

COMPETENCY STANDARD

FOR

**COMPLIANCE & SUSTAINABILITY FOR FOOTWEAR &
LEATHER GOODS SECTOR**

(LEATHER GOODS & FOOTWEAR SECTOR)

Skills for Industry Competitiveness and Innovation Program (SICIP)
Finance Division, Ministry of Finance

COPYRIGHT

The Competency Standards for **Compliance & Sustainability for Footwear & Leather Goods Sector** is designed to guide the development of curricula, teaching materials, and assessment tools. It also serves as a framework for providing industry-aligned training, ensuring that individuals meeting the prescribed standards through assessments are qualified to secure relevant employment opportunities.

This document was originally developed under the **Skills for Employment Investment Program (SEIP)** and later reviewed and updated with the input from occupation-specific industry experts to be utilized in training initiatives under the **Skills for Industry Competitiveness and Innovation Program (SICIP)**. The document is owned by the Finance Division, Ministry of Finance, People's Republic of Bangladesh.

While public and private institutions are permitted to use the information from this standard for activities that benefit Bangladesh, other parties must seek prior permission from the document's owner for reproducing its content, either partially or entirely, in English or other languages.

INTRODUCTION:

The Skills for Industry Competitiveness and Innovation Program (SICIP) has the overall objective of developing a skilled workforce adept at handling new technologies, especially for emerging industries in Bangladesh. It will expand skills training and strengthen the development of the training ecosystem to address the skills requirements of the SICIP-selected industry sectors. The program aims to (i) increase the technology-oriented skilled workforce across emerging and priority sectors, (ii) promote inclusive skilling and upskilling opportunities for women and socially disadvantaged groups, (iii) incentivize industry-university partnerships to nurture innovation capacity and improve industry competitiveness, and (iv) foster skills for climate-resilient manufacturing processes and green technologies. The program is expected to benefit about 220,000 new and existing workers over a 6-year implementation period from 2024-2029.

The SICIP Program has, therefore, taken the initiative to enhance the employability and productivity of trainees by implementing market-responsive and job-focused training programs through public and private training providers. This will require the development of competency standards for each of the occupations/trades which will provide a structured framework in the learning process to guide training providers, ensure consistent training quality, and create an alignment between the skills provided by the training institutes and the needs of the industry.

The Competency Standard also suggests integration of YouTube or similar platforms or downloaded clips into classroom practice to ensure simulated creation of the contents so that learners are exposed to visual demonstrations before classroom instruction or practical session, which aligns with modern learning preference and supports flipped classroom models.

This competency standard is therefore developed to improve skills following the job roles and skill sets of the occupation and ensure that the required skills are aligned with industry requirements.

The document details the format, sequencing, wording, and layout of the Competency Standard for an occupation which comprises Units of Competence and its corresponding Elements.

OVERVIEW:

A **Competency Standard** is a written specification of the knowledge, skills, and attitudes required for the performance of a job or occupation or trade corresponding to the standard of performance required in the workplace.

Competency standard:

- provides a consistent and reliable set of components for training, recognizing, and assessing people's skills, and may also have optional support materials.
- enables industry-recognized qualifications to be awarded through direct assessment of workplace competencies
- encourages the development and delivery of flexible training that suits individual and industry requirements
- encourages learning and assessment in a work-related environment which leads to verifiable workplace outcomes.

Competency Standards are developed by a working group comprised of national and international process experts and the participation of experts from the industry to identify the competencies required of an occupation in a particular sector.

Competency Standards describe the skills, knowledge, and attitude needed to perform effectively in the workplace. Competency Standards acknowledge that people can achieve vocational and technical competency in many ways by emphasizing what the learner can do, not how or where they learned to do it.

With Competency Standards, assessment and training may be conducted at the workplace, at training organization, during regular work, or through work experience, work placement, work simulation or any combination of these.

A Unit of Competency describes a distinct work activity that would normally be undertaken by one person in accordance with industry standards.

Units of Competency are documented in a standard format that comprises:

- Reference to Industry Sector, Occupational Title and Occupational Description
- Unit code
- Unit title
- Unit descriptor
- Elements and performance criteria
- Variables and range statement
- Evidence guides

Together all the parts of a Unit of Competency:

- Describe a work activity
- Guide the assessor in determining whether the candidate is competent.

