(RMG SECTOR)

Skills for Industry Competitiveness and Innovation Program (SICIP)
Finance Division, Ministry of Finance

COPYRIGHT

The Competency Standards for Quality Control for RMG serve as a foundational document for the development of curricula, teaching materials, and assessment tools specifically tailored for the RMG sector. This document ensures that training activities align with industry requirements, enabling individuals who successfully meet the established standards through assessment to become qualified professionals in relevant roles within the sector.

Developed under the Skills for Industry Competitiveness and Innovation Program (SICIP), this document addresses the skills requirements critical for Quality Control for RMG. It is owned by the Finance Division of the Ministry of Finance of the People's Republic of Bangladesh.

Public and private institutes may use the information contained in this competency standard for training activities benefitting Bangladesh.

Other interested parties must obtain permission from the owner of this document for reproduction of information in any manner in whole or in part of this Skills Standard, in English or other languages.

INTRODUCTION:

The Skills for Industry Competitiveness and Innovation Program (SICIP) has the overall objective of developing a skilled workforce adept at handling new technologies, especially for emerging industries in Bangladesh. It will expand skills training and strengthen the development of the training ecosystem to address the skills requirements of the SICIP-selected industry sectors. The program aims to (i) increase the technology-oriented skilled workforce across emerging and priority sectors, (ii) promote inclusive skilling and upskilling opportunities for women and socially disadvantaged groups, (iii) incentivize industry-university partnerships to nurture innovation capacity and improve industry competitiveness, and (iv) foster skills for climate-resilient manufacturing processes and green technologies. The program is expected to benefit about 220,000 new and existing workers over a 6-year implementation period from 2024-2029.

The SICIP Program has, therefore, taken the initiative to enhance the employability and productivity of trainees by implementing market-responsive and job-focused training programs through public and private training providers. This will require the development of competency standards for each of the occupations/trades which will provide a structured framework in the learning process to guide training providers, ensure consistent training quality, and create an alignment between the skills provided by the training institutes and the needs of the industry.

The Competency Standard also suggests integration of YouTube or similar platforms or downloaded clips into classroom practice to ensure simulated creation of the contents so that learners are exposed to visual demonstrations before classroom instruction or practical session, which aligns with modern learning preference and supports flipped classroom models.

This competency standard is therefore developed to improve skills following the job roles and skill sets of the occupation and ensure that the required skills are aligned with industry requirements.

The document details the format, sequencing, wording, and layout of the Competency Standard for an occupation which comprises Units of Competence and its corresponding Elements.

OVERVIEW:

A **Competency Standard** is a written specification of the knowledge, skills, and attitudes required for the performance of a job or occupation or trade corresponding to the standard of performance required in the workplace.

Competency standard:

- provides a consistent and reliable set of components for training, recognizing, and assessing people's skills, and may also have optional support materials.
- enables industry-recognized qualifications to be awarded through direct assessment of workplace competencies
- encourages the development and delivery of flexible training that suits individual and industry requirements
- encourages learning and assessment in a work-related environment which leads to verifiable workplace outcomes.

Competency Standards are developed by a working group comprised of national and international process experts and the participation of experts from the industry to identify the competencies required of an occupation in a particular sector.

Competency Standards describe the skills, knowledge, and attitude needed to perform effectively in the workplace. Competency Standards acknowledge that people can achieve vocational and technical competency in many ways by emphasizing what the learner can do, not how or where they learned to do it.

With Competency Standards, assessment and training may be conducted at the workplace, at training organization, during regular work, or through work experience, work placement, work simulation or any combination of these.

A Unit of Competency describes a distinct work activity that would normally be undertaken by one person in accordance with industry standards.

Units of Competency are documented in a standard format that comprises:

- Reference to Industry Sector, Occupational Title and Occupational Description
- Unit code
- Unit title
- Unit descriptor
- Unit of Competency
- Elements and performance criteria
- Variables and range statement
- Evidence guides

Together all the parts of a Unit of Competency:

- Describe a work activity
- Guide the assessor in determining whether the candidate is competent.

Competency Standard has been developed by a working group comprised of occupation-specific experts from the industry/institution, relevant consultants of SICIP.

The ensuing sections of this document comprise a description of the respective occupation with all the key components of a Unit of Competence:

- An overview of all Units of Competence for the occupation and their corresponding duration required for completion of training.
- The Competency Standards that include the Unit of Competency, Unit Descriptor, Elements and Performance Criteria, Range of Variables, Curricular Content Guide, and Assessment Evidence Guide.

Units & Elements at a Glance:

Generic Competencies (20 hrs.)

Code	Unit of Competency	Elements of Competency	Duration (Hours)
SICIP-RMG-QC-01-G	Apply occupational health and safety (OHS) practice in the workplace	1 Identify OHS policies and procedures 2 Apply personal health and safety practices 3 Report hazards and risks 4 Respond to emergencies	10
SICIP-RMG-QC-02-G	Manage personal and professional development	1 Interpret personal development skills 2 Set and meet self-development priorities 3 Maintain professional growth and development	10
Total Hours			20

Sector Specific Competencies (20 hrs.)

Code	Unit of Competency	Elements of Competency	Duration (Hours)
SICIP-RMG-QC-01-S	Carry out measurements and calculations	1. Plan and prepare. 2. Obtain measurements. 3. Perform calculations.	10
SICIP-RMG-QC-02-S	Apply green practices in RMG sector	1. Interpret green concepts 2. Minimize resource use in the workplace 3. Implement waste management practices	10
Total Hour			20

Occupation Specific Competencies (200 hrs.)

