Skills for Industry Competitiveness and Innovation Program (SICIP)
Finance Division, Ministry of Finance

COPYRIGHT

The Competency Standards for **Pattern Design and Product Development (Jute Sector)** is a document for the development of curricula, teaching and learning materials, and assessment tools. It also serves as the document for providing training consistent with the requirements of the industry for individuals who pass through the set standard via assessment would be qualified and settled for a relevant job.

Developed under the Skills for Industry Competitiveness and Innovation Program (SICIP), this document addresses the skills requirements critical for Industrial Automation. It is owned by the Finance Division of the Ministry of Finance of the People's Republic of Bangladesh.

Public and private institutions may use the information contained in this standard for activities benefitting Bangladesh.

Other interested parties must obtain permission from the owner of this document for reproduction of information in any manner in whole or in part of this Skills Standard, in English or other languages.

This document is available at:

INTRODUCTION:

The Skills for Industry Competitiveness and Innovation Program (SICIP) has the overall objective of developing a skilled workforce adept at handling new technologies, especially for emerging industries in Bangladesh. It will expand skills training and strengthen the development of the training ecosystem to address the skills requirements of the SICIP-selected industry sectors. The program aims to (i) increase the technology-oriented skilled workforce across emerging and priority sectors, (ii) promote inclusive skilling and upskilling opportunities for women and socially disadvantaged groups, (iii) incentivize industry-university partnerships to nurture innovation capacity and improve industry competitiveness, and (iv) foster skills for climate-resilient manufacturing processes and green technologies. The program is expected to benefit about 220,000 new and existing workers over a 6-year implementation period from 2024-2029.

The SICIP Program has, therefore, taken the initiative to enhance the employability and productivity of trainees by implementing market-responsive and job-focused training programs through public and private training providers. This will require the development of competency standards for each of the occupations/trades which will provide a structured framework in the learning process to guide training providers, ensure consistent training quality, and create an alignment between the skills provided by the training institutes and the needs of the industry.

The Competency Standard also suggests integration of YouTube or similar platforms or downloaded clips into classroom practice to ensure simulated creation of the contents so that learners are exposed to visual demonstrations before classroom instruction or practical session, which aligns with modern learning preference and supports flipped classroom models.

This competency standard is therefore developed to improve skills following the job roles and skill sets of the occupation and ensure that the required skills are aligned with industry requirements.

The document details the format, sequencing, wording, and layout of the Competency Standard for an occupation which comprises Units of Competence and its corresponding Elements.

OVERVIEW:

A **Competency Standard** is a written specification of the knowledge, skills, and attitudes required for the performance of a job or occupation or trade corresponding to the standard of performance required in the workplace.

Competency standard:

- provides a consistent and reliable set of components for training, recognizing, and assessing people's skills, and may also have optional support materials.
- enables industry-recognized qualifications to be awarded through direct assessment of workplace competencies
- encourages the development and delivery of flexible training that suits individual and industry requirements
- encourages learning and assessment in a work-related environment which leads to verifiable workplace outcomes.

Competency Standard has been reviewed and updated by a working group comprised of occupation-specific experts from the industry/institution, relevant consultants of SICIP.

Competency Standards describe the skills, knowledge, and attitude needed to perform effectively in the workplace. Competency Standards acknowledge that people can achieve vocational and technical competency in many ways by emphasizing what the learner can do, not how or where they learned to do it.

With Competency Standards, assessment and training may be conducted at the workplace, at training organization, during regular work, or through work experience, work placement, work simulation or any combination of these.

A Unit of Competency describes a distinct work activity that would normally be undertaken by one person in accordance with industry standards.

Units of Competency are documented in a standard format that comprises:

- Reference to Industry Sector, Occupational Title and Occupational Description
- Unit code
- Unit title
- Unit descriptor
- Unit of Competency
- Elements and performance criteria
- Variables and range statement
- Evidence guides

Together all the parts of a Unit of Competency:

- Describe a work activity
- Guide the assessor in determining whether the candidate is competent.

Identification and validation of units of competency and elements for each occupation were made by experts from in consultative workshop.

The ensuing sections of this document comprise a description of the respective occupation with all the key components of a Unit of Competence:

- An overview of all Units of Competence for the occupation and their corresponding duration required for completion of training.
- The Competency Standards that include the Unit of Competency, Unit Descriptor, Elements and Performance Criteria, Range of Variables, Curricular Content Guide, and Assessment Evidence Guide.

Units & Elements at a Glance:

Generic Competencies (20 Hrs.)

Code	Unit of Competency	Elements of Competency	Duration (Hours)
SICIP- JUTE-PDP-01-G	Apply occupational health and safety (OHS) practices at workplace	1. Identify, control and report OHS hazards 2. Conduct work safely 3. Follow emergency response procedures 4. Maintain and improve health and safety in the workplace	10
SICIP- JUTE-PDP-02-G	Work In a Team Environment	1. Identify team goals and work processes 2. Communicate and co-operate with team members 3. Work as a team member 4. Solve problems as a team member	10
Total Hour			20

Sector Specific Competencies (20 hrs.)

Code	Unit of Competency	Elements of Competency	Duration (Hours)
SICIP- JUTE-PDP -01-S	Apply Quality Procedures in Jute Manufacturing	1. Identify quality procedures 2. Follow quality procedures 3. Maintain standard procedures	10
SICIP- JUTE-PDP-02-S	Apply green practices in Jute sector	1. Interpret green concepts 2. Minimize resource use in the workplace 3. Implement waste management practices	10
Total Hour			20

Occupation Specific Competencies (180 hrs.)

Code	Unit of Competency	Elements of Competency	Duration (hours)
SICIP- JUTE- PDP-01-O	Apply Pattern Design Fundamentals	1. Identify jute products. 2. Identify jute fabrics, materials and accessories. 3. Interpret product specifications and measurements. 4. Explain pattern making concepts. 5. Identify pattern making tools and equipment.	15
SICIP- JUTE-PDP-02-O	Develop Jute Product Designs	1. Prepare product sketches. 2. Develop design layouts. 3. Select colors and trims. 4. Prepare design specifications. 5. Review product designs.	20
SICIP- JUTE- PDP-03-O	Prepare Basic Patterns for Jute Products	1. Prepare basic bag patterns. 2. Prepare home décor product patterns. 3. Prepare fashion accessory patterns. 4. Modify patterns according to design requirements.	25
SICIP- JUTE- PDP-04-O	Develop Samples and Prototypes	1. Select materials and accessories. 2. Cut materials according to patterns. 3. Assemble product samples. 4. Inspect sample quality. 5. Revise prototype products.	25
SICIP- JUTE-PDP-05-O	Develop Jute Bag Products	1. Develop shopping bags.	30

Code	Unit of Competency	Elements of Competency	Duration (hours)
		2. Develop carry bags. 3. Develop promotional bags. 4. Develop travel bags. 5. Inspect finished bag products.	
SICIP- JUTE- PDP-06-O	Develop Jute Home and Lifestyle Products	1. Develop storage baskets. 2. Develop table mats and runners. 3. Develop floor mats and rugs. 4. Develop cushion and home décor products. 5. Inspect finished products.	30
SICIP- JUTE- PDP-07-O	Develop Jute Fashion and Gift Products	1. Develop fashion accessories. 2. Develop office and stationery products. 3. Develop gift and souvenir products. 4. Prepare products for packaging. 5. Present finished products.	35
Total Hours			180

COMPETENCY STANDARD: PATTERN DESIGN AND PRODUCT DEVELOPMENT

Generic Competencies:

Unit of Competency: APPLY OCCUPATIONAL HEALTH AND SAFETY (OHS) PRACTICES AT WORKPLACE	Nominal Duration: 10 Hrs.	Unit Code: SICIP-JUTE-PDP-01-G
Unit Descriptor: This unit covers the knowledge, skills and attitudes required to apply occupational health and safety (OHS) practices at workplace. It specifically includes the tasks of identifying, controlling and reporting OHS hazards, conducting work safely, following emergency response procedures and maintaining and improving health and safety in the workplace.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Identify, control and report OHS hazards	1.1 Work area is routinely checked for Occupational Health and Safety (OHS) hazards prior to commencing and during work. 1.2 <u>Hazards</u> are identified and corrective action is taken within the level of responsibility. 1.3 OSH hazards and incidents are reported to appropriate personnel according to workplace procedures. 1.4 <u>Safety signs and symbols</u> are identified and followed. 1.5 <u>Preventive Control measures</u> are identified in accordance with OSH work standards.
2. Conduct work safely	2.1 OHS practices are applied in the workplace. 2.2 <u>Personal Protective Equipment (PPE)</u> are used.
3. Follow emergency response procedures	3.1 Emergency situations are identified and reported according to workplace requirements. 3.2 Emergency procedures are followed as appropriate to the nature of the emergency and according to workplace procedures. 3.3 <u>Workplace procedures</u> for dealing with accidents, fires and emergencies are followed whenever necessary within scope of responsibilities.
4. Maintain and improve health and safety in	4.1 Risks are identified and appropriate control measures are implemented in the workplace.