Competency Standard has been developed by a working group comprised of occupation-specific experts from the industry/institution, relevant consultants of SICIP.

The ensuing sections of this document comprise a description of the respective occupation with all the key components of a Unit of Competence:

- An overview of all Units of Competence for the occupation and their corresponding duration required for completion of training.
- The Competency Standards that include the Unit of Competency, Unit Descriptor, Elements and Performance Criteria, Range of Variables, Curricular Content Guide, and Assessment Evidence Guide.

Units & Elements at a Glance:**Generic Competencies (30 Hrs.)**

Code	Unit of Competency	Elements of Competency	Duration (Hours)
SICIP-LET-CSL-01-G	Carry out workplace interaction	1. Interpret workplace communication and etiquette 2. Read and understand workplace documents 3. Participate in workplace meetings and discussions 4. Practice professional ethics at work	15
SICIP-LET-CSL-02-G	Operate in a team environment	1. Identify team goals and work processes 2. Identify own role and responsibilities within team 3. Communicate and co-operate with team members 4. Practice problem solving within the team	15
Total Hour			30

Sector Specific Competencies (20 hrs.)

Code	Unit of Competency	Elements of Competency	Duration (Hours)
SICIP-LET-CSL-01-S	Carry out measurements and calculations	1. Plan and prepare 2. Obtain measurements 3. Perform calculations	10
SICIP-LET-CSL-02-S	Apply green practices in LET sector	1. Interpret green concepts 2. Minimize resource use in the workplace 3. Implement waste management practices	10
Total Hour			20

Occupation Specific Competencies (250 hrs.)

Code	Unit of Competency	Elements of Competency	Duration (hours)
SICIP-LET-CSL-01-O	Interpret compliance and sustainability with in legal and regulatory framework	1. Understand the concept of compliance in the leather and footwear industry 2. Identify compliance issues and their impacts on the industry 3. Define the roles and responsibilities of compliance officers 4. Understand different law and rules 5. Recognize the regulatory framework 6. Identify organizational policies and procedures	30
SICIP-LET-CSL-02-O	Interpret Social Compliance Standards & Audits	1. Identify major social compliance standards 2. Implement audit procedures for social compliance 3. Document and maintain audit findings 4. Develop and implement corrective action plans (CAP) 5. Ensure compliance with buyer codes of conduct	70
SICIP-LET-CSL-03-O	Implement Occupational Health and Safety (OHS) Practices	1. Understand and apply OHS policies and procedures 2. Follow workplace safety standards and emergency response plans 3. Identify hazards in the workplace 4. Conduct risk assessment and develop mitigation strategies	70
SICIP-LET-CSL-04-O	Manage Environmental Practices in Chemical and Waste Management	1. Assess environmental management issues in industry 2. Implement chemical management practices 3. Manage waste disposal and recycling systems 5. Monitor and report on environmental management performance	50

Code	Unit of Competency	Elements of Competency	Duration (hours)
SICIP-LET-CSL-05-O	Manage Industrial Relations & Employee Welfare	1. Facilitate worker representation and participation 2. Implement grievance handling procedures 3. Resolve workplace disputes and ensure harmony 4. Implement employee welfare initiatives 5. Understand employment life cycle	30
Total Hours			250

