste
6. Workplace practices	6.1 Following environmental policies and SOPs 6.2 Proper waste segregation and disposal 6.3 Use of eco-friendly materials 6.4 Compliance with environmental regulations 6.5 Maintaining clean and safe work environment
7. Types of waste	7.1 Jute fibre waste and dust 7.2 Yarn and fabric off-cuts 7.3 Chemical waste (dyes, salts, auxiliaries) 7.4 Wastewater from processing 7.5 Packaging waste (poly bags, cartons) 7.6 Sludge from effluent treatment
8. Reusable and recyclable materials	8.1 Jute fibre scraps for reprocessing 8.2 Reusable packaging materials 8.3 Recyclable plastics and paper 8.4 Recoverable chemical containers (if applicable)

Curricular Content Guide

1. Underpinning Knowledge	1.1 Concepts of environmental sustainability, green practices, and eco-friendly workplace behavior. 1.2 Environmental impacts of jute production and related industrial processes. 1.3 Principles of resource efficiency, including water, energy, and raw material conservation. 1.4 Waste reduction strategies such as reuse, recycling, and minimizing material wastage. 1.5 Efficient use of machines and equipment with focus on energy-saving practices. 1.6 Identification, segregation, and safe handling of different types of waste in jute operations. 1.7 Proper waste storage, disposal methods, and compliance with environmental regulations. 1.8 Hazardous waste handling and application of workplace environmental safety procedures.
2. Underpinning Skills	2.1 Applying resource efficiency principles in workplace operations 2.2 Applying waste reduction, reuse, and recycling practices in jute production activities 2.3 Promoting eco-friendly practices in daily workplace tasks 2.4 Using water, energy, and raw materials efficiently according to workplace requirements 2.5 Minimizing unnecessary consumption and wastage of resources during operations 2.6 Operating machines and equipment in energy-efficient modes where applicable 2.7 Handling materials carefully to reduce wastage and improve accuracy 2.8 Controlling leakage, spillage, and resource wastage and reporting issues promptly 2.9 Segregating different types of waste generated in jute operations 2.10 Handling hazardous waste according to safety guidelines and regulations
3 Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincere and honest to duties 3.4 Environmental concerns 3.5 Eagerness to learn 3.6 Tidiness and timeliness 3.7 Respect for rights of peers and seniors in the workplace 3.8 Communication with peers, subordinates and seniors in the workplace
4 Resource	The following resources must be provided:

Implications	4.1 Workplace (simulated or actual) 4.2 Standard operating procedure 4.3 Workplace documents, signs and symbols 4.4 Codes of conduct 4.5 Tools, equipment and facilities appropriate to the process or activities. 4.6 Materials are relevant to the proposed activity.
--------------	--

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1 interpreted green concepts 1.2 minimized resources use in the workplace 1.3 implemented waste management practices
2. Methods of Assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical demonstration 2.3 Oral questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated workplace after completion of the training. 3.2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

The Occupation Specific Competencies

Unit of Competency: INTERPRET COMPLIANCE REQUIREMENTS	Nominal Duration: 20 Hrs.	Unit Code: SICIP-JUTE-CSI-01-O
Unit Descriptor: This unit covers the skills, knowledge and attitudes required to interpret compliance requirements. It specifically includes the task of identifying compliance requirements in the jute industry, explaining labour laws and regulations, describing environmental sustainability principles and interpreting organizational compliance policies.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Identify compliance requirements in the jute industry	1.1 <u>Types of compliance</u> applicable to the jute sector are identified. 1.2 <u>Relevant compliance requirements</u> in jute industry operations are identified. 1.3 <u>Environmental and sustainability compliance</u> requirements are identified. 1.4 Relevant industry standards and regulatory codes are identified.
2. Explain labour laws and regulations	2.1 Applicable <u>national labour laws and workplace regulations</u> are recognized. 2.2 Key provisions of labour laws and workplace regulations are explained. 2.3 Legal requirements related to wages, working hours, and leave are described. 2.4 Employer and worker responsibilities under labour laws are explained. 2.5 Compliance with labour laws and workplace regulations is recognized.
3. Describe environmental sustainability principles	3.1 <u>Environmental sustainability principles</u> relevant to the jute sector are identified. 3.2 Sustainable production and resource management practices are described. 3.3 Environmental protection requirements and standards are explained. 3.4 Environmentally responsible workplace practices are identified.
4. Interpret organizational compliance policies	4.1 <u>Organizational compliance policies and procedures</u> are identified. 4.2 Key compliance requirements within organizational policies are explained. 4.3 Roles and responsibilities related to compliance are

	recognized.
	4.4 Workplace practices are reviewed against organizational compliance policies.