the workplace	4.2 Recommendations arising from risk assessments are implemented within level of responsibility. 4.3 Safety records are maintained according to <u>company policies</u>.
---------------	--

Range of Variables

Variable	Range (May include but not limited to):
1. Hazards	1.1. OHS incidents include near misses, injuries, illnesses and property damage, noise, handling hazardous substances. 1.2. Biological hazards- bacteria, viruses, plants, parasites, mites, molds, fungi, insects 1.3. Chemical hazards – dusts, fibers, mists, fumes, smoke, gasses, vapors 1.4. Ergonomics Hazards 1.5. Physiological factors – monotony, personal relationship, work out cycle 1.6. Safety hazards (unsafe workplace condition) – confined space, excavations, falling objects, gas leaks, electrical, poor storage of materials and waste, spillage, waste and debris 1.7. Unsafe workers' act (Smoking in off-limited areas, Substance and alcohol abuse at work) 1.8. Working with and near moving equipment / load shifting equipment. 1.9. Broken or damaged equipment or materials.
2. Safety signs and symbols	2.1 Direction signs (exit, emergency exit, etc.) 2.2 First aid signs 2.3 Danger Tags 2.4 Hazard signs 2.5 Safety tags 2.6 Warning signs
3. Personal Protective Equipment (PPE)	3.1 Apron 3.2 Safety Helmet 3.3 Goggles 3.4 Ear muffs 3.5 Ear plugs 3.6 Gloves 3.7 Clothing 3.8 Safety Boots 3.9 Face Protection (Musk & Shield) 3.10 Scarf 3.11 Hair Net/cap/bonnet 3.12 Hard hat
	4.1 Eliminate the hazard (i.e., get rid of the dangerous

4. Preventive Control Measures	machine 4.2 Isolate the hazard (i.e. keep the machine in a closed room and operate it remotely; barricade an unsafe area off) 4.3 Substitute the hazard with a safer alternative (i.e., replace the machine with a safer one) 4.4 Use administrative controls to reduce the risk (i.e. give trainings on how to use equipment safely; OHS-related topics, issue warning signage, rotation/shifting work schedule) 4.5 Use engineering controls to reduce the risk (i.e. use safety guards to machine) 4.6 Use personal protective equipment 4.7 Safety, health and work environment evaluation 4.8 Periodic and/or special medical examinations of workers
5. Workplace Procedures	5.1 Fire fighting 5.2 Medical and first aid 5.3 Evacuation 5.4 Material Safety Data Sheets (MSDSs) and manufacturers' advice
6. Company policies	6.1 Job related Standard Operating Procedures (SOPs). 6.2 Occupational Health and Safety (OHS) specific procedures. Examples of OHS procedures include – consultation and participation, emergency response to specific hazards, incident investigation, risk assessment, reporting arrangement and issue resolution procedures.

Curricular Content Guide

1. Underpinning Knowledge	1.1. OHS Workplace Policies and Procedures. 1.2. Work safety procedures. 1.3. Fire and emergency procedures. 1.4. Types of Hazards (Biological, Chemical and Physical) and their effects. 1.5. PPE types and uses. 1.6. Personal hygiene practices. 1.7. OHS awareness. 1.8. Steps of hazard identification. 1.9. Principles of hazards control. 1.10. Employer's role. 1.11. Supervisor's responsibilities.
2. Underpinning Skills	2.1. Identifying OHS policies and procedures. 2.2. Following personal work safety practices. 2.3. Reporting hazards and risks. 2.4. Responding to emergency procedures. 2.5. Maintaining physical well-being in the workplace.

	2.6. Identify tools and equipment related to OHS. 2.7. Improving OHS performance.
3. Underpinning Attitudes	3.1. Commitment to occupational health and safety 3.2. Promptness in carrying out activities 3.3. Sincere and honest to duties 3.4. Eagerness to learn 3.5. Tidiness and timeliness 3.6. Environmental concerns 3.7. Respect for rights of peers and seniors at workplace 3.8. Communication with peers and seniors at workplace
4. Resource Implications	The following resources must be provided: 4.1 Workplace (simulated or actual) 4.2 Workplace procedures 4.3 Manuals 4.4 Workplace documents, signs and symbols 4.5 Relevant specifications or work instructions. 4.6 Tools, equipment and facilities appropriate to the process or activities. 4.7 Materials are relevant to the proposed activity.

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1 used Personal Protective Equipment (PPE). 1.2 identified hazards. 1.3 took corrective action of different hazards. 1.4 took corrective action for emergency procedure. 1.5 reported emergency situation to the Supervisor / Manager. 1.6 satisfied requirements mentioned in the performance criteria and range of variables.
2. Methods of Assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical demonstration 2.3 Oral questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

Unit of Competency: WORK IN A TEAM ENVIRONMENT	Nominal Duration: 10 Hrs.	Unit Code: SICIP-JUTE-PDP-02-G
---	-------------------------------------	--

Unit Descriptor:

This unit covers the knowledge, skills and attitudes required to work in a team environment. It specifically includes the tasks of Identifying team goals and processes, communicating and cooperating with team members, working as a team member and solving problems as a team member.

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Identify team goals and work processes.	1.1. Team goals and collaborative decision-making processes are identified. 1.2. Role and common goals of the team are defined from available <u>sources of information</u> . 1.3. Team structure, responsibilities and reporting relations are identified from team discussions and other external sources.
2. Communicate and co-operate with team members.	2.1 Communication and negotiation skills are applied and maintained in all relevant situations. 2.2 Constructive contributions are made to <u>workplace discussions</u> on such issues as production, quality and safety. 2.3 Goals/ objectives and action plans undertaken in the workplace are communicated promptly. 2.4 Information regarding problems and issues are organized coherently to ensure clear and effective communication. 2.5 Dialogue is initiated with appropriate personnel. 2.6 Communication problems and issues are raised 2.7 Barriers to communication are identified and resolved
3. Work as a team member	3.1 Effective forms of communication are used to interact with <u>team members</u> in discussing team activities and objectives. 3.2 Mutual respect, empathy and active collaboration are demonstrated 3.3 Communication channels are followed as per <u>workplace context</u> .
4. Solve problems as a team member	4.1 Current and potential problems faced by team are identified 4.2 Problems are investigated and analyzed 4.3 Potential solutions of problem are identified 4.4 Recommendations about possible solutions are developed, documented, ranked and presented to team members for decision.

Range of Variables

Variable	Range (May include but not limited to):
1. Sources of information	1.1. Organizational structures 1.2. Operations Manuals 1.3. Job description 1.4. Standard operating procedures
2. Workplace discussions	2.1 Coordination meetings 2.2 Toolbox discussion 2.3 Peer-to-peer discussion
3. Team members	3.1 Coach / members 3.2 Supervisor / manager 3.3 Peers / colleagues 3.4 Other members /Employee representative of the organization.
4. Workplace context	4.1 National laws and statutes 4.2 Standard operating procedures 4.3 Workplace rules and regulations

Curricular Content Guide

1. Underpinning Knowledge	1.1. Sources of information define 1.2. Team structure, role, and responsibility. 1.3. Individual member's roles and responsibilities. 1.4. Effective verbal communication methods 1.5. Communication flow and reporting structures. 1.6. Interpersonal communication skills. 1.7. Organization requirements for written and electronic communication methods 1.8. Communication problems and issues 1.9. Barriers in communication 1.10. Team planning. 1.11. Team meeting procedures. 1.12. Workplace etiquette 1.13. Industry maintenance, service and helpdesk practices, processes and procedures 1.14. Industry standard diagnostic tools 1.15. Malfunctions and resolutions
2. Underpinning Skills	2.1 Organizing sources of information 2.2 Identifying the role and responsibility of the team. 2.3 Identifying roles and responsibilities of individual members. 2.4 Identifying effective verbal communication methods 2.5 Identifying communication flow and reporting structure. 2.6 Identifying interpersonal communication skills 2.7 Complying with organization requirements for the use of written and electronic communication methods

	2.8 Negotiation and communication skills 2.9 Participating in team discussion. 2.10 Working as a team member. 2.11 Participating in a variety of workplace discussions 2.12 Effective clarifying and probing skills 2.13 Identifying issues 2.14 Identifying current industry standard diagnostic tools 2.15 Describing common malfunctions and resolutions. 2.16 Determining the root cause of a routine malfunction
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincere and honest to duties 3.4 Eagerness to learn 3.5 Tidiness and timeliness 3.6 Environmental concerns 3.7 Respect for rights of peers and seniors at workplace 3.8 Communication with peers and seniors at workplace
4. Resource Implications	The following resources must be provided: 4.1 Workplace (simulated or actual) 4.2 Standard operating procedure 4.3 Relevant specifications or work instructions. 4.4 Tools, equipment and facilities appropriate to the process or activities. 4.5 Materials are relevant to the proposed activity.