COMPETENCY STANDARD: COMPLIANCE & SUSTAINABILITY FOR FOOTWEAR & LEATHER GOODS SECTOR

Generic Competencies

UNIT OF COMPETENCY: CARRY OUT WORKPLACE INTERACTION	Nominal Duration: 15 hrs.	Unit Code: SICIP-LET-CSL-01-G
Unit Descriptor: This unit covers the skills, knowledge and attitudes required to carry out workplace interaction. It specifically includes the task of interpreting workplace communication and etiquette, Reading and understanding workplace documents, participating in workplace meetings and discussions and practicing professional ethics at work.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Interpret workplace communication and etiquette	1.1 Workplace codes of conduct are interpreted as per organizational guidelines. 1.2 Appropriate lines of communication are maintained with supervisors and colleagues. 1.3 Workplace interactions are conducted in a <u>courteous manner</u> to gather and convey information. 1.4 <u>Workplace procedures and matters</u> are comprehended.
2. Read and understand workplace documents	2.1 Workplace documents are interpreted correctly. 2.2 Visual information/symbols/signage are understood correctly and followed. 2.3 Specific and relevant information are accessed from <u>appropriate sources</u> . 2.4 Appropriate medium is used to transfer information and ideas.
3. Participate in workplace meetings and discussions	3.1 Team meetings are attended on time. 3.2 Meeting procedures and etiquette are followed. 3.3 Active participation is ensured, opinions are expressed and heard. 3.4 Inputs are provided and interpreted in line with the meeting purpose.
4. Practice professional ethics at work	4.1 Responsibilities as a team member are performed. 4.2 Tasks are performed in accordance with workplace procedures. 4.3 Confidentiality is maintained. 4.4 Inappropriate and conflicting situations are avoided.

Range of variables:

Variables	Range (may include but not limited to)
1. Courteous manner	1.1 Effective questioning 1.2 Active listening 1.3 Speaking skills 1.4 Writing skill 1.5 Email etiquette
2. Workplace procedures and matters	1.6 Notes 1.7 Arranging a meeting 1.8 Agenda 1.9 Simple reports such as progress and incident reports 1.10 Job sheets 1.11 Operational manuals 1.12 Brochures and promotional material 1.13 Visual and graphic materials 1.14 Standards 1.15 OHS information 1.16 Signs
3. Appropriate sources	1.17 Human Resources (HR) Department 1.18 Managers 1.19 Supervisors 1.20 Management Information System (MIS)

Curricular Content Guide

1. Underpinning knowledge	1.1 Workplace codes of conduct 1.2 Workplace communication and etiquette 1.3 Workplace documents, signs and symbols 1.4 Meeting procedure and etiquette 1.5 Professional ethics 1.6 Responsibilities of team member
2. Underpinning skill	1.7 Demonstrating workplace communication and etiquette 1.8 Interpreting workplace instructions and symbols 1.9 Performing responsibilities of a team member 1.10 Demonstrating active participation in workplace meeting 1.11 Applying professional ethics at work
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincere and honest to duties 3.4 Environmental concerns 3.5 Eagerness to learn 3.6 Tidiness and timeliness 3.7 Respect for rights of peers and seniors in the workplace 3.8 Communication with peers, subordinates and seniors in the workplace
4. Resource implications	The following resources must be provided:

	1.1 Workplace (simulated or actual) 1.2 Projector 1.3 Learning manual
--	---

Assessment Evidence Guide

1. Critical aspects of competency	Assessment required evidence that the candidate: 1.1 Interpreted workplace communication and etiquette 1.2 Interpreted workplace instructions and symbols 1.3 Performed active participation in workplace meetings 1.4 Performed responsibilities of a team member
2. Methods of assessment	Competency should be assessed by: 1.5 Written test 1.6 Practical Demonstration 1.7 Oral Questioning 1.8 Portfolio (Optional)
3. Context of assessment	1.9 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 1.10 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

Unit of Competency: OPERATE IN A TEAM ENVIRONMENT	Nominal Duration: 15 hrs.	Unit Code: SICIP-LET-CSL-02-G
Unit Descriptor: This unit covers the skills, knowledge and attitudes required to operate in a team environment. It specifically includes the task of identifying team goals and work processes, identifying own role and responsibilities within team, communicating and cooperating with team members and practicing problem solving within the team.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Identify team goals and work processes	1.1. Roles and objectives of the team are identified and interpreted. 1.2. Roles and responsibilities of team members are identified and interpreted.
2. Identify own role and responsibilities within team	2.1 Personal role and responsibilities are identified within the team environment. 2.2 Reporting relationships are interpreted within team and external to team.
3. Communicate and cooperate with team members	3.1 Other teammates' tasks are identified and support provided when requested. 3.2 The team is encouraged through <u>sharing information</u> or expertise, working together to solve problems, and putting team success first. 3.3 Views and opinions of other team members are interpreted and respected.
4. Practice problem solving within the team	4.1 Problems faced at the individual and team level are identified and showed insight into the root causes of the problems. 4.2 A range of solutions and courses of action are identified together with benefits, costs, and risks associated with each. 4.3 The good ideas of others to help develop solutions are recognized and advice sought from those who have solved similar problems. 4.4 It is looked beyond the obvious and not stopped at the first answers.

