FOR

JUTE PRODUCT DEVELOPMENT

(JUTE SECTOR)

Skills for Industry Competitiveness and Innovation Program (SICIP)
Finance Division, Ministry of Finance

COPYRIGHT

The Competency Standards for Jute Product Development is a document for the development of curricula, teaching and learning materials, and assessment tools. It also serves as the document for providing training consistent with the requirements of the industry for individuals who pass through the set standard via assessment would be qualified and settled for a relevant job.

The document was developed under the Skills for Employment Investment Program (SEIP) and subsequently reviewed and updated with the engagement of occupation-specific industry experts to use in training under the **Skills for Industry Competitiveness and Innovation Program (SICIP)**. This document is owned by the Finance Division of the Ministry of Finance of the People's Republic of Bangladesh.

Public and private institutions may use the information contained in this standard for activities benefitting Bangladesh.

Other interested parties must obtain permission from the owner of this document for reproduction of information in any manner in whole or in part of this Skills Standard, in English or other languages.

INTRODUCTION:

The Skills for Industry Competitiveness and Innovation Program (SICIP) has the overall objective of developing a skilled workforce adept at handling new technologies, especially for emerging industries in Bangladesh. It will expand skills training and strengthen the development of the training ecosystem to address the skills requirements of the SICIP-selected industry sectors. The program aims to (i) increase the technology-oriented skilled workforce across emerging and priority sectors, (ii) promote inclusive skilling and upskilling opportunities for women and socially disadvantaged groups, (iii) incentivize industry-university partnerships to nurture innovation capacity and improve industry competitiveness, and (iv) foster skills for climate-resilient manufacturing processes and green technologies. The program is expected to benefit about 220,000 new and existing workers over a 6-year implementation period from 2024-2029.

The SICIP Program has, therefore, taken the initiative to enhance the employability and productivity of trainees by implementing market-responsive and job-focused training programs through public and private training providers. This will require the development of competency standards for each of the occupations/trades which will provide a structured framework in the learning process to guide training providers, ensure consistent training quality, and create an alignment between the skills provided by the training institutes and the needs of the industry.

The Competency Standard also suggests integration of YouTube or similar platforms or downloaded clips into classroom practice to ensure simulated creation of the contents so that learners are exposed to visual demonstrations before classroom instruction or practical session, which aligns with modern learning preference and supports flipped classroom models.

This competency standard is therefore developed to improve skills following the job roles and skill sets of the occupation and ensure that the required skills are aligned with industry requirements.

The document details the format, sequencing, wording, and layout of the Competency Standard for an occupation which comprises Units of Competence and its corresponding Elements.

OVERVIEW:

A **Competency Standard** is a written specification of the knowledge, skills, and attitudes required for the performance of a job or occupation or trade corresponding to the standard of performance required in the workplace.

Competency standard:

- provides a consistent and reliable set of components for training, recognizing, and assessing people's skills, and may also have optional support materials.
- enables industry-recognized qualifications to be awarded through direct assessment of workplace competencies
- encourages the development and delivery of flexible training that suits individual and industry requirements
- encourages learning and assessment in a work-related environment which leads to verifiable workplace outcomes.

Competency Standard has been developed by a working group comprised of occupation-specific experts from the industry/institution, relevant consultants of SICIP.

Competency Standards describe the skills, knowledge, and attitude needed to perform effectively in the workplace. Competency Standards acknowledge that people can achieve vocational and technical competency in many ways by emphasizing what the learner can do, not how or where they learned to do it.

With Competency Standards, assessment and training may be conducted at the workplace, at training organization, during regular work, or through work experience, work placement, work simulation or any combination of these.

A Unit of Competency describes a distinct work activity that would normally be undertaken by one person in accordance with industry standards.

Units of Competency are documented in a standard format that comprises:

- Reference to Industry Sector, Occupational Title and Occupational Description
- Unit code
- Unit title
- Unit descriptor
- Unit of Competency
- Elements and performance criteria
- Variables and range statement
- Evidence guides

Together all the parts of a Unit of Competency:

- Describe a work activity
- Guide the assessor in determining whether the candidate is competent.

Competency Standard has been developed by a working group comprised of occupation-specific experts from the industry/institution, relevant consultants of SICIP.

The ensuing sections of this document comprise a description of the respective occupation with all the key components of a Unit of Competence:

- An overview of all Units of Competence for the occupation and their corresponding duration required for completion of training.
- The Competency Standards that include the Unit of Competency, Unit Descriptor, Elements and Performance Criteria, Range of Variables, Curricular Content Guide, and Assessment Evidence Guide.

Units & Elements at a Glance:

Generic Competencies (30 Hrs.)

Code	Unit of Competency	Elements of Competency	Duration (Hours)
SICIP-JUTE-JPD-01-G	Apply Occupational Safety and Health (OSH) Practices at Workplace	1. Identify, control and report OSH hazards 2. Conduct work safely 3. Follow emergency response procedures 4. Maintain and improve health and safety in the workplace	10
SICIP-JUTE-JPD-02-G	Receive and Respond to Workplace Instructions	1. Interpret and follow verbal Instructions 2. Read and Interpret Workplace Documents 3. Receive and follow written instructions 4. Attend meetings and provide inputs	10
SICIP-JUTE-JPD-03-G	Work In a Team Environment	1. Identify team goals and processes 2. Communicate and cooperate with team members 3. Work as a team member 4. Solve problems as a team member	10
Total Hour			30

Sector Specific Competencies (30 hrs.)

Code	Unit of Competency	Elements of Competency	Duration (Hours)
SICIP-JUTE-JPD-01-S	Carry out measurements and calculations	1. Plan and prepare. 2. Obtain measurements. 3. Perform calculations.	10
SICIP-JUTE-JPD-02-S	Apply knowledge of business planning	1. Identify business plan. 2. Perform business survey. 3. Identify banking requirements.	20
Total Hour			30

Occupation Specific Competencies (300 hrs.)