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1 identified team goals and work processes 1.2 identified own role and responsibilities within team 1.1 communicated and cooperated with team members 1.2 practice problem solving within the team
2. Methods of Assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical demonstration 2.3 Oral questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

Sector Specific Competencies (20 Hrs.)

Unit of Competency:	Nominal	Unit Code:
---------------------	---------	------------

APPLY QUALITY PROCEDURES IN JUTE MANUFACTURING	Duration: 10 Hrs.	SICIP-JUTE-PDP-01-S
Unit Descriptor: This unit covers the knowledge, skills and attitudes required to apply quality procedures in jute manufacturing. It specifically includes the tasks of identifying quality procedures, following quality procedures and maintaining standard procedures.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Identify quality procedures	1.1. <u>Manuals</u> and guidelines for jute production processes are collected as per product specifications. 1.2. The importance of manuals in ensuring quality standards is recognized. 1.3. Instructions and procedures for quality control are identified. 1.4. Required information is collected from manuals. 1.5. Performance measurement systems are identified.
2. Follow quality procedures	2.1 Instructions and procedures are followed strictly and duties are performed in accordance with the <u>quality improvement system</u> . 2.2 Concept of supplying jute products to meet <u>customer quality requirements</u> is understood and applied. 2.3 Conformance to specifications is ensured. 2.4 Defects and deviations are detected and reported to the relevant authority according to standard operating procedures.
3. Maintain standard procedures	3.1 Performance is assessed at regular intervals. 3.2 Specifications and standard operating procedures are established. 3.3 Quality of jute product is checked and verified. 3.4 Quality control and quality assurance system procedures for each job are followed. 3.5 Conformance to specification is ensured in all situations.

Range of Variables

Variable	Range (May include but not limited to):
----------	--

1. Manuals	1.1 Buyers' specification manual 1.2 Compliance manual 1.3 Jute product quality manual 1.4 Maintenance procedure manual 1.5 Signs and symbols, instruction manuals
2. Quality improvement system	2.1 Quality inspection 2.2 Testing 2.3 Quality control 2.4 Quality assurance 2.5 Total Quality Management (TQM)
3. Customer quality requirements	3.1 Performance 3.2 Features 3.3 Reliability 3.4 Conformance 3.5 Aesthetics 3.6 Durability

Curricular Content Guide

1. Underpinning Knowledge	1.1 Themes on various types of RMG manuals 1.2 Schedules, dimensions and specifications contained in sketch 1.3 Units of conversion 1.4 Rules of sketch, drawings and specifications 1.5 Sketch and specifications 1.6 Signs and symbols 1.7 Terms and abbreviations used
2. Underpinning Skills	2.1 Recognising importance of manual 2.2 Selecting appropriate manuals as per sample 2.3 Collecting information from manual as per sample 2.4 Identifying signs and symbols 2.5 Identifying drawings and specifications 2.6 Interpreting schedules, dimensions, drawings and specifications
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincere and honest to duties 3.4 Environmental concerns 3.5 Eagerness to learn 3.6 Tidiness and timeliness 3.7 Respect for rights of peers and seniors in workplace 3.8 Communication with peers, sub-ordinates and seniors in workplace
4. Resource Implications	The following resources must be provided: 4.1 Workplace (simulated or actual) 4.2 Manuals 4.3 Workplace documents, signs and symbols 4.4 Sketch and specifications

	4.5 Tools, equipment and facilities appropriate to the process or activities.
	4.6 Materials are relevant to the proposed activity.

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1 collected information from manual as per sample 1.2 Identified relevant drawings and specifications 1.3 identified signs and symbols 1.4 identified terms and abbreviations 1.5 identified sketches and specifications as per sample
2. Methods of Assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical demonstration 2.3 Oral questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

Unit of Competency: APPLY GREEN PRACTICES IN JUTE SECTOR	Nominal Duration: 10 hrs.	Unit Code: SICIP-JUTE-PDP-02-S
Unit Descriptor: This unit covers the skills, knowledge and attitudes required for apply green practices in Jute sector. It specifically includes the tasks of interpreting green concepts, minimizing resources use in the workplace and implementing waste management practices.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Interpret green concepts	1.1 <u>Principles of green practices in Jute</u> manufacturing are explained. 1.2 Key terms and symbols in Jute production processes are identified. 1.3 <u>Sources of environmental impacts</u> during Jute manufacturing activities are identified. 1.4 Jute manufacturing activities use are explained. 1.5 <u>Ways of mitigating environmental impacts</u> in Jute manufacturing are explained.
2. Minimize resources use in the workplace	2.1 Water, energy, and raw material consumption in Jute manufacturing are documented. 2.2 <u>Recyclable and non-recyclable items</u> in Jute production processes are identified. 2.3 Procedures to reduce resource consumption in Jute manufacturing are implemented. 2.4 Sustainable alternatives in Jute manufacturing are explored and applied.
3. Implement waste management practices	3.1 <u>Different types of waste in Jute manufacturing</u> are identified. 3.2 Hazardous waste in jute production is disposed of according to environmental regulations. 3.3 Green habits to reduce waste in personal and professional life are practiced.

Range of Variables

Variable	Range (May include but not limited to):
1. Principles of green practices in RMG (Ready-Made Garment)	1.1 Reducing energy consumption in Jute manufacturing processes. 1.2 6R for waste management in Jute production: 1.2.1 Refuse unnecessary materials and processes. 1.2.2 Reduce resource consumption and waste generation. 1.2.3 Reuse materials within the production process. 1.2.4 Recycle materials for future use in Jute manufacturing. 1.2.5 Recover usable resources from waste. 1.2.6 Repair damaged products or materials instead of discarding them. 1.3 Use of sustainable materials in Jute production with low environmental impact.

	1.4 Recycling of materials used in the Jute manufacturing process. 1.5 Sustainable transportation methods for moving goods and materials within the Jute sector.
2. Sources of environmental impacts	2.1 Air pollution in Jute manufacturing 2.2 Water pollution in Jute manufacturing 2.3 Soil degradation in Jute manufacturing 2.4 Noise pollution in Jute manufacturing 2.5 Waste generation in Jute manufacturing 2.6 Resource depletion in Jute manufacturing
3. Ways of mitigating environmental impacts	3.1 Utilizing energy-efficient equipment in Jute production processes. 3.2 Adopting renewable energy sources for Jute manufacturing operations. 3.3 Implementing site protection measures to prevent pollution and reduce environmental. 3.4 Using reusable materials in production processes. 3.5 Choosing sustainable materials with low environmental impact for garment production. 3.6 Using noise-reducing equipment and scheduling production work. 3.7 Optimizing logistics and delivery to reduce transportation emissions and improve overall supply chain efficiency.
4. Recyclable and non-recyclable items	4.1 Recyclable Items in RMG Manufacturing 4.1.1 Metal components. 4.1.2 Wooden materials. 4.1.3 Fabric scraps and textile fibers. 4.1.4 Plastic items, including buttons, tags, and packaging materials. 4.2 Non-Recyclable Items in Jute Manufacturing 4.2.1 Paints, coatings, and dyes. 4.2.2 Contaminated materials. 4.2.3 Treated wood and other materials.
5. Different types of waste in RMG manufacturing	5.1 Fabric waste from cutting and trimming processes. 5.2 Wood waste from packaging or display materials. 5.3 Metal waste from trims, buttons, zippers, and other hardware. 5.4 Textile waste, including scraps from garment production and defective products. 5.5 Plastic waste, such as packaging materials, labels, and plastic buttons. 5.6 Solid waste from chemical treatments or dyeing processes. 5.7 Packaging waste from raw materials and finished products.

