FOR

INTERIOR DESIGN AND DECORATION FIT OUT

MANAGEMENT

(CONSTRUCTION SECTOR)

Skills for Industry Competitiveness and Innovation Program (SICIP)
Finance Division, Ministry of Finance

Copyright

The Competency Standards for Interior Design and Decoration Fit Out Management is a document for developing curricula, teaching and learning materials, and assessment tools. It also serves as the document for providing training consistent with the requirements of the industry for individuals who pass through the set standard via assessment. Subsequently, they would be qualified and settled for a relevant job.

This document has been specifically developed for training purposes under the Skills for Industry Competitiveness and Innovation Program (SICIP), aiming to address the skills requirements of the construction sector. It is owned by the Finance Division of the Ministry of Finance of the People's Republic of Bangladesh.

While public and private institutions are permitted to use the information from this standard for activities that benefit Bangladesh, other parties must seek prior permission from the document's owner for reproducing its content, either partially or entirely, in English or other languages.

This document is available at:

INTRODUCTION:

The Skills for Industry Competitiveness and Innovation Program (SICIP) has the overall objective of developing a skilled workforce adept at handling new technologies, especially for emerging industries in Bangladesh. It will expand skills training and strengthen the development of the training ecosystem to address the skills requirements of the SICIP-selected industry sectors. The program aims to (i) increase the technology-oriented skilled workforce across emerging and priority sectors, (ii) promote inclusive skilling and upskilling opportunities for women and socially disadvantaged groups, (iii) incentivize industry-university partnerships to nurture innovation capacity and improve industry competitiveness, and (iv) foster skills for climate-resilient manufacturing processes and green technologies. The program is expected to benefit about 220,000 new and existing workers over a 6-year implementation period from 2024-2029.

The SICIP Program has, therefore, taken the initiative to enhance the employability and productivity of trainees by implementing market-responsive and job-focused training programs through public and private training providers. This will require the development of competency standards for each of the occupations/trades which will provide a structured framework in the learning process to guide training providers, ensure consistent training quality, and create an alignment between the skills provided by the training institutes and the needs of the industry.

This competency standard is therefore developed to improve skills following the job roles and skill sets of the occupation and ensure that the required skills are aligned with industry requirements.

The document details the format, sequencing, wording, and layout of the Competency Standard for an occupation which comprises Units of Competence and its corresponding Elements.

OVERVIEW:

A **Competency Standard** is a written specification of the knowledge, skills, and attitudes required for the performance of a job or occupation or trade corresponding to the standard of performance required in the workplace.

Competency standard:

- provides a consistent and reliable set of components for training, recognizing, and assessing people's skills, and may also have optional support materials.
- enables industry-recognized qualifications to be awarded through direct assessment of workplace competencies
- encourages the development and delivery of flexible training that suits individual and industry requirements
- encourages learning and assessment in a work-related environment, which leads to verifiable workplace outcomes.

Competency Standard has been developed by a working group comprised of occupation-specific experts from the industry/institution and relevant consultants of SICIP.

Competency Standards describe the skills, knowledge, and attitude needed to perform effectively in the workplace. Competency Standards acknowledge that people can achieve vocational and technical competency in many ways by emphasizing what the learner can do, not how or where they learned to do it.

With Competency Standards, assessment and training may be conducted at the workplace, at training organization, during regular work, or through work experience, work placement, work simulation or any combination of these.

A Unit of Competency describes a distinct work activity that would normally be undertaken by one person in accordance with industry standards.

Units of Competency are documented in a standard format that comprises:

- Reference to Industry Sector, Occupational Title and Occupational Description
- Unit code
- Unit title
- Unit descriptor
- Elements and performance criteria
- Variables and range statement
- Evidence guides

Together all the parts of a Unit of Competency:

- Describe a work activity
- Guide the assessor in determining whether the candidate is competent.

The ensuing sections of this document comprise a description of the respective occupation with all the key components of a Unit of Competence:

- An overview of all Units of Competence for the occupation and their corresponding duration required for completion of training.
- The Competency Standards that include the Unit of Competency, Unit Descriptor, Elements and Performance Criteria, Range of Variables, Curricular Content Guide, and Assessment Evidence Guide.

**Units & Elements at a glance:
Generic Competencies (30 hrs.)**

Code	Unit of Competency	Elements of Competency	Duration (Hours)
SICIP-CON-IDD-01-G	Apply occupational health and safety (OHS) practice in the workplace	1. Identify OHS policies and procedures. 2. Apply personal health and safety practices. 3. Report hazards and risks 4. Respond to emergencies.	10
SICIP-CON-IDD-02-G	Carry out workplace interaction	1 Interpret workplace communication and etiquette. 2 Read and understand workplace documents. 3 Participate in workplace meetings and discussions. 4 Practice professional ethics at work	10
SICIP-CON-IDD-03-G	Operate in a team environment	1 Identify team goals and work processes. 2 Identify own role and responsibilities within team. 3 Communicate and co-operate with team members. 4 Practice problem solving within the team.	10
Total Hour			30 Hrs.

Sector Specific Competencies (30 hrs.)

Code	Unit of Competency	Elements of Competency	Duration (hours)
SICIP-CON-IDD-01-S	Read and interpret sketches and drawings	1. Interpret information and specifications 2. Read and interpret sketches and drawings.	10
SICIP-CON-IDD-02-S	Use hand and power tools	1. Identify and inspect hand and power tools 2. Use hand tools properly and safely 3. Operate power tools properly and safely 4. Clean and maintain hand and power tools	10
SICIP-CON-IDD-03-S	Apply green practices in construction sector	1. Interpret green concepts 2. Minimize resource use in the workplace 3. Implement waste management practices	10
Total:			30 Hrs.

OCCUPATION SPECIFIC COMPETENCIES (300 HRS.)

Code	Unit of Competency	Elements of Competency	Duration (hours)
SICIP-CON-IDD-01-O	Interpret interior design and fit-out specifications	1. Collect and read out drawing and specification 2. Identify key design aspects/themes and functionality 3. Understand sustainability and safety considerations	20
SICIP-CON-IDD-02-O	Assess client needs and preferences for the design	1. Collect client requirements through consultation 2. Understand market availability 3. Adopt contemporary design solutions and alternatives	20
SICIP-CON-IDD-03-O	Plan and organize fit-out work management	1. Draft preliminary work breakdown for execution 2. Communicate design interpretation with clients 3. Negotiate and finalize the client approval 4. Develop work schedule with deadline	30
SICIP-CON-IDD-04-O	Develop fit-out management process	1. Organize resource and materials 2. Estimate quantities of materials and furnishings 3. Ensure timely procurement and delivery 4. Allocate tasks according to expertise	80
SICIP-CON-IDD-05-O	Implement Interior Design and Decoration/Interior Fit Out Management schemes	1. Interpret design briefs and specification 2. Select and prepare appropriate materials and methods for the specific work 3. Organize and coordinate installation activities	90

Code	Unit of Competency	Elements of Competency	Duration (hours)
		4. Apply decoration techniques/methods and styling details 5. Ensure compliance with quality, quantity, safety and sustainability requirements 6. Finalize and present completed interior schemes	
SICIP-CON-IDD-06-O	Monitor expenditure, budget and documentation	1. Track actual cost against estimated budget 2. Control and monitor the cost 3. Identify cost overruns and suggest corrective measures 4. Control and monitor waste usage of materials	40
SICIP-CON-IDD-07-O	Handover and evaluate client's satisfaction	1. Conduct final inspection 2. Facilitate client handover 3. Assess client satisfaction	20
Total Hours:			=SUM(ABOVE) 300 Hrs.

COMPETENCY STANDARD: INTERIOR DESIGN AND DECORATION FIT OUT MANAGEMENT

Generic Competencies

Unit of Competency: APPLY OCCUPATIONAL HEALTH AND SAFETY (OHS) PRACTICE IN THE WORKPLACE	Nominal Duration: 10 hrs.	Unit Code: SICIP-CON-IDD-01-G
Unit Descriptor: This unit covers the skills, knowledge and attitudes required to apply occupational health and safety (OHS) practices in the workplace. It specifically includes the tasks of identifying OHS policies and procedures, applying personal health and safety practices, reporting hazards and risks and responding to emergencies.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Identify OHS policies and procedures	1.1 <u>OHS policies</u> and safe operating procedures are interpreted 1.2 Safety signs and symbols are identified and followed. 1.3 Response, evacuation procedures and other contingency measures are interpreted correctly.
2. Apply personal health and safety practices	2.1 OHS policies and procedures are interpreted in the workplace including <u>personal protective equipment (PPE)</u> . 2.2 Common health issues are recognized. 2.3 Common safety issues are identified and applied.
3. Report hazards and risks	3.1 Hazards and risks are identified. 3.2 Hazards and risks assessment and controls are interpreted 3.3 Hazards and risk assessment are reported
4. Respond to emergencies	4.1 Respond to alarms and warning devices. 4.2 <u>Emergency response plans and procedures</u> are responded to. 4.3 <u>First aid procedures</u> during emergency situations are identified.