Unit Code	Unit of Competency	Elements of Competency	Duration (Hours)
SICIP-RMG-QC-01-O	Understand quality management	1. Interpret quality 2. Interpret quality control and quality assurance 3. Identify roles and responsibilities of quality personnel	10
SICIP-RMG-QC-02-O	Identify garments process operation	1. Identify fabric and garment types 2. Identify sewing machine 3. Identify stitch and seam type 4. Identify types of trim and accessories 5. Interpret garment components	30
SICIP-RMG-QC-03-O	Inspect fabric, trims and accessories	1. Carry out fabric inspection 2. Carry out trim and accessories inspection	20
SICIP-RMG-QC-04-O	Carry out section wise quality control	1. Perform quality control in sample 2. Perform quality control in washing 3. Perform quality control in cutting 4. Perform quality control in embellishment 5. Perform quality control in sewing 6. Perform quality control in finishing	60
SICIP-RMG-QC-05-O	Identify faults and defects	1. Identify fabric faults 2. Identify trim and accessories faults 3. Identify garment defects 4. Classify garment zones and defects 5. Identify product safety and integrity	30
SICIP-RMG-QC-06-O	Apply root cause analysis techniques	1. Analyse data and identify root causes 2. Implement root cause analysis techniques 3. Implement corrective and preventive actions 4. Prepare report analysis results	25
SICIP-RMG-QC-07-O	Perform final inspection audit and report	1. Prepare for final inspection 2. Conduct final product inspection 3. Interpret technical audit system	25
Total Hours			200
Total			240

COMPETENCY STANDARD: QUALITY CONTROL FOR RMG

Generic Competencies

Unit of Competency: APPLY OCCUPATIONAL HEALTH AND SAFETY (OHS) PRACTICES IN THE WORKPLACE	Nominal Duration: 10 hrs.	Unit Code: SICIP-RMG-QC-01-G
Unit Descriptor: This unit covers the knowledge, skills and attitudes required to apply occupational health and safety (OHS) practices in the workplace. It specifically includes the tasks of identifying OHS policies and procedures, applying personal health and safety practices, reporting hazards and risks, and responding to emergencies.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Identify OHS policies and procedures	1.1 <u>OHS policies</u> and safe operating procedures are interpreted. 1.2 Safety signs and symbols are identified and followed. 1.3 Response, evacuation procedures and other contingency measures are interpreted correctly.
2. Apply personal health and safety practices	2.1 OHS policies and procedures are interpreted in the workplace including <u>personal protective equipment (PPE)</u> . 2.2 Common health issues are recognized. 2.3 Common safety issues are identified.
3. Report hazards and risks	3.1 Hazards and risks are identified. 3.2 Hazards and risks assessment and controls are interpreted.
4. Respond to emergencies	4.1 Alarms and warning devices are responded. 4.2 <u>Emergency response plans and procedures</u> are implemented. 4.3 <u>First aid procedures</u> are identified during emergency situations.

Range of variables:

Variables	Range (may include but not limited to)
1. OHS policies	1.1 Organizational OHS policies 1.2 International OHS requirements 1.3 Fire safety rules and regulations
2. Emergency response plans and procedures	2.1 Firefighting procedures 2.2 Earthquake response procedures

	2.3 Emergency response plans and procedures 2.4 Medical and first aid
3. First aid procedure	3.1 Washing of open wound 3.2 Washing chemically infected area 3.3 Applying bandage 3.4 Taking appropriate medicine
4. Personal protective equipment	4.1 Safety glasses 4.2 Ear plugs 4.3 Gloves 4.4 Apron 4.5 Helmet 4.6 Mask 4.7 Safety shoes

Curricular Content Guide

1. Underpinning knowledge	1.1 Workplace OHS policies and procedures 1.2 Work safety procedures 1.3 Emergency response procedures: 1.3.1 Firefighting 1.3.2 Earthquake response 1.3.3 Accident response 1.4 Types of hazards (biological, chemical and physical) and their effects 1.5 OHS awareness 1.6 Personal protective equipment (PPE) 1.7 Malfunctions and resolutions
2. Underpinning skill	2.1 Identifying OHS policies and procedures 2.2 Applying personal health and safety practices 2.3 Reporting hazards and risks 2.4 Responding to emergencies 2.5 Maintaining physical well-being in the workplace 2.6 Using firefighting accessories and fire extinguishers 2.7 Applying basic first aid procedures
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincere and honest to duties 3.4 Environmental concerns 3.5 Eagerness to learn 3.6 Tidiness and timeliness 3.7 Respect for rights of peers and seniors in the workplace 3.8 Communication with peers, subordinates and seniors in the workplace
4 Resource implications	The following resources must be provided: 4.1 Workplace (simulated or actual) 4.2 Personal protective equipment (PPE) 4.3 Firefighting equipment

	4.4 Emergency response manual 4.5 First aid kits 4.6 Learning manual
--	--

Assessment Evidence Guide

1. Critical aspects of competency	Assessment required evidence that the candidate: 1.1 interpreted work safety procedures 1.2 identified OHS policies and procedures 1.3 applied personal health and safety practices 1.4 reported hazards and risks 1.5 responded to emergencies 1.6 implemented plans and procedures to respond emergency 1.7 applied basic first aid procedure
2. Methods of assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical demonstration 2.3 Oral questioning 2.4 Portfolio (optional)
3. Context of assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

Unit of Competency: MANAGE PERSONAL AND PROFESSIONAL DEVELOPMENT	Nominal Duration: 10 hrs.	Unit Code: SICIP-RMG-QC-02-G
Unit Descriptor: This unit covers the knowledge, skills and attitudes required to manage personal and professional development. It specifically includes the tasks of interpreting personal development skills, setting and meeting self-development priorities and maintaining professional growth and development.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Interpret personal development skills	1.1 Objectives of personal development skills are described. 1.2 <u>Personal development skills</u> are identified. 1.3 Intra and Interpersonal relationships are maintained in the course of managing oneself. 1.4 Self-analysis is performed and personal development needs are identified.
2. Set and meet self-development priorities	2.1 Tasks are prioritized to achieve personal, team and organizational goals and objectives. 2.2 <u>Resources</u> are utilized efficiently and effectively to manage work priorities and commitments. 2.3 Economic usage and maintenance of facilities are followed as per established procedures.
3. Maintain professional growth and development	3.1 Pro activeness/zeal is demonstrated in fulfilling personal and professional growth requirements. 3.2 <u>Trainings and career opportunities</u> are identified and accessed based on job requirements. 3.3 <u>Recognitions</u> are sought/ received and demonstrated as proof of career advancement. 3.4 <u>Licenses and/or certifications</u> relevant to the job and career are obtained and renewed

Range of variables:

Variables	Range (may include but not limited to)
1. Personal Development skills	1.1 Problem-solving 1.2 Self-confidence 1.3 Adaptability 1.4 Integrity 1.5 Work ethic 1.6 Pro-activeness
2. Resources	2.1 Human 2.2 Financial