Curricular Content Guide

1. Underpinning Knowledge	1.1 Principles of green practices in Jute manufacturing. 1.2 Sources of environmental impacts. 1.3 Ways of mitigating environmental impacts 1.4 Recyclable and non-recyclable items 1.5 Different types of waste in Jute manufacturing 1.6 Hazardous waste in Jute production 1.7 Green habits to reduce waste
2. Underpinning Skills	2.1 Explaining principles of green practices in Jute manufacturing 2.2 Identifying sources of environmental impacts 2.3 Explaining re-cyclable and non-recyclable items 2.4 Minimizing resources use in the workplace 2.5 Identifying different types of waste in Jute manufacturing 2.6 Disposing hazardous waste in Jute production 2.7 Practicing green habits to reduce waste
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincere and honest to duties 3.4 Environmental concerns 3.5 Eagerness to learn 3.6 Tidiness and timeliness 3.7 Respect for rights of peers and seniors in the workplace 3.8 Communication with peers, subordinates and seniors in the workplace
4. Resource Implications	The following resources must be provided: 4.1 Workplace (simulated or actual) 4.2 Standard operating procedure 4.3 Workplace documents, signs and symbols 4.4 Codes of conduct 4.5 Tools, equipment and facilities appropriate to the process or activities. 4.6 Materials are relevant to the proposed activity.

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1 interpreted green concepts 1.2 minimized resources use in the workplace 1.3 implemented waste management practices
2. Methods of Assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical demonstration 2.3 Oral questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training.

	3.2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.
--	--

Occupation Specific Competencies (180 Hrs.)

Unit of Competency: APPLY PATTERN DESIGN FUNDAMENTALS	Nominal Duration: 15 Hrs.	Unit Code: SICIP-JUTE-PDP-01-O
Unit Descriptor: This unit covers the knowledge, skills and attitudes required to apply pattern design fundamentals. It specifically includes the tasks of identifying jute products, identifying jute fabrics, materials and accessories, interpreting product specifications and measurements, explaining pattern making concepts, and identifying pattern making tools and equipment.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Identify jute products	1.1 <u>Different types of jute products</u> are identified according to their applications and end uses. 1.2 <u>Product categories</u> are classified based on design, construction, and intended market. 1.3 Physical characteristics and features of jute products are recognized according to product specifications. 1.4 <u>Quality requirements of jute products</u> are identified in accordance with industry standards and customer requirements. 1.5 Jute products are inspected and identified following workplace procedures and safety requirements.
2. Identify jute fabrics, materials and accessories.	2.1 <u>Different types of jute fabrics</u> and <u>jute materials</u> are identified according to product requirements. 2.2 <u>Accessories</u> are identified based on their functions and specifications. 2.3 <u>Material properties</u> are recognized according to quality standards.
3. Interpret product specifications and measurements.	3.1 <u>Product specifications</u> are interpreted according to design requirements. 3.2 <u>Symbols, markings, and notations</u> are interpreted correctly. 3.3 Measurement accuracy is verified using appropriate <u>measuring tools</u> . 3.4 Product specifications are confirmed before pattern development in accordance with workplace procedures.
4. Explain pattern making concepts.	4.1 The purpose and importance of pattern making are explained according to product development requirements. 4.2 Basic pattern making terminology is identified correctly. 4.3 <u>Types of patterns</u> are explained according to their applications. 4.4 Pattern allowances and markings are explained based on industry practices. 4.5 Pattern making principles are described in relation to

	product quality and production efficiency.
5. Identify pattern making tools and equipment.	5. 1 <u>Pattern making tools and equipment</u> are identified according to their functions. 5. 2 Measuring and marking tools are selected based on task requirements. 5. 3 <u>Cutting tools</u> are identified and handled following safety procedures. 5. 4 Tools and equipment are inspected for serviceability before use. 5. 5 Tools and equipment are cleaned, maintained, and stored according to workplace procedures.

Range of Variables

Variable	Range (May include but not limited to):
1. Different types of jute products	1.1 Jute shopping bag 1.2 Tissue box 1.3 Bottle bag 1.4 File cover 1.5 Memo box/slip pad 1.6 Note book 1.7 Photo frame 1.8 Gift box and jewelry box 1.9 Pen holder 1.10 Visiting card holder 1.11 Nursery pot
2. Product categories	2. 1 Stationery 2. 2 Home décor 2. 3 Life style 2. 4 Household
3. Product qualities	3. 1 Appearance 3. 2 Measurement 3. 3 Printing 3. 4 Weaving 3. 5 Weight
4. Different types of jute fabrics	4.1 Hessian (Burlap) Fabric 4.2 Sacking Fabric 4.3 Canvas Jute 4.4 Jute Felt (Needle-Punched Fabric) 4.5 Decorative or Laminated Jute Fabric 4.6 Jute-Cotton Blended Fabric 4.7 Jute-Polyester Blended Fabric 4.8 Jute Denim Fabric 4.9 Jute Geotextile Fabric 4.10 Bleached or Dyed Jute Fabric
5. Jute materials	5. 1 FJF (Finer Jute Fabric) (13X13, 15X15) 5. 2 Union Fabrics 5. 3 Hessian 5. 4 Canvas
6. Accessories	6. 1 Twill tape 6. 2 Zipper and runner 6. 3 Lining fabrics

	6. 4 Scissor 6. 5 Measuring tape
7. Material properties	7. 1 High tensile strength 7. 2 Coarse texture 7. 3 High breath ability 7. 4 Low elastic and High rigidity Chemical properties 7. 5 Cellulose 65% 7. 6 Hemi cellulose 25% 7. 7 Lignin 12% 7. 8 Wax and pectin 3%
8. Product specifications	8. 1 Buyer inquiry 8. 2 Product development 8. 3 Costing and quotation 8. 4 Order confirmation 8. 5 Sample approval 8. 6 Quality inspection
9. Symbols, markings and notations	9.1 Grain line symbol 9.2 Cutting line 9.3 Seam allowance line 9.4 Notches 9.5 Pattern piece identification 9.6 Stitching line 9.7 Placement marks
10. Measuring tools	10.1 Steel ruler 10.2 Measuring tape 10.3 Micrometer 10.4 Digital caliper 10.5 Depth gauge 10.6 Height gauge 10.7 Feeler gauge 10.8 Try square 10.9 Combination square 10.10 Dial indicator 10.11 Laser distance meter 10.12 Thickness gauge 10.13 Measuring wheel 10.14 Template or profile gauge 10.15 Angle gauge 10.16 Marking gauge 10.17 Digital measuring instruments
11. Types of patterns	11. 1 Basic (Block) Pattern 11. 2 Working Pattern 11. 3 Master Pattern 11. 4 Production Pattern
12. Pattern making tools and equipment	12. 1 Pattern paper 12. 2 Pattern card or cardboard 12. 3 Pattern master 12. 4 L-square 12. 5 Hip curve 12. 6 French curve 12. 7 Straight ruler 12. 8 Set square

	12. 9 Compass 12. 10 Tracing wheel 12. 11 Notcher 12. 12 Pattern punch 12. 13 Pattern weights 12. 14 Pins 12. 15 Adhesive tape 12. 16 Pencils, markers, erasers, and chalk 12. 17 Plotter and printer 12. 18 Pattern drafting table
13. Cutting tools	13. 1 Fabric shears 13. 2 Dressmaking scissors 13. 3 Paper scissors 13. 4 Thread snips 13. 5 Rotary cutter 13. 6 Cutting knife 13. 7 Utility knife 13. 8 Straight knife cutting machine 13. 9 Round knife cutting machine 13. 10 Band knife cutting machine 13. 11 Die cutting machine 13. 12 Laser cutting machine 13. 13 Cutting mat

Curricular Content Guide

1. Underpinning Knowledge	1.1 Concepts of jute products and their applications. 1.2 Types of jute fabrics, materials, and accessories. 1.3 Identification of product features and material properties. 1.4 Principles of product specifications and measurements. 1.5 Pattern making concepts and terminology. 1.6 Types of patterns, allowances, and pattern markings. 1.7 Functions of pattern making tools and equipment. 1.8 Procedures for tool inspection, maintenance, and storage.
2. Underpinning Skills	2.1 Identifying jute products according to applications and end uses. 2.2 Classifying jute fabrics, materials, and accessories according to product requirements. 2.3 Interpreting product specifications, symbols, and measurement charts. 2.4 Using measuring tools to verify product dimensions accurately. 2.5 Selecting appropriate pattern making tools and equipment for assigned tasks. 2.6 Applying pattern making terminology, markings, and allowances correctly. 2.7 Maintaining pattern making tools and equipment according to workplace procedures.

3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincere and honest to duties 3.4 Environmental concerns 3.5 Eagerness to learn 3.6 Tidiness and timeliness 3.7 Respect for rights of peers and seniors in the workplace 3.8 Communication with peers, subordinates and seniors in the workplace
4. Resource Implications	The following resources must be provided: 4.1 Workplace (simulated or actual) 4.2 Tools, equipment and facilities appropriate to the process or activities.