Code	Unit of Competency	Elements of Competency	Duration (hours)
SICIP-JUTE-JPD-01-O	Apply Knowledge on Jute Product Development Process	1. Define Jute 2. Describe Jute product development process 3. Identify types of jute fabrics and trims 4. Identify jute fabric construction 5. Identify the tools and equipment	25
SICIP-JUTE-JPD-02-O	Operate Sewing Machine	1. Identify different types sewing machine 2. Identify parts of sewing machines 3. Set up the sewing machine 4. Perform the sewing machine operation 5. Maintain the sewing machine	60
SICIP-JUTE-JPD-03-O	Produce Jute Bags	1. Create pattern for jute bag 2. Cut fabric for bag components 3. Assemble fabric pieces and sew components 4. Finish the edges and add handles	75
SICIP-JUTE-JPD-04-O	Produce Jute Wallet and Folder	1. Create pattern for wallet and folder 2. Cut jute fabric for wallet and folder 3. Sew jute wallet and folder 4. Finish the jute wallet and folder	60
SICIP-JUTE-JPD-05-O	Produce Jute Box Items	1. Create pattern for jute box items 2. Cut fabric and paperboard for jute box items 3. Sew Jute Box Items	55

Code	Unit of Competency	Elements of Competency	Duration (hours)
		4. Finish the Jute Box items	
SICIP-JUTE-JPD-06-O	Perform Quality Control in Jute Product	1. Identify quality procedures 2. Identify Jute fabric defects 3. Perform routine maintenance	25
Total Hours			300

COMPETENCY STANDARD: JUTE PRODUCT DEVELOPMENT

Generic Competencies

Unit of Competency: APPLY OCCUPATIONAL SAFETY AND HEALTH (OSH) PRACTICES AT WORKPLACE	Nominal Duration: 10 Hrs.	Unit Code: SICIP-JUTE-JPD-01-G
Unit Descriptor: This unit covers the knowledge, skills and attitudes required to apply occupational safety and health (OSH) practices at workplace. It specifically includes the tasks of identifying, controlling and reporting OSH hazards, conducting work safety, following emergency response procedures and maintaining and improving health and safety in the workplace.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Identify, control and report OSH hazards	1.1 Work area is routinely checked for Occupational Safety and Health (OSH) hazards prior to commencing and during work. 1.2 <u>Hazards</u> are identified and corrective action is taken within the level of responsibility. 1.3 OSH hazards and incidents are reported to appropriate personnel according to workplace procedures. 1.4 <u>Safety signs and symbols</u> are identified and followed. 1.5 <u>Preventive Control Measures</u> are identified in accordance with OSH work standards.
2. Conduct work safely	2.1 OSH practices are applied in the workplace. 2.2 <u>Personal Protective Equipment (PPE)</u> are used.
3. Follow emergency response procedures	3.1 Emergency situations are identified and reported according to workplace requirements. 3.2 Emergency procedures are followed as appropriate to the nature of the emergency and according to workplace procedures. 3.3 <u>Workplace procedures</u> for dealing with accidents, fires and emergencies are followed whenever necessary within scope of responsibilities.
4. Maintain and improve health and safety in the workplace	4.1 Risks are identified and appropriate control measures are implemented in the workplace. 4.2 Recommendations arising from risk assessments are implemented within level of responsibility.

	4.3 Safety records are maintained according to <u>company policies</u> .
--	--

Range of Variables

Variable	Range (Includes but not limited to):
1. Hazards	1.1. OSH incidents include near misses, injuries, illnesses and property damage, noise, handling hazardous substances. 1.2. Biological hazards- bacteria, viruses, plants, parasites, mites, molds, fungi, insects 1.3. Chemical hazards – dusts, fibers, mists, fumes, smoke, gasses, vapors 1.4. Ergonomics Hazards 1.5. Physiological factors – monotony, personal relationship, work out cycle 1.6. Safety hazards (unsafe workplace condition) – confined space, excavations, falling objects, gas leaks, electrical, poor storage of materials and waste, spillage, waste and debris 1.7. Unsafe workers' act (Smoking in off-limited areas, Substance and alcohol abuse at work) 1.8. Working with and near moving equipment / load shifting equipment. 1.9. Broken or damaged equipment or materials.
2. Safety signs and symbols	2.1 Direction signs (exit, emergency exit, etc.) 2.2 First aid signs 2.3 Danger Tags 2.4 Hazard signs 2.5 Safety tags 2.6 Warning signs
3. Personal Protective Equipment (PPE)	3.1 Apron 3.2 Safety Helmet 3.3 Goggles 3.4 Ear muffs 3.5 Ear plugs 3.6 Gloves 3.7 Clothing 3.8 Safety Boots 3.9 Face Protection (Musk & Shield) 3.10 Scarf 3.11 Hair Net/cap/bonnet 3.12 Hard hat

4. Preventive Control Measures	4.1 Eliminate the hazard (i.e., get rid of the dangerous machine) 4.2 Isolate the hazard (i.e. keep the machine in a closed room and operate it remotely; barricade an unsafe area off) 4.3 Substitute the hazard with a safer alternative (i.e., replace the machine with a safer one) 4.4 Use administrative controls to reduce the risk (i.e. give trainings on how to use equipment safely; OSH-related topics, issue warning signage, rotation/shifting work schedule) 4.5 Use engineering controls to reduce the risk (i.e. use safety guards to machine) 4.6 Use personal protective equipment 4.7 Safety, Health and Work Environment Evaluation 4.8 Periodic and/or special medical examinations of workers
5. Workplace Procedures	5.1 Fire fighting 5.2 Medical and first aid 5.3 Evacuation 5.4 Material Safety Data Sheets (MSDSs) and manufacturers' advice
6. Company policies	6.1 Job related Standard Operating Procedures (SOPs). 6.2 Occupational Health and Safety (OSH) specific procedures. 6.3 Examples of OSH procedures include – consultation and participation, emergency response to specific hazards, incident investigation, risk assessment, reporting arrangement and issue resolution procedures.