Range of variables:

Variables	Range (may include but not limited to)
------------------	---

1. Sharing information	1.1. Agenda 1.2. Minutes 1.3. progress and incident reports 1.4. Operational manuals 1.5. Visual and graphic materials 1.6. Emails and SMS 1.7. Phone directory 1.8. Policy, procedure and standards 1.9. OHS information
------------------------	---

Curricular Content Guide

1. Underpinning knowledge	1.1. Team goals and work processes 1.2. Roles and responsibilities of team members 1.3. Personal role and responsibilities 1.4. Sharing information 1.5. Views and opinions 1.6. Problem solving within the team
2. Underpinning skill	1.1. Identifying team goals and work processes 1.2. Identifying own role and responsibilities within team 1.3. Communicating and cooperating with team members 1.4. Practicing problem solving within the team
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincere and honest to duties 3.4 Eagerness to learn 3.5 Tidiness and timeliness 3.6 Environmental concerns 3.7 Respect for rights of peers and seniors at workplace 3.8 Communication with peers and seniors at workplace
4. Resource implications	The following resources must be provided: 4.1 Workplace (simulated or actual) 4.2 Projector 4.3 Stationery 4.4 Learning manual

Assessment Evidence Guide

1. Critical aspects of competency	Assessment required evidence that the candidate: 1.1 identified team goals and work processes 1.2 identified own role and responsibilities within team 1.3 communicated and cooperated with team members 1.4 practiced problem solving within the team
-----------------------------------	--

2. Methods of assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical Demonstration 2.3 Oral Questioning 2.4 Portfolio (Optional)
3. Context of assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

The Sector Specific Competencies

Unit of Competency: CARRY OUT MEASUREMENTS AND CALCULATIONS	Nominal Duration: 10 hrs.	Unit Code: SICIP-LET-CSL-01-S
Unit Descriptor: This unit covers the skills, knowledge and attitudes required for carry out measurements and calculations. It specifically includes the task of planning and preparing, obtaining measurements and performing calculations.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Plan and prepare	1.1. Work instructions are confirmed and applied to the job in hand. 1.2. Materials to be measured are identified as per job specification. 1.3. Appropriate <u>measuring device</u> is identified and selected based on materials to be measured. 1.4. Specifications are obtained and verified from relevant <u>documents</u> .
2. Obtain measurements	2.1 Method of obtaining measurement is selected and applied. 2.2 <u>Measurements</u> are obtained using appropriate device in accordance with job requirement. 2.3 Measurements, including area, volume, tolerance and clearance limits, are confirmed and applied
3. Perform calculations	3.1 <u>Calculations</u> , using basic operations, for determining material requirement are taken. 3.2 Appropriate <u>formulas</u> for calculating quantities are selected. 3.3 Quantities are estimated from the calculation taken. 3.4 Material quantities are calculated, confirmed and recorded within tolerances.

Range of Variables

Variable	Range
	May include but not limited to:
1. Measuring device	1.1 Measuring tape 1.2 Steel rule 1.3 Calculator 1.4 Sets square
2. Documents	2.1. Technical manuals

	2.2. Specifications 2.3. Sketches 2.4. Drawings 2.5. Charts 2.6. Photographs
3. Measurements	3.1. Length 3.2. Width 3.3. Weight 3.4. Tolerance
4. Calculations	4.1 Addition 4.2 Subtraction 4.3 Multiplication 4.4 Division 4.5 Area 4.6 Volume 4.7 Circumference 4.8 Cubic meter 4.9 Volumetric weight
5. Formulas	5.1 Fractions 5.2 Percentages 5.3 Mixed numbers 5.4 Conversions 5.5 Scales

Curricular Content Guide

1. Underpinning Knowledge	1.1 Measuring devices 1.2 Measurements 1.3 Simple calculation techniques 1.4 Appropriate formulas 1.5 Estimating quantities
2. Underpinning Skills	2.1 Identifying appropriate measuring devices 2.2 Carrying out measurements for appropriate device 2.3 Performing calculations using appropriate formulas
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincere and honest to duties 3.4 Environmental concerns 3.5 Eagerness to learn 3.6 Tidiness and timeliness 3.7 Respect for rights of peers and seniors in workplace 3.8 Communication with peers, sub-ordinates and seniors in workplace
4. Resource Implications	4.1 Workplace (simulated or actual) 4.2 Map/globe 4.3 Projector 4.4 Stationery 4.5 Learning manual.