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1 identified jute products 1.2 identified jute fabrics, materials and accessories 1.3 interpreted product specifications and measurements 1.4 explained pattern making concepts 1.5 identified pattern making tools and equipment.
2. Methods of Assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical demonstration 2.3 Oral questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

Unit of Competency: DEVELOP JUTE PRODUCT DESIGNS	Nominal Duration: 20 Hrs.	Unit Code: SICIP-JUTE-PDP-02-O
Unit Descriptor: This unit covers the knowledge, skills and attitudes required to develop jute product designs. It specifically includes the tasks of preparing product sketches, developing design layouts, selecting colors and trims, preparing design specifications, and reviewing product designs.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in bold and underlined are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Prepare product sketches.	1. 1 <u>Product requirements</u> are interpreted according to the design brief and customer requirements. 1. 2 <u>Sketching materials and drawing tools</u> are selected according to workplace requirements. 1. 3 Freehand and technical sketches are prepared according to product dimensions and proportions. 1. 4 <u>Product details</u> are incorporated into the sketches according to design requirements. 1. 5 Product sketches are reviewed and finalized in accordance with workplace procedures.
2. Develop design layouts	2. 1 Design layouts are developed according to approved product sketches. 2. 2 Layout dimensions and proportions are prepared according to product specifications. 2. 3 Design elements are arranged according to aesthetic and functional requirements. 2. 4 <u>Layout components</u> are incorporated into the layout according to design requirements. 2. 5 Final design layouts are verified and approved according to workplace procedures.
3. Select colors and trims.	3. 1 <u>Color</u> schemes are selected according to product design and market trends. 3. 2 <u>Trims and accessories</u> are selected according to product specifications. 3. 3 Color combinations are evaluated for harmony and product appearance. 3. 4 Selected trims are matched with jute fabrics according to design requirements. 3. 5 Colors and trims are confirmed in accordance with customer requirements and workplace procedures.
4. Prepare design specifications	4. 1 Product dimensions and measurements are recorded according to design requirements.

	4. 2 Material specifications are documented according to product requirements. 4. 3 Construction details and finishing requirements are specified according to product standards. 4. 4 Color, trim, and accessory specifications are documented according to the approved design. 4. 5 Complete design specifications are prepared and verified according to workplace procedures.
5. Review product designs	5. 1 Product designs are evaluated against the design brief and customer requirements. 5. 2 Design quality, functionality, and aesthetics are assessed according to product standards. 5. 3 Non-conformities and improvement opportunities are identified according to evaluation results. 5. 4 Necessary <u>design modifications</u> are incorporated according to review findings. 5. 5 Final product designs are approved and documented according to workplace procedures.

Range of Variables

Variable	Range (May include but not limited to):
1. Product requirements	1.1 Design brief 1.2 Customer requirements 1.3 Product specifications 1.4 Measurement sheet
2. Sketching materials and drawing tools	2.1 Sketch paper 2.2 Pencils 2.3 Erasers 2.4 Rulers 2.5 Scale 2.6 Markers 2.7 Design instruments Box Set
3. Product details	3.1 Dimensions 3.2 Components 3.3 Decorative features 3.4 Functional features
4. Layout components	4.1 Dimensions 4.2 Proportions 4.3 Patterns 4.4 Motifs 4.5 Logo 4.6 Graphics
5. Color	5.1 Color palettes 5.2 Color shades 5.3 Color combinations

	5.4 Dye references
6. Trims and accessories	6.1 Labels 6.2 Ribbons 6.3 Laces 6.4 Handles 6.5 Fasteners 6.6 Decorative accessories
7. Design modifications	7.1 Dimension changes 7.2 Material revisions 7.3 Color adjustments 7.4 Trim modifications 7.5 Layout improvements

Curricular Content Guide

1. Underpinning Knowledge	1.1 Product sketching and design principles. 1.2 Types of sketching materials, drawing tools, and equipment. 1.3 Design layouts, dimensions, and proportions. 1.4 Concepts of design elements and product aesthetics. 1.5 Types of colors, trims, and accessories for jute products. 1.6 Principles of color selection and color combinations. 1.7 Requirements for design specifications and technical documentation. 1.8 Quality requirements for product design and finishing. 1.9 Procedures for reviewing, modifying, and approving product designs.
2. Underpinning Skills	2.1 Interpreting design briefs and product requirements. 2.2 Selecting sketching materials, drawing tools, and trims. 2.3 Preparing freehand and technical product sketches. 2.4 Developing design layouts according to specifications. 2.5 Applying color schemes and matching trims with fabrics. 2.6 Recording product dimensions and design specifications accurately.
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincere and honest to duties 3.4 Environmental concerns 3.5 Eagerness to learn 3.6 Tidiness and timeliness 3.7 Respect for rights of peers and seniors in the workplace 3.8 Communication with peers, subordinates and seniors in the workplace
4. Resource Implications	The following resources must be provided: 4.1 Workplace (simulated or actual) 4.2 Standard operating procedure

	4.3 Tools, equipment and facilities appropriate to the process or activities.
	4.4 Materials are relevant to the proposed activity.

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1 prepared product sketches 1.2 developed design layouts 1.3 selected colors and trims 1.4 prepared design specifications 1.5 reviewed product designs.
2. Methods of Assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical demonstration 2.3 Oral questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

Unit of Competency: PREPARE BASIC PATTERNS FOR JUTE PRODUCTS	Nominal Duration: 25 Hrs.	Unit Code: SICIP-JUTE-PDP-03-O
---	-------------------------------------	--

Unit Descriptor:

This unit covers the knowledge, skills and attitudes required to prepare basic patterns for jute products. It specifically includes the tasks of preparing basic bag patterns, preparing home décor product patterns, preparing fashion accessory patterns, and modifying patterns according to design requirements.

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Prepare basic bag patterns.	1. 1 Product design, dimensions, and specifications are interpreted according to the approved design brief. 1. 2 Pattern making tools, equipment, and materials are selected according to workplace requirements. 1. 3 Basic <u>bag pattern pieces</u> are drafted according to product measurements. 1. 4 <u>Pattern markings</u> are incorporated according to pattern making standards. 1. 5 Completed bag patterns are checked for dimensional accuracy and approved according to workplace procedures.
2. Prepare home décor product patterns.	2. 1 Product specifications and measurements for home décor products are interpreted according to design requirements. 2. 2 Suitable pattern layouts are prepared for home décor products according to product dimensions. 2. 3 Pattern pieces for home décor products, including cushion covers, table runners, placemats, storage baskets, and organizers, are developed according to design specifications. 2. 4 Pattern markings are incorporated according to pattern making standards. 2. 5 Home décor product patterns are verified for accuracy and usability according to workplace procedures.
3. Prepare fashion accessory patterns.	3. 1 Product specifications and dimensions for fashion accessories are interpreted according to the approved design. 3. 2 Pattern making tools and materials are selected according to product requirements. 3. 3 <u>Pattern pieces</u> for fashion accessories are prepared according to design specifications. 3. 4 Construction details, seam allowances, notches, grain lines, and placement marks are incorporated according to pattern making standards. 3. 5 Completed fashion accessory patterns are inspected

	and approved according to workplace procedures.
4. Modify patterns according to design requirements.	4. 1 Existing patterns are evaluated according to revised design specifications and customer requirements. 4. 2 Pattern modifications are modified according to product requirements. 4. 3 Seam allowances, pattern markings, and construction details are updated according to revised specifications. 4. 4 Modified patterns are checked for fit, functionality, and production feasibility according to quality standards. 4. 5 Final modified patterns are documented and approved according to workplace procedures.

Range of Variables

Variable	Range (May include but not limited to):
1. Bag pattern pieces	1. 1 Front 1. 2 Back 1. 3 Side gusset 1. 4 Base 1. 5 Flap 1. 6 Handle
2. Pattern markings	2. 1 Seam allowances 2. 2 Fold lines 2. 3 Grain lines 2. 4 Notches 2. 5 Pattern identification 2. 6 Cutting lines 2. 7 Matching marks
3. Pattern pieces	3. 1 Wallets 3. 2 Pouches 3. 3 Belts 3. 4 Hats 3. 5 Laptop sleeves
4. Pattern modifications	4. 1 Dimensions 4. 2 Shape 4. 3 Style 4. 4 Construction details

Curricular Content Guide

1. Underpinning Knowledge	1. 1 Pattern making for jute products. 1. 2 Principles of interpreting product designs and specifications. 1. 3 Pattern making tools, equipment, and materials.
---------------------------	--

	1. 4 Methods of drafting bag, home décor, and fashion accessory patterns. 1. 5 Understanding of pattern markings, seam allowances, and grain lines. 1. 6 Requirements for pattern dimensions and measurement accuracy. 1. 7 Procedures for modifying patterns according to design requirements. 1. 8 Pattern inspection, approval, and documentation.
2. Underpinning Skills	2. 1 Interpreting product designs, specifications, and measurements. 2. 2 Selecting pattern making tools, equipment, and materials. 2. 3 Drafting bag, home décor, and fashion accessory patterns. 2. 4 Applying pattern markings, seam allowances, and grain lines correctly. 2. 5 Preparing pattern layouts according to product dimensions. 2. 6 Modifying patterns according to revised design requirements.
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincere and honest to duties 3.4 Environmental concerns 3.5 Eagerness to learn 3.6 Tidiness and timeliness 3.7 Respect for rights of peers and seniors in the workplace 3.8 Communication with peers, subordinates and seniors in the workplace
4. Resource Implications	The following resources must be provided: 4. 1 Workplace (simulated or actual) 4. 2 Rules and regulations 4. 3 Internet connectivity 4. 4 Tools, equipment and facilities appropriate to the process or activities.