Range of Variables

Variable	Range (Includes but not limited to):
1. Types of compliance	1.1 Legal compliance 1.2 Social compliance 1.3 Occupational Health and Safety (OHS) Compliance 1.4 Environmental Compliance 1.5 Quality and Product Compliance
2. Relevant compliance requirements	2.1 National labour laws and regulations 2.2 Occupational safety and health (OSH) requirements 2.3 Environmental protection regulations 2.4 Industry standards and codes of conduct 2.5 Quality and product standards 2.6 Workplace policies and operational procedures 2.7 Buyer and export compliance requirements
3. Environmental and sustainability compliance	3.1 Waste management and disposal practices 3.2 Air and water pollution control regulations 3.3 Chemical handling and storage requirements 3.4 Energy and resource efficiency practices 3.5 Sustainable production and environmental conservation practices 3.6 Compliance with environmental laws and regulations
4. National labor laws and workplace regulations	4.1 Bangladesh Labor Act 2006 (amended) 4.2 Bangladesh Labor Rules 2015 4.3 Minimum wage regulations 4.4 Working hours and overtime provisions 4.5 Leave and welfare provisions 4.6 Workplace safety and health regulations 4.7 Employment conditions and worker rights
5. Environmental sustainability principles	5.1 Resource efficiency 5.2 Waste management and recycling 5.3 Pollution control 5.4 Safe chemical management 5.5 Environmental conservation 5.6 Sustainable production practices
6. Organizational compliance policies and procedures	6.1 Workplace rules and company policies 6.2 Code of conduct 6.3 Health and safety procedures 6.4 Environmental management procedures 6.5 Quality control procedures 6.6 Reporting and documentation procedures

Curricular Content Guide

1. Underpinning Knowledge	1.1 Concepts and types of compliance requirements applicable to the jute industry. 1.2 Relevant industry standards, regulatory codes, and organizational compliance policies. 1.3 Fundamentals of national labour laws, workplace regulations, and worker rights. 1.4 Legal requirements related to wages, working hours, leave, and workplace conditions. 1.5 Employer and employee responsibilities in maintaining workplace compliance. 1.6 Principles of environmental sustainability and resource management in the jute sector. 1.7 Environmental protection standards and environmentally responsible workplace practices. 1.8 Procedures for reviewing workplace practices against organizational compliance requirements and policies.
2. Underpinning Skills	2.1. Understanding industry standards, codes, and legal compliance requirements 2.2. Explaining applicable national labour laws and workplace regulations 2.3. Describing legal provisions related to wages, working hours, and leave 2.4. Understanding employer and worker responsibilities under labour laws 2.5. Recognizing the importance of labour law compliance in workplace practices 2.6. Understanding sustainable production and resource management practices 2.7. Interpreting organizational compliance policies and procedures 2.8. Understanding roles and responsibilities related to workplace compliance 2.9. Reviewing workplace practices against organizational compliance requirements
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincere and honest to duties 3.4 Environmental concerns 3.5 Eagerness to learn 3.6 Tidiness and timeliness 3.7 Respect for rights of peers and seniors in the workplace 3.8 Communication with peers, subordinates and seniors in the workplace
4 Resource Implications	4.1 Workplace (simulated or actual) 4.2 National labour laws and workplace regulations 4.3 Organizational compliance policies and procedures

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1 identified compliance requirements in the jute industry 1.2 explained labour laws and regulations 1.3 described environmental sustainability principles 1.4 interpreted organizational compliance policies
2. Methods of Assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical Demonstration 2.3 Oral Questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by nationally certified assessor or occupation-specific industry expert.

Unit of Competency: APPLY WORKPLACE HEALTH AND SAFETY PRACTICES	Nominal Duration: 20 Hrs.	Unit Code: SICIP-JUTE-CSI-02-O
Unit Descriptor: This unit covers the skills, knowledge and attitudes required to apply workplace health and safety practices. It specifically includes the task of identifying workplace hazards and risks, following occupational health and safety procedures, using personal protective equipment (PPE) and reporting accidents unsafe conditions.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Identify workplace hazards and risks	1.1 Workplace areas are inspected for hazards before work begins. 1.2 <u>Hazards</u> are identified according to workplace safety procedures. 1.3 <u>Risks</u> are assessed based on likelihood and severity of harm. 1.4 Identified hazards are recorded in the workplace hazard register. 1.5 Corrective actions are recommended within the scope of responsibility.
2. Follow occupational health and safety procedures	2.1 <u>OHS policies and procedures</u> are read and followed as required. 2.2 Work tasks are performed in line with standard safe work procedures. 2.3 <u>Safety signs and symbols</u> are identified and observed at the worksite 2.4 <u>Emergency response procedures</u> are followed when required. 2.5 Work area is kept clean and free from hazards throughout the shift.
3. Use personal protective equipment (PPE)	3.1 <u>Required PPE</u> is identified based on the task and work environment 3.2 PPE is selected, fitted, and worn correctly before work begins. 3.3 PPE is inspected for damage or defects before each use. 3.4 Damaged or faulty PPE is removed from use and reported promptly. 3.5 Used PPE is cleaned, stored, and maintained as per workplace procedures.
4. Report accidents unsafe conditions	4.1 <u>Unsafe conditions</u> are identified and reported using the correct workplace form or channel. 4.2 Accidents, incidents, and near misses are reported

	immediately to the supervisor.
	4.3 Accident reports are completed accurately and submitted within the required timeframe.
	4.4 Safety records and reports are maintained according to workplace procedures.