Range of variables:

Variables	Range (may include but not limited to)
1. OHS policies	1.1 Organizational OHS policies 1.2 International OHS requirements 1.3 Fire safety rules and regulations

2. Personal protective equipment	2.1 Safety glasses 2.2 Ear plugs 2.3 Gloves 2.4 Apron 2.5 Helmet 2.6 Mask 2.7 Safety shoes
3. Emergency response plans and procedures	3.1 Firefighting procedures 3.2 Earthquake response procedures 3.3 Emergency response plans and procedures 3.4 Medical and first aid
4. First aid procedure	4.1 Washing of open wound 4.2 Washing chemically infected area 4.3 Applying bandage 4.4 Taking appropriate medicine

Curricular Content Guide

1. Underpinning knowledge	1.1 Workplace OHS policies and procedures 1.2 Work safety procedures 1.3 Emergency response procedures: 1.3.1 Firefighting 1.3.2 Earthquake response 1.3.3 Accident response 1.4 Types of hazards (biological, chemical and physical) and their effects 1.5 OHS awareness 1.6 Personal protective equipment (PPE) 1.7 Malfunctions and resolutions
2. Underpinning skill	2.1 Identifying OHS policies and procedures 2.2 Applying personal health and safety practices 2.3 Reporting hazards and risks 2.4 Responding to emergencies
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincere and honest to duties 3.4 Environmental concerns 3.5 Eagerness to learn 3.6 Tidiness and timeliness 3.7 Respect for rights of peers and seniors in the workplace 3.8 Communication with peers, subordinates and seniors in the workplace
4. Resource implications	The following resources must be provided:

	4.1 Workplace (simulated or actual) 4.2 Workplace documents, signs and symbols 4.3 Codes of conduct 4.4 Projector 4.5 Learning manual 4.6 Tools, equipment and facilities appropriate to the process or activities. 4.7 Materials are relevant to the proposed activity.
--	--

Assessment Evidence Guide

1. Critical aspects of competency	Assessment required evidence that the candidate: 1.1 identified OHS policies and procedures 1.2 applied personal health and safety practices (including PPE) 1.3 reported hazards and risks 1.4 responded to emergencies.
2. Methods of assessment	Methods of assessment may include but not limited to: 2.1 Written test 2.2 Practical Demonstration 2.3 Oral Questioning 2.4 Portfolio (Optional)
3. Context of assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

Unit of Competency: CARRY OUT WORKPLACE INTERACTION	Nominal Duration: 10 hrs.	Unit Code: SICIP-CON-IDD-02-G
Unit Descriptor: This unit covers the skills, knowledge and attitudes required to carry out workplace interaction. It specifically includes the tasks of interpreting workplace communication and etiquette, reading and understanding workplace documents, participating in workplace meetings and discussions and practicing professional ethics at work.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Interpret workplace communication and etiquette	1.1 Workplace codes of conduct are interpreted as per organizational guidelines. 1.2 Appropriate lines of communication are maintained with supervisors and colleagues. 1.3 Workplace interactions are conducted in a <u>courteous manner</u> to gather and convey information. 1.4 <u>Workplace procedures and matters</u> are comprehended.
2. Read and understand workplace documents	2.1 Workplace documents are interpreted correctly. 2.2 Visual information/symbols/signage are understood correctly and followed. 2.3 Specific and relevant information are accessed from <u>appropriate sources</u> . 2.4 Appropriate medium is used to transfer information and ideas.
3. Participate in workplace meetings and discussions	3.1 Team meetings are attended on time. 3.2 Meeting procedures and etiquette are followed. 3.3 Active participation is ensured, opinions are expressed and heard. 3.4 Inputs are provided and interpreted in line with the meeting purpose.
4. Practice professional ethics at work	4.1 Responsibilities as a team member are performed. 4.2 Tasks are performed in accordance with workplace procedures. 4.3 Confidentiality is maintained. 4.4 Inappropriate and conflicting situations are avoided.

Range of variables:

Variables	Range (may include but not limited to)
1. Courteous manner	1.1 Effective questioning 1.2 Active listening 1.3 Speaking skills 1.4 Writing skill 1.5 Email etiquette
2. Workplace procedures and matters	2.1 Notes 2.2 Arranging a meeting 2.3 Agenda 2.4 Simple reports such as progress and incident reports 2.5 Job sheets 2.6 Operational manuals 2.7 Brochures and promotional material 2.8 Visual and graphic materials 2.9 Standards 2.10 OHS information 2.11 Signs
3. Appropriate sources	3.1 Human Resources (HR) Department 3.2 Managers 3.3 Supervisors 3.4 Management Information System (MIS)

Curricular Content Guide

1. Underpinning knowledge	1.1 Workplace communication and etiquette 1.2 Workplace documents, signs and symbols 1.3 Meeting procedure and etiquette 1.4 Professional ethics
2. Underpinning skill	2.1 Demonstrating workplace communication and etiquette 2.2 Interpreting workplace instructions and symbols 2.3 Demonstrating active participation in workplace meeting 2.4 Applying professional ethics at work
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincere and honest to duties 3.4 Environmental concerns 3.5 Eagerness to learn 3.6 Tidiness and timeliness 3.7 Respect for rights of peers and seniors in the workplace 3.8 Communication with peers, subordinates and seniors in the workplace
4. Resource implications	The following resources must be provided: 4.1 Workplace (simulated or actual)

	4.2 Standard operating procedure 4.3 Workplace documents, signs and symbols 4.4 Codes of conduct 4.5 Projector 4.6 Learning manual 4.7 Tools, equipment and facilities appropriate to the process or activities. 4.8 Materials are relevant to the proposed activity.
--	---

Assessment Evidence Guide

1. Critical aspects of competency	Assessment required evidence that the candidate: 1.1 Interpreted workplace communication and etiquette 1.2 Interpreted workplace instructions and symbols 1.3 Performed active participation in workplace meetings
2. Methods of assessment	Methods of assessment may include but not limited to: 2.1 Written test 2.2 Practical Demonstration 2.3 Oral Questioning 2.4 Portfolio (Optional)
3. Context of assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

Unit of Competency: OPERATE IN A TEAM ENVIRONMENT	Nominal Duration: 10 hrs.	Unit Code: SICIP-CON-IDD-03-G
Unit Descriptor: This unit covers the skills, knowledge and attitudes required to operate in a team environment. It specifically includes the tasks of identifying team goals and work processes, identifying own role and responsibilities within team, communicating and cooperating with team member, and practicing problem solving within the team.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Identify team goals and work processes	1.1. Roles and objectives of the team are identified and interpreted. 1.2. Roles and responsibilities of team members and work processes are identified and interpreted.
2. Identify own role and responsibilities within team	2.1. Personal role and responsibilities are identified within the team environment. 2.2. Importance of relationships within and outside the team are interpreted .
3. Communicate and co-operate with team members	3.1. Other teammates' tasks are identified and support provided when requested. 3.2. The team is encouraged through <u>sharing information</u> or expertise, working together to solve problems, and putting team success first. 3.3. Views and opinions of other team members are interpreted and respected.
4. Practice problem solving within the team	4.1. Problems faced at the individual and team level are identified and showed insight into the root-causes of the problems. 4.2. A range of solutions and courses of action are identified together with benefits, costs, and risks associated with each. 4.3. The good ideas of others to help develop solutions are recognized and advice sought from those who have solved similar problems. 4.4. It is looked beyond the obvious and not stopped at the first answers.

Range of variables:

Variables	Range (may include but not limited to)
1. Sharing information	1.1. Agenda 1.2. Minutes 1.3. Progress and incident reports 1.4. Operational manuals 1.5. Visual and graphic materials 1.6. Emails and SMS 1.7. Policy, procedure and standards 1.8. OHS information

Curricular Content Guide

1. Underpinning knowledge	1.1. Team goals and work processes 1.2. Roles and responsibilities of the team 1.3. Finding problems and solving them 1.4. Importance of views and opinions of other team members
2. Underpinning skill	2.1. Identifying own role and responsibilities within team 2.2. Communicating and co-operating with team members 2.3. Demonstrating problem solving within the team
3. Underpinning Attitudes	3.1. Commitment to occupational health and safety 3.2. Promptness in carrying out activities 3.3. Sincere and honest to duties 3.4. Eagerness to learn 3.5. Tidiness and timeliness 3.6. Environmental concerns 3.7. Respect for rights of peers and seniors at workplace 3.8. Communication with peers and seniors at workplace
4. Resource implications	The following resources must be provided: 4.1. Workplace (simulated or actual) 4.2. Workplace documents, Projector 4.3. Learning manual 4.4. Tools, equipment and facilities appropriate to the process or activities. 4.5. Materials are relevant to the proposed activity.