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1. 1 prepared basic bag patterns 1. 2 prepared home décor product patterns 1. 3 prepared fashion accessory patterns 1. 4 modified patterns according to design requirements.
2. Methods of Assessment	Competency should be assessed by: 2. 1 Written test 2. 2 Practical demonstration 2. 3 Oral questioning 2. 4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training.

	3.3 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.
--	--

Unit of Competency: DEVELOP SAMPLES AND PROTOTYPES	Nominal Duration: 25 Hrs.	Unit Code: SICIP-JUTE-PDP-04-O
Unit Descriptor: This unit covers the knowledge, skills and attitudes required to develop samples and prototypes. It specifically includes the tasks of selecting materials and accessories, cutting		

materials according to patterns, assembling product samples, inspecting sample quality, and revising prototype products.

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Select materials and accessories	1. 1 Product design specifications and material requirements are interpreted according to the approved design. 1. 2 <u>Jute fabrics</u> are selected according to product type, quality, color, texture, and construction requirements. 1. 3 <u>Accessories and trims</u> are selected according to product specifications. 1. 4 Selected materials and accessories are inspected for quality, quantity, and defects according to workplace quality standards. 1. 5 Materials and accessories are prepared and organized according to workplace procedures and production requirements.
2. Cut materials according to patterns.	2. 1 Approved patterns are positioned on the fabric according to grain line, fabric direction, and material utilization requirements. 2. 2 Marking tools and cutting equipment are selected according to material type and cutting requirements. 2. 3 Fabric pieces are marked and cut according to pattern dimensions, seam allowances, and pattern markings. 2. 4 Cut components are inspected for dimensional accuracy, edge quality, and completeness according to product specifications. 2. 5 Cut materials are sorted, bundled, and labeled according to workplace procedures.
3. Assemble product samples.	3. 1 Cut components and accessories are assembled according to product specifications and assembly sequence. 3. 2 <u>Sewing machines</u> , hand tools, and equipment are selected and prepared according to <u>assembly requirements</u> . 3. 3 Stitching, joining, and finishing operations are carried out according to approved construction methods. 3. 4 Decorative features, trims, and accessories are attached according to design specifications.

	3. 5 Completed product samples are cleaned and prepared for quality inspection according to workplace procedures.
4. Inspect sample quality	4. 1 Product samples are inspected against approved design specifications and quality standards. 4. 2 Dimensions, shape, stitching quality, and finishing are checked according to product requirements. 4. 3 Materials, accessories, and decorative features are verified for correct application and appearance. 4. 4 Defects and non-conformities are identified, recorded, and reported according to workplace procedures. 4. 5 Sample inspection results are documented and recommendations for improvement are made according to quality requirements.
5. Revise prototype products.	5. 1 Prototype evaluation results and customer feedback are reviewed according to product development requirements. 5. 2 Design, pattern, material, or construction modifications are identified according to improvement requirements. 5. 3 Necessary revisions are made to the prototype according to revised specifications. 5. 4 Revised prototype products are re-evaluated for functionality, appearance, durability, and dimensional accuracy according to quality standards. 5. 5 Final prototype products and revision records are documented and approved according to workplace procedures.

Range of Variables

Variable	Range (May include but not limited to):
1. Jute fabrics	1.1 Finer Jute Fabrics (FJF) 1.2 Hessian 1.3 Sacking 1.4 Canvas 1.5 Laminated jute 1.6 Decorative jute fabrics 1.7 Dyed and Printed jute fabrics
2. Accessories and trims	2.1 Handles 2.2 Zippers 2.3 Buttons 2.4 Buckles

	2.5 Hooks 2.6 Rivets 2.7 Labels 2.8 Threads 2.9 Belco
3. Sewing machines	3.1 Lockstitch machine 3.2 Overlock machine 3.3 Heming 3.4 Plain Sewing machine
4. Assembly requirements	4.1 Stitching 4.2 Joining 4.3 Finishing 4.4 Attachment of trims and accessories
5. Inspection	5.1 Dimensions 5.2 Shape 5.3 Stitching quality 5.4 Finishing 5.5 Appearance
6. Prototype products	6.1 Revised prototype 6.2 Product sample 6.3 Prototype components
7. Workplace procedures	7.1 Prototype revision procedures 7.2 Re-evaluation procedures 7.3 Documentation and approval procedures

Curricular Content Guide

1. Underpinning Knowledge	1.1 Principles of selecting jute fabrics, materials, and accessories. 1.2 Quality requirements for materials, trims, and accessories. 1.3 Methods of pattern placement and fabric utilization. 1.4 Procedures for cutting materials according to approved patterns. 1.5 Product assembly and construction methods. 1.6 Quality requirements for stitching, finishing, and sample products. 1.7 Methods of sample inspection and defect identification. 1.8 Procedures for prototype revision and product improvement.
2. Underpinning Skills	2.1 Selecting suitable jute fabrics, accessories, and trims. 2.2 Positioning patterns and cutting materials accurately. 2.3 Using marking tools, cutting equipment, and sewing machines safely. 2.4 Assembling product samples according to construction specifications. 2.5 Applying stitching, joining, and finishing techniques

	correctly. 2.6 Inspecting product samples for quality, dimensions, and workmanship. 2.7 Identifying defects and revising prototype products according to requirements.
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincere and honest to duties 3.4 Environmental concerns 3.5 Eagerness to learn 3.6 Tidiness and timeliness 3.7 Respect for rights of peers and seniors in the workplace 3.8 Communication with peers, subordinates and seniors in the workplace
4. Resource Implications	The following resources must be provided: 4.1 Workplace (simulated or actual) 4.2 Attendance and performance record templates 4.3 Grievance handling procedure documents 4.4 Bangladesh Labor Act reference materials 4.5 Case study scenarios for grievance handling 4.6 Tools, equipment and facilities appropriate to the process or activities. 4.7 Materials are relevant to the proposed activity.

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1 selected materials and accessories 1.2 cut materials according to patterns 1.3 assembled product samples 1.4 inspected sample quality 1.5 revised prototype products.
2. Methods of Assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical demonstration 2.3 Oral questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

Unit of Competency: DEVELOP JUTE BAG PRODUCTS	Nominal Duration: 30 Hrs.	Unit Code: SICIP-JUTE-PDP-05-O
Unit Descriptor: This unit covers the knowledge, skills and attitudes required to develop jute bag products. It specifically includes the tasks of developing shopping bags, developing carry bags, developing promotional bags, developing travel bags, and inspecting finished bag products.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Develop shopping bags	1. 1 Approved design specifications, patterns, and materials are selected according to product requirements. 1. 2 Jute fabric components and accessories are cut and prepared according to approved patterns and measurements. 1. 3 <u>Shopping bag components</u> are assembled according to construction specifications. 1. 4 Stitching, finishing, and decorative features are completed according to design requirements. 1. 5 Finished shopping bags are inspected for dimensions, appearance, strength, and workmanship according to workplace procedures.
2. Develop carry bags.	2. 1 Carry bag design specifications and materials are interpreted according to customer requirements. 2. 2 Pattern pieces are laid out and cut according to approved dimensions and grain direction. 2. 3 <u>Carry bag components</u> are assembled according to construction methods. 2. 4 Accessories and decorative elements are attached according to design specifications. 2. 5 Completed carry bags are inspected for dimensional accuracy, functionality, and finishing quality according to workplace procedures.
3. Develop promotional bags.	3. 1 Promotional bag designs, logos, and customer branding requirements are interpreted according to approved artwork. 3. 2 Suitable jute fabrics, printing materials, and accessories are selected according to product specifications. 3. 3 Promotional graphics, logos, or printed designs are applied according to customer requirements. 3. 4 Promotional bag components are assembled and finished according to approved construction specifications. 3. 5 Finished promotional bags are inspected for print quality, alignment, dimensions, and overall appearance according to workplace procedures.
4. Develop travel bags.	4. 1 Travel bag design specifications, dimensions, and materials are interpreted according to approved product requirements. 4. 2 Heavy-duty jute fabrics, reinforcements, linings, and accessories are selected according to product specifications. 4. 3 <u>Travel bag components</u> are assembled according to construction methods. 4. 4 Reinforcement, stitching, and finishing operations are completed according to durability and quality requirements.

