The Competency Standards for **Trade and Business Relations Management** serve as a foundational document for the development of curricula, teaching materials, and assessment tools specifically tailored for the RMG sector. This document ensures that training activities align with industry requirements, enabling individuals who successfully meet the established standards through assessment to become qualified professionals in relevant roles within the sector.

Developed under the Skills for Industry Competitiveness and Innovation Program (SICIP), this document addresses the skills requirements critical for **Trade and Business Relations Management**. It is owned by the Finance Division of the Ministry of Finance of the People's Republic of Bangladesh.

Public and private institutes may use the information contained in this competency standard for training activities benefitting Bangladesh.

## INTRODUCTION

The Skills for Industry Competitiveness and Innovation Program (SICIP) has the overall objective of developing a skilled workforce adept at handling new technologies, especially for emerging industries in Bangladesh. It will expand skills training and strengthen the development of the training ecosystem to address the skills requirements of the SICIP-selected industry sectors. The program aims to (i) increase the technology-oriented skilled workforce across emerging and priority sectors, (ii) promote inclusive skilling and upskilling opportunities for women and socially disadvantaged groups, (iii) incentivize industry-university partnerships to nurture innovation capacity and improve industry competitiveness, and (iv) foster skills for climate-resilient manufacturing processes and green technologies. The program is expected to benefit about 220,000 new and existing workers over a 6-year implementation period from 2024-2029.

The SICIP Program has, therefore, taken the initiative to enhance the employability and productivity of trainees by implementing market-responsive and job-focused training programs through public and private training providers. This will require the development of competency standards for each of the occupations/trades which will provide a structured framework in the Learning process to guide training providers, ensure consistent training quality, and create an alignment between the skills provided by the training institutes and the needs of the industry.

This competency standard is therefore developed to improve skills following the job roles and skill sets of the occupation and ensure that the required skills are aligned with industry requirements.

**The Competency Standard also suggests integration of YouTube or similar digital platforms or downloaded clips into classroom practice to ensure simulated creation of the contents so that Learners are exposed to visual demonstrations before classroom instruction or practical session, which aligns with modern Learning preference and supports flipped classroom models.**

The document details the format, sequencing, wording, and layout of the Competency Standard for an occupation which comprises Units of Competence and its corresponding Elements.

## OVERVIEW

A **Competency Standard** is a written specification of the knowledge, skills, and attitudes required for the performance of a job or occupation or trade corresponding to the standard of performance required in the workplace.

Competency standard:

- provides a consistent and reliable set of components for training, recognizing, and assessing people's skills, and may also have optional support materials.
- enables industry-recognized qualifications to be awarded through direct assessment of workplace competencies
- encourages the development and delivery of flexible training that suits individual and industry requirements
- encourages Learning and assessment in a work-related environment, which leads to verifiable workplace outcomes.

Competency Standard has been developed by a working group comprised of occupation-specific experts from the industry/institution and relevant consultants of SICIP.

Competency Standards describe the skills, knowledge, and attitude needed to perform effectively in the workplace. Competency Standards acknowledge that people can achieve vocational and technical competency in many ways by emphasizing what the Learner can do, not how or where they learned to do it.

With Competency Standards, assessment and training may be conducted at the workplace, at training organization, during regular work, or through work experience, work placement, work simulation or any combination of these.

A Unit of Competency describes a distinct work activity that would normally be undertaken by one person in accordance with industry standards.

Units of Competency are documented in a standard format that comprises:

- Reference to Industry Sector, Occupational Title and Occupational Description
- Unit code
- Unit title
- Unit descriptor
- Unit of Competency
- Elements and performance criteria
- Variables and range statement
- Evidence guides

Together all the parts of a Unit of Competency:

- Describe a work activity
- Guide the assessor in determining whether the candidate is competent.

Identification and validation of units of competency and elements for each occupation were made by experts from various Light Engineering companies in industry consultative workshops.

The ensuing sections of this document comprise a description of the respective occupation with all the key components of a Unit of Competence:

- An overview of all Units of Competence for the occupation and their corresponding duration required for completion of training.
- The Competency Standards that include the Unit of Competency, Unit Descriptor, Elements and Performance Criteria, Range of Variables, Curricular Content Guide, and Assessment Evidence Guide.

| 3. Context of Assessment          | 3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training<br>3.2 Assessment should be done by a certified assessor or occupation-specific industry expert.          |