	2.3 Technology
3. Trainings and career opportunities	3.1 Participation in training programs 3.1.1 Technical 3.1.2 Supervisory 3.1.3 Managerial 3.1.4 Continuing Education 3.2 Serving as Resource Persons in conferences and workshops
4. Recognitions	4.1 Recommendations 4.2 Citations 4.3 Certificate of Appreciations 4.4 Commendations 4.5 Awards 4.6 Tangible and Intangible Rewards
5. Licenses and/or certifications	5.1 National Certificates 5.2 Certificate of Competency 5.3 Support Level Licenses 5.4 Professional Licenses

Curricular Content Guide

1. Underpinning Knowledge	1.1 Importance of personal development skills 1.2 Organizational policies relevant to training and professional growth 1.3 Procedures on economic usage and maintenance of facilities 1.4 Company operations, procedures and standards 1.5 Resources in work environment
2. Underpinning Skills	2.1 Identifying personal development skills 2.2 Utilizing and improving personal development skills 2.3 Maintaining intra- and inter-personal relationship 2.4 Utilizing communication skills 2.5 Prioritizing tasks in accordance with work commitment 2.6 Utilizing resources efficiently and effectively to manage work priorities and commitments 2.7 Identifying and accessing training and career opportunities based on job requirements 2.8 Obtaining and maintaining licenses and/or certifications according to the requirement of the qualification
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincere and honest to duties 3.4 Environmental concerns 3.5 Eagerness to learn 3.6 Tidiness and timeliness 3.7 Respect for rights of peers and seniors in the

	workplace 3.8 Communication with peers, subordinates and seniors in the workplace
4. Resource implications	The following resources must be provided: 4.1 Workplace (simulated or actual) 4.2 Workplace procedures 4.3 Standard operating procedure 4.4 Workplace documents, signs and symbols 4.5 Codes of conduct 4.6 Projector 4.7 Learning manual

Assessment Evidence Guide

1. Critical aspects of competency	Assessment required evidence that the candidate: 1.1 interpreted personal development skills 1.2 maintained intra and interpersonal relationship in the course of managing oneself 1.3 prioritized tasks according to work commitments 1.4 identified training and career opportunities 1.5 completed trainings based on the requirements of the industries 1.6 acquired and maintained licenses and/or certifications according to the requirement of the qualification
2. Methods of assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical demonstration 2.3 Oral questioning 2.4 Portfolio (optional)
3. Context of assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

Sector Specific Competencies

Unit of Competency: CARRY OUT MEASUREMENTS AND CALCULATIONS	Nominal Duration: 10 hrs.	Unit Code: SICIP-RMG-QC-01-S
Unit Descriptor: This unit covers the skills, knowledge and attitudes required for carry out measurements and calculations. It specifically includes the task of planning and preparing, obtaining measurements and performing calculations.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Plan and prepare	1.1. Work instructions are confirmed and applied to the job in hand. 1.2. Materials to be measured are identified as per job specification. 1.3. Appropriate <u>measuring device</u> is identified and selected based on materials to be measured. 1.4. Specifications are obtained and verified from relevant <u>documents</u> .
2. Obtain measurements	2.1 Method of obtaining measurement is selected and applied. 2.2 <u>Measurements</u> are obtained using appropriate device in accordance with job requirement. 2.3 Measurements, including area, volume, tolerance and clearance limits, are confirmed and applied
3. Perform calculations	3.1 <u>Calculations</u> , using basic operations, for determining material requirement are taken. 3.2 Appropriate <u>formulas</u> for calculating quantities are selected. 3.3 Quantities are estimated from the calculation taken. 3.4 Material quantities are calculated, confirmed and recorded within tolerances.

Range of Variables

Variable	Range
	May include but not limited to:
1. Measuring device	1.1 Measuring tape 1.2 Steel rule 1.3 Calculator 1.4 Sets square
2. Documents	2.1. Technical manuals 2.2. Specifications

	2.3. Sketches 2.4. Drawings 2.5. Charts 2.6. Photographs
3. Measurements	3.1. Length 3.2. Width 3.3. Weight 3.4. Tolerance
4. Calculations	4.1 Addition 4.2 Subtraction 4.3 Multiplication 4.4 Division 4.5 Area 4.6 Volume 4.7 Circumference 4.8 Cubic meter 4.9 Volumetric weight
5. Formulas	5.1 Fractions 5.2 Percentages 5.3 Mixed numbers 5.4 Conversions 5.5 Scales

Curricular Content Guide

1. Underpinning Knowledge	1.1 Measuring devices 1.2 Measurements 1.3 Simple calculation techniques 1.4 Appropriate formulas 1.5 Estimating quantities
2. Underpinning Skills	2.1 Identifying appropriate measuring devices 2.2 Carrying out measurements for appropriate device 2.3 Performing calculations using appropriate formulas
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincere and honest to duties 3.4 Environmental concerns 3.5 Eagerness to learn 3.6 Tidiness and timeliness 3.7 Respect for rights of peers and seniors in workplace 3.8 Communication with peers, sub-ordinates and seniors in workplace
4. Resource Implications	4.1 Workplace (simulated or actual) 4.2 Map/globe 4.3 Projector 4.4 Stationery 4.5 Learning manual.

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1 Identified and selected appropriate measuring devices 1.2 Carried out measurements for appropriate device 1.3 Identified and selected correct mathematical formula 1.4 Performed calculations using appropriate formulas
2. Methods of Assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical Demonstration 2.3 Oral Questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

Unit of Competency: APPLY GREEN PRACTICES IN RMG SECTOR	Nominal Duration: 10 hrs.	Unit Code: SICIP-RMG-QC-02-S
Unit Descriptor: This unit covers the skills, knowledge and attitudes required to apply green practices in RMG sector. It specifically includes the tasks of interpreting green concepts, minimizing resources use in the workplace and implementing waste management practices.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Interpret green concepts	1.1 <u>Principles of green practices in RMG (Ready-Made Garment)</u> manufacturing are explained. 1.2 Key terms and symbols in RMG production processes are identified. 1.3 <u>Sources of environmental impacts</u> during RMG manufacturing activities are identified. 1.4 RMG manufacturing activities use are explained. 1.5 <u>Ways of mitigating environmental impacts</u> in RMG manufacturing are explained.
2. Minimize resources use in the workplace	2.1 Water, energy, and raw material consumption in RMG manufacturing are documented. 2.2 <u>Recyclable and non-recyclable items</u> in RMG production processes are identified. 2.3 Procedures to reduce resource consumption in RMG manufacturing are implemented. 2.4 Sustainable alternatives in RMG manufacturing are explored and applied.
3. Implement waste management practices	3.1 <u>Different types of waste in RMG manufacturing</u> are identified. 3.2 Hazardous waste in RMG production is disposed of according to environmental regulations. 3.3 Green habits to reduce waste in personal and professional life are practiced.