Assessment Evidence Guide

1. Critical aspects of competency	Assessment required evidence that the candidate: 1.1 Identified own role and responsibilities within team
-----------------------------------	--

	1.2 Communicated and co-operated with team members 1.3 Demonstrated problem solving within the team
2. Methods of assessment	Methods of assessment may include but not limited to: 2.1 Written test 2.2 Practical Demonstration 2.3 Oral Questioning 2.4 Portfolio (Optional)
3. Context of assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

Sector Specific Competencies

Unit of Competency: READ AND INTERPRET SKETCHES AND DRAWINGS	Nominal Duration: 10 hrs.	Unit Code: SICIP-CON-IDD-01-S
Unit Descriptor: This unit covers the skills, knowledge and attitudes required to read and interpret sketches and drawings. It specifically includes the task of interpreting information and specifications, reading and interpreting sketches and drawings.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Interpret information and specifications	1.1 Required <u>manuals</u> for work activity are identified and collected. 1.2 Information and <u>specifications</u> in the manuals are interpreted and applied.
2. Interpret sketches and drawings	2.1. Relevant <u>sketches and drawings</u> are identified for job requirement. 2.2. Key <u>terms and abbreviations</u> are identified and interpreted. 2.3. <u>Signs and symbols</u> are identified and interpreted. Schedules, dimensions, sketches, drawings and specifications are correctly read and interpreted.

Range of Variables

Variable	Range (May include but not limited to):
1. Manuals	1.1. Buyers' specification 1.2. Compliance 1.3. Maintenance procedure 1.4. Periodic maintenance 1.5. Quality assurance 1.6. Standard operating procedure (SOP)
2. Specifications	2.1 Product 2.2 Performance 2.3 Method
3. Sketches and drawings	3.1 Technical 3.2 Measurement 3.3 Design

4. Terms and abbreviations	4.1 Refers to all terms and abbreviations associated with the Construction Sector.
5. Signs and symbols	5.1 Include all signs and symbols associated with the Construction Sector.

Curricular Content Guide

1. Underpinning Knowledge	1.1 Types of construction manuals. 1.2 Relevant signs and symbols. 1.3 Identification of units of measurement 1.4 Units of conversion 1.5 Sketches, drawings and specifications 1.6 Terms and abbreviations.
2. Underpinning Skills	2.1 Identifying appropriate manuals. 2.2 Reading and identifying information from manual 2.3 Reading and interpreting sketches and drawings 2.4 Identifying drawings and specifications. 2.5 Interpreting drawings and specifications. 2.6 Storing manuals.
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincere and honest to duties 3.4 Environmental concerns 3.5 Eagerness to learn 3.6 Tidiness and timeliness 3.7 Respect for rights of peers and seniors in workplace 3.8 Communication with peers, sub-ordinates and seniors in workplace
4. Resource Implications	The following resources must be provided: 4.1 Workplace (actual or simulated) 4.2 Tools, equipment and facilities appropriate to processes or activity 4.3 Sketches and drawings relevant to the proposed activity 4.4 Computer/laptop 4.5 Software 4.6 Manual 4.7 Notebook

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1 identified and accessed appropriate manuals 1.2 identified information and specifications 1.3 read and interpreted sketches and drawings
-----------------------------------	--

	1.4 identified terms and abbreviations
2. Methods of Assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical Demonstration 2.3 Oral Questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

Unit of Competency: USE HAND AND POWER TOOLS	Nominal Duration: 10 hrs.	Unit Code: SICIP-CON-IDD-02-S
Unit Descriptor: This unit covers the skills, knowledge and attitudes required to use hand and power tools. It specifically includes the task of identifying and inspecting hand and power tools, using hand tools properly and safely, operating power tools properly and safely and cleaning and maintaining hand and power tools.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Identify and inspect hand and power tools	1.1. Appropriate hand and power tools are identified. 1.2. Application of hand and power tools is recognized. 1.3. Usability of hand and power tools is checked and verified.
2. Use hand tools properly and safely	2.1. Appropriate <u>hand tools</u> are selected. 2.2. Safety precautions are ensured before using hand tools. 2.3. Unsafe or faulty hand tools are identified and marked for repair. 2.4. <u>Measuring tools</u> are checked and calibrated before use. 2.5. Hand tools are used properly and safely to perform work activity.
3. Operate power tools properly and safely	3.1. Appropriate <u>power tools</u> are selected. 3.2. Power supply outlet and electrical cord are inspected and confirmed safe for use in accordance with established workplace safety requirements. 3.3. Safety precautions are ensured before using power tools in accordance with manufacturer's operating specification. 3.4. Proper sequence of operation is applied for using power tools. 3.5. Unsafe or faulty power tools are identified and marked for repair. 3.6. Power tools are operated properly and safely to perform work activity.
4. Clean and maintain hand and power tools	4.1. Dust and foreign particles are removed from hand and power tools in accordance to workplace standards. 4.2. Condition of hand and power tools is checked after use and reported. 4.3. Appropriate lubricant is applied after use and prior to storage. 4.4. Measuring tools are checked and calibrated after use. 4.5. Defective hand and power tools are inspected and

	repaired or replaced.
	4.6. Hand and power tools are stored and secured in accordance with workplace requirements.

Range of Variables

Variable	Range (May include but not limited to):
1. Hand tools	1.1. Hammer 1.2. Ball pin hammer 1.3. Wrenches and spanners 1.4. Adjustable wrench 1.5. Pliers 1.6. Scriber 1.7. Hacksaw 1.8. Socket spanners 1.9. Claw Hammer 1.10. Drill 1.11. Angle grinder 1.12. Pulleys 1.13. Scaffold keys 1.14. Clamps 1.15. Jacks 1.16. Screw driver set 1.17. Hand saw 1.18. Mallet 1.19. Plumb bob 1.20. Ratchets spanner
2. Power tools	2.1. Drills 2.2. Rivet gun 2.3. Grinders 2.4. Saws 2.5. Glue guns 2.6. Nail gun machine 2.7. Electric planer
3. Measuring tools	3.1. Measuring tape 3.2. Hose level 3.3. Water level 3.4. Magnetic spirit level 3.5. Laser level 3.6. Slide Calipers 3.7. Set square 3.8. Steel rule 3.9. Protractor 3.10. Tri-square

	3.11. Measuring steel tape 3.12. Sliding T-Bevel square 3.13. Feeler gauges 3.14. Thermometers
--	---

Curricular Content Guide

1. Underpinning Knowledge	1.1 Types, functions and use of hand and power tools 1.2 Procedures for safely using hand and power tools 1.3 Methods of cleaning and storing hand and power tools 1.4 Process of apply appropriate lubricant on hand and power tools 1.5 Storing procedure of hand, power and measuring tools
2. Underpinning Skills	2.1 Identifying hand, power and measuring tools 2.2 Following safety precautions when using hand, power and measuring tools 2.3 Using hand and measuring tools correctly and safely 2.4 Operating power tools correctly and safely 2.5 Cleaning and maintaining hand and power tools after use 2.6 Applying appropriate lubricant on hand and power tools after use and prior to storing 2.7 Storing technic of hand and power tools.
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincere and honest to duties 3.4 Environmental concerns 3.5 Eagerness to learn 3.6 Tidiness and timeliness 3.7 Respect for rights of peers and seniors in the workplace 3.8 Communication with peers, subordinates and seniors in the workplace
4. Resource Implications	The following resources must be provided: 4.1 Workplace (actual or simulated) 4.2 Tools, equipment and facilities appropriate to processes or activity 4.3 Materials relevant to the proposed activity 4.4 Personal protective equipment (PPE)

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1 Identified and selected appropriate hand and power tools
-----------------------------------	--

	for work to be performed 1.2 Identified and used measuring and testing tools appropriate to work activity 1.3 Followed safety precautions when using hand and power tools 1.4 Operated power tools safely and pursuant to manufacturer's operating specification 1.5 cleaned and lubricants tools and equipment 1.6 Inspected and corrected or replaced defective instruments, equipment and accessories 1.7 Performed cleaning and maintenance of hand and power tools after use and prior to storing
2. Methods of Assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical Demonstration 2.3 Oral Questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

Unit of Competency: APPLY GREEN PRACTICES IN CONSTRUCTION SECTOR	Nominal Duration: 10 hrs.	Unit Code: SICIP-CON-IDD-03-S
Unit Descriptor: This unit covers the skills, knowledge and attitudes required for apply green practices in construction sector. It specifically includes the tasks of interpreting green concepts, minimizing resources in the workplace and implementing waste management practices.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Interpret green concepts	1.1 <u>Green concepts in the construction sector</u> are understood. 1.2 <u>Sustainable building materials</u> are recognized. 1.3 Energy-efficient designs are interpreted. 1.4 <u>Water conservation practices</u> are understood. 1.5 Construction waste management is recognized. 1.6 <u>Building codes and regulations</u> are interpreted. 1.7 <u>Green building certifications</u> are understood.
2. Minimize resources use in the workplace	2.1 Resource consumption in the construction sector is regularly monitored. 2.2 <u>Energy-efficient equipment and technologies</u> are utilized. 2.3 Material selection is optimized. 2.4 Water usage is managed by using water-saving systems. 2.5 Optimized building designs are implemented. 2.6 Sustainable practices are followed.
3. Implement waste management practices	3.1 <u>Types of waste</u> generated in the construction sector. 3.2 Waste segregation is implemented on-site. 3.3 Recycling programs are recognized. 3.4 On-site storage and disposal methods are described. 3.5 Construction processes are followed ensuring waste management practices.