Curricular Content Guide

1. Underpinning Knowledge	1.1 OSH Workplace Policies and Procedures. 1.2 Work safety procedures. 1.3 Fire and emergency procedures. 1.4 Types of Hazards (Biological, Chemical and Physical) and their effects. 1.5 PPE types and uses. 1.6 Personal hygiene practices. 1.7 OSH awareness. 1.8 Steps of hazard identification. 1.9 Principles of hazards control. 1.10 Employer's role. 1.11 Supervisor's responsibilities.
---------------------------	--

2. Underpinning Skills	2.1 Identifying OSH policies and procedures. 2.2 Following personal work safety practices. 2.3 Reporting hazards and risks. 2.4 Responding to emergency procedures. 2.5 Maintaining physical well-being in the workplace. 2.6 Identify tools and equipment related to OSH. 2.7 Improving OSH performance.
3. Underpinning Attitudes	3.1. Commitment to occupational health and safety 3.2. Promptness in carrying out activities 3.3. Sincere and honest to duties 3.4. Environmental concerns 3.5. Eagerness to learn 3.6. Tidiness and timeliness 3.7. Respect for rights of peers and seniors in the workplace 3.8. Communication with peers, subordinates and seniors in the workplace
4. Resource Implications	The following resources must be provided: 4.1 Workplace (actual or simulated). 4.2 Tools and equipment appropriate to workplace. 4.3 Materials relevant to the proposed activity. 4.4 All tools, equipment, material and documentation required. 4.5 Relevant specifications or work instructions.

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1 Identified, controlled and reported OSH hazards 1.2 Conducted work safely 1.3 Followed emergency response procedures 1.4 Maintained and improved health and safety in the workplace
2. Methods of Assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical Demonstration 2.3 Oral Questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

Unit of Competency: RECEIVE AND RESPOND TO WORKPLACE INSTRUCTIONS	Nominal Duration: 10 Hrs.	Unit Code: SICIP-JUTE-JPD-02-G
Unit Descriptor: This unit covers the knowledge, skills and attitudes required to receive and respond to workplace communication. It specifically includes the tasks of interpreting and following verbal instructions; reading and interpreting workplace documents; receiving and following written instructions and attending meetings and providing inputs.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Interpret and follow verbal Instructions	1.1 Verbal Instructions are interpreted. 1.2 Questions are asked to clarify understanding or obtaining more information. 1.3 Instructions are followed as per understanding. 1.4 Information/ instruction is recorded.
2. Read and Interpret Workplace Documents	2.1 <u>Written instructions</u> are read and interpreted in accordance with <u>workplace guidelines</u> . 2.2 Work <u>signage</u> are interpreted.
3. Receive and follow written instructions	3.1 Written instructions are interpreted. 3.2 Routine written instructions are followed in sequence. 3.3 Feedback is given to workplace supervisor based on workplace guidelines.
4. Attend meetings and provide inputs	4.1 Meetings are attended regularly and on time following well-disseminated agenda. 4.2 Proper <u>Communication</u> methods are used to transmit instructions 4.3 Appropriate non-verbal communication is used. 4.4 Inputs are provided consistent with the meeting purpose. 4.5 Opinions are expressed without interruption. 4.6 Meeting outputs are implemented.

Range of Variables

Variable	Range (Includes but not limited to):
1. Written instructions	1.1 Supervisor's / Manager's Instructions 1.2 Memoranda 1.3 Rules and Regulations

	1.4 Signage 1.5 Approved Work Plan 1.6 External communications
2. Workplace guidelines	2.1 Labor Policies and Guidelines 2.2 Written Instructions 2.3 Operations Manual 2.4 Organizational Manuals 2.5 Quality Assurance Handbook
3. Signage	3.1 On-site direction signs 3.2 Common site warnings 3.3 Location signs 3.4 Traffic signs
4. Communication	4.1 Verbal instructions 4.2 Written instructions 4.3 Online communication

Curricular Content Guide

1. Underpinning Knowledge	1.1. Workplace Communication Policies, Standards and Procedures. 1.2. Verbal and Non-verbal communication. 1.3. Modes of Communication.
2. Underpinning Skills	2.1 Receiving verbal instructions 2.2 Interpreting verbal and written information/ instruction 2.3 Conveying instructions using verbal and 2.4 Written forms of communication 2.5 Participating in work place meetings and Discussions
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincere and honest to duties 3.4 Environmental concerns 3.5 Eagerness to learn 3.6 Tidiness and timeliness 3.7 Respect for rights of peers and seniors in the workplace 3.8 Communication with peers, subordinates and seniors in the workplace
4. Resource Implications	The following resources must be provided: 4.1 Workplace (simulated or actual) 4.2 Facilities appropriate to the process or activities. 4.3 Materials are relevant to the proposed activity. 4.4 Stationary 4.5 Learning manual

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1. Interpreted and followed verbal Instructions 1.2. Read and Interpreted Workplace Documents 1.3. Received and followed written instructions 1.4. Attended meetings and provided inputs
2. Methods of Assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical Demonstration 2.3 Oral Questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

Unit of Competency: OPERATE IN A TEAM ENVIRONMENT	Nominal Duration: 10 Hrs.	Unit Code: SICIP-JUTE-JPD-03-G
Unit Descriptor: This unit covers the knowledge, skills and attitudes required to operate in a team environment. It specifically includes the tasks of identify team goals and work processes, identify own role and responsibilities within team, communicating and co-operate with team members and practicing problem solving within the team.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Identify team goals and work processes.	1.1 Roles and objectives of the team are identified and interpreted. 1.2 Roles and responsibilities of team members are identified and interpreted.
2. Identify own role and responsibilities within team.	2.1 Personal role and responsibilities are identified within the team environment. 2.2 Reporting relationships are interpreted within team and external to team.
3. Communicate and co-operate with team members.	3.1 Other teammates' tasks are identified and support provided when requested. 3.2 The team is encouraged through <u>sharing information</u> or expertise, working together to solve problems, and putting team success first. 3.3 Views and opinions of other team members are interpreted and respected.
4. Practice problem solving within the team.	4.1 Problems faced at the individual and team level are identified and showed insight into the root-causes of the problems. 4.2 A range of solutions and courses of action are identified together with benefits, costs, and risks associated with each. 4.3 The good ideas of others to help develop solutions are recognised and advice sought from those who have solved similar problems. 4.4 It is looked beyond the obvious and not stopped at the first answers.