Range of Variables

Variable	Range
	May include but not limited to:
1. Principles of green practices in RMG (Ready-Made Garment)	1.1 Reducing energy consumption in RMG manufacturing processes. 1.2 6R for waste management in RMG production: 1.2.1 Refuse unnecessary materials and processes.

	1.2.2 Reduce resource consumption and waste generation. 1.2.3 Reuse materials within the production process. 1.2.4 Recycle materials for future use in RMG manufacturing. 1.2.5 Recover usable resources from waste. 1.2.6 Repair damaged products or materials instead of discarding them. 1.3 Use of sustainable materials in RMG production with low environmental impact. 1.4 Recycling of materials used in the RMG manufacturing process. 1.5 Sustainable transportation methods for moving goods and materials within the RMG sector.
2. Sources of environmental impacts	2.1 Air Pollution in RMG Manufacturing 2.2 Water Pollution in RMG Manufacturing 2.3 Soil Degradation in RMG Manufacturing 2.4 Noise Pollution in RMG Manufacturing 2.5 Waste Generation in RMG Manufacturing 2.6 Resource Depletion in RMG Manufacturing
3. Ways of mitigating environmental impacts	3.1 Utilizing energy-efficient equipment in RMG production processes. 3.2 Adopting renewable energy sources for RMG manufacturing operations. 3.3 Implementing site protection measures to prevent pollution and reduce environmental. 3.4 Using reusable materials in production processes. 3.5 Choosing sustainable materials with low environmental impact for garment production. 3.6 Using noise-reducing equipment and scheduling production work. 3.7 Optimizing logistics and delivery to reduce transportation emissions and improve overall supply chain efficiency.
4. Recyclable and non-recyclable items	4.1 Recyclable Items in RMG Manufacturing 4.1.1 Metal components. 4.1.2 Wooden materials. 4.1.3 Fabric scraps and textile fibers. 4.1.4 Plastic items, including buttons, tags, and packaging materials. 4.2 Non-Recyclable Items in RMG Manufacturing 4.2.1 Paints, coatings, and dyes. 4.2.2 Contaminated materials. 4.2.3 Treated wood and other materials.

5. Different types of waste in RMG manufacturing	5.1 Fabric waste from cutting and trimming processes. 5.2 Wood waste from packaging or display materials. 5.3 Metal waste from trims, buttons, zippers, and other hardware. 5.4 Textile waste, including scraps from garment production and defective products. 5.5 Plastic waste, such as packaging materials, labels, and plastic buttons. 5.6 Solid waste from chemical treatments or dyeing processes. 5.7 Packaging waste from raw materials and finished products.
--	--

Curricular Content Guide

1. Underpinning Knowledge	1.1 Principles of green practices in RMG (Ready-Made Garment) manufacturing. 1.2 Sources of environmental impacts. 1.3 Ways of mitigating environmental impacts 1.4 Recyclable and non-recyclable items 1.5 Different types of waste in RMG manufacturing 1.6 Hazardous waste in RMG production 1.7 Green habits to reduce waste
2. Underpinning Skills	2.1 Explaining principles of green practices in RMG manufacturing 2.2 Identifying sources of environmental impacts 2.3 Explaining re-cyclable and non-recyclable items 2.4 Minimizing resources use in the workplace 2.5 Identifying different types of waste in RMG manufacturing 2.6 Disposing hazardous waste in RMG production 2.7 Practicing green habits to reduce waste
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincere and honest to duties 3.4 Environmental concerns 3.5 Eagerness to learn 3.6 Tidiness and timeliness 3.7 Respect for rights of peers and seniors in the workplace 3.8 Communication with peers, subordinates and seniors in the workplace
4. Resource Implications	4.1 Workplace (simulated or actual) 4.2 Projector 4.3 Stationery 4.4 Learning manual

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1 interpreted green concepts 1.2 minimizing resources use in the workplace 1.3 implementing waste management practices
2. Methods of Assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical Demonstration 2.3 Oral Questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

Occupation Specific Competencies

Unit of Competency: UNDERSTAND QUALITY MANAGEMENT	Nominal Duration: 10 Hrs.	Unit Code: SICIP-RMG-QC-01-O
Unit Descriptor: This unit covers the skills, knowledge and attitudes required to understand quality management. It specifically includes the task of interpreting quality, interpreting quality control and quality assurance and identifying roles and responsibilities of quality personnel.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Interpret quality	1.1 Quality is defined according to industry standards and organizational requirements. 1.2 <u>Basic quality tools and equipment</u> used for quality control and assurance is identified and described. 1.3 <u>Quality dimensions</u> are interpreted and explained. 1.4 The relationship between quality dimensions and the overall quality management system is understood. 1.5 Quality benchmarks and measurement criteria are identified with organizational goals for quality.
2. Interpret quality control and quality assurance	2.1 Importance of quality control systems is defined and explained. 2.2 <u>Methods of quality control</u> are identified and described. 2.3 <u>Quality control procedures</u> are identified and explained. 2.4 <u>Quality assurance parameters</u> are identified and described according to the specific needs of the product 2.5 The difference between quality control and quality assurance is explained.
3. Identify roles and responsibilities of quality personnel	3.1 The structure of the quality department is identified and described. 3.2 Reporting lines and communication flow within the quality department are identified. 3.3 <u>Core responsibilities</u> of quality personnel within the quality department are described.