Range of Variables

Variable	Range
	May include but not limited to:
1. Green concepts in the construction sector	1.1 Sustainable Building Materials 1.2 Energy-Efficient Design 1.3 Water Conservation Measures

	1.4 Waste Management and Recycling 1.5 Site Environmental Protection 1.6 Renewable Energy Integration
2. Sustainable building materials	2.1 Recycled and Reclaimed Materials 2.2 Renewable Natural Materials 2.3 Low-Emission and Non-Toxic Materials 2.4 High-Performance Insulation Materials 2.5 Durable and Long-Lasting Materials 2.6 Innovative Eco-Friendly Materials
3. Water conservation practices	3.1 Rainwater Harvesting Systems 3.2 Greywater Recycling 3.3 Low-Flow Fixtures and Fittings 3.4 Efficient Site Water Management 3.5 Landscaping with Drought-Resistant Plants 3.6 Water Leak Detection and Repair Systems 3.7 Use of Water-Efficient Appliances and Equipment
4. Building codes and regulations	4.1 Bangladesh National Building Code (BNBC) 4.2 Environmental Conservation Rules (1997) 4.3 Water Supply and Sewerage Authority (WASA) Regulations 4.4 Fire Service and Civil Defense Regulations 4.5 Bangladesh Labour Act (2006) and Construction Safety 4.6 Local Government (City Corporation and Municipal) Building Bye-laws 4.7 Energy Efficiency and Green Building Guidelines
5. Green building certifications	5.1 LEED (Leadership in Energy and Environmental Design) 5.2 BREEAM (Building Research Establishment Environmental Assessment Method) 5.3 WELL Building Standard 5.4 EDGE (Excellence in Design for Greater Efficiencies) 5.5 Green Globe Certification 5.6 Green Rating for Integrated Habitat Assessment (GRIHA)
6. Energy-efficient equipment and technologies	6.1 High-Efficiency HVAC Systems 6.2 LED and Smart Lighting Systems 6.3 Energy-Efficient Construction Machinery 6.4 Building Automation and Control Systems (BACS) 6.5 Solar-Powered Equipment and Technologies 6.6 Insulation and Building Envelope Technologies
7. Types of waste	7.1 Concrete and Masonry Waste 7.2 Wood Waste 7.3 Metal Waste 7.4 Plastic and Packaging Waste 7.5 Hazardous Waste

	7.6	Soil and Excavation Waste
	7.7	Glass and Ceramics Waste

Curricular Content Guide

1. Underpinning Knowledge	1.1 Fundamental principles of green construction. 1.2 Benefits, environmental footprint, and lifecycle considerations 1.3 Overview of sustainable building materials 1.4 Relevant building codes and environmental regulations 1.5 Common types of construction waste 1.6 Waste segregation principles and methods 1.7 Green building certifications 1.8 Principles of integrated design and project management 1.9 Sustainable construction techniques
2. Underpinning Skills	2.1 Identifying and selecting sustainable building materials 2.2 Interpreting and applying energy-efficient design principle 2.3 Establishing and managing on-site waste storage systems 2.4 Segregating construction waste on-site into recyclable, reusable, and hazardous categories 2.5 Coordinating with recycling facilities and waste disposal contractors 2.6 Following building codes, environmental regulations, and green certification 2.7 Documenting waste generation and disposal activities
3 Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincere and honest to duties 3.4 Environmental concerns 3.5 Eagerness to learn 3.6 Tidiness and timeliness 3.7 Respect for rights of peers and seniors in the workplace 3.8 Communication with peers, subordinates and seniors in the workplace
4 Resource Implications	4.1 Workplace (simulated or actual) 4.2 Projector 4.3 Stationery 4.4 Learning manual

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1 interpreted green concepts 1.2 minimizing resources use in the workplace 1.3 implementing waste management practices
2. Methods of Assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical Demonstration 2.3 Oral Questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

Occupation Competencies

Unit of Competency: INTERPRET INTERIOR DESIGN AND FIT-OUT SPECIFICATIONS	Nominal Duration: 20 hrs.	Unit Code: SICIP-CON-IDD-01-O
Unit Descriptor: This unit of competency requires knowledge, skills and attitude to interpret interior design and fit-out specifications. It specifically includes the tasks of collecting and reading out drawing and specification, identifying key design aspects/themes and functionality and understanding substantiality and safety considerations.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Collect and read out drawing and specifications	1.1 Drawings and specifications are collected from the relevant <u>sources</u> . 1.2 Specifications are reviewed and understood to ensure that all requirements are captured correctly. 1.3 The layout, scale, and details of the drawing are analyzed and compared with the project requirements. 1.4 Necessary amendments or clarifications to the drawing and specifications are identified and communicated. 1.5 Drawings and specifications are interpreted to ensure alignment with the overall project objectives. 1.6 Relevant stakeholders are informed of any discrepancies or issues in the drawing or specifications.
2. Identify key design aspects/themes and functionality	2.1 Design themes are analyzed and aligned with the client's vision and the intended use of the space. 2.2 Functional requirements of the design are recognized and documented to meet the needs of the client. 2.3 <u>Potential challenges</u> in design functionality are identified and considered for resolution. 2.4 Design concepts are reviewed for compatibility with overall space functionality and user experience. 2.5 Relevant design guidelines and standards are consulted to ensure design aspects align with <u>industry best practices</u> . 2.6 Design themes and functionality are communicated to relevant stakeholders for feedback and approval.
3. Understand sustainability and safety considerations	3.1 Sustainability requirements are identified and integrated into the design process according to environmental standards.

	3.2 Safety regulations and standards are reviewed and ensured to be met throughout the project lifecycle. 3.3 Materials and resources are evaluated for their environmental impact and sustainability. 3.4 Safe practices are implemented during the design and installation phases to minimize risks. 3.5 The potential for energy-efficient solutions is considered and incorporated into design proposals. 3.6 Compliance with environmental and safety standards is confirmed through audits or assessments. 3.7 Sustainable materials and construction methods are selected to ensure long-term environmental benefits.
--	--

Range of variables:

Variable	Range May include but not limited to:
1. Sources	1.1 Design teams 1.2 Architects 1.3 Interior Architects/ Designers 1.4 Project managers. 1.5 AI 1.6 Internationally available Manuals and guide books
2. Potential challenges	2.1 Limited Space to accommodate design aspects 2.2 Budget and Cost 2.3 Availability of required materials 2.4 Availability of skilled manpower 2.5 Time constraint
3. Industry best practices	3.1 Price 3.2 Quality 3.3 Workmanship 3.4 Timely handover

Curricular Content Guide

1. Underpinning Knowledge	1.1 Identify the purpose and importance of drawings and specifications in interior design projects. 1.2 Interpret layout, scale, and technical details from design drawings and documents. 1.3 Understand the relationship between client requirements and design specifications. 1.4 Identify key design themes, styles, and functional aspects relevant to interior spaces. 1.5 Understand how to balance aesthetics, functionality, and user experience in design planning.
---------------------------	---

	1.6 Identify safety standards, building codes, and regulations relevant to Interior Design and Decoration/Interior Fit Out Management. 1.7 Understand the selection and use of sustainable materials and energy-efficient design solutions. 1.8 Interpret the role of collaboration and communication among clients, designers, and other stakeholders.
2. Underpinning Skills	2.1 Performing accurate interpretation of drawings and specifications. 2.2 Applying analytical skills to review layouts, scales, and project details. 2.3 Demonstrating effective communication when clarifying design requirements or discrepancies. 2.4 Following design guidelines and standards to ensure functionality and compliance. 2.5 Applying creative and technical judgment to align design themes with client needs. 2.6 Applying knowledge of sustainability principles in material and design selection. 2.7 Following safety regulations and ensuring compliance throughout the project stages.
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Tidiness and timeliness 3.4 Respect for rights of peers, sub-ordinates and seniors in the workplace 3.5 Environmental concerns 3.6 Sincerity and honesty to duties 3.7 Eagerness to learn 3.8 Good relationships with peers, subordinates and seniors in the workplace
4. Resource Implications	The following resources must be provided: 4.1 Computer/laptop 4.2 Learning manuals 4.3 Technical drawing 4.4 Design theme

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1 collected and read out drawing and specification 1.2 identified key design aspects/themes and functionality 1.3 understood sustainability and safety considerations
2. Methods of Assessment	Methods of assessment may include but not limited to:

	2.1 Written test 2.2 Practical Demonstration 2.3 Oral questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a certified assessor or occupation-specific industry expert