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1 planed and prepared 1.2 obtained measurements 1.3 performed calculations
2. Methods of Assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical Demonstration 2.3 Oral Questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

Unit of Competency: APPLY GREEN PRACTICES IN LET SECTOR	Nominal Duration: 10 hrs.	Unit Code: SICIP-LET-CSL-02-S
Unit Descriptor: This unit covers the skills, knowledge and attitudes required for apply green practices in LET sector. It specifically includes the tasks of interpreting green concepts, minimizing resources use in the workplace and implementing waste management practices.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Interpret green concepts	1.1 <u>Principles of green practices in LET (Ready-Made Garment)</u> manufacturing are explained. 1.2 Key terms and symbols in LET production processes are identified. 1.3 <u>Sources of environmental impacts</u> during LET manufacturing activities are identified. 1.4 LET manufacturing activities use are explained. 1.5 <u>Ways of mitigating environmental impacts</u> in LET manufacturing are explained.
2. Minimize resources use in the workplace	2.1 Water, energy, and raw material consumption in LET manufacturing are documented. 2.2 <u>Recyclable and non-recyclable items</u> in LET production processes are identified. 2.3 Procedures to reduce resource consumption in LET manufacturing are implemented. 2.4 Sustainable alternatives in LET manufacturing are explored and applied.
3. Implement waste management practices	3.1 <u>Different types of waste in LET manufacturing</u> are identified. 3.2 Hazardous waste in LET production is disposed of according to environmental regulations. 3.3 Green habits to reduce waste in personal and professional life are practiced.

Range of Variables

Variable	Range
	May include but not limited to:
1. Principles of green practices in LET (Ready-Made Garment)	1.1 Reducing energy consumption in LET manufacturing processes. 1.2 6R for waste management in LET production: 1.2.1 Refuse unnecessary materials and processes. 1.2.2 Reduce resource consumption and waste

	generation. 1.2.3 Reuse materials within the production process. 1.2.4 Recycle materials for future use in LET manufacturing. 1.2.5 Recover usable resources from waste. 1.2.6 Repair damaged products or materials instead of discarding them. 1.3 Use of sustainable materials in LET production with low environmental impact. 1.4 Recycling of materials used in the LET manufacturing process. 1.5 Sustainable transportation methods for moving goods and materials within the LET sector.
2. Sources of environmental impacts	2.1 Air Pollution in LET Manufacturing 2.2 Water Pollution in LET Manufacturing 2.3 Soil Degradation in LET Manufacturing 2.4 Noise Pollution in LET Manufacturing 2.5 Waste Generation in LET Manufacturing 2.6 Resource Depletion in LET Manufacturing
3. Ways of mitigating environmental impacts	3.1 Utilizing energy-efficient equipment in LET production processes. 3.2 Adopting renewable energy sources for LET manufacturing operations. 3.3 Implementing site protection measures to prevent pollution and reduce environmental. 3.4 Using reusable materials in production processes. 3.5 Choosing sustainable materials with low environmental impact for garment production. 3.6 Using noise-reducing equipment and scheduling production work. 3.7 Optimizing logistics and delivery to reduce transportation emissions and improve overall supply chain efficiency.
4. Recyclable and non-recyclable items	4.1 Recyclable Items in LET Manufacturing 4.1.1 Metal components. 4.1.2 Wooden materials. 4.1.3 Fabric scraps and textile fibers. 4.1.4 Plastic items, including buttons, tags, and packaging materials. 4.2 Non-Recyclable Items in LET Manufacturing 4.2.1 Paints, coatings, and dyes. 4.2.2 Contaminated materials. 4.2.3 Treated wood and other materials.
5. Different types of waste in LET manufacturing	5.1 Fabric waste from cutting and trimming processes. 5.2 Wood waste from packaging or display materials. 5.3 Metal waste from trims, buttons, zippers, and other hardware. 5.4 Textile waste, including scraps from garment production

	and defective products. 5.5 Plastic waste, such as packaging materials, labels, and plastic buttons. 5.6 Solid waste from chemical treatments or dyeing processes. 5.7 Packaging waste from raw materials and finished products.
--	--