Range of Variables

Variable	Range (Includes but not limited to):
1. Basic quality tools and equipment	1.1 Measuring tape 1.2 Button pull test machine 1.3 Needle detector machine

	1.4 Pilling tester 1.5 Crock meter 1.6 GSM Cutter 1.7 Digital Weight scale 1.8 Counting glass
2. Quality dimensions	2.1 Durability 2.2 Functionality 2.3 Aesthetic appeal 2.4 Performance 2.5 Reliability 2.6 Serviceability 2.7 Conformance
3. Methods of quality control	3.1 Testing 3.2 Inspection 3.3 Monitoring and auditing
4. Quality control procedures	4.1 Fabric and raw material inspection 4.2 Cutting quality control 4.3 In-process quality control (IPQC) 4.4 End-line quality inspection 4.5 End-Table quality inspection 4.6 Measurements and final quality control (FQC)
5. Quality assurance parameters	5.1 Dimension 5.2 Shrinkage and spirality 5.3 Strength 5.4 Colour fastness 5.5 Products safety 5.6 Customer satisfaction
6. Core responsibilities	6.1 Quality Inspections and Audits 6.2 Quality Standard Compliance 6.3 Defect identification 6.4 Process Improvement 6.5 Data Analysis 6.6 Documentation and Reporting

Curricular Content Guide

1. Underpinning Knowledge	1.1 Define quality 1.2 Basic quality tools and equipment 1.3 Quality dimensions 1.4 Overall quality management 1.5 Quality benchmarks and measurement criteria 1.6 Quality control procedures 1.7 Quality Control Parameters
2. Underpinning Skills	2.1. Interpreting quality 2.2. Interpreting quality dimensions 2.3. Identifying quality control procedures 2.4. Interpreting quality control and quality assurance

	2.5. Identifying roles and responsibilities of quality personnel
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincere and honest to duties 3.4 Environmental concerns 3.5 Eagerness to learn 3.6 Tidiness and timeliness 3.7 Respect for rights of peers and seniors in the workplace 3.8 Communication with peers, subordinates and seniors in the workplace
4 Resource Implications	4.1 Workplace (simulated or actual) 4.2 Workplace procedures 4.3 Standard operating procedure 4.4 Workplace documents, signs and symbols 4.5 Projector 4.6 Learning manual

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1 interpreted quality 1.2 interpreted quality dimensions 1.3 identified quality control procedures 1.4 interpreted quality control and quality assurance 1.5 Identified roles and responsibilities of quality personnel
2. Methods of Assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical Demonstration 2.3 Oral Questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by nationally certified assessor or occupation-specific industry expert.

Unit of Competency: IDENTIFY GARMENTS PROCESS OPERATION	Nominal Duration: 30 Hrs.	Unit Code: SICIP-RMG-QC-02-O
Unit Descriptor: This unit covers the skills, knowledge and attitudes required to identify garments process operation. It specifically includes the task of identifying fabric and garment types, identifying sewing machine, identifying stitch and seam type, identifying types of trim and accessories and interpreting garment process operation.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Identify fabric and garment types	1.1 <u>Fabric types</u> are identified and classified based on their composition and texture. 1.2 <u>Garment types</u> are identified and categorized. 1.3 Garment parts and points are identified as per sample. 1.4 Fabric and garment classifications are compared and classified.
2. Identify sewing machine	2.1 <u>Types of sewing machines</u> are identified and classified based on their functions. 2.2 Key components of sewing machines are identified and described. 2.3 Machine features and specifications are explained.
3. Identify stitch and seam type	3.1 <u>Stitch types</u> are identified and categorized based on their function and application. 3.2 <u>Seam types</u> are identified and described according to their design and purpose. 3.3 The characteristics of each stitch type are explained.
4. Identify types of trim and accessories	4.1 <u>Types of trim and accessories</u> are identified and differentiated. 4.2 Use of trims and accessories are identified according to specification sheet.
5. Identify garments components	5.1. <u>Garment components</u> are identified based on standard operating processes. 5.2. Garment components are described.

Range of Variables

Variable	Range (Includes but not limited to):
1. Fabric types	1.1. Woven 1.2. Non-woven 1.3. Knit
2. Garment types	2.1. Woven 2.1.1. Shirt

	2.1.2. Pant 2.1.3. Jacket 2.1.4. Dress 2.1.5. Blazers 2.1.6. Waist coat 2.2. Knit 2.2.1. T-shirt 2.2.2. Pants/trouser 2.2.3. Polo-shirt 2.2.4. Hoodie jacket
3. Types of sewing machine	3.1. Chain stitch machine 3.1.1. Kansai multi-needle 3.1.2. Flat lock 3.1.3. Feed of the arm 3.1.4. Single needle chain stitch 3.2. Lock stitch machine 3.2.1. Single needle lock stitch 3.2.2. Double needle lock stitch 3.2.3. Overlock 3.2.4. Bar tuck 3.2.5. Button stitch 3.2.6. Button hole
4. Stitch type	4.1. Chain Stitch 4.2. Lock Stitch
5. Seam type	5.1. Super imposed seam 5.2. Lapped seam 5.3. Bound seam 5.4. Flat seam 5.5. Decorative seam 5.6. Edge neatening seam 5.7. Enclosed seam 5.8. Applied seam
6. Types of trim and accessories	6.1. Trims: 6.1.1. Sewing 6.1.2. Finishing 6.2. Accessories: 6.2.1. Informative 6.2.2. Decorative 6.2.3. Paper made 6.2.4. Plastic made
7. Garment components	7.1. Front part 7.2. Back part 7.3. Assembling parts

Curricular Content Guide

1. Underpinning Knowledge	1.1 Types of fabric and garment 1.2 Garment parts and points 1.3 Types of sewing machines 1.4 Stitch and seam type 1.5 Types of trim and accessories 1.6 Garments components
2. Underpinning Skills	2.1 Identifying fabric and garment types 2.2 Identifying sewing machine 2.3 Identifying stitch and seam type 2.4 Identifying types of trim and accessories 2.5 Identifying garments components
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincere and honest to duties 3.4 Environmental concerns 3.5 Eagerness to learn 3.6 Tidiness and timeliness 3.7 Respect for rights of peers and seniors in the workplace 3.8 Communication with peers, subordinates and seniors in the workplace
4 Resource Implications	4.1 Workplace (simulated or actual) 4.2 Computer/laptop/notebook 4.3 Fabric and garment 4.4 Sewing machine 4.5 Trim and accessories 4.6 Projector 4.7 Learning manual

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1 Identified fabric and garment 1.2 Identified sewing machine 1.3 Identified stitch and seam 1.4 Identified types of trim and accessories 1.5 Identified garments components
2. Methods of Assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical Demonstration 2.3 Oral Questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

Unit of Competency: INSPECT FABRIC, TRIMS AND ACCESSORIES	Nominal Duration: 20 Hrs.	Unit Code: SICIP-RMG-QC-03-O
Unit Descriptor: This unit covers the skills, knowledge and attitudes required to Inspect fabric, trims and accessories. It specifically includes the task of carrying out fabric inspection and carrying out trim and accessories inspection.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Carry out fabric inspection	1.1 <u>Fabric inspection methods</u> are identified and described. 1.2 <u>Inspection tools and equipment</u> are selected and used. 1.3 Fabric inspection is performed according to buyer guidelines. 1.4 Inspection reports are prepared for internal and buyer review.
2. Carry out trims and accessories inspection	2.1 <u>Trims and accessories inspection methods</u> are identified and described. 2.2 Trims and accessories inspection is performed in accordance with the buyer's guidelines. 2.3 Inspection reports are prepared.