Unit of Competency: ASSESS CLIENT NEEDS AND PREFERENCES FOR THE DESIGN	Nominal Duration: 20 hrs.	Unit Code: SICIP-CON-IDD-02-O
Unit Descriptor: This unit of competency requires knowledge, skills and attitude to assess client needs and preferences for the design. It specifically includes the tasks of collecting client requirements through consultation, understanding market availability and adopting contemporary design solutions and alternatives.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Collect client requirements through consultations	1.1 Client requirements are gathered through consultations. 1.2 Key objectives and priorities for the project are established and communicated to client. 1.3 The scope of the project is clarified, and any constraints or limitations are recognized and recorded. 1.4 Client needs, preferences, and expectations are identified and <u>documented</u> during the consultation process. 1.5 Feedback from the client is gathered and analyzed to ensure design concepts align with their vision. 1.6 A summary of client requirements is prepared and presented for review and confirmation.
2. Understand market availability	2.1 Market trends and availability of <u>design materials and products</u> are researched and understood. 2.2 Emerging market products are identified and evaluated for their suitability to the project. 2.3 Vendor and supplier options are assessed for reliability, quality, and cost-effectiveness. 2.4 Information regarding material availability, lead times, and potential sourcing issues is gathered and documented. 2.5 Supply chain challenges and their impact on project timelines are identified and addressed in planning stages
3. Adopt contemporary design solutions and alternatives	3.1 Contemporary design trends and innovations are identified and evaluated for their relevance to the project. 3.2 Innovative design solutions are explored and selected based on the project's requirements and client preferences. 3.3 Alternative design solutions are proposed and assessed for their feasibility, cost-effectiveness, and sustainability.

	3.4 Design concepts are developed by integrating current design practices and technologies to enhance functionality and aesthetics. 3.5 Design alternatives are compared, and the most suitable option is selected based on performance, budget, and client approval. 3.6 Contemporary design solutions are presented to the client for feedback and approval. 3.7 Design modifications are made based on client feedback or constraints.
--	---

Range of variables:

Variable	Range May include but not limited to:
1. Documented	1.1 Client Details – Name, contact info, project location 1.2 Project Scope – Rooms/areas to design, size, purpose 1.3 Style Preferences – Themes, colors, materials, aesthetics 1.4 Budget – Total budget and allocation per area 1.5 Timeline – Start date, milestones, completion date 1.6 Functional Requirements – Furniture, storage, lighting, utilities 1.7 Special Requests – Custom features, accessibility, sustainability 1.8 Inspirations / References – Images, mood boards, examples 1.9 Constraints – Structural limits, regulations, existing features 1.10 Approval & Feedback – Client sign-off sections
2. Design materials and products	2.1 Flooring Materials: 2.1.1 Hardwood (Oak, Maple, Cherry, etc.) 2.1.2 Laminate Flooring 2.1.3 Vinyl Flooring 2.1.4 Ceramic & Porcelain Tiles 2.1.5 Carpet & Rugs 2.1.6 Stone (Granite, Marble, Limestone, etc.) 2.2 Wall Finishes: 2.2.1 Paint (Matte, Gloss, Satin) 2.2.2 Wallpaper (Textured, Printed, and Vinyl) 2.2.3 Wood Paneling 2.2.4 Wall Tiles (Ceramic, Mosaic, Glass, etc.) 2.2.5 Fabric Wall Coverings 2.2.6 Stone Cladding 2.2.7 Concrete Wall Finishes 2.3 Ceiling Materials:

	2.3.1 Drywall (Plasterboard) 2.3.2 Wooden Beams 2.3.3 Acoustic Panels 2.3.4 Suspended (Drop) Ceilings 2.3.5 Exposed Metal Ceilings
	2.4 Furniture and Fixtures: 2.4.1 Cabinets and Shelving Units 2.4.2 Lighting Fixtures (Chandeliers, Pendant Lights, etc.) 2.4.3 Desks and Workstations 2.4.4 Storage Solutions (Wardrobes, Closets)
	2.5 Lighting Materials: 2.5.1 LED Bulbs and Fixtures 2.5.2 Table Lamps and Floor Lamps 2.5.3 Pendant Lights 2.5.4 Track Lighting 2.5.5 Chandeliers 2.5.6 Smart Lighting Systems
	2.6 Decorative Materials: 2.6.1 Mirrors (Framed and Frameless) 2.6.2 Artwork (Paintings, Prints, Sculptures) 2.6.3 Vases and Decorative Bowls 2.6.4 Indoor Plants and Planters
	2.7 Kitchen and Bathroom Materials: 2.7.1 Countertops (Granite, Quartz, Marble, etc.) 2.7.2 Cabinets (Wood, MDF, Acrylic) 2.7.3 Backsplashes (Glass, Tile, Stone) 2.7.4 Sink and Faucets 2.7.5 Shower Enclosures and Bathtubs 2.7.6 Shower Panels and Accessories 2.7.7 Bathroom Mirrors 2.7.8 Toilet and Bidet Units 2.7.9 Kitchen Appliances (Ovens, Refrigerators, etc.)
	2.8 Metal and Glass Materials: 2.8.1 Stainless Steel (for kitchens, railings, etc.) 2.8.2 Glass Panels (for partitioning or décor) 2.8.3 Mirrored Glass 2.8.4 Aluminum Frames and Fixtures 2.8.5 Metal Mesh or Screens 2.8.6 Glass Doors and Windows

Curricular Content Guide

1. Underpinning Knowledge	1.1 Identify methods for collecting client requirements through structured consultations and discussions.
---------------------------	---

	1.2 Understand how to document client objectives, preferences, and constraints for interior design projects. 1.3 Interpret the relationship between client needs and practical design outcomes. 1.4 Identify current market trends, product availability, and emerging materials relevant to interior design. 1.5 Understand how to evaluate vendors, suppliers, and sourcing options based on quality and reliability. 1.6 Identify and interpret contemporary design styles, innovations, and sustainable solutions. 1.7 Recognize the importance of cost-effectiveness, functionality, and aesthetics in adopting modern design solutions. 1.8 Understand how to integrate client feedback into the final design proposal for approval.
2. Underpinning Skills	2.1 Applying questioning and analytical skills to identify client needs, preferences, and expectations. 2.2 Performing documentation of client requirements and project constraints accurately. 2.3 Applying research skills to assess market trends, material availability, and supplier reliability. 2.4 Demonstrating decision-making skills in selecting suitable materials and vendors. 2.5 Applying creative thinking to develop innovative and contemporary design solutions. 2.6 Performing evaluation and comparison of design alternatives for feasibility and sustainability. 2.7 Applying presentation and interpersonal skills to convey design ideas clearly and confidently.
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Tidiness and timeliness 3.4 Respect for rights of peers, sub-ordinates and seniors in the workplace 3.5 Environmental concerns 3.6 Sincerity and honesty to duties 3.7 Eagerness to learn 3.8 Good relationships with peers, subordinates and seniors in the workplace
4. Resource Implications	The following resources must be provided: 4.1 Stationeries 4.2 Computer/laptop 4.3 Design 4.4 Technical drawing

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1 collected client requirements through consultation 1.2 understood market availability 1.3 adopted contemporary design solutions and alternatives
2. Methods of Assessment	Methods of assessment may include but not limited to: 2.1 Written test 2.2 Practical Demonstration 2.3 Oral questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a certified assessor or occupation-specific industry expert.

Unit of Competency: PLAN AND ORGANIZE FIT-OUT WORK MANAGEMENT	Nominal Duration: 30 hrs.	Unit Code: SICIP-CON-IDD-03-O
Unit Descriptor: This unit of competency requires knowledge, skills and attitude to plan and organize fit-out work management. It specifically includes the tasks of drafting preliminary work breakdown for execution, communicating design interpretation with clients, seeking, negotiating and finalizing the client approval and developing work schedule with deadline.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Draft preliminary work breakdown for execution	1.1 Preliminary work breakdowns are drafted to guide project execution. 1.2 Tasks and activities within the work breakdown are identified and organized. 1.3 Responsibilities for each task are assigned and documented. 1.4 <u>Major tools and equipment</u> are identified. 1.5 Draft work breakdown is reviewed and approved before execution. 1.6 Any required adjustments to the work breakdown are incorporated based on feedback.
2. Communicate design interpretation with clients	2.1 Design interpretations are communicated clearly to clients using appropriate visual and verbal methods. 2.2 Client feedback on design concepts is actively sought and documented. 2.3 Adjustments to design interpretations are made based on client input. 2.4 Information regarding design proposals is accurately recorded and reported. 2.5 Design intent and recommendations are presented in a professional and understandable manner.
3. Negotiate and finalize the client approval	3.1 Client approvals are sought through appropriate communication channels. 3.2 Design proposals and related details are presented and explained to the client. 3.3 Negotiations with the client are conducted to address concerns and preferences.