Range of Variables

Variable	Range (Includes but not limited to):
1. Hazards	1.1 Mechanical hazards 1.2 Electrical hazards 1.3 Fire and explosion hazards 1.4 Chemical hazards 1.5 Dust and air pollution hazards 1.6 Noise hazards 1.7 Heat and steam hazards 1.8 Slipping, tripping, and falling hazards 1.9 Manual handling and ergonomic hazards
2. Risks	2.1 Machine-related injuries 2.2 Electric shock risks 2.3 Fire accident risks 2.4 Chemical exposure risks 2.5 Respiratory health risks from jute dust 2.6 Hearing damage from excessive noise 2.7 Burns from hot surfaces and steam 2.8 Slips, trips, and falls 2.9 Muscle strain from manual handling 2.10 Environmental pollution risks
3. OHS policies and procedures	3.1 Safe machine operation procedures 3.2 Fire safety and emergency response procedures 3.3 Electrical safety procedures 3.4 Chemical handling and storage procedures 3.5 Hazard identification and risk reporting 3.6 Housekeeping and workplace cleanliness procedures 3.7 Safe lifting and manual handling procedures 3.8 First aid and accident reporting procedures
4. Safety signs and symbols	4.1 Warning signs 4.2 Mandatory signs 4.3 Emergency escape signs 4.4 Fire safety signs 4.5 Electrical hazard signs 4.6 Chemical hazard symbols 4.7 Flammable material signs 4.8 First aid signs 4.9 Machine safety signs
5. Emergency response procedures	5.1 Fire response and evacuation procedures 5.2 First aid and medical emergency response

	5.3 Accident reporting and emergency communication 5.4 Emergency shutdown of machines and equipment 5.5 Chemical spill and electrical hazard response 5.6 Use of fire extinguishers and emergency equipment 5.7 Assembly point and worker headcount system
6. Required PPE	6.1 Safety helmet 6.2 Dust mask or respirator 6.3 Safety goggles 6.4 Ear protection (ear plugs/ear muffs) 6.5 Protective gloves 6.6 Safety shoes/boots 6.7 Apron or protective clothing 6.8 High-visibility vest 6.9 Face shield (for chemical handling)
7. Unsafe conditions	7.1 Exposed or unguarded machinery 7.2 Faulty electrical systems and wiring 7.3 Slippery, wet, or cluttered floors 7.4 Poor ventilation with excessive dust build-up 7.5 Improper storage of chemicals and materials

Curricular Content Guide

1. Underpinning Knowledge	1.1 Basic concepts of workplace health, safety, hazards, and risk management. 1.2 Procedures for identifying workplace hazards and assessing risks. 1.3 Occupational Health and Safety (OHS) policies, procedures, and safe work practices. 1.4 Meaning and importance of workplace safety signs, symbols, and emergency procedures. 1.5 Types, selection, correct use, and maintenance of Personal Protective Equipment (PPE). 1.6 Importance of workplace housekeeping and maintaining hazard-free work areas. 1.7 Procedures for reporting unsafe conditions, accidents, incidents, and near misses. 1.8 Requirements for maintaining safety records, accident reports, and workplace documentation.
2. Underpinning Skills	2.1 Inspecting workplace areas to identify hazards before starting work 2.2 Assessing risks based on likelihood and severity of harm 2.3 Recommending corrective actions within job responsibility limits 2.4 Performing work tasks in line with safe work practices 2.5 Observing safety signs, symbols, and workplace warnings 2.6 Following emergency response procedures when

	required 2.7 Maintaining a clean and hazard-free work environment 2.8 Reporting unsafe conditions using proper workplace channels 2.9 Reporting accidents, incidents, and near misses immediately
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincere and honest to duties 3.4 Environmental concerns 3.5 Eagerness to learn 3.6 Tidiness and timeliness 3.7 Respect for rights of peers and seniors in the workplace 3.8 Communication with peers, subordinates and seniors in the workplace
4 Resource Implications	4.1 Workplace (simulated or actual) 4.2 OHS policies and procedures 4.3 Safety signs and symbols 4.4 Personal Protective Equipment (PPE)

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1 identified workplace hazards and risks 1.2 followed occupational health and safety procedures 1.3 used personal protective equipment (PPE) 1.4 reported accidents unsafe conditions
2. Methods of Assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical Demonstration 2.3 Oral Questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