Range of Variables

Variable	Range (Includes but not limited to):
1. Sharing information	1.1. Agenda 1.2. Minutes 1.3. Progress and incident reports 1.4. Operational manuals 1.5. Visual and graphic materials 1.6. Emails and SMS 1.7. Phone directory 1.8. Policy, procedure and standards 1.9. OHS information

Curricular Content Guide

1. Underpinning Knowledge	1.1 Team goals and work processes 1.2 Roles and responsibilities 1.3 Finding problems and solving them
2. Underpinning Skills	2.1 Identifying own role and responsibilities within team 2.2 Communicating and co-operating with team members 2.3 Demonstrating problem solving within the team
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincere and honest to duties 3.4 Environmental concerns 3.5 Eagerness to learn 3.6 Tidiness and timeliness 3.7 Respect for rights of peers and seniors in the workplace 3.8 Communication with peers, subordinates and seniors in the workplace
4. Resource Implications	The following resources must be provided: 4.1 Workplace (simulated or actual) 4.2 Facilities appropriate to the process or activities. 4.3 Materials are relevant to the proposed activity. 4.4 Stationary 4.5 Learning manual

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1. identified own role and responsibilities within team 1.2. communicated and co-operated with team members 1.3. demonstrated problem solving within the team
-----------------------------------	---

2. Methods of Assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical Demonstration 2.3 Oral Questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

Sector Specific Competencies (30 hrs.)

Unit of Competency: CARRY OUT MEASUREMENTS AND CALCULATIONS	Nominal Duration: 10 Hrs.	Unit Code: SICIP-JUTE-JPD-01-S
Unit Descriptor: This unit covers the knowledge, skills and attitudes required to carry out measurements and calculations. It specifically includes the tasks of planning and prepare, obtaining measurements and performing calculations.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Plan and prepare.	1.1 Work instructions are confirmed and applied to the job in hand. 1.2 Materials to be measured are identified as per job specification. 1.3 Appropriate <u>measuring device</u> is identified and selected based on materials to be measured. 1.4 Specifications are obtained and verified from relevant <u>documents</u> .
2. Obtain measurements.	2.1 Method of obtaining measurement is selected and applied. 2.2 <u>Measurements</u> are obtained using appropriate device in accordance with job requirement. 2.3 Measurements, including area, volume, tolerance and clearance limits, are confirmed and applied.
3. Perform calculations.	3.1 <u>Calculations</u> , using basic operations, for determining material requirement are taken. 3.2 Appropriate <u>formulas</u> for calculating quantities are selected. 3.3 Quantities are estimated from the calculation taken. 3.4 Material quantities are calculated, confirmed and recorded within tolerances.

Range of Variables

Variable	Range (Includes but not limited to):
1. Measuring device	1.1. Measuring tape 1.2. Steel rule 1.3. Calculator 1.4. Sets square
2. Documents	2.1 Technical manuals

	2.2 Specifications 2.3 Sketches 2.4 Drawings 2.5 Charts 2.6 Photographs
3. Measurements	3.1 Length 3.2 Width 3.3 Weight 3.4 Tolerance
4. Calculations	4.1 Addition 4.2 Subtraction 4.3 Multiplication 4.4 Division 4.5 Area 4.6 Volume 4.7 Circumference 4.8 CBM (Cubic Meter) 4.9 Volumetric weight
5. Formulas	5.1 Fractions 5.2 Percentages 5.3 Mixed numbers 5.4 Conversions 5.5 Scales

Curricular Content Guide

1. Underpinning Knowledge	1.1 Measuring devices 1.2 Basic mathematical formulas 1.3 Simple calculation techniques 1.4 Garment allowances and tolerances 1.5 Recording data procedures
2. Underpinning Skills	2.1 Identifying appropriate measuring devices 2.2 Carrying out measurements for apparel 2.3 Performing calculations as per job requirement
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincere and honest to duties 3.4 Environmental concerns 3.5 Eagerness to learn 3.6 Tidiness and timeliness 3.7 Respect for rights of peers and seniors in the workplace 3.8 Communication with peers, subordinates and seniors in the workplace
4. Resource Implications	The following resources must be provided:

	4.1 Workplace (simulated or actual) 4.2 Tools, equipment and facilities appropriate to the process or activities. 4.3 Materials are relevant to the proposed activity. 4.4 Manuals
--	---

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1 identified and selected appropriate measuring devices 1.2 carried out measurements for apparel 1.3 identified and selected correct mathematical formula 1.4 Performed calculations as per job requirement
2. Methods of Assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical Demonstration 2.3 Oral Questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

Unit of Competency: APPLY KNOWLEDGE OF BUSINESS PLANNING	Nominal Duration: 20 Hrs.	Unit Code: SICIP-JUTEJPD-03-S
Unit Descriptor: This unit covers the knowledge, skills and attitudes required to apply knowledge of business planning. It specifically includes the tasks of identifying business plan, performing business survey and identifying banking requirements.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Identify business plan.	1.1 Business planning systems are identified. 1.2 Business <u>planning steps</u> are identified as per marketing plan. 1.3 Business plan is developed and prepared as per marketing plan.
2. Perform business survey.	2.1 <u>Market survey techniques</u> are identified. 2.2 Survey is conducted and information is collected. 2.3 Marketing plan is followed when conducting business survey.
3. Identify banking requirements.	3.1 <u>Banking requirements</u> for apparel business are identified and explained. 3.2 Banking requirements and procedures are finalized. 3.3 Bank account opening process is identified and described. 3.4 Financial requirements and loan process are identified.