	4. 5 Finished travel bags are inspected for strength, functionality, dimensions, and workmanship according to workplace procedures.
5. Inspect finished bag products.	5. 1 Finished bag products are inspected against approved design specifications and quality standards. 5. 2 Dimensions, shape, stitching, handles, closures, and accessories are checked according to inspection criteria. 5. 3 Product defects are identified and recorded according to workplace procedures. 5. 4 Non-conforming products are segregated and corrective actions are recommended according to quality control procedures. 5. 5 Inspection results are documented, and conforming products are approved for packaging or delivery according to workplace procedures.

Range of Variables

Variable	Range (May include but not limited to):
1. Shopping bag components	1. 1 Body panels 1. 2 Gussets 1. 3 Handles 1. 4 Linings,
2. Carry bag components	2. 1 Handles 2. 2 Side panels 2. 3 Base 2. 4 Closures
3. Travel bag components,	3. 1 Compartments 3. 2 Pockets 3. 3 Handles 3. 4 Straps 3. 5 Zippers
4. Product defects	4. 1 Stitching faults 4. 2 Fabric defects 4. 3 Printing defects 4. 4 Finishing defects

Curricular Content Guide

1. Underpinning Knowledge	1. 1 Bag design specifications and product requirements. 1. 2 Types of linings, reinforcements, and accessories. 1. 3 Methods of cutting, assembling, and finishing bag components. 1. 4 Requirements for stitching, reinforcement, and construction quality. 1. 5 Promotional printing, branding, and logo application. 1. 6 Quality requirements for shopping, carry, promotional, and travel bags. 1. 7 Methods of inspecting dimensions, appearance, and workmanship.
---------------------------	---

	1. 8 Procedures for identifying and recording product defects. 1. 9 Procedures for handling non-conforming products and corrective actions.
2. Underpinning Skills	2. 1 Interpreting bag design specifications and product requirements. 2. 2 Selecting suitable jute fabrics, reinforcements, linings, and accessories. 2. 3 Cutting fabric components according to approved patterns and measurements. 2. 4 Assembling bag components according to construction specifications. 2. 5 Applying stitching, finishing, printing, and decorative techniques. 2. 6 Inspecting finished bags for dimensions, strength, functionality, and appearance. 2. 7 Identifying and recording product defects and non-conformities.
3. Underpinning Attitudes	3. 1 Commitment to occupational health and safety 3. 2 Promptness in carrying out activities 3. 3 Sincere and honest to duties 3. 4 Environmental concerns 3. 5 Eagerness to learn 3. 6 Tidiness and timeliness 3. 7 Respect for rights of peers and seniors in the workplace 3. 8 Communication with peers, subordinates and seniors in the workplace
4. Resource Implications	The following resources must be provided: 4. 1 Workplace (simulated or actual) 4. 2 Tools, equipment and facilities appropriate to the process or activities. 4. 3 Materials are relevant to the proposed activity.

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1. 1 developed shopping bags 1. 2 developed carry bags 1. 3 developed promotional bags 1. 4 developed travel bags 1. 5 inspected finished bag products.
2. Methods of Assessment	Competency should be assessed by: 2. 1 Written test 2. 2 Practical demonstration 2. 3 Oral questioning 2. 4 Portfolio (Optional)
3. Context of Assessment	3. 1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3. 2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

Unit of Competency: DEVELOP JUTE HOME AND LIFESTYLE PRODUCTS	Nominal Duration: 30 Hrs.	Unit Code: SICIP-JUTE-PDP-06-0
Unit Descriptor: This unit covers the knowledge, skills and attitudes required to develop jute home and lifestyle products. It specifically includes the tasks of developing storage baskets, developing table mats and runners, developing floor mats and rugs, developing cushion and home décor products, and inspecting finished products.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Develop storage baskets	1. 1 Approved design specifications, dimensions, and materials are interpreted according to product requirements. 1. 2 Pattern pieces and jute materials are prepared and cut according to approved patterns and measurements. 1. 3 <u>Storage basket components</u> are assembled according to construction specifications. 1. 4 Stitching, shaping, reinforcement, and finishing operations are completed according to quality standards. 1. 5 Finished storage baskets are inspected for dimensions, shape, strength, and workmanship according to workplace procedures.
2. Develop table mats and runners.	2. 1 <u>Product specifications</u> are interpreted according to approved designs. 2. 2 Jute fabrics and decorative materials are selected according to product specifications. 2. 3 Table mats and runners are cut, assembled, and stitched according to approved construction methods. 2. 4 <u>Decorative and finishing components</u> are applied according to design requirements. 2. 5 Finished table mats and runners are inspected for size, appearance, stitching quality, and finishing according to workplace procedures.
3. Develop floor mats and rugs.	3. 1 Design specifications, dimensions, and material requirements are interpreted according to approved product designs. 3. 2 <u>Suitable materials</u> are selected according to product specifications. 3. 3 Floor mats and rugs are cut, assembled, woven or stitched according to approved construction techniques. 3. 4 <u>Finishing components</u> are completed according to quality requirements. 3. 5 Finished floor mats and rugs are inspected for dimensions, durability, appearance, and workmanship according to workplace procedures.
4. Develop cushion and home décor products.	4. 1 Product designs, dimensions, and material specifications are interpreted according to approved design documents. 4. 2 <u>Materials and components</u> are selected according to product requirements. 4. 3 Cushion covers and home décor products are assembled according to approved construction methods. 4. 4 <u>Decorative features</u> are attached according to design specifications. 4. 5 Completed cushion and home décor products are <u>inspected</u> according to workplace procedures.

5. Inspect finished products.	5. 1 Finished home décor products are inspected against approved design specifications and quality standards. 5. 2 Dimensions, shape, stitching, finishing, and decorative features are checked according to inspection criteria. 5. 3 Product defects are identified and recorded according to workplace procedures. 5. 4 Non-conforming products are segregated and corrective actions are recommended according to quality control procedures. 5. 5 Inspection results are documented, and conforming products are approved for packaging or delivery according to workplace procedures.

Curricular Content Guide

1. Underpinning Knowledge	1.1 Home décor product design and specifications. 1.2 Types of home décor product materials, and decorative accessories. 1.3 Methods of cutting, assembling, stitching, and finishing home décor products. 1.4 Shaping, reinforcement, and product construction. 1.5 Decorative features and finishing techniques. 1.6 Quality requirements for storage baskets, mats, rugs, cushions, and home décor products. 1.7 Methods of inspecting product dimensions, appearance, and workmanship. 1.8 Procedures for identifying and recording product defects. 1.9 Procedures for handling non-conforming products and corrective actions.
2. Underpinning Skills	2.1 Selecting suitable jute fabrics, decorative materials, and accessories. 2.2 Cutting materials according to approved patterns and measurements. 2.3 Assembling storage baskets and home décor products according to construction methods. 2.4 Applying stitching, shaping, reinforcement, weaving, and finishing techniques. 2.5 Attaching decorative features according to design specifications. 2.6 Inspecting finished products for dimensions, appearance, durability, and workmanship. 2.7 Identifying and recording product defects and non-conformities.
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincere and honest to duties 3.4 Eagerness to learn 3.5 Tidiness and timeliness 3.6 Environmental concerns 3.7 Respect for rights of peers and seniors at workplace 3.8 Communication with peers and seniors at workplace
4. Resource Implications	The following resources must be provided: 4.1 Workplace (simulated or actual) 4.2 Writing materials. 4.3 Tools, equipment and facilities appropriate to the process or activities. 4.4 Materials are relevant to the proposed activity.