Range of Variables

Variable	Range (Includes but not limited to):
1. Fabric inspection methods	1.1 4-point system 1.2 10-point system 1.3 Dallas system
2. Inspection tools and equipment	2.1 Measuring tools 2.2 Fabric inspection machine 2.3 Light box
3. Trim and accessories inspection methods	3.1 Countable item inspection method 3.2 Uncountable item inspection method

Curricular Content Guide

1. Underpinning Knowledge	1.1 Fabric inspection methods 1.2 Inspection tools and equipment 1.3 Performing fabric inspection 1.4 Trim and accessories inspection methods 1.5 Inspection reports
2. Underpinning Skills	2.1. Identified fabric inspection methods

	2.2. Identified trims and accessories inspection methods 2.3. Performing trims and accessories inspection 2.4. Preparing inspection reports
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincere and honest to duties 3.4 Environmental concerns 3.5 Eagerness to learn 3.6 Tidiness and timeliness 3.7 Respect for rights of peers and seniors in the workplace 3.8 Communication with peers, subordinates and seniors in the workplace
4 Resource Implications	4.1 Workplace (simulated or actual) 4.2 Standard operating procedure 4.3 Required tools, Equipment and facilities 4.4 Relevant Materials for proposed activity 4.5 Manual

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1 identified fabric inspection methods 1.2 identified trims and accessories inspection methods 1.3 performed trims and accessories inspection 1.4 prepared inspection reports
2. Methods of Assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical Demonstration 2.3 Oral Questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

Unit of Competency: CARRY OUT SECTION WISE QUALITY CONTROL	Nominal Duration: 60 Hrs.	Unit Code: SICIP-RMG-QC-04-O
Unit Descriptor: This unit covers the skills, knowledge and attitudes required to carry out section wise quality control. It specifically includes the task of performing quality control in sample, performing quality control in washing, performing quality control in cutting, performing quality control in embellishment, performing quality control in sewing and performing quality control in finishing.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Perform quality control in sample	1.1 <u>Types of samples</u> are identified. 1.2 <u>Technical issues</u> are identified. 1.3 Quality control procedures are followed to ensure that the sample meets all the <u>required criteria</u> .
2. Perform quality control in washing	2.1 Washing quality standards are identified and interpreted. 2.2 Washing methods are identified. 2.3 Inspection of washed garments is carried out. 2.4 Washing defects are identified and recorded. 2.5 Washing quality control reports are prepared.
3. Perform quality control in cutting	3.1 <u>Pattern and marker checking</u> procedure is explained. 3.2 Inspection of pattern and marker is carried out. 3.3 Cut fabric checking procedure is identified and described. 3.4 Inspection of cut fabric is carried out. 3.5 Cutting quality reporting formats are identified.
4. Perform quality control in embellishment	4.1 Embellishment quality standards are identified and interpreted. 4.2 Embellishments are inspected for defects. 4.3 Defective embellishments are identified, recorded, and categorized. 4.4 Quality control documentation for embellishments is prepared.
5. Perform quality control in sewing	5.1 In process inspection is explained 5.2 End-table(line) inspection procedure is explained. 5.3 Inline inspection procedure is explained. 5.4 Inspection of inline and end-line is carried out. 5.5 Sewing quality control reports are prepared.
6. Perform quality control in finishing	6.1 Initial inspection procedure is explained. 6.2 Measurements and get-up inspection is explained. 6.3 Inspection of initial and end-line is carried out. 6.4 Finishing quality control reports are prepared.

Range of Variables

Variable	Range (Includes but not limited to):
1. Types of samples	1.1 Development/styling 1.2 Fit 1.3 Size set 1.4 Pre-production 1.5 Wash test 1.6 Production 1.7 Shipment
2. Technical issues	2.1 Shrinkage 2.2 Master pattern 2.3 Pattern grading 2.4 Related issues
3. Required criteria	3.1 Match with specification 3.2 Fabrication 3.3 Trims and accessories 3.4 Workmanship 3.5 Measurement 3.6 Get-up/presentation of the sample 3.7 Sample information
4. Pattern and marker checking	4.1 Number of pattern and garment pieces 4.2 Number of garments and size 4.3 Parts alignment
5. Finishing procedure	5.1 Ironing 5.2 Folding 5.3 Packing and carton

Curricular Content Guide

1. Underpinning Knowledge	1.1 Types of samples 1.2 Technical issues 1.3 Quality control procedures 1.4 Washing methods 1.5 Inspection of washed garments 1.6 Washing defects 1.7 Embellishments defects 1.8 Inspection of pattern and marker 1.9 Quality control documentation 1.10 Initial inspection procedure 1.11 Finishing procedures 1.12 Measurements concepts 1.13 Quality control reports
2. Underpinning Skills	2.1 Performing quality control in sample 2.2 Performing quality control in washing 2.3 Performing quality control in cutting 2.4 Performing quality control in embellishment 2.5 Performing quality control in sewing

	2.6 Performing quality control in finishing
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincere and honest to duties 3.4 Environmental concerns 3.5 Eagerness to learn 3.6 Tidiness and timeliness 3.7 Respect for rights of peers and seniors in the workplace 3.8 Communication with peers, subordinates and seniors in the workplace
4 Resource Implications	4.1 Workplace (simulated or actual) 4.2 Standard operating procedure 4.3 Required tools, Equipment and facilities 4.4 Relevant Materials for proposed activity 4.5 Manual

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1 performed quality control in sample 1.2 performed quality control in washing 1.3 performed quality control in cutting 1.4 performed quality control in embellishment 1.5 performed quality control in sewing 1.6 performed quality control in finishing
2. Methods of Assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical Demonstration 2.3 Oral Questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