	3.4 Final approvals are obtained and documented for project implementation. 3.5 Records of client decisions and agreements are maintained accurately.
2. Develop work schedule with deadline	4.1 Task durations and milestones are identified and documented. 4.2 Deadlines are assigned to each task and communicated to relevant parties. 4.3 A work schedule is developed to outline tasks and deadlines. 4.4 The work schedule is reviewed and adjusted as required. 4.5 Progress against the schedule is monitored and recorded.

Range of variables:

Variable	Range May include but not limited to:
1. Major tools and equipment	1.1 Measuring and Layout Tools: 1.1.1 Measuring tools 1.1.2 Laser Distance Measurer 1.1.3 Ruler/Scale 1.1.4 Calipers 1.1.5 Level 1.1.6 Square Tool 1.1.7 Compass 1.1.8 Protractor 1.1.9 Plumb Bob 1.2 Drawing and Design Tools: 1.2.1 Graph Paper 1.2.2 Markers and Highlighters 1.2.3 Architect's Scale Ruler 1.2.4 Drawing Boards 1.2.5 Tracing Paper 1.2.6 T-Square 1.3 Furniture and Fabric Tools: 1.3.1 Upholstery Tools 1.3.2 Swatch Books 1.3.3 Sample Boards 1.3.4 Cutting Tools 1.3.5 Stapler and Tackers 1.4 Construction and Installation Tools: 1.4.1 Screwdrivers and Drills 1.4.2 Hammer and Nails 1.4.3 Power Tools 1.4.4 Staplers and Nail Guns

	1.4.5 Ladders 1.4.6 Paint Rollers and Brushes
--	--

Curricular Content Guide

1. Underpinning Knowledge	1.1 Identify the purpose and components of a work breakdown structure in interior design projects. 1.2 Understand how to organize tasks, assign responsibilities, and allocate resources effectively. 1.3 Identify methods for clear and professional communication of design ideas to clients. 1.4 Understand the process of collecting, analyzing, and integrating client feedback into design revisions. 1.5 Recognize effective techniques for negotiation and client engagement during approval stages. 1.6 Understand how to document and maintain accurate records of client decisions and approvals. 1.7 Identify the steps for developing a practical work schedule, including tasks, milestones, and deadlines. 1.8 Understand how to monitor progress and adjust the schedule to ensure timely project completion.
2. Underpinning Skills	2.1 Performing task analysis to draft a clear and logical work breakdown structure. 2.2 Applying organizational skills to define activities, responsibilities, and required resources. 2.3 Demonstrating attention to detail when identifying tools, equipment, and task dependencies. 2.4 Applying communication skills to present and discuss design interpretations with clients. 2.5 Applying documentation skills to record client feedback, agreements, and approvals accurately. 2.6 Performing time management to develop and monitor effective work schedules and deadlines. 2.7 Applying teamwork and coordination skills to ensure smooth project execution and delivery.
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Tidiness and timeliness 3.4 Respect for rights of peers, sub-ordinates and seniors in the workplace 3.5 Environmental concerns 3.6 Sincerity and honesty to duties 3.7 Eagerness to learn

	3.8 Good relationships with peers, subordinates and seniors in the workplace
4. Resource Implications	The following resources must be provided: 4.1 Stationeries 4.2 Computer/laptop 4.3 Design 4.4 Sample

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1 drafted preliminary work breakdown for execution 1.2 communicating design interpretation with clients 1.3 negotiated and finalized the client approval 1.4 developed work schedule with deadline
2. Methods of Assessment	Methods of assessment may include but not limited to: 2.1 Written test 2.2 Practical Demonstration 2.3 Oral questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training 3.2 Assessment should be done by a certified assessor or occupation-specific industry expert

Unit of Competency: DEVELOP FIT-OUT MANAGEMENT PROCESS	Nominal Duration: 80 hrs.	Unit Code: SICIP-CON-IDD-04-O
Unit Descriptor: This unit of competency requires knowledge, skills and attitude to developing fit-out management process. It specifically includes the tasks of organizing resource and materials, estimating quantities of materials and furnishings, ensuring timely procurement and delivery and allocating tasks according to expertise.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1 Organize Resources and Materials	1.1 <u>Resources and materials</u> required for the project are identified and organized. 1.2 Materials are sourced based on the project's specifications and client requirements. 1.3 The organization of resources ensures that all necessary items are available and accessible for the project's execution. 1.4 A system for inventory management is established to track the availability and movement of materials. 1.5 Necessary safety protocols for handling materials and resources are followed and maintained.
2 Estimate Quantities of Materials and Furnishings	2.1 Material quantities required for each of the works and project are calculated. 2.2 Accurate estimations are made for the quantities of elements based on project design and specification. 2.3 Potential variations in material quantities are identified. 2.4 Material market knowledge is interpreted to pricing, quality and availability. 2.5 Suppliers and vendors are consulted to verify availability and pricing based on the estimated quantities. 2.6 <u>Estimation calculations</u> are documented and reviewed. 2.7 The final material and furnishing quantities are communicated to the client.
3 Ensure Timely Procurement and Delivery	3.1 Procurement requirements are identified and communicated to vendors and suppliers in a timely manner. 3.2 Suppliers and delivery schedules are reviewed to ensure that materials are received on time.

	3.3 Delays in procurement or delivery are identified and addressed promptly to minimize disruption. 3.4 Timely procurement is tracked and monitored to ensure the project stays on schedule. 3.5 Delivery timelines are confirmed with suppliers. 3.6 Procurement processes are followed to ensure compliance with project budgets and client requirements. 3.7 Adjustments to the procurement plan are made when necessary.
4 Allocate Tasks According to Expertise	4.1 Tasks are assigned to team members based on their skills, experience, and expertise. 4.2 Team members are briefed on their responsibilities and expectations to ensure effective task completion. 4.3 Expertise within the team is recognized and utilized to maximize efficiency and quality of work. 4.4 Feedback from team members is considered when allocating tasks to improve workflow and task performance. 4.5 The progress of allocated tasks is reviewed and tasks/assignments are adjusted.

Range of variables:

Variable	Range May include but not limited to:
1. Resources and materials	1.1 Materials 1.1.1. Wood 1.1.2. Board 1.1.3. Metal 1.1.4. Glass 1.1.5. Fabrics 1.1.6. Tiles 1.1.7. Paint 1.1.8. Wallpaper 1.2 Decor Items 1.2.1. Artwork 1.2.2. Mirrors 1.2.3. Plants 1.2.4. Decorative accessories 1.3 Finishes 1.3.1. Flooring 1.3.2. Wall textures 1.3.3. Ceiling designs
2. Estimation calculations	2.1 Material costs 2.2 Labor costs 2.3 Design fees

	2.4 Transportation & logistics
	2.5 Equipment rental
	2.6 Overhead costs
	2.7 Contingency allowance
	2.8 Taxes & duties

Curricular Content Guide

1. Underpinning Knowledge	1.1 Identify different types of resources and materials used in interior design projects. 1.2 Understand methods for organizing and managing materials to ensure smooth project execution. 1.3 Interpret inventory management systems for tracking material use and availability. 1.4 Understand the principles of material estimation and how to calculate accurate quantities. 1.5 Identify how design specifications influence material selection, quality, and quantity. 1.6 Understand procurement procedures, timelines, and coordination with vendors and suppliers. 1.7 Understand how to allocate tasks effectively based on team members' expertise and workload capacity. 1.8 Recognize the role of communication and feedback in improving task performance and workflow efficiency.
2. Underpinning Skills	2.1 Applying organizational skills to identify and arrange project resources and materials efficiently. 2.2 Performing accurate material estimation based on project drawings, specifications, and requirements. 2.3 Applying communication skills to coordinate with suppliers, vendors, and clients regarding material needs. 2.4 Demonstrating time management to ensure timely procurement and delivery of materials. 2.5 Applying problem-solving skills to address procurement delays or supply chain issues. 2.6 Performing task allocation effectively based on team members' expertise and capability. 2.7 Demonstrating leadership and teamwork to maintain coordination and workflow efficiency. 2.8 Applying documentation and monitoring skills to track inventory, procurement, and task progress accurately.
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Tidiness and timeliness

	3.4 Respect for rights of peers, sub-ordinates and seniors in the workplace 3.5 Environmental concerns 3.6 Sincerity and honesty to duties 3.7 Eagerness to learn 3.8 Good relationships with peers, subordinates and seniors in the workplace
4. Resource Implications	The following resources must be provided: 4.1 Consumables 4.2 Calculator 4.3 Computers/laptop 4.4 Measuring tape

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1 organized resources and materials 1.2 estimated quantities of materials and furnishings 1.3 ensured timely procurement and delivery 1.4 allocated tasks according to expertise
2. Methods of Assessment	Methods of assessment may include but not limited to: 2.1 Written test 2.2 Practical Demonstration 2.3 Oral questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training 3.2 Assessment should be done by a certified assessor or occupation-specific industry expert