Unit of Competency: MAINTAIN LABOUR RIGHTS AND ETHICAL WORKPLACE PRACTICES	Nominal Duration: 30 Hrs.	Unit Code: SICIP-JUTE-CSI-03-O
Unit Descriptor: This unit covers the skills, knowledge and attitudes required to maintain labour rights and ethical workplace practices. It specifically includes the task of identifying workers' rights and responsibilities, following ethical workplace practices, maintaining gender equality practices and reporting workplace harassment and abuse.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Identify workers' rights and responsibilities	1.1 <u>Workers' responsibilities</u> are identified according to Bangladesh Labour Law 1.2 Employment terms and conditions are read and understood before work commences 1.3 <u>Workers' rights</u> are recognized as per legal requirements. 1.4 Freedom of association and the right to collective bargaining are identified as per applicable regulations.
2. Follow ethical workplace practices	2.1 <u>Workplace code of conduct</u> is followed consistently during all work activities. 2.2 Confidential workplace information is handled and protected as per workplace policy. 2.3 Conflicts of interest are avoided and declared to the supervisor when identified. 2.4 Work tasks are performed with honesty, fairness, and respect for others. 2.5 <u>Ethical standards</u> set by relevant industry and compliance frameworks are observed at all times.
3. Maintain gender equality practices	3.1 <u>Gender equality policies and procedures</u> are identified and followed in the workplace 3.2 Equal treatment of all workers regardless of gender is maintained during work activities. 3.3 Opportunities for women's participation and advancement are recognized and supported. 3.4 Gender-discriminatory language, behavior, and practices are avoided in the workplace. 3.5 Concerns related to gender inequality are reported to the appropriate personnel.
4. Report workplace harassment and abuse	4.1 Workplace harassment, abuse, and misconduct are identified based on workplace definitions and policy. 4.2 Incidents of harassment or abuse are reported promptly.

	4.3 Reporting procedures for harassment and abuse are followed as per workplace policy. 4.4 Confidentiality of the reporting process is maintained according to workplace requirements. 4.5 Support mechanisms available to affected workers are identified and communicated as required.
--	--

Range of Variables

Variable	Range (Includes but not limited to):
1. Workers' responsibilities	1.1 Follow all workplace rules, instructions, and discipline requirements. 1.2 Use safety equipment properly and follow occupational safety procedures. 1.3 Perform assigned duties responsibly and avoid negligence or misuse of resources. 1.4 Protect machinery, materials, and company property from damage. 1.5 Report hazards, accidents, or unsafe conditions to authorities immediately.
2. Workers' rights	2.1 Right to safe and healthy working conditions, including occupational safety measures and PPE 2.2 Right to fair wages, timely payment, and legal overtime benefits 2.3 Right to reasonable working hours, rest breaks, weekly holidays, and leave facilities 2.4 Right to form and join trade unions for collective bargaining 2.5 Right to be free from discrimination, forced labour, and unfair treatment 2.6 Right to receive compensation and medical support in case of workplace injury or accident
3. Workplace code of conduct	3.1 Maintain discipline, honesty, and respectful behaviour at the workplace 3.2 Follow all lawful instructions, workplace rules, and company policies 3.3 Avoid harassment, discrimination, and abusive or unsafe behaviour 3.4 Ensure proper attendance, punctuality, and responsible job performance 3.5 Protect workplace property, machinery, and maintain confidentiality where required
4. Ethical standards	4.1 Maintain honesty and integrity in all workplace activities 4.2 Avoid corruption, bribery, and misuse of workplace resources 4.3 Treat all workers with fairness, dignity, and respect

	4.4 Follow transparency and accountability in assigned duties 4.5 Uphold compliance with labour laws, workplace rules, and ethical conduct norms
5. Gender equality policies and procedures	5.1 Equal opportunity in recruitment, training, and promotion for all genders 5.2 Equal pay for equal work without gender discrimination 5.3 Safe and respectful working environment for all employees 5.4 Maternity protection, leave, and supportive workplace facilities

Curricular Content Guide

1. Underpinning Knowledge	1.1 Basic provisions of Bangladesh Labour Law related to workers' rights and responsibilities. 1.2 Employment terms and conditions, including workplace obligations and legal protections. 1.3 Concepts of freedom of association and collective bargaining rights. 1.4 Principles of ethical workplace behavior, honesty, fairness, and professional conduct. 1.5 Workplace code of conduct, confidentiality requirements, and conflict of interest management. 1.6 Gender equality principles, equal opportunity practices, and prevention of discrimination. 1.7 Identification and prevention of workplace harassment, abuse, and misconduct. 1.8 Procedures for reporting harassment, maintaining confidentiality, and accessing worker support mechanisms.
2. Underpinning Skills	2.1. Understanding employment terms and conditions before starting work 2.2. Following workplace code of conduct in all work activities 2.3. Handling confidential information according to workplace policy 2.4. Performing work with honesty, fairness, and respect 2.5. Observing ethical standards and compliance requirements in the workplace 2.6. Following gender equality policies and workplace procedures 2.7. Supporting women's participation and professional development opportunities 2.8. Reporting concerns related to gender inequality appropriately 2.9. Reporting incidents of harassment or abuse promptly
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety

	3.2 Promptness in carrying out activities 3.3 Sincere and honest to duties 3.4 Environmental concerns 3.5 Eagerness to learn 3.6 Tidiness and timeliness 3.7 Respect for rights of peers and seniors in the workplace 3.8 Communication with peers, subordinates and seniors in the workplace
4 Resource Implications	4.1 Workplace (simulated or actual) 4.2 Workplace code of conduct 4.3 Gender equality policies and procedures

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1 identified workers' rights and responsibilities 1.2 followed ethical workplace practices 1.3 maintained gender equality practices 1.4 reported workplace harassment and abuse
2. Methods of Assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical Demonstration 2.3 Oral Questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

Unit of Competency: FOLLOW WORKPLACE COMPLIANCE PROCEDURES	Nominal Duration: 50 Hrs.	Unit Code: SICIP-JUTE-CSI-04-O
Unit Descriptor: This unit covers the skills, knowledge and attitudes required to follow workplace compliance procedures. It specifically includes the task of following production standard operating procedures (SOPs), maintaining compliance documentation and records, following organizational compliance guidelines and supporting workplace compliance activities.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Follow production standard operating procedures (SOPs)	1.1 <u>Relevant SOPs</u> are located and read before work tasks are commenced. 1.2 Work tasks are performed in accordance with documented production SOPs. 1.3 Deviations from SOPs are identified and reported to the legal authority promptly. 1.4 Updated SOPs are followed when changes to procedures are communicated. 1.5 Adherence to SOPs is maintained consistently throughout the production process.
2. Maintain compliance documentation and records	2.1 <u>Required compliance documents</u> are identified according to workplace procedures. 2.2 Records are completed accurately, legibly, and within the required timeframe. 2.3 Completed documents are filed and stored in designated locations as per workplace policy. 2.4 Compliance records are updated when changes in processes or requirements occur. 2.5 Confidential compliance documents are handled and protected as per workplace guidelines.
3. Follow organizational compliance guidelines	3.1 <u>Organizational compliance guidelines</u> are identified and referred to during work activities. 3.2 Work tasks are carried out in line with applicable legal, social, and environmental compliance requirements. 3.3 Industry-specific compliance standards relevant to the jute sector are recognized and followed. 3.4 <u>Non-compliance issues</u> observed in the workplace are identified and reported to the legal authority. 3.5 Changes to compliance guidelines are acknowledged and applied in day-to-day work tasks.
4. Support workplace compliance activities	4.1 Compliance audits and inspections are supported by providing accurate information as required

	4.2 Compliance-related instructions from manager and auditors are followed promptly. 4.3 Workplace areas and equipment are maintained in a compliance-ready condition at all times. 4.4 Feedback from compliance reviews is received and applied to improve work practices. 4.5 Compliance awareness is demonstrated through consistent and responsible workplace behavior.
--	---

Range of Variables

Variable	Range (Includes but not limited to):
1. Relevant SOPs	1.1 Step-by-step instructions for each production process 1.2 Safe machine operation and shutdown procedures 1.3 Correct handling and mixing of raw materials and chemicals 1.4 Quality control checks during and after production 1.5 Workplace safety procedures including PPE use 1.6 Waste management and environmental protection procedures 1.7 Emergency response and accident reporting procedures
2. Required compliance documents	2.1 Factory license and labour law compliance records 2.2 Health, safety, and fire safety certificates 2.3 Environmental clearance and waste management records 2.4 Worker attendance, leave, wage, and training records 2.5 Machine inspection and maintenance logs
3. Organizational compliance guidelines	3.1 Compliance with Bangladesh Labour Act and related regulations 3.2 Adherence to occupational health and safety (OHS) policies 3.3 Following environmental protection and waste management rules 3.4 Maintaining accurate production, wage, and attendance records 3.5 Ensuring fire safety and emergency preparedness standards 3.6 Upholding ethical conduct, discipline, and workplace code of behavior
4. Non-compliance issues	4.1 Violation of labour laws and workplace regulations 4.2 Failure to follow safety procedures and use PPE 4.3 Poor machine operation and unsafe working practices 4.4 Environmental rule violations (waste, effluent, pollution control) 4.5 Inaccurate records (wages, attendance, production data) 4.6 Ignoring SOPs and organizational quality standards