Unit of Competency: IDENTIFY FAULTS AND DEFECTS	Nominal Duration: 30 Hrs.	Unit Code: SICIP-RMG-QC-05-O
Unit Descriptor: This unit covers the skills, knowledge and attitudes required to identify faults and defects. It specifically includes the task of identifying fabric faults, identifying trim and accessories faults, identifying garment defects, classifying garment zones and defects and identifying product safety and integrity.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Identify fabric faults	1.1 <u>Common fabric</u> faults are identified. 1.2 Fabric faults are categorized. 1.3 Solutions to repair and rectify fabric faults are identified
2. Identify trims and accessories faults	2.1 <u>Common trims and accessories faults</u> are identified. 2.2 Trim and accessories faults are classified. 2.3 Solutions to repair or replace trim and accessories faults are identified.
3. Identify garment defects	3.1 <u>Common garment defects</u> are identified. 3.2 Garment defects are categorized. 3.3 Solutions to repair or rectify garment defects are identified.
4. Classify garment zones and defects	4.1 <u>Garment zone classification</u> is identified and described. 4.2 <u>Garment defect classification</u> is carried out based on the specific garment zone. 4.3 Garment zone and defect classification records are maintained. 4.4 Defect per hundred units (DHU) record is maintained.
5. Identify product safety and integrity	5.1 <u>Product safety standards</u> are identified and described. 5.2 Potential safety risks in the product are recognized and evaluated. 5.3 Safety protocols and quality checks are followed throughout the production process.

Range of Variables

Variable	Range (Includes but not limited to):
1. Common fabric faults	1.1 Oily stains 1.2 Dust to surface 1.3 Improper cleaning 1.4 Very high yarn twist 1.5 Needle broken

	1.6 Uneven yarn 1.7 Slub and yarn contamination
2. Common trims and accessories faults	2.1 Unmatched colour of thread 2.2 Broken button and zipper 2.3 Short zippers 2.4 Wrong labels 2.5 Improper size labels 2.6 Printing mistake of labels and cartons 2.7 Broken polybag 2.8 Wrong hanger
3. Common garment defects	3.1 Seam puckering 3.2 Uneven joint stitch 3.3 Broken buttons 3.4 Broken stitching 3.5 Defective snaps 3.6 Different shades (within the same garment) 3.7 Dropped stitch 3.8 Skipped stitch 3.9 Exposed stitch 3.10 Exposed raw edges 3.11 Fabric defects 3.12 Holes 3.13 Inoperative zipper 3.14 Loose sewing threads 3.15 Misaligned buttons and holes 3.16 Needle cuts and needle mark 3.17 Open seams 3.18 Loose thread 3.19 Stain/spot 3.20 Unfinished buttonhole 3.21 Zipper waving
4. Garment zone classification	4.1 Zone A 4.2 Zone B 4.3 Zone C
5. Garment defect classification	5.1. Critical defects 5.2. Major defects 5.3. Minor defects
6. Product safety standards	6.1 Compliance with Regulations 6.2 Material Safety 6.3 Durability and Strength 6.4 Inappropriate labelling and misinformation 6.5 Product recall 6.6 Broken needle policy

Curricular Content Guide

1. Underpinning	1.1 Fabric faults
-----------------	-------------------

Knowledge	1.2 Trims and accessories 1.3 Garment defects 1.4 Garment zones and defects 1.5 Product safety and integrity 1.6 Safety protocols and quality checks
2. Underpinning Skills	2.1. Identifying fabric faults 2.2. Identifying trim and accessories faults 2.3. Identifying garment defects 2.4. Classifying garment zones and defects 2.5. Identifying product safety and integrity.
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincere and honest to duties 3.4 Environmental concerns 3.5 Eagerness to learn 3.6 Tidiness and timeliness 3.7 Respect for rights of peers and seniors in the workplace 3.8 Communication with peers, subordinates and seniors in the workplace
4 Resource Implications	4.1 Workplace (simulated or actual) 4.2 Computer/laptop/notebook 4.3 Fabric and garment 4.4 Sewing machine 4.5 Trim and accessories 4.6 Projector 4.7 Learning manual

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1 Identified fabric faults 1.2 Identified trims and accessories faults 1.3 Identified garment defects 1.4 Classified garment zones and defects 1.5 Identified product safety and integrity
2. Methods of Assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical Demonstration 2.3 Oral Questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

Unit of Competency: APPLY ROOT CAUSE ANALYSIS TECHNIQUES	Nominal Duration: 25 Hrs.	Unit Code: SICIP-RMG-QC-06-O
Unit Descriptor: This unit covers the skills, knowledge and attitudes required to apply root cause analysis techniques. It specifically includes the task of analysing data and identifying root causes, implement root cause analysis techniques, implementing corrective and preventive actions and preparing report analysis results.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Analyse Data and Identify Root Causes	1.1 Relevant data are collected and organized systematically to support analysis. 1.2 Appropriate <u>data analysis methods</u> are applied. 1.3 Findings from data analysis are documented. 1.4 Root causes of identified issues are determined.
2. Implement Root Cause Analysis Techniques	2.1 <u>Root cause analysis techniques</u> are identified and selected based on specific quality control issue. 2.2 Data requirements for each root cause analysis technique are determined to ensure effective application. 2.3 Selected root cause analysis techniques are applied systematically to analyze problems.
3. Implement Corrective and Preventive Actions	3.1 Corrective actions are identified to address the root causes of quality issues. 3.2 Preventive actions are proposed. 3.3 Corrective and preventive action plans are prepared. 3.4 Effectiveness of corrective actions is monitored.
4. Prepare Report Analysis Results	4.1 Analysis results are reviewed and verified. 4.2 Report format is selected and followed according to organizational standards. 4.3 Final report is prepared and submitted to relevant stakeholders.