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1 developed storage baskets
-----------------------------------	---

	1. 2 developed table mats and runners 1. 3 developed floor mats and rugs 1. 4 developed cushion and home décor products 1. 5 inspected finished products.
2. Methods of Assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical demonstration 2.3 Oral questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

Unit of Competency: DEVELOP JUTE FASHION AND GIFT PRODUCTS	Nominal Duration: 35 Hrs.	Unit Code: SICIP-JUTE-PDP-07-O
Unit Descriptor: This unit covers the knowledge, skills and attitudes required to develop jute fashion and gift products. It specifically includes the tasks of developing fashion accessories, developing office and stationery products, developing gift and souvenir products, preparing products for packaging, and present finished products.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Develop fashion accessories	1. 1 Approved design specifications, patterns, and materials are interpreted according to product requirements. 1. 2 Jute fabrics, linings, trims, and accessories are selected according to the approved design. 1. 3 <u>Fashion accessory components</u> are cut and assembled according to construction specifications. 1. 4 Stitching, decorative features, and finishing operations are completed according to quality standards and design requirements. 1. 5 Finished fashion accessories are inspected for dimensions, appearance, functionality, and workmanship according to workplace procedures.
2. Develop office and stationery products	2. 1 Product specifications, dimensions, and materials are interpreted according to approved designs. 2. 2 Pattern pieces, jute fabrics, boards, linings, and accessories are selected according to product requirements. 2. 3 Office and <u>stationery products</u> are assembled according to approved construction methods. 2. 4 Printing, branding, labeling, and finishing operations are completed according to customer and product specifications. 2. 5 Finished office and stationery products are inspected for dimensions, appearance, durability, and workmanship according to workplace procedures.
3. Develop gift and souvenir products.	3. 1 Approved product designs, specifications, and materials are interpreted according to customer requirements. 3. 2 Jute fabrics, decorative materials, embellishments, and accessories are selected according to product specifications. 3. 3 <u>Gift and souvenir products</u> are assembled according to approved construction methods. 3. 4 Decorative features, printing, embroidery, appliqué,

	painting, or embellishments are applied according to design requirements. 3. 5 Finished gift and souvenir products are inspected for appearance, craftsmanship, dimensional accuracy, and quality according to workplace procedures.
4. Prepare products for packaging	4. 1 Finished products are cleaned and prepared according to packaging requirements. 4. 2 Packaging materials are selected according to product specifications. 4. 3 Products are packaged using appropriate packaging methods to prevent damage during storage and transportation. 4. 4 Product labels are attached according to customer and workplace requirements. 4. 5 Packaged products are inspected and stored according to workplace procedures and quality standards.
5. Present finished products.	5. 1 Finished products are arranged according to display and presentation requirements. 5. 2 Product information, specifications, and features are prepared according to customer and marketing requirements. 5. 3 Product displays are organized using appropriate display materials, stands, or presentation techniques. 5. 4 Finished products are presented by highlighting design features, quality, functionality, and craftsmanship according to presentation objectives. 5. 5 Customer feedback is obtained, recorded, and incorporated according to workplace procedures.

Range of Variables

Variable	Range (May include but not limited to):
1. Fashion accessory components	1. 1 Alleys 1. 2 Pouches 1. 3 Belts 1. 4 Hats 1. 5 Laptop sleeves 1. 6 Key holders
2. Stationery products	2. 1 File folders 2. 2 Document bags 2. 3 Notebooks 2. 4 Pen holders 2. 5 Desk organizers 2. 6 Laptop sleeves
3. Gift and souvenir products	3. 1 Gift bags 3. 2 Decorative boxes 3. 3 Ornaments 3. 4 Wall hangings 3. 5 Handcrafted items
4. Packaging materials	4. 1 Protective materials

	4. 2 Labels 4. 3 Tags 4. 4 Poly pack 4. 5 Cartoon 4. 6 Binding tape 4. 7 Binding machine 4. 8 Cos tape
5. Product Labels	5. 1 Labels tag 5. 2 Barcodes 5. 3 Branding 5. 4 Handling instructions

Curricular Content Guide

1. Underpinning Knowledge	1. 1 Fashion accessory, office, stationery, gift, and souvenir product design. 1. 2 Types of jute fabrics, linings, trims, embellishments, and accessories. 1. 3 Methods of cutting, assembling, stitching, and finishing products. 1. 4 Requirements for printing, branding, labeling, and decorative techniques. 1. 5 Product appearance, durability, functionality, and workmanship. 1. 6 Methods of product inspection and quality verification. 1. 7 Procedures for selecting packaging materials and packaging products. 1. 8 Principles of product display and presentation techniques. 1. 9 Collect customer feedback and maintaining workplace documentation.
2. Underpinning Skills	2. 1 Interpreting product designs, specifications, and material requirements. 2. 2 Selecting suitable jute fabrics, linings, trims, and accessories. 2. 3 Cutting and assembling product components according to construction specifications. 2. 4 Stitching, printing, branding, embroidery, and finishing. 2. 5 Inspecting finished products for dimensions, appearance, functionality, and workmanship. 2. 6 Preparing products for packaging according to workplace procedures. 2. 7 Labeling and packaging products according to customer and product requirements. 2. 8 Presenting finished products using appropriate display techniques.
3. Underpinning Attitudes	3. 1 Commitment to occupational health and safety 3. 2 Promptness in carrying out activities 3. 3 Sincere and honest to duties 3. 4 Eagerness to learn 3. 5 Tidiness and timeliness 3. 6 Environmental concerns 3. 7 Respect for rights of peers and seniors at workplace

	3. 8 Communication with peers and seniors at workplace
4. Resource Implications	The following resources must be provided: 4. 1 Workplace (simulated or actual) 4. 2 Writing materials. 4. 3 Tools, equipment and facilities appropriate to the process or activities. 4. 4 Materials are relevant to the proposed activity.

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1. 10 developed fashion accessories 1. 11 developed office and stationery products 1. 12 developed gift and souvenir products 1. 13 prepared products for packaging 1. 14 presented finished products.
2. Methods of Assessment	Competency should be assessed by: 2. 9 Written test 2. 10 Practical demonstration 2. 11 Oral questioning 2. 12 Portfolio (Optional)
3. Context of Assessment	3. 1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3. 2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

End of the Competency Standard

Workshop/Lab Facility Standard

Course Name:	Pattern Design and Product Development (Jute Sector)
Number of Trainees:	30

Course-wise Training Space (Theoretical Classroom, Workshop/ Lab/ Classroom cum Workshop):

- Classroom – 350 sft (33 sqm)
 - Workshop/ lab – 800 sft (75 sqm)
- OR
- Classroom cum workshop – 1000 sft (93 sqm)

Major Training Equipment and Training Facilities:

S.N.	Major Training Equipment and Tools	Required Facilities
1	Desktop Computers	15 Nos.
2	Instructor Computer	1 Nos
3	Multimedia Projector	1 Nos
4	Whiteboard and markers	01 Nos
5	Flip chart stand with paper	2 Nos
6	Printer	1 Nos
7	Flatbed Scanner	1 Nos
8	Jute Fiber Sample Collection (FJF natural & Lamination)	1 Complete Set
9	Jute Yarn Sample Collection	1 Complete Set
10	Jute Fabric Sample Collection	1 Complete Set
11	Diversified Jute Product Sample Set	1 Complete Set
12	Fabric and Yarn Testing Kit	5 Sets
13	GSM Cutter and GSM Balance	2 Sets
14	Digital Weighing Scale	2 Nos.
15	Quality Inspection Tools	5 Sets
16	Measuring Tapes	25 Nos.
17	Set squares (Large)	30 Nos.
18	L-square	30 Nos.
19	Scale (12', 18', 24', 40')	25 Nos.
20	Cutter Board (Large size)	2 Nos.
21	Pattern Board	12 Pics
22	Scissor	5 Nos.
23	Design instruments Box (set of 20)	1 Nos.
24	Anty cutter	7 Nos.
25	Cutting Table with 6 drawers (3' Hight) (4'x8')	1 Nos.
26	Tool	6 Nos.
27	Led pencil	7 Nos.

28	Single needle chain stitch Sewing Machine	1 Nos
29	Overlock machine	01
30	Electric hand cutting machine	01
31	Packaging Material Sample Set	1 Complete Set
32	First aid kit	1 Nos
33	Fire extinguisher (for safety demonstration)	1 Nos

The following conditions must be fulfilled –

- The institute shall not use the same facilities for any other projects/organizations offering a similar course.
- The institute must provide sufficient evidence to prove ownership of the proposed training equipment.

The list denotes the minimum training equipment and facility required to effectively conduct training for a specific course. Additionally, the institute must ensure that all other necessary training tools, equipment, and furniture are available to meet the requirement of competency standards (CS) provided by SICIP.

For the operation of training course on **Pattern Design and Product Development (Jute Sector)** the institute must ensure the availability of at least 80% of the major training equipment and training facilities (according to the CS) to be eligible for SICIP training delivery. If the score is below 80%, the remaining equipment and facilities need to be installed before the commencement of the training.

The institute will also provide all other hand tools and power tools as per CS for 30 trainees. Also, they will arrange adequate seating arrangement and classroom setup for the 30 trainees.