Curricular Content Guide

1. Underpinning Knowledge	1.1 Purpose and importance of Standard Operating Procedures (SOPs) in workplace operations. 1.2 Procedures for locating, understanding, and following production SOPs. 1.3 Principles of compliance documentation, record keeping, and document control. 1.4 Requirements for handling confidential compliance records and workplace information. 1.5 Organizational compliance guidelines related to legal, social, and environmental requirements. 1.6 Industry-specific compliance standards applicable to the jute sector. 1.7 Procedures for identifying and reporting non-compliance issues and workplace deviations. 1.8 Roles and responsibilities in supporting audits, inspections, and continuous compliance improvement.
2. Underpinning Skills	2.1 Performing work in accordance with documented production SOPs 2.2 Following updated procedures when changes are communicated 2.3 Maintaining consistent adherence to SOPs throughout production activities 2.4 Recording information accurately, clearly, and within required timelines 2.5 Handling confidential compliance documents securely and responsibly 2.6 Ensuring work aligns with legal, social, and environmental requirements 2.7 Supporting compliance audits and inspections with accurate information 2.8 Demonstrating consistent compliance awareness in daily activities
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincere and honest to duties 3.4 Environmental concerns 3.5 Eagerness to learn 3.6 Tidiness and timeliness 3.7 Respect for rights of peers and seniors in the workplace 3.8 Communication with peers, subordinates and seniors in the workplace
4 Resource Implications	4.1 Workplace (simulated or actual) 4.2 Standard Operating Procedures (SOPs) 4.3 Required compliance documents 4.4 Organizational compliance guidelines

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1 followed production standard operating procedures (SOPs) 1.2 maintained compliance documentation and records 1.3 followed organizational compliance guidelines 1.4 supported workplace compliance activities
2. Methods of Assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical Demonstration 2.3 Oral Questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

Unit of Competency: SUPPORT COMPLIANCE MONITORING AND REPORTING	Nominal Duration: 20 Hrs.	Unit Code: SICIP-JUTE-CSI-05-O
Unit Descriptor: This unit covers the skills, knowledge and attitudes required to support compliance monitoring and reporting. It specifically includes the task of assisting compliance inspection activities, identifying workplace non-compliance issues, reporting compliance observations, and maintaining compliance records and reports.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Assist compliance inspection activities	1.1 <u>Compliance inspection schedules</u> and requirements are identified before inspections commence. 1.2 Workplace areas, equipment, and documents are prepared and made ready for inspection. 1.3 Accurate information is provided to inspectors and compliance officers as required. 1.4 Inspection checklists and tools are used as directed by the supervisor or compliance officer. 1.5 Inspection findings and observations are noted and communicated to the relevant personnel.
2. Identify workplace non-compliance issues	2.1 Non-compliance issues are interpreted by comparing workplace practices against established standards. 2.2 <u>Breaches</u> are recognized during work activities. 2.3 Non-compliance issues are categorized according to type and level of severity. 2.4 Root causes of identified non-compliance issues are noted for reporting purposes. 2.5 Identified non-compliance issues are escalated to the supervisor without delay.
3. Report compliance observations	3.1 Compliance observations are documented accurately using the required workplace reporting format 3.2 Reports are completed clearly, factually, and within the required timeframe. 3.3 Compliance observations are reported to the designated personnel as per workplace procedure. 3.4 <u>Supporting evidence</u> is collected and attached as required 3.5 Confidentiality of compliance observations and reports is maintained according to workplace policy.
4. Maintain compliance records and reports	4.1 Compliance records are maintained in an accurate, complete, and up-to-date manner.

	4.2	Records are filed and stored in designated locations according to workplace documentation procedures.
	4.3	Compliance reports are retrieved and provided to authorized personnel when requested
	4.4	Compliance record-keeping practices are carried out.

Range of Variables

Variable	Range (Includes but not limited to):
1. Compliance inspection schedules	1.1 Daily workplace safety and housekeeping inspections 1.2 Weekly machine safety and maintenance checks 1.3 Monthly fire safety equipment inspections 1.4 Periodic health and safety audits (internal/external) 1.5 Environmental compliance and effluent monitoring checks 1.6 Annual regulatory inspections by government authorities
2. Breaches	2.1 Not following safety rules and SOPs 2.2 Not using PPE properly 2.3 Unsafe machine operation 2.4 Poor housekeeping and unsafe workplace 2.5 Wrong handling or disposal of chemicals and waste 2.6 Not reporting accidents or hazards 2.7 Incorrect or incomplete workplace records
3. Supporting evidence	3.1 Photographs and video recordings of workplace activities 3.2 Compliance documents and certificates 3.3 Inspection and audit reports 3.4 Checklists and observation sheets 3.5 Attendance and training records 3.6 Incident and accident reports 3.7 Maintenance logs and machine records