Range of Variables

Variable	Range (Includes but not limited to):
1. Data analysis methods	1.1 Check sheet 1.2 Top 3 defects analysis 1.3 Traffic Light System (TLS)
2. Root cause analysis techniques	2.1 5 why 2.2 Fishbone diagram 2.3 Pareto chart

Curricular Content Guide

1. Underpinning Knowledge	1.1 Data analysis methods 1.2 Root cause analysis techniques 1.3 Corrective actions 1.4 Preventive actions
2. Underpinning Skills	2.1 Analyzing data 2.2 Identifying root causes 2.3 Implementing root cause analysis techniques 2.4 Implementing corrective and preventive actions
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincere and honest to duties 3.4 Environmental concerns 3.5 Eagerness to learn 3.6 Tidiness and timeliness 3.7 Respect for rights of peers and seniors in the workplace 3.8 Communication with peers, subordinates and seniors in the workplace
4. Resource Implications	4.1 Workplace (simulated or actual) 4.2 Standard operating procedure 4.3 Required tools, Equipment and facilities 4.4 Relevant Materials for proposed activity 4.5 Manual

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1 analyzed data 1.2 identified root causes 1.3 implemented root cause analysis techniques 1.4 implemented corrective and preventive actions
2. Methods of Assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical Demonstration 2.3 Oral Questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

Unit of Competency: PERFORM FINAL INSPECTION AND AUDIT	Nominal Duration: 25 Hrs.	Unit Code: SICIP-RMG-QC-07-O
Unit Descriptor: This unit covers the skills, knowledge and attitudes required to perform final inspection and audit. It specifically includes the task of preparing for final inspection, conducting final product inspection and interpret technical audit system.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Prepare for final inspection	1.1. Acceptable Quality Level (AQL) is identified and defined. 1.2. <u>AQL chart</u> is identified as per standard operating procedure 1.3. Importance and use of AQL chart are described.
2. Conduct final product inspection	2.1 Procedure for packing list verification and carton selection is identified. 2.2 Garment selection is carried out as per AQL and standard operating procedure. 2.3 <u>Inspection methodology</u> to be utilised is identified and explained. 2.4 <u>Final inspection</u> is carried out as per standard operating procedure. 2.5 Final Inspection report is prepared and submitted.
3. Interpret technical audit system	3.1 <u>Technical audit system</u> is understood and interpreted. 3.2 Key components of the technical audit system are identified. 3.3 Audit objectives and their relevance to the organization's goals are explained. 3.4 Audit process steps are described. 3.5 Technical criteria and benchmarks are identified.

Range of Variables

Variable	Range (Includes but not limited to):
1. AQL chart	1.1. Lot or batch size 1.2. Sample size code letter 1.3. Sample size 1.4. Acceptable quality level (AQL)
2. Inspection methodology	2.1. Environment checking of inspection room 2.2. Packing list and carton verification 2.3. Sample lot selection

3. Final inspection	3.1 Quantity of the order 3.2 Matching with byer approval (pre-production) sample 3.3 Garments checking as per AQL 3.4 Needle detection 3.5 Measurement and GSM check 3.6 Inspection report
4. Technical audit system	4.1. Good Manufacturing Practice (GMP) 4.2. Factory Capacity and Capability Audit (FCCA) 4.3. Process validation (PV) 4.4. Supplier Excellence (SE) 4.5. ISO 9001:2015 (QMS)

Curricular Content Guide

1. Underpinning Knowledge	1.1 Acceptable Quality Level (AQL) 1.2 AQL chart 1.3 Packing list and carton selection 1.4 Inspection methodology 1.5 Final inspection 1.6 Technical audit system 1.7 Audit process steps
2. Underpinning Skills	2.1 Identifying Acceptable Quality Level (AQL) 2.2 Identifying AQL chart 2.3 Preparing for final inspection 2.4 Conducting final product inspection 2.5 Interpret technical audit system 2.6 Carrying out Final inspection
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincere and honest to duties 3.4 Environmental concerns 3.5 Eagerness to learn 3.6 Tidiness and timeliness 3.7 Respect for rights of peers and seniors in the workplace 3.8 Communication with peers, subordinates and seniors in the workplace
4. Resource Implications	4.1 Workplace (simulated or actual) 4.2 Standard operating procedure 4.3 Required tools, Equipment and facilities 4.4 Relevant Materials for proposed activity 4.5 Manual

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1 identified Acceptable Quality Level (AQL) 1.2 identified AQL chart
-----------------------------------	---

	1.3 prepared for final inspection 1.4 conducted final product inspection 1.5 interpreted technical audit system 1.6 carried out final inspection
2. Methods of Assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical Demonstration 2.3 Oral Questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

End of the Competency Standard

Workshop/Lab Facility Standard

Course Name:	Quality Control for RMG
Number of Trainees:	25

Course-wise Training Space (Theoretical Classroom, Workshop/ Lab/ Classroom cum Workshop):

- Classroom – 350 sft (33 sqm)
- Workshop/ lab – 800 sft (75 sqm) OR
- Classroom cum workshop – 1000 sft (93 sqm)

Major Training Equipment and Training Facilities:

S.N .	Major Equipment and Training facilities	Required facilities
1.	Computer/Laptop	2
2.	Multimedia Projector	1
3.	Internet connectivity	1
4.	Display Board Samples of trims (sewing trims, finishing trims) and accessories (informative, decorative, paper, plastic)	10
5.	Fabric defect samples (yarn defects, weaving/knit defects, dyeing/printing/finishing defects)	20
6.	Samples of different embellishments defect (prints, embroidery)	20
7.	Samples of garment defects	20
8.	Garments Inspection Table with Lighting System	2
9.	Fabric Inspection Table with Lighting System (min. 6 feet)	2
10.	Fabric Inspection Machine	1
11.	Tensile testers for fabric strength testing	1
12.	Pilling testers for fabric surface quality evaluation	1
13.	Abrasion testers for wear and tear simulation	1
14.	Colour fastness testers for colour durability assessment	1
15.	Gray scale	6
16.	Measurement tape	26
17.	Light Box	1
18.	GSM Cutter	2
19.	Button Pull Test Machine	1

The following conditions must be fulfilled –

- The institute shall not use the same facilities for any other projects/organizations offering a similar course.
- The institute must provide sufficient evidence to prove ownership of the proposed training equipment.

The list denotes the minimum training equipment and facility required to effectively conduct training for a specific course. Additionally, the institute must ensure that all other necessary training tools, equipment, and furniture are available to meet the requirement of competency standards (CS) provided by SICIP.

For the operation of training course on **Quality Control for RMG** the institute must ensure the availability of at least 80% of the major training equipment and training facilities (according to the CS) to be eligible for SICIP training delivery. If the score is below 80%, the remaining equipment and facilities need to be installed before the commencement of the training.

The institute will also provide all other hand tools and power tools as per CS for 25 trainees. Also, they will arrange adequate seating arrangement and classroom setup for the 25 trainees.