Unit of Competency: IMPLEMENT INTERIOR DESIGN AND DECORATION/INTERIOR FIT OUT MANAGEMENT SCHEMES	Nominal Duration: 90 hrs.	Unit Code: SICIP-CON-IDD-05-O
Unit Descriptor: This unit of competency requires knowledge, skills and attitude to implement Interior Design and Decoration/Interior Fit Out Managements schemes. It specifically includes the tasks of interpreting design briefs and specification, selecting and preparing appropriate materials and methods for the specific work, organizing and coordinating installation activities, applying decoration techniques/methods and styling details, ensuring compliance with quality, quantity, safety & sustainability requirements and finalizing and presenting completed interior schemes.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Interpret design briefs and specification	1.1 Design briefs and project specifications are reviewed and interpreted to identify key requirements. 1.2 Client requirements, design objectives, and functional needs are extracted from the briefs. 1.3 <u>Technical drawings, sketches, and specification documents</u> are analyzed for accuracy and completeness. 1.4 Critical design constraints and opportunities are identified and documented. 1.5 Design interpretations are verified against client expectations and project goals.
2. Select and prepare appropriate materials and methods for the specific work	2.1 Suitable materials and finishes are selected according to design requirements and client preferences. 2.2 Tools, equipment, and methods for handling and installing materials are identified and prepared. 2.3 Materials are inspected and conditioned for quality and suitability before installation. 2.4 Material preparation is carried out according to manufacturer's instructions and project standards. 2.5 Alternative methods and materials are considered and documented in case of unavailability or design changes.
3. Organize and coordinate installation activities	3.1 Installation tasks are scheduled and coordinated with team members and subcontractors. 3.2 Resources, tools, and materials are organized to ensure smooth workflow during installation. 3.3 Responsibilities and tasks are assigned to personnel based on expertise and project requirements.

	3.4 Installation progress is monitored and deviations from the plan are addressed promptly. 3.5 Communication with stakeholders is maintained to report installation status and updates.
4. Apply decoration techniques/methods and styling details	4.1 Appropriate decoration techniques and styling methods are selected based on the design scheme. 4.2 Techniques are applied accurately to ensure desired aesthetic and functional outcomes. 4.3 Finishes, textures, and decorative details are installed or applied according to design specifications. 4.4 Alignment, proportions, and positioning of decorative elements are verified and adjusted as required. 4.5 Completed decorative elements are inspected to ensure consistency and quality with the overall design.
5. Ensure compliance with quality, quantity, safety and sustainability requirements	5.1 Work is performed according to approved quality standards and specifications. 5.2 Material usage and quantities are monitored to minimize waste and ensure efficiency. 5.3 Safety protocols and regulations are followed throughout the installation and decoration process. 5.4 Sustainable practices are applied in material selection, installation, and disposal. 5.5 Compliance with client and regulatory requirements is documented and verified.
6. Finalize and present completed interior schemes	6.1 Completed interior schemes are reviewed to ensure all design objectives are met. 6.2 Final adjustments and refinements are applied to decorations, finishes, and furnishings. 6.3 Completed schemes are presented to clients using visual aids, walkthroughs, or models. 6.4 Feedback from clients is recorded and incorporated where feasible. 6.5 Handover documentation, including materials used and care instructions, is prepared and provided to the client.

Range of variables:

Variable	Range
	May include but not limited to:
1 Technical drawings, sketches, and specification documents	1.1 Floor plans 1.2 Elevations 1.3 Sections 1.4 3D renderings / perspectives 1.5 Concept sketches 1.6 Furniture layout plans

	1.7 Lighting and electrical plans 1.8 Plumbing layouts 1.9 Material specifications 1.10 Color schemes and palettes 1.11 Finishing details 1.12 Fixture and fitting schedules 1.13 Compliance and safety specifications
2 Installation progress	2.1 Progress reports 2.2 Milestones achieved 2.3 Deviations/issues log 2.4 Corrective actions and quality checks
3 Communication with stakeholders	3.1 Status updates 3.2 Meeting schedules 3.3 Feedback collection 3.4 Issue reporting 3.5 Documentation/records
4 Decoration techniques	4.1 Painting methods 4.2 Color chart 4.3 Wallpaper installation 4.4 Lighting arrangements 4.5 Accessory placement
5 Sustainable Practices	5.1 Energy-efficient lighting 5.2 Low-VOC paints and finishes 5.3 Recycling and waste management 5.4 Responsible disposal methods

Curricular Content Guide

1. Underpinning Knowledge	1.1 Identify and interpret design briefs, specifications, and technical drawings accurately. 1.2 Understand client requirements, design objectives, and functional needs in relation to project goals. 1.3 Recognize appropriate materials, finishes, and installation methods for various interior works. 1.4 Understand scheduling, coordination, and teamwork in organizing installation activities. 1.5 Identify key decoration techniques, finishes, and styling methods used in interior design. 1.6 Interpret methods for minimizing waste and ensuring efficient material usage. 1.7 Understand client presentation techniques. 1.8 Identify documentation requirements for project completion, including care and maintenance instructions.
---------------------------	---

2 Underpinning Skills	2.1 Performing accurate interpretation of design briefs, drawings, and specifications. 2.2 Applying analytical skills to identify key design requirements, constraints, and opportunities. 2.3 Demonstrating technical knowledge in selecting suitable materials, tools, and methods for installation. 2.4 Applying organizational and coordination skills to manage installation activities and resources effectively. 2.5 Performing quality control checks to maintain consistency, alignment, and aesthetic standards. 2.6 Applying safety and sustainability practices throughout material selection and installation. 2.7 Applying documentation and reporting skills to verify compliance and finalize project handover.
3 Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Tidiness and timeliness 3.4 Respect for rights of peers, sub-ordinates and seniors in the workplace 3.5 Environmental concerns 3.6 Sincerity and honesty to duties 3.7 Eagerness to learn 3.8 Good relationships with peers, subordinates and seniors in the workplace
4 Resource Implications	The following resources must be provided: 4.1 Stationeries 4.2 Consumables 4.3 Calculators 4.4 Computer/laptop

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1 interpreted design briefs and specification 1.2 selected and prepared appropriate materials and methods for specific work 1.3 organized and coordinate installation activities 1.4 applying decoration techniques/methods and styling details 1.5 ensured compliance with quality, quantity, safety and sustainability requirements 1.6 finalized and presented completed interior schemes
2. Methods of Assessment	Methods of assessment may include but not limited to: 2.1 Written test

	2.2 Practical Demonstration 2.3 Oral questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a certified assessor or occupation-specific industry expert.

Unit of Competency: MONITOR EXPENDITURE, BUDGET AND DOCUMENTATION	Nominal Duration: 40 hrs.	Unit Code: SICIP-CON-IDD-06-O
Unit Descriptor: This unit of competency requires knowledge, skills and attitude to monitor expenditure, budget and documentation. It specifically includes the tasks of tracking actual cost against estimated budget, controlling and monitoring the cost, identifying cost overruns and suggest corrective measures and controlling and monitoring waste usage of materials.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Track actual cost against estimated budget	1.1 The estimated budget and actual costs are compared periodically. 1.2 <u>Expenditure records</u> are reviewed according to the budget categories. 1.3 Any variances between the actual costs and the estimated budget are calculated. 1.4 Cost overruns or savings are documented on the analysis of the budget tracking. 1.5 <u>Budget reports</u> are generated regularly to provide a clear overview of actual expenses. 1.6 The actual costs are monitored in real-time to ensure that they align with the estimated budget.
2. Control and monitor the cost	2.1 The budget is regularly monitored. 2.2 Actual expenditures are tracked and compared with the approved budget. 2.3 Financial reports are generated to provide insights into current expenditures. 2.4 Unnecessary costs are identified and reduced through efficient resource. 2.5 <u>Any deviations</u> from the planned budget are analyzed. 2.6 Appropriate cost-cutting strategies or reallocation of funds are proposed and implemented. 2.7 Ongoing communication is maintained with stakeholders.
3. Identify cost overruns and suggest corrective measures	3.1 Cost overruns are identified by comparing actual expenses to the budgeted amounts. 3.2 The reasons for the cost overruns are evaluated. 3.3 The areas where cost overruns have occurred are documented.

	3.4 Corrective measures are suggested to address the causes of the cost overruns. 3.5 Alternative cost-saving strategies are proposed. 3.6 The impact of proposed corrective measures on the overall budget and project timeline.
4. Control and monitor waste usage of materials	4.1 Material usage is tracked regularly to monitor any wastage. 4.2 Waste generation is identified and analyzed. 4.3 The consumption of materials is compared against project requirements. 4.4 Excessive material uses or wastage is reported. 4.5 The effectiveness of waste reduction strategies is regularly assessed. 4.6 Regular reports on material usage and waste levels are generated.