Range of Variables

Variable	Range (Includes but not limited to):
1. Planning steps	1.1. Research 1.2. Strategize 1.3. Calculate 1.4. Draft 1.5. Revise 1.6. Proof
2. Market survey techniques	2.1 Focus group 2.2 One-on-one 2.3 Telephone 2.4 Mail 2.5 Online
3. Banking requirements	3.1 Trade license

	3.2 Bank account 3.3 TIN (Tax Identification Number) 3.4 VAT (Value Added Tax) 3.5 Factory license
--	---

Curricular Content Guide

1. Underpinning Knowledge	1.1 Business planning systems 1.2 Business planning steps 1.3 Market survey techniques 1.4 Marketing plans 1.5 Banking requirements 1.6 Financial requirements and loan process
2. Underpinning Skills	2.1 Preparing business plan 2.2 Carrying out business survey 2.3 Identifying banking requirements 2.4 Opening bank account
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincere and honest to duties 3.4 Environmental concerns 3.5 Eagerness to learn 3.6 Tidiness and timeliness 3.7 Respect for rights of peers and seniors in the workplace 3.8 Communication with peers, subordinates and seniors in the workplace
4. Resource Implications	The following resources must be provided: 4.1 Workplace (simulated or actual) 4.2 Equipment and facilities appropriate to the process or activities. 4.3 Materials are relevant to the proposed activity. 4.4 Manuals

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1 identified Business planning steps. 1.2 collected information. 1.3 identified Banking requirements for apparel business.
2. Methods of Assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical Demonstration 2.3 Oral Questioning

	2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

Occupation Specific Competencies

Unit of Competency: APPLY KNOWLEDGE ON JUTE PRODUCT DEVELOPMENT PROCESS	Nominal Duration: 25 Hrs.	Unit Code: SICIP-JUTE-JPD-01-O
Unit Descriptor: This unit covers the knowledge, skills, and attitude to interpret fundamentals of fashions and garments. It specifically includes the tasks of defining garments and types, interpreting fashion and design, identifying parts, points and measurements of garments and interpreting manufacturing process of garments.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Define Jute	1.1 Jute is defined as a natural fiber derived from the stem of the jute plant. 1.2 History of jute is described, emphasizing its role in the global market as a major fiber crop. 1.3 <u>Types of jute</u> are identified. 1.4 Characteristics of jute fibers are explained, making them suitable for a consumer product.
2. Describe jute product development process	2.1 Types of jute products are identified, distinguishing between <u>traditional products</u> and <u>diversified products</u> . 2.2 Process of jute product development is described. 2.3 Diversified jute product development is explained. 2.4 Role of sustainability in jute product development is interpreted.
3. Identify types of jute fabrics and trims	3.1 <u>Types of jute fabrics</u> are identified based on their texture, durability, and application. 3.2 Jute fabrics are categorized by their weight, strength, and finish. 3.3 <u>Trims used with jute fabrics</u> are identified based on their decorative or functional use in jute products. 3.4 Jute trims are recognized for their application in products enhancing both aesthetic appeal and functionality.
4. Identify jute fabric construction	4.1 <u>Jute fabric constructions</u> are identified based on their structure and durability. 4.2 Plain weave construction is recognized. 4.3 Twill weave is identified for its diagonal pattern.

	4.4 Satin weave is recognized for its smooth surface and shiny appearance. 4.5 Jute yarns are identified in terms of their construction. 4.6 Jute fabric finishes are identified and explained.
5. Identify the tools and equipment	5.1 Hand tools are identified and described based on their specific function and usage. 5.2 Measuring tools are identified for ensuring accurate measurements in production. 5.3 Cutting tools are identified for their application in shaping and trimming materials.

Range of Variables

Variable	Range (Includes but not limited to):
1. Types of jute	1.1 Tossa jute 1.2 White jute
2. Traditional products	2.1 Sacking 2.2 Hessian 2.3 Jute Ropes and Twines 2.4 Carpet Backing Cloth (CBC)
3. Diversified products	3.1 Jute Bags 3.2 Jute Fabrics 3.3 Jute Footwear 3.4 Jute Geotextiles 3.5 Jute home textile 3.6 Jute home holder 3.7 Jute gardening 3.8 Jute Paper 3.9 Jute Furniture 3.10 Jute Yarn and Thread 3.11 Jute Rugs and Mats 3.12 Jute Insulation Materials 3.13 Jute-Based Composites
4. Types of jute fabrics	4.1 Fine jute fabrics 4.2 Jute cotton fabrics 4.3 Benny bunon (Macrom)
5. Trims used with jute fabrics	5.1 Buttons 5.2 Zipper 5.3 Rivet 5.4 Velcro tape 5.5 Draw string 5.6 Ribbons 5.7 Laces

	5.8 Hook 5.9 Eyelet 5.10 Braids 5.11 Piping 5.12 Tassels 5.13 Fringes 5.14 Cord 5.15 Beads and Embellishments
6. Jute fabric constructions	6.1 Plain weave 6.2 Twill weave 6.3 Satin weave
7. Jute yarns	7.1 Single yarn 7.2 Ply yarn
8. Hand tools	8.1 Ball pin hammer 8.2 Screw driver 8.3 Combination Pliers 8.4 Nose pliers 8.5 Plastic hammer 8.6 Punching machine 8.7 Stitch opener
9. Measuring tools	9.1 Measuring tape 9.2 Measuring scale 9.3 Steel ruler 9.4 Tri-square 9.5 Shape card
10. Cutting tools	10.1 Scissors 10.2 Trimmers 10.3 Anti-cutter 10.4 Thread cutter

Curricular Content Guide

1. Underpinning Knowledge	1.1
2. Underpinning Skills	2.1
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincere and honest to duties 3.4 Environmental concerns 3.5 Eagerness to learn 3.6 Tidiness and timeliness 3.7 Respect for rights of peers and seniors in the workplace 3.8 Communication with peers, subordinates and seniors in the workplace

4. Resource Implications	The following resources must be provided: 4.1 Workplace (actual or simulated) 4.2 Projector 4.3 Stationary 4.4 Learning manual 4.5 Accessibility to the workplace
--------------------------	--

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1
2. Methods of Assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical Demonstration 2.3 Oral Questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