## The Sector Specific Competencies

|                                                                                                                                                                                                                                                                                        |                                     |                                          |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------|------------------------------------------|
| <b>Unit of Competency:</b><br><b>PERFORM MEASUREMENT AND CALCULATIONS</b>                                                                                                                                                                                                              | <b>Nominal Duration:</b><br>10 hrs. | <b>Unit Code:</b><br>SICIP-RMG-TBRM-01-S |
| <b>Unit Descriptor:</b><br>This unit covers the knowledge, skills and attitudes required to perform measurement and calculations in industry. It specifically includes the tasks of selecting measuring devices, obtaining measurement for apparel and performing simple calculations. |                                     |                                          |

### Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

| Elements of Competency             | Performance Criteria                                                                                                                                                                                                                                                                                                                                                                                                                  |
|------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1. Select measuring devices        | 1.1. Work instructions are confirmed and applied to the job in hand.<br>1.2. Materials to be measured are identified as per job specifications.<br>1.3. Appropriate <b><u>measuring devices</u></b> are selected based on materials to be measured.<br>1.4. Specifications are obtained from relevant <b><u>documents</u></b> .<br>1.5. Tolerance and clearance limits are identified and adjusted according to the job requirements. |
| 2. Obtain measurements for apparel | 2.1 Accurate <b><u>measurements</u></b> are obtained in accordance with job requirements.<br>2.2 Systems of measurements are identified and measurement conversions done as per requirement.<br>2.3 Measurements are confirmed and recorded in the given company format.                                                                                                                                                              |
| 3. Perform simple calculations     | 3.1 Simple calculations involving <b><u>basic operations</u></b> are carried out.<br>3.2 <b><u>Other operations</u></b> are used to complete tasks.<br>3.3 Appropriate formulas for calculating quantities of materials are selected.<br>3.4 <b><u>Calculations</u></b> are performed and verified.<br>3.5 Material quantities are calculated and shared with team as per requirement.                                                |

### Range of Variables

| Variable             | Range                                                                     |
|----------------------|---------------------------------------------------------------------------|
|                      | May Include but not limited to:                                           |
| 1. Measuring devices | 1.1 Measuring Tape<br>1.2 Steel rule<br>1.3 Calculator<br>1.4 Sets square |
| 2. Documents         | 2.1 Technical Manuals                                                     |

|                     |                                                                                        |
|---------------------|----------------------------------------------------------------------------------------|
|                     | 2.2 Specifications<br>2.3 Sketches<br>2.4 Charts<br>2.5 Photographs                    |
| 3. Measurements     | 3.1 Length<br>3.2 Width<br>3.3 Weight<br>3.4 Tolerance                                 |
| 4. Basic operation  | 4.1 Addition<br>4.2 Subtraction<br>4.3 Multiplication<br>4.4 Division                  |
| 5. Other operations | 5.1 Fractions<br>5.2 Percentages<br>5.3 Mixed numbers<br>5.4 Conversions<br>5.5 Scales |
| 6. Calculations     | 6.1 Area<br>6.2 Volume<br>6.3 Circumference<br>6.4 CBM<br>6.5 Volumetric Weight        |

#### Curricular Content Guide:

|                           |                                                                                                                                                                                                                                                                                                                                                                                                                                         |
|---------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1. Underpinning Knowledge | 1.1 Information on measuring devices<br>1.2 Selection technique of appropriate measuring devices<br>1.3 Measurement and calculation techniques for apparel merchandising<br>1.4 Techniques of recording measurements<br>1.5 Way to allowance and tolerance<br>1.6 Presentation of data and information<br>1.7 Instructions for use of measuring devices                                                                                 |
| 2. Underpinning Skills    | 2.1 Identifying measuring devices based on materials to be measured<br>2.2 Obtaining specification of measuring devices from relevant document<br>2.3 Obtaining measurement according to the job requirements<br>2.4 Identifying tolerance and clearance limits and adjusting according to the job requirements<br>2.5 Performing calculations for quantities of materials<br>2.6 Conforming and recording measurements as per standard |
| 3. Underpinning Attitudes | 3.1 Commitment to occupational health and safety<br>3.2 Promptness in carrying out activities<br>3.3 Sincerity and honesty to duties<br>3.4 Environmental concerns                                                                                                                                                                                                                                                                      |

|                          |                                                                                                                                                                                                                                                 |
|--------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                          | 3.5 Eagerness to learn<br>3.6 Tidiness and timeliness<br>3.7 Respect for rights of peers and seniors in the workplace<br>3.8 Good relationships with peers, sub-ordinates and seniors in the workplace                                          |
| 4. Resource Implications | The following resources must be provided:<br>4.1 Workplace (simulated or actual)<br>4.2 Tools, equipment and physical facilities appropriate to perform activities.<br>4.3 Materials, consumables to perform activities<br>4.4 Learning manuals |