Curricular Content Guide

1. Underpinning Knowledge	1.1 Principles and purpose of workplace compliance inspections and monitoring activities. 1.2 Procedures for preparing workplace areas, equipment, and documents for inspections. 1.3 Understanding of workplace standards, compliance requirements, and non-compliance indicators. 1.4 Methods for identifying, categorizing, and escalating non-compliance issues. 1.5 Basics of root cause identification related to compliance breaches and workplace issues. 1.6 Procedures for preparing accurate compliance reports and maintaining supporting evidence. 1.7 Importance of confidentiality, accuracy, and timeliness in compliance reporting and documentation.
---------------------------	--

	1.8 Compliance record management practices including filing, storage, retrieval, and documentation control.
2. Underpinning Skills	2.1 Preparing workplace areas, equipment, and documents for inspection readiness 2.2 Providing accurate and relevant information to inspectors and compliance officers 2.3 Using inspection checklists and tools as instructed by supervisors or compliance officers 2.4 Escalating non-compliance issues promptly to supervisors 2.5 Documenting compliance observations using required workplace formats 2.6 Completing reports clearly, factually, and within required timelines 2.7 Submitting compliance reports to designated personnel as per procedure 2.8 Keeping compliance records accurate, complete, and up to date 2.9 Filing and storing records according to documentation procedures
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincere and honest to duties 3.4 Environmental concerns 3.5 Eagerness to learn 3.6 Tidiness and timeliness 3.7 Respect for rights of peers and seniors in the workplace 3.8 Communication with peers, subordinates and seniors in the workplace
4 Resource Implications	4.1 Workplace (simulated or actual) 4.2 Computer/laptop 4.3 Pen/pencil 4.4 Paper

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1 assisted compliance inspection activities 1.2 identified workplace non-compliance issues 1.3 reported compliance observations 1.4 maintained compliance records and reports
2. Methods of Assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical Demonstration 2.3 Oral Questioning 2.4 Portfolio (Optional)

3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.
---------------------------------	--

Unit of Competency: APPLY ENVIRONMENTAL SUSTAINABILITY PRACTICES	Nominal Duration: 40 Hrs.	Unit Code: SICIP-JUTE-CSI-06-O
Unit Descriptor: This unit covers the skills, knowledge and attitudes required to apply environmental sustainability practices. It specifically includes the task of identifying environmental impacts operations, following waste management practices, auditing energy and water conservation and maintaining environmentally responsible behaviour.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Identify environmental impacts operations	1.1 <u>Environmental impacts of jute processing operations</u> are identified in the work area. 1.2 Sources of pollution are recognized. 1.3 <u>Environmental risks</u> are assessed according to workplace environmental procedures. 1.4 Identified environmental impacts are recorded and reported to the supervisor. 1.5 Relevant environmental regulations and workplace policies are referred to as required.
2. Follow waste management practices	2.1 <u>Waste materials</u> are sorted and separated according to workplace waste management procedures. 2.2 Biodegradable, non-biodegradable, and recyclable wastes are disposed of in designated areas. 2.3 Jute by-products and fiber waste are handled and stored as per workplace guidelines. 2.4 <u>Chemical and hazardous waste</u> is disposed of following safety and environmental standards. 2.5 Waste reduction opportunities are identified and reported to the supervisor.
3. Audit energy and water conservation	3.1 <u>Energy consumption</u> during operations is monitored and kept within required levels 3.2 Machinery and equipment are switched off when not in use as per workplace procedure. 3.3 Water usage is controlled to minimize wastage during jute processing tasks. 3.4 Leaks, spills, and equipment faults causing energy or water loss are reported promptly. 3.5 Energy and water conservation practices are followed consistently during work tasks.
4. Maintain environmentally responsible behavior	4.1 Environmental awareness is demonstrated through consistent and responsible work behavior. 4.2 Work tasks are carried out in a manner that minimizes harm to the environment.

	4.3 Environmental policies and sustainability guidelines are followed at all times.
	4.4 <u>Environmentally harmful practices</u> observed in the workplace are reported to the supervisor.
	4.5 <u>Environmental performance improvement areas</u> are identified and communicated to relevant personnel.