Unit of Competency: OPERATE SEWING MACHINE	Nominal Duration: 60 Hrs.	Unit Code: SICIP-JUTE-JPD-02-O
Unit Descriptor: This unit covers the knowledge, skills, and attitude required to develop design for garments. It specially includes the tasks of using tools and materials for designing, performing initial process of designing and developing final design.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Identify different types sewing machine	1.1. <u>Different types of sewing machine</u> are identified. 1.2. Types of sewing machine is categorized. 1.3. The functions of sewing machines are interpreted and described.
2. Identify parts of sewing machines	2.1 <u>Parts of a single needle chain stitch machine</u> are identified, 2.2 Functions of single needle chain stitch machine parts are explained. 2.3 <u>Parts of an overlock machine (three-thread)</u> are identified. 2.4 Functions of overlock machine (three-thread) machine parts are explained.
3. Set up the sewing machine	3.1 Threading of the machine is performed by placing the thread through the thread guides. 3.2 <u>Needle</u> is selected according to the fabric type and sewing requirements. 3.3 Presser foot is attached and adjusted based on the fabric thickness and stitching needs. 3.4 Machine settings and tension are adjusted based on fabric type and stitching requirements. 3.5 Machine is tested on scrap fabric to ensure proper stitching.
4. Perform the sewing machine operation	4.1 Straight stitch is performed using paper to control machine settings. 4.2 Round stitch is performed using paper as a guide to control machine settings. 4.3 Zigzag stitch is performed using paper to control the machine's width and length settings. 4.4 Sewing speed is controlled for each stitch type (straight, round, zigzag).

5. Maintain the sewing machine	5.1 Needle is removed or replaced with a new needle based on the fabric type and sewing requirements. 5.2 Needle bar and needle clamp are checked for tightness and alignment. 5.3 Bobbin case and bobbin are checked for cleanliness and proper threading. 5.4 Machine cleaning is performed by removing lint, dust, and any debris from the machine parts. 5.5 Lubrication of moving parts is carried out as per manufacturer's instructions.
--------------------------------	---

Range of Variables

Variable	Range (Includes but not limited to):
1. Different types of sewing machine	1.1 Single needle lockstitch machine. 1.2 Overlock machine (three-thread)
2. Parts of a single needle chain stitch machine	2.1 Needle 2.2 Presser Foot 2.3 Take of liver 2.4 Feed Mechanism 2.5 Needle Plate 2.6 Bobbin Case 2.7 Looper 2.8 Thread Tension Discs 2.9 Upper Thread Guide 2.10 Stitch Length Regulator 2.11 Hand Wheel 2.12 Foot paddle 2.13 Motor
3. Parts of an overlock machine (three-thread)	3.1 Needles 3.2 Presser Foot 3.3 Feed Dogs 3.4 Needle Plate 3.5 Upper Looper 3.6 Lower Looper 3.7 Thread Tension Discs 3.8 Stitch Finger 3.9 Knife 3.10 Differential Feed 3.11 Motor 3.12 Hand Wheel
4. Needle	4.1 Universal Needle 4.2 Ballpoint Needle

Curricular Content Guide

1. Underpinning Knowledge	1.1
2. Underpinning Skills	2.1
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincere and honest to duties 3.4 Environmental concerns 3.5 Eagerness to learn 3.6 Tidiness and timeliness 3.7 Respect for rights of peers and seniors in the workplace 3.8 Communication with peers, subordinates and seniors in the workplace
4. Resource Implications	The following resources must be provided: 4.1 Workplace (actual or simulated) 4.2 Tools and materials for designing 4.3

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1
2. Methods of Assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical Demonstration 2.3 Oral Questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

Unit of Competency: PRODUCE JUTE BAGS	Nominal Duration: 75 Hrs.	Unit Code: SICIP-JUTE-JPD-03-O
Unit Descriptor: This unit covers the knowledge, skills, and attitude required to perform fabric ornamentation. It specially includes the tsks of interpreting fashion fabric ornamentation, carrying out Hand Embroidery, carrying out Block Printing, carrying out Tie-Dye Batik Printing, carrying out Screen Printing and cleaning and maintaining workplace.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Create pattern for jute bag	1.1 <u>Pattern making tools</u> are collected as per job requirements. 1.2 Measurement is taken as per measurement chart or sample. 1.3 Pattern for lunch carrier bag is created as per measurement chart or sample. 1.4 Pattern for official bag is created as per measurement chart or sample.
2. Cut fabric for bag components	2.1 <u>Jute fabric</u> is selected based on the pattern requirements and bag design. 2.2 Jute fabric is measured according to the pattern size and marked clearly for cutting. 2.3 <u>Cutting tools</u> are used to ensure clean and accurate edges. 2.4 Components of the bag are cut from the fabric with precision. 2.5 Fabric pieces are checked after cutting to ensure they match the pattern dimensions. 2.6 Excess fabric is carefully trimmed or discarded to avoid waste.
3. Assemble fabric pieces and sew components	3.1 Fabric pieces are arranged and aligned according to the pattern design. 3.2 Fabric components are pinned, clipped, or basted together to ensure proper alignment before sewing. 3.3 Seams are stitched securely and evenly, using the appropriate stitch type for strength and durability. 3.4 Any <u>additional components</u> are sewn onto the main fabric pieces. 3.5 Stitched components are inspected for consistency in stitching, alignment, and secure seams.

	3.6 Excess threads are trimmed, and seams are pressed flat to achieve a neat and professional finish.
4. Finish the edges and add handles	4.1 Edges of the fabric pieces are finished using appropriate methods. 4.2 Handles are cut, measured, and prepared according to the pattern specifications. 4.3 Handles are positioned correctly on the bag. 4.4 Edges of handles are finished neatly, either by folding, pressing. 4.5 Final inspection is carried out to check for even stitching, secure handle attachment, and proper edge finishing.