#### **Assessment Evidence Guide:**

|                                   |                                                                                                                                                                                                                                                                                                            |
|-----------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1. Critical Aspects of Competency | Assessment required evidence that the candidate:<br>1.1 selected measuring devices based on materials to be measured<br>1.2 obtained measurements for apparel as per job requirements<br>1.3 performed calculations for quantities of materials<br>1.4 confirmed and recorded measurements as per standard |
| 2. Methods of Assessment          | Methods of assessment may include but not limited to:<br>2.1 Written test<br>2.2 Practical demonstration<br>2.3 Oral questioning<br>2.4 Portfolio (optional)                                                                                                                                               |
| 3. Context of Assessment          | 3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training<br>3.2 Assessment should be done by a certified assessor or occupation-specific industry expert                                                           |

|                                                                                                                                                                                                                                                                  |                                     |                                          |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------|------------------------------------------|
| <b>Unit of Competency:</b><br><b>INTERPRET SKETCH AND SPECIFICATIONS IN MANUALS</b>                                                                                                                                                                              | <b>Nominal Duration:</b><br>10 hrs. | <b>Unit Code:</b><br>SICIP-RMG-TBRM-02-S |
| <b>Unit Descriptor:</b><br>This unit covers the knowledge, skills and attitudes required to interpret sketch and specifications in manuals. It specifically includes the tasks of identifying information from manual and identifying sketch and specifications. |                                     |                                          |

### Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

| Elements of Competency                 | Performance Criteria                                                                                                                                                                                                                                                                  |
|----------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1. Identify information from manual    | 1.1 Appropriate <b><u>manuals</u></b> are collected as per sample.<br>1.2 Importance of manuals is recognized.<br>1.3 Required information are collected from manuals.                                                                                                                |
| 2. Interpret sketch and specifications | 2.1 Relevant <b><u>sketch</u></b> and <b><u>specifications</u></b> are identified.<br>2.2 Key <b><u>terms and abbreviations</u></b> are identified.<br>2.3 <b><u>Signs and symbols</u></b> are identified.<br>2.4 Schedules, dimensions, drawings and specifications are interpreted. |

### Range of Variables

| Variable                   | Range                                                                                                                                                                                                |
|----------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                            | May include but not limited to:                                                                                                                                                                      |
| 1. Manuals                 | 1.1 Buyers' specification manual<br>1.2 Compliance manual<br>1.3 Maintenance procedure manual<br>1.4 Periodic maintenance manual<br>1.5 Quality manual<br>1.6 Signs and symbols, instruction manuals |
| 2. Sketch                  | 2.1 Technical sketch<br>2.2 Measurement sketch                                                                                                                                                       |
| 3. Specifications          | 3.1 Product specifications<br>3.2 Performance specifications<br>3.3 Method specifications                                                                                                            |
| 4. Terms and abbreviations | 4.1 Refers to all terms and abbreviations associated with the RMG sector                                                                                                                             |
| 5. Signs and symbols       | 5.1 Include all signs and symbols associated with the RMG sector                                                                                                                                     |

### Curricular Content Guide

|                           |                                                                                                |
|---------------------------|------------------------------------------------------------------------------------------------|
| 1. Underpinning Knowledge | 1.1 Themes on various types of RMG manuals<br>1.2 Rules of sketch, drawings and specifications |
| 2. Underpinning Skills    | 2.1 Recognising importance of manual<br>2.2 Selecting appropriate manuals as per sample        |

|                           |                                                                                                                                                                                                                                                                                                                                                                              |
|---------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                           | 2.3 Collecting information from manual as per sample<br>2.4 Identifying relevant sketch and specifications<br>2.5 Interpreting schedules, dimensions, drawings and specifications                                                                                                                                                                                            |
| 3. Underpinning Attitudes | 3.1 Commitment to occupational health and safety<br>3.2 Promptness in carrying out activities<br>3.3 Sincerity and honesty to duties<br>3.4 Environmental concerns<br>3.5 Eagerness to learn<br>3.6 Tidiness and timeliness<br>3.7 Respect for rights of peers and seniors in the workplace<br>3.8 Good relationships with peers, sub-ordinates and seniors in the workplace |
| 4. Resource Implications  | The following resources must be provided:<br>4.1 Workplace (simulated or actual)<br>4.2 Tools, equipment and physical facilities appropriate to perform activities<br>4.3 Materials, consumables to perform activities<br>4.4 Learning manuals<br>4.5 Relevant drawings, codes, standards and reference materials                                                            |