Curricular Content Guide

1. Underpinning Knowledge	1.1 Principles of green practices in LET (Ready-Made Garment) manufacturing. 1.2 Sources of environmental impacts. 1.3 Ways of mitigating environmental impacts 1.4 Recyclable and non-recyclable items 1.5 Different types of waste in LET manufacturing 1.6 Hazardous waste in LET production 1.7 Green habits to reduce waste
2. Underpinning Skills	2.1 Explaining principles of green practices in LET manufacturing 2.2 Identifying sources of environmental impacts 2.3 Explaining re-cyclable and non-recyclable items 2.4 Minimizing resources use in the workplace 2.5 Identifying different types of waste in LET manufacturing 2.6 Disposing hazardous waste in LET production 2.7 Practicing green habits to reduce waste
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincere and honest to duties 3.4 Environmental concerns 3.5 Eagerness to learn 3.6 Tidiness and timeliness 3.7 Respect for rights of peers and seniors in the workplace 3.8 Communication with peers, subordinates and seniors in the workplace
4. Resource Implications	4.1 Workplace (simulated or actual) 4.2 Projector 4.3 Stationery 4.4 Learning manual

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1 interpreted green concepts
-----------------------------------	---

	1.2 minimized resources use in the workplace 1.3 implemented waste management practices
2. Methods of Assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical Demonstration 2.3 Oral Questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

The Occupation Specific Competencies

Unit of Competency: INTERPRET COMPLIANCE AND SUSTAINABILITY WITH IN LEGAL AND REGULATORY FRAMEWORK	Nominal Duration: 30 Hrs.	Unit Code: SICIP-LET-CSL-01-O
Unit Descriptor: This unit covers the skills, knowledge and attitudes required to Interpret compliance and sustainability with in legal and regulatory framework. It specifically includes the task of understanding the concept of compliance in the leather and footwear industry, identifying compliance issues and their impacts on the industry, defining the roles and responsibilities of compliance officers, understanding different law and rules, recognizing the regulatory framework and identifying organizational policies and procedures.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Understand the concept of compliance in the leather and footwear industry	1.1 Compliance is defined in the context of the leather and footwear industry. 1.2 Importance of compliance are understood and outlined. 1.3 Different <u>types of compliance</u> are identified. 1.4 <u>Concerns of compliance</u> within the industry are understood. 1.5 Industry-specific compliance standards, including international and local regulations, are recognized. 1.6 Compliance monitoring and reporting procedures are explained.
2. Identify compliance issues and their impacts on the industry	2.1 <u>Compliance issues</u> are identified in leather and footwear production. 2.2 Health and safety compliance issues are recognized. 2.3 Labor compliance issues are understood with in the industry supply chain. 2.4 Impacts of non-compliance with environmental regulations are identified. 2.5 Social and ethical impacts of non-compliance are analyzed. 2.6 Impacts of non-compliance on product quality and safety are recognized.
3. Define the roles and responsibilities of compliance officers	3.1 <u>Role and responsibilities of compliance officer</u> is defined. 3.2 The liaison with concern department and regulatory bodies is defined. 3.3 Accountability for maintaining records and documentation is understood.
4. Understand different	4.1 <u>Applicable laws</u> and <u>regulations</u> related to the

law and rules	industry are identified. 4.2 Rules and standards for environmental protection, labor rights, and product safety are understood and interpreted. 4.3 Labor laws are recognized ensuring the organization's operations align with labor standards. 4.4 Health and safety regulations are understood. 4.5 The consequences of non-compliance with relevant laws and rules are understood.
5. Recognize the regulatory framework	5.1 Regulatory framework governing the industry is identified. 5.2 Industry standards and codes of practice are recognized. 5.3 Importance of compliance with the regulatory framework is understood. 5.4 Penalties for non-compliance are recognized to meet regulatory standards. 5.5 Impact of the regulatory framework is understood.
6. Identify organizational policies and procedures	6.1 Recruitment policies are understood. 6.2 Health and safety policies are recognized. 6.3 Emergency procedures and risk management protocols are understood. 6.4 Grievance handling policy and procedure are identified. 6.5 Anti-harassment and abuse policy is understood. 6.6 No-discrimination policy is recognized.