Range of Variables

Variable	Range (Includes but not limited to):
1 Pattern making tools	1.1 Scissors 1.2 Anti-cutter 1.3 Measuring tape 1.4 Marking chalk 1.5 Scale 1.6 Shape card 1.7 Ball pin hammer
2 Jute fabric	2.1 Fine jute fabrics 2.2 Jute cotton fabrics 2.3 Benny bunon (Macrom)
3 Cutting tools	3.1 Scissors 3.2 Trimmers 3.3 Anti-cutter 3.4 Thread cutter
4 Additional components	4.1 Buttons 4.2 Velcro tape 4.3 Zipper 4.4 Bock less

Curricular Content Guide

1 Underpinning Knowledge	1.1
2 Underpinning Skills	2.1
3 Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincere and honest to duties 3.4 Environmental concerns 3.5 Eagerness to learn

	3.6 Tidiness and timeliness 3.7 Respect for rights of peers and seniors in the workplace 3.8 Communication with peers, subordinates and seniors in the workplace
4 Resource Implications	The following resources must be provided: 4.1 Workplace (actual or simulated) 4.2 Tools and materials for designing 4.3

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1
2. Methods of Assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical Demonstration 2.3 Oral Questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

Unit of Competency: PRODUCE JUTE WALLET AND FOLDER	Nominal Duration: 60 Hrs.	Unit Code: SICIP-JUTE-JPD-04-O
Unit Descriptor: This unit covers the knowledge, skills, and attitude to perform pattern making and fabric cutting. It specifically includes the tasks of practicing OSH, carrying out measurement, preparing pattern, performing fabric cutting and cleaning and maintaining workplace.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Create pattern for wallet and folder	1.1 <u>Pattern making tools</u> are collected as per job requirements. 1.2 Measurement is taken as per measurement chart or sample. 1.3 Pattern for gent's wallet is created as per measurement chart or sample. 1.4 Pattern for lady's wallet is created as per measurement chart or sample. 1.5 Pattern for folder is created as per measurement chart or sample.
2. Cut jute fabric for wallet and folder	2.1 <u>Jute fabric</u> is selected based on the pattern requirements for wallet and folder design. 2.2 Jute fabric is measured according to the pattern size and marked clearly for cutting. 2.3 <u>Cutting tools</u> are used to ensure clean and accurate edges. 2.4 Components of the wallet are cut from the fabric with precision. 2.5 Components of the folder are cut from the fabric with precision. 2.6 Fabric pieces are checked after cutting to ensure they match the pattern dimensions. 2.7 Excess fabric is carefully trimmed or discarded to avoid waste.
3. Sew jute wallet and folder	3.1 Fabric pieces are arranged and aligned according to the pattern design. 3.2 Fabric components are pinned or joint using glue gun using ball pin hammer before sewing. 3.3 Jute pieces are sewn together following the pattern, ensuring even stitching and secure seams.

	3.4 Any decorative stitching or additional components are sewn according to the design specifications. 3.5 Sewing is checked for strength, neatness, and consistency.
4. Finish the jute wallet and folder	4.1 Jute wallet and folder are inspected to ensure all materials and components are properly assembled. 4.2 Stitching or bonding is checked to confirm it is secure and neat. 4.3 Any excess material or threads are trimmed to ensure a clean finish. 4.4 Final product is checked for quality, including the alignment of patterns and smoothness of edges. 4.5 Wallet and folder are cleaned and polished, if necessary, to enhance appearance. 4.6 Completed jute wallet and folder are packed or stored appropriately for delivery or display.

Range of Variables

Variable	Range (Includes but not limited to):
1. Pattern making tools	1.1 Scissors 1.2 Anti-cutter 1.3 Measuring tape 1.4 Marking chalk 1.5 Scale 1.6 Shape card 1.7 Ball pin hammer
2. Jute fabric	2.1 Fine jute fabrics 2.2 Jute cotton fabrics 2.3 Benny bunon (Macrom)
3. Cutting tools	3.1 Scissors 3.2 Trimmers 3.3 Anti-cutter 3.4 Thread cutter
4. Additional components	4.1 Buttons 4.2 Velcro tape/magnet 4.3 Zipper

Curricular Content Guide

1. Underpinning Knowledge	1.1
2. Underpinning Skills	2.1
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincere and honest to duties

	3.4 Environmental concerns 3.5 Eagerness to learn 3.6 Tidiness and timeliness 3.7 Respect for rights of peers and seniors in the workplace 3.8 Communication with peers, subordinates and seniors in the workplace
4. Resource Implications	The following resources must be provided: 4.1 Workplace (simulated or actual) 4.2 PPE 4.3 Measuring tools 4.4

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1
2. Methods of Assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical Demonstration 2.3 Oral Questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

Unit of Competency: PRODUCE JUTE BOX ITEMS	Nominal Duration: 55 Hrs.	Unit Code: SICIP-JUTE-JPD-05-O
Unit Descriptor: This unit covers the knowledge, skills, and attitude required to perform sewing machine operation. It specifically includes the tasks of practicing OSH, operating sewing machine, performing different stitching, performing basic maintenance of sewing machine and cleaning workplace and machine.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Create pattern for jute box items	1.1 <u>Pattern making tools</u> are collected as per job requirements. 1.2 Measurement is taken as per measurement chart or sample. 1.3 Pattern for tissue box is created as per measurement chart or sample. 1.4 Pattern for ornamental box is created as per measurement chart or sample. 1.5 Pattern is reviewed for size and functionality before finalizing the design for production.
2. Cut fabric and paper board for jute box items	2.1 <u>Jute fabric</u> is selected based on the pattern requirements for tissue box and ornamental box design. 2.2 Jute fabric is measured according to the pattern size and marked clearly for cutting. 2.3 <u>Cutting tools</u> are used to ensure clean and accurate edges. 2.4 Components of the tissue boxes are cut from the fabric with precision. 2.5 Components of the ornamental boxes are cut from the fabric with precision. 2.6 Paperboard is cut according to the design requirements for both tissue and ornamental boxes. 2.7 Fabric pieces are checked after cutting to ensure they match the pattern dimensions.
3. Sew Jute Box Items	3.1 Fabric pieces are arranged and aligned according to the pattern design, ensuring proper fit and structure. 3.2 Fabric components are pinned or joined using glue gun and ball pin hammer to secure them before sewing.