Range of Variables

Variable	Range (Includes but not limited to):
1. Environmental impacts of jute processing operations	1.1 Water pollution from retting, washing, and dyeing effluents 1.2 Air pollution from dust, smoke, and boiler emissions 1.3 Chemical pollution from dyes, salts, and finishing agents 1.4 Solid waste generation from jute fibres and processing waste 1.5 High water and energy consumption during processing operations
2. Environmental risks	2.1 Water pollution from untreated effluents 2.2 Air pollution from dust and boiler emissions 2.3 Chemical contamination of soil and water 2.4 Excessive water and energy use 2.5 Improper waste disposal and accumulation
3. Waste materials	3.1 Jute fibre waste and dust 3.2 Yarn and fabric off-cuts 3.3 Chemical waste from dyes and auxiliaries 3.4 Wastewater from processing and dyeing 3.5 Packaging waste (plastic, paper, cartons)
4. Chemical and hazardous waste	4.1 Dyeing effluents containing reactive and direct dyes 4.2 Acid and alkali waste solutions 4.3 Salt and chemical residues from processing baths 4.4 Spent bleaching and finishing chemicals 4.5 Contaminated wastewater sludge 4.6 Empty chemical containers and packaging waste
5. Energy consumption	5.1 Electricity usage tracking 5.2 Machine power consumption checks 5.3 Fuel consumption monitoring 5.4 Production load control and management
6. Environmentally harmful practices	6.1 Improper disposal of chemical waste and effluents 6.2 Excessive use of water and energy 6.3 Uncontrolled release of dust and emissions 6.4 Dumping solid waste in open areas 6.5 Use of harmful or non-compliant chemicals
7. Environmental performance improvement areas	7.1 Reduction of water and energy consumption 7.2 Improved waste management and recycling practices 7.3 Control of air, dust, and emission levels

	7.4 Proper treatment of chemical effluents
	7.5 Use of eco-friendly materials and processes
	7.6 Better housekeeping and workplace cleanliness

Curricular Content Guide

1. Underpinning Knowledge	1.1 Basic concepts of environmental sustainability and its importance in industrial operations. 1.2 Environmental impacts of jute processing, including pollution sources and risk factors. 1.3 Relevant environmental regulations, workplace policies, and compliance requirements. 1.4 Principles of waste management, including segregation, recycling, and proper disposal methods. 1.5 Handling and management of jute by-products, fiber waste, and hazardous materials. 1.6 Energy and water conservation principles in industrial and workplace settings. 1.7 Methods for monitoring resource usage and identifying inefficiencies such as leaks or wastage. 1.8 Practices for environmentally responsible behavior and continuous improvement in sustainability performance.
2. Underpinning Skills	2.1. Assessing environmental risks according to workplace procedures 2.2. Recording and reporting environmental impacts to supervisors 2.3. Sorting and separating waste according to waste management procedures 2.4. Handling and storing jute by-products and fiber waste properly 2.5. Monitoring energy consumption and maintaining required usage levels 2.6. Controlling water usage to reduce wastage in operations 2.7. Reporting leaks, spills, and equipment faults affecting resources 2.8. Following energy and water conservation practices consistently
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincere and honest to duties 3.4 Environmental concerns 3.5 Eagerness to learn 3.6 Tidiness and timeliness 3.7 Respect for rights of peers and seniors in the workplace 3.8 Communication with peers, subordinates and seniors in the workplace

4 Resource Implications	4.1 Workplace (simulated or actual) 4.2 Computer/laptop 4.3 Pen/pencil 4.4 Paper 4.5 Standard operating procedure (samples)

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1 identified environmental impacts operations 1.2 followed waste management practices 1.3 audited energy and water conservation 1.4 maintained environmentally responsible behavior
2. Methods of Assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical Demonstration 2.3 Oral Questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

End of the Competency Standard

Workshop/Lab Facility Standard

Course Name:	Compliance and Sustainability Issues
Number of Trainees:	25

Course-wise Training Space (Theoretical Classroom, Workshop/ Lab/ Classroom cum Workshop):

- Classroom – 350 sft (33 sqm)
- Workshop/ lab – 800 sft (75 sqm) OR
- Classroom cum workshop – 1000 sft (93 sqm)

Major Training Equipment and Training Facilities:

S.N.	Major Equipment and Training facilities	Required facilities
1.	Computer/Laptops	1
2.	Multimedia projector & screen	1
3.	Scanner	1
4.	Printer	1
5.	Internet-enabled devices (router/modem)	1
6.	First Aid Box	5
7.	Digital Lux meter	5
8.	Noise level meter	5
9.	Fire Extinguisher (water, foam, CO2, powder)	5
10.	Smoke or heat detector	5
11.	Rubbermaid Recycling Bins	5
12.	Water Testing Kits	5
13.	Air Quality Testing Kits	5

The following conditions must be fulfilled –

- The institute shall not use the same facilities for any other projects/organizations offering a similar course.
- The institute must provide sufficient evidence to prove ownership of the proposed training equipment.

The list denotes the minimum training equipment and facility required to effectively conduct training for a specific course. Additionally, the institute must ensure that all other necessary training tools, equipment, and furniture are available to meet the requirement of competency standards (CS) provided by SICIP.

For the operation of training course on **Compliance and Sustainability Issues** the institute must ensure the availability of at least 80% of the major training equipment and training facilities (according to the CS) to be eligible for SICIP training delivery. If the score is below 80%, the remaining equipment and facilities need to be installed before the commencement of the training.

The institute will also provide all other hand tools and power tools as per CS for 25 trainees. Also, they will arrange adequate seating arrangement and classroom setup for the 25 trainees.