Range of variables:

Variable	Range May include but not limited to:
1. Expenditure records	1.1 Purchase orders 1.2 Supplier invoices 1.3 Receipts and vouchers 1.4 Expense categorization 1.5 Payment records
2. Budget reports	2.1 Weekly/monthly/quarterly reports 2.2 Expense summaries 2.3 Department-wise breakdown 2.4 Forecasting analysis
3. Any deviations	3.1 Estimated budget and actual costs 3.2 Variance percentage 3.3 Root cause analysis 3.4 Impact on project scope/timeline 3.5 Risk assessment 3.6 Adjustment measures
4. Corrective measures	4.1 Negotiating with suppliers 4.2 Adjusting material specifications 4.3 Reducing non-essential purchases 4.4 Improving workflow efficiency 4.5 Reallocating tasks
5. Waste generation	5.1 Type of waste 5.1.1. Wood 5.1.2. Paint 5.1.3. Fabric 5.1.4. Glass

	5.2 Source of waste 5.2.1. Cutting 5.2.2. Installation 5.2.3. Transport 5.2.4. Handling
--	---

Curricular Content Guide

1. Underpinning Knowledge	1.1 Identify and interpret the concepts of budgeting, cost estimation, and financial tracking. 1.2 Understand methods for comparing actual costs with estimated budgets. 1.3 Recognize techniques for monitoring expenditures and maintaining financial control. 1.4 Understand causes of cost overruns and approaches for corrective action. 1.5 Identify cost control strategies, resource optimization methods, and reallocation techniques. 1.6 Understand procedures for tracking material usage and detecting waste. 1.7 Recognize waste reduction practices and sustainability measures in cost management. 1.8 Interpret reporting and documentation processes for budgeting, expenditure, and material usage.
2. Underpinning Skills	2.1 Performing accurate recordkeeping and documentation of expenditures and variances. 2.2 Demonstrating data analysis skills to identify cost overruns and budget deviations. 2.3 Performing monitoring and reporting skills to track financial performance in real time. 2.4 Applying communication skills to share budget updates and reports with stakeholders. 2.5 Demonstrating resource management skills to control and minimize unnecessary costs. 2.6 Performing assessment and reporting of waste reduction effectiveness to improve efficiency.
3 Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Tidiness and timeliness 3.4 Respect for rights of peers, sub-ordinates and seniors in the workplace 3.5 Environmental concerns 3.6 Sincerity and honesty to duties 3.7 Eagerness to learn

	3.8 Good relationships with peers, subordinates and seniors in the workplace
4 Resource Implications	The following resources must be provided: 4.1 Stationeries 4.2 Consumables 4.3 Calculator 4.4 Computers/laptop

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1 tracked actual cost against estimated budget 1.2 controlled and monitored the cost 1.3 identified cost overruns and suggest corrective measures 1.4 controlled and monitored waste usage of materials
2. Methods of Assessment	Methods of assessment may include but not limited to: 2.1 Written test 2.2 Practical Demonstration 2.3 Oral questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training 3.2 Assessment should be done by a certified assessor or occupation-specific industry expert

Unit of Competency: HANDOVER AND EVALUATE CLIENTS' SATISFACTION	Nominal Duration: 20 hrs.	Unit Code: SICIP-CON-IDD-07-O
Unit Descriptor: This unit of competency requires knowledge, skills and attitude to handover and evaluate client's satisfaction. It specifically includes the tasks of conducting final inspection, facilitating client handover and assessing client satisfaction.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Conduct final inspection	1.1 Completed work is thoroughly checked against the project scope. 1.2 <u>All components</u> , systems, or installations are tested. 1.3 A checklist is used to confirm that all tasks and requirements have been completed. 1.4 The client is informed about the inspection results and any issues that have been resolved. 1.5 The final inspection report is prepared, detailing the outcomes of the inspection. 1.6 Feedback from the client is collected during the inspection.
2. Facilitate client handover	2.1 The final deliverables are presented to the client, ensuring all work is completed as agreed. 2.2 <u>All relevant documents</u> are handed over to the client. 2.3 Client is briefed on the completed work. 2.4 Any outstanding issues are addressed, and the client's questions are answered. 2.5 Client is informed about any aftercare services or support available. 2.6 Feedback from the client is gathered to ensure their satisfaction with the work. 2.7 The handover process is documented for reference and future follow-up.
3. Assess client satisfaction	3.1 Client feedback is collected on completion of project work through surveys, interviews, or direct communication. 3.2 Client's expectations and overall experience are assessed to determine satisfaction. 3.3 Any issues or concerns raised by the client are noted and addressed promptly.

	3.4 Quality of the work and services provided is reviewed based on client input. 3.5 Based on the client's inputs, work strategy is taken for future project.
--	---

Range of variables:

Variable	Range May include but not limited to:
1. All components	1.1 Lighting fixtures 1.2 Plumbing fittings 1.3 Furniture installations 1.4 Modular kitchen 1.5 Decorative finishes
2. All relevant documents	2.1 Warranty documents of household equipment 2.1.1 Kitchen equipment 2.1.2 Living room and comfort equipment 2.1.3 Bedroom equipment 2.1.4 Bathroom equipment 2.1.5 Safety and utility equipment 2.1.6 Cleaning and maintenance equipment 2.2 Warranty documents of office equipment 2.2.1 Furniture and fixtures 2.2.2 Computing and IT equipment 2.2.3 Communication equipment 2.2.4 Mailing and packaging equipment 2.2.5 Presentation and meeting equipment 2.2.6 Safety and utility equipment 2.3 Maintenance manuals

Curricular Content Guide

1. Underpinning Knowledge	1.1 Identify and interpret procedures for conducting final inspections and quality checks. 1.2 Understand the use of checklists and inspection tools to verify project completion. 1.3 Recognize the importance of client communication during inspection and handover. 1.4 Understand documentation requirements for inspection reports and handover records. 1.5 Identify steps involved in the client handover process, including briefing and aftercare information. 1.6 Understand methods for collecting and analyzing client feedback to assess satisfaction.
---------------------------	--

	1.7 Recognize techniques for addressing client concerns and ensuring quality improvement. 1.8 Understand how client feedback contributes to refining future project strategies.
2. Underpinning Skills	2.1 Performing detailed inspection and verification of completed work against project requirements. 2.2 Applying analytical and documentation skills to prepare accurate inspection and handover reports. 2.3 Demonstrating communication skills to explain inspection results and project outcomes to clients. 2.4 Demonstrating interpersonal and customer service skills when engaging with clients during handover. 2.5 Applying problem-solving skills to address client concerns or outstanding issues effectively. 2.6 Performing feedback collection and analysis to measure client satisfaction and identify improvements. 2.7 Applying reflective skills to use client feedback for enhancing future project performance.
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Tidiness and timeliness 3.4 Respect for rights of peers, sub-ordinates and seniors in the workplace 3.5 Environmental concerns 3.6 Sincerity and honesty to duties 3.7 Eagerness to learn 3.8 Good relationships with peers, subordinates and seniors in the workplace
4. Resource Implications	The following resources must be provided: 4.1 Stationeries 4.2 Computer/laptop

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1 conducted final inspection 1.2 facilitate client handover 1.3 assessed client satisfaction
2. Methods of Assessment	Methods of assessment may include but not limited to: 2.1 Written test 2.2 Practical Demonstration 2.3 Oral questioning 2.4 Portfolio (Optional)

3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training 3.2 Assessment should be done by a certified assessor or occupation-specific industry expert
--------------------------	---

Workshop/Lab Facility Standard

Course Name:	Interior Design and Decoration Fit Out Management
Number of Trainees:	25

Course-wise Training Space (Theoretical Classroom, Workshop/ Lab/ Classroom cum Workshop):

- Classroom – 350 sft (33 sqm)
- Workshop/ lab – 800 sft (75 sq) OR
- Classroom cum workshop – 1000 sft (93 sqm)

Major Training Equipment and Training Facilities:

Sl. No.	Major Equipment and Training facilities	Required facilities
1.	Laptop/Desktop	01
2.	Color Printer	01
3.	Scanner	01
4.	Projector or Large Display Screen	01
5.	White board	01
6.	Color chart	01
7.	Swatches of Materials	25
8.	Drawing Board	01
9.	T-Square	01
10.	Set Squares & Scale Rulers	01
11.	Compass & Protractor	01
12.	Measuring Tape & Laser Distance Meter	01

The following conditions must be fulfilled –

- The institute shall not use the same facilities for any other projects/organizations offering a similar course.
- The institute must provide sufficient evidence to prove ownership of the proposed training equipment.

The list denotes the minimum training equipment and facility required to effectively conduct training for a specific course. Additionally, the institute must ensure that all other necessary

training tools, equipment, and furniture are available to meet the requirement of competency standards (CS) provided by SICIP.

For the operation of training course on Interior Design and Decoration/Interior Fit Out Managements the institute must ensure the availability of at least 80% of the major training equipment and training facilities (according to the CS) to be eligible for SICIP training delivery. If the score is below 80%, the remaining equipment and facilities need to be installed before the commencement of the training.

The institute will also provide all other hand tools and power tools as per CS for 25 trainees. Also, they will arrange adequate seating arrangement and classroom setup for the 25 trainees.