	3.3 Paperboard is carefully aligned with the fabric pieces and stitched. 3.4 Jute pieces are sewn together following the pattern attachment to the paperboard. 3.5 Any additional components are sewn according to the design specifications. 3.6 Sewing is checked for strength, neatness, and consistency.
4. Finish the Jute Box items	4.1 Tissue box and ornamental boxes are inspected to ensure all materials and components are properly assembled. 4.2 Stitching or bonding is checked to confirm it is secure and neat. 4.3 Any excess material or threads are trimmed to ensure a clean finish. 4.4 Final product is checked for quality, including the alignment of patterns and smoothness of edges. 4.5 Tissue box and ornamental boxes are cleaned and polished, if necessary, to enhance appearance. 4.6 Completed tissue box and ornamental boxes are packed or stored appropriately for delivery or display.

Range of Variables

Variable	Range (Includes but not limited to):
1. Pattern making tools	1.1. Scissors 1.2. Anti-cutter 1.3. Measuring tape 1.4. Marking chalk 1.5. Scale 1.6. Shape card 1.7. Ball pin hammer
2. Jute fabric	2.1 Fine jute fabrics 2.2 Jute cotton fabrics 2.3 Benny bunon (Macrom)
3. Cutting tools	3.1 Scissors 3.2 Trimmers 3.3 Anti-cutter 3.4 Thread cutter
4. Additional components	4.1 Buttons 4.2 Velcro tape/magnet

Curricular Content Guide

1. Underpinning Knowledge	1.1
2. Underpinning Skills	2.1
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincere and honest to duties 3.4 Environmental concerns 3.5 Eagerness to learn 3.6 Tidiness and timeliness 3.7 Respect for rights of peers and seniors in the workplace 3.8 Communication with peers, subordinates and seniors in the workplace
4. Resource Implications	The following resources must be provided: 4.1 Workplace (simulated or actual) 4.2 PPE 4.3

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1
2. Methods of Assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical Demonstration 2.3 Oral Questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

Unit of Competency: PERFORM QUALITY CONTROL IN JUTE PRODUCT	Nominal Duration: 25 Hrs.	Unit Code: SICIP-JUTE-JPD-06-O
Unit Descriptor: This unit covers the knowledge, skills, and attitude required to perform sewing and finishing. It specially includes the tasks of practicing OSH, sewing garments, checking quality of garments, carrying out finishing & packing and cleaning workplace and machine.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Identify Quality Procedures	1.1 <u>Quality control processes</u> are identified to maintain product integrity. 1.2 Procedures for material inspection are identified. 1.3 Quality assurance measures are identified.
2. Identify Jute fabric defects	2.1 <u>Weaving defects</u> are identified in the jute fabric. 2.2 <u>Finishing defects</u> are identified in the fabric's surface. 2.3 <u>Quality of stitching</u> is checked to ensure it meets quality standards. 2.4 Fabric's texture and appearance are identified.
3. Perform Routine Maintenance	3.1 <u>Maintenance of sewing machine</u> requirements is identified and interpreted 3.2 Basic maintenance is performed as per job requirement. 3.3 Machine is cleaned and lubricated as per machine manual.

Range of Variables

Variable	Range (Includes but not limited to):
1. Quality control processes	1.1 Raw Material Inspection 1.2 Weaving Inspection 1.3 Shrinkage checking 1.4 Defect Detection 1.5 Dimensional Control 1.6 Packaging Check 1.7 Final Product Check
2. Weaving defects	2.1 Broken ends or picks 2.2 Floats 2.3 Loose or tight ends/picks 2.4 Reed marks

	2.5 Slobs
3. Finishing defects	3.1 Unwanted marks 3.2 Discoloration 3.3 Pinholes 3.4 Puckering 3.5 Bowing 3.6 Pilling
4. Quality of Stitching	4.1 SPI (Stitch Per Inch) 4.2 Seam strength 4.3 Loose ends 4.4 Gap stitches 4.5 Frayed edges
5. Maintenance of sewing machine	5.1 Needle condition check 5.2 Needle change 5.3 Thread tension adjustment 5.4 Folder and guide adjustment 5.5 Oil level check

Curricular Content Guide

1. Underpinning Knowledge	1.1
2. Underpinning Skills	2.1
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincere and honest to duties 3.4 Environmental concerns 3.5 Eagerness to learn 3.6 Tidiness and timeliness 3.7 Respect for rights of peers and seniors in the workplace 3.8 Communication with peers, subordinates and seniors in the workplace
4. Resource Implications	The following resources must be provided: 4.1 Workplace (simulated or actual) 4.2 PPE

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1
2. Methods of Assessment	Competency should be assessed by: 2.1 Written test

	2.2 Practical Demonstration 2.3 Oral Questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

Workshop/Lab Facility Standard

Course Name:	Jute Product Development
Number of Trainees:	25

Course-wise Training Space (Theoretical Classroom, Workshop/ Lab/ Classroom cum Workshop):

- Classroom – 350 sft (33 sqm)
 - Workshop/ lab – 800 sft (75 sqm)
- OR
- Classroom cum workshop – 1000 sft (93 sqm)

Major Training Equipment and Training Facilities:

S. N.	Major Equipment and Training facilities	Required facilities
1.	Computers/Laptop	01
2.	Multimedia projector with screen	01
3.	Printer	01
4.	Single needle chain stitch machine	25
5.	Overlock machine	02
6.	Machine tools	25
7.	Rotary cutting machine	01
8.	Cutting table	01
9.	Cutting tools	25
10.	Pattern making tools	25
11.	Measuring tools	25

The following conditions must be fulfilled –

- The institute shall not use the same facilities for any other projects/organizations offering a similar course.
- The institute must provide sufficient evidence to prove ownership of the proposed training equipment.

The list denotes the minimum training equipment and facility required to effectively conduct training for a specific course. Additionally, the institute must ensure that all other necessary training tools, equipment, and furniture are available to meet the requirement of competency standards (CS) provided by SICIP.

For the operation of training course on Jute Product Development, the institute must ensure the availability of at least 80% of the major training equipment and training facilities (according to the CS) to be eligible for SICIP training delivery. If the score is below 80%, the remaining equipment and facilities need to be installed before the commencement of the training.

The institute will also provide all other hand tools and power tools as per CS for 25 trainees. Also, they will arrange adequate seating arrangement and classroom setup for the 25 trainees.