#### Assessment Evidence Guide

|                                   |                                                                                                                                                                                                                                                               |
|-----------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1. Critical Aspects of Competency | Assessment required evidence that the candidate:<br>1.1 selected appropriate manuals as per sample<br>1.2 identified required information from manual<br>1.3 identified and interpreted relevant sketches and specifications                                  |
| 2. Methods of Assessment          | Competency should be assessed by:<br>2.1 Written test<br>2.2 Practical demonstration<br>2.3 Oral questioning<br>2.4 Portfolio (optional)                                                                                                                      |
| 3. Context of Assessment          | 3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training.<br>3.2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert. |

## The Occupation Specific Competencies

|                                                                                                                                                                                                                                                                                                                                                                                    |                                     |                                          |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------|------------------------------------------|
| <b>Unit of Competency:</b><br><b>INTERPRET COMMERCIAL PROCEDURES</b>                                                                                                                                                                                                                                                                                                               | <b>Nominal Duration:</b><br>20 hrs. | <b>Unit Code:</b><br>SICIP-RMG-TBRM-01-O |
| <b>Unit Descriptor:</b><br>This unit covers the knowledge, skills and attitudes required to interpret commercial procedures. It specifically includes the tasks of identifying commercial activities, interpreting terminologies of commercial management, understanding international trade rules, analyzing the flow of goods and services, and identifying trade documentation. |                                     |                                          |

### Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

| Elements of Competency                              | Performance Criteria                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
|-----------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1. Identify commercial activities                   | 1.1 <b><u>Commercial activities</u></b> are identified and interpreted as per organizational standard.<br>1.2 <b><u>Major functions of commercial department</u></b> are identified and described.<br>1.3 <b><u>Role and responsibilities of key personnel</u></b> of commercial department are identified and described.                                                                                                                                                                                                |
| 2. Interpret terminologies of commercial management | 2.1 <b><u>Terminologies of commercial management</u></b> are identified and understood.<br>2.2 Application of commercial terminologies are explained.<br>2.3 Contractual terms are interpreted in commercial agreements.<br>2.4 Trade terminologies related to international business are understood.                                                                                                                                                                                                                    |
| 3. Understand international trade rules             | 3.1 <b><u>Laws, rules and regulations</u></b> for commercial management are identified from reliable and official sources.<br>3.2 Trade compliance requirements are interpreted according to international trade protocols.<br>3.3 Import and export policies are identified in accordance with current national and international guidelines.<br>3.4 Documentation related to trade regulations is interpreted based on standard operating procedures.                                                                  |
| 4. Analyze the flow of goods and services           | 4.1 Buyer sourcing strategies are identified based on sourcing objectives and market requirements.<br>4.2 Product sourcing processes are reviewed and assessed according to client specifications and supply capabilities.<br>4.3 Order terms and conditions are negotiated in alignment with standard trade practices and organizational policies.<br>4.4 Order confirmations are obtained and documented following agreed timelines and contractual obligations.<br>4.5 Raw materials are sourced and collected as per |

|                                 |                                                                                                                                                                                                                                                                                                                                                                   |
|---------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                 | <p>production requirements and supplier agreements.</p> <p>4.6 End-to-end supply flow is mapped and evaluated to ensure timely delivery and quality compliance.</p>                                                                                                                                                                                               |
| 5. Identify trade documentation | <p>5.1 <b>Required trade documents</b> are identified according to the type of domestic and international transaction.</p> <p>5.2 Purpose and use of each trade document are explained based on standard trade procedures.</p> <p>5.3 Legal and regulatory requirements for documentation are confirmed using domestic and international official guidelines.</p> |

### Range of Variables

| 12.  | Garment Costing Software/Excel Templates                       | 01                  |
| 13.  | Buyer Audit Checklists and Compliance Templates (Printed Copy) | 25                  |

The following conditions must be fulfilled –

- The institute shall not use the same facilities for any other projects/organizations offering a similar course.
- The institute must provide sufficient evidence to prove ownership of the proposed training equipment.

The list denotes the minimum training equipment and facility required to effectively conduct training for a specific course. Additionally, the institute must ensure that all other necessary training tools, equipment, and furniture are available to meet the requirement of competency standards (CS) provided by SICIP.

For the operation of training course on Trade and Business Relations Management, the institute must ensure the availability of at least 80% of the major training equipment and training

facilities (according to the CS) to be eligible for SICIP training delivery. If the score is below 80%, the remaining equipment and facilities need to be installed before the commencement of the training.

The institute will also provide all other hand tools and power tools as per CS for 25 trainees. Also, they will arrange adequate seating arrangement and classroom setup for the 25 trainees.