Range of Variables

Variable	Range (Includes but not limited to):
1. Types of compliance	1.1 Social 1.2 Environmental
2. Concerns of compliance	2.1 Environmental impacts 2.2 Workplace health and safety 2.3 Ethical sourcing 2.4 Social aspects
3. Compliance issues	3.1 Waste management 3.2 Chemical management 3.3 Sustainability practices
4. Role and responsibilities of compliance officer	4.1 Workplace health and safety 4.2 Awareness training 4.3 Grievance handling 4.4 Social compliance audit 4.5 Audit documentation 4.6 Welfare issues 4.7 Reporting
5. Applicable laws	5.1 Labor law 2006 with all amendments 5.2 Labor rules 2015 with all amendments

	5.3 ILO conventions
6. Regulations	6.1 Environmental 6.2 Health and safety

Curricular Content Guide

1. Underpinning Knowledge	1.1 Definition of compliance within the context of the leather and footwear industry. 1.2 Importance of compliance for business sustainability, brand reputation, and market access. 1.3 Overview of various compliance categories: legal, environmental, labor, social, ethical, and safety. 1.4 Key international standards and local laws governing the industry. 1.5 Procedures for monitoring compliance internally and externally. 1.6 Legal, financial, operational, and reputational risks arising from non-compliance. 1.7 Role of compliance in upholding labor rights, preventing discrimination, and promoting ethical sourcing. 1.8 Duties of compliance officers.
2. Underpinning Skills	2.1. Defining compliance in the context of the leather and footwear industry. 2.2. Outlining the importance of compliance and its relevance to business operations. 2.3. Applying industry-specific compliance standards, both international and local regulations. 2.4. Proficiency in explaining compliance monitoring and reporting procedures effectively. 2.5. Skill in identifying compliance issues in leather and footwear production, focusing on health, safety, labor, and environmental concerns. 2.6. Analyzing the impacts of non-compliance.
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincere and honest to duties 3.4 Environmental concerns 3.5 Eagerness to learn 3.6 Tidiness and timeliness 3.7 Respect for rights of peers and seniors in the workplace 3.8 Communication with peers, subordinates and seniors in the workplace
4 Resource Implications	4.1 Workplace (simulated or actual) 4.2 Projector 4.3 Learning manual

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1 understand the concept of compliance in the leather and footwear industry 1.2 identified compliance issues and their impacts on the industry 1.3 defined the roles and responsibilities of compliance officers 1.4 understand different law and rules 1.5 recognized the regulatory framework 1.6 identified organizational policies and procedures
2. Methods of Assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical Demonstration 2.3 Oral Questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by nationally certified assessor or occupation-specific industry expert.

Unit of Competency: INTERPRET SOCIAL COMPLIANCE STANDARDS & AUDITS	Nominal Duration: 70 Hrs.	Unit Code: SICIP-LET-CSL-02-O
Unit Descriptor: This unit covers the skills, knowledge and attitudes required to Interpret Social Compliance Standards & Audits. It specifically includes the task of identifying major social compliance standards, implementing audit procedures for social compliance, documenting and maintaining audit findings, developing and implementing corrective action plans (CAP), ensuring compliance with buyer codes of conduct.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Identify major social compliance standards	1.1 International labor standards are identified. 1.2 AMFORI BSCI standards are identified for ensuring ethical business practices. 1.3 SEDEX standards are identified for ensuring social compliance in supply chains. 1.4 SA8000 standard is recognized for promoting social accountability and the protection of workers' rights. 1.5 Ethical Trading Initiative (ETI) Base Code is identified for improving labor standards.
2. Implement audit procedures for social compliance	2.1 Audit is defined, and the <u>types of audits</u> are identified. 2.2 Scope of the audit is interpreted, ensuring that the audit focuses on the relevant areas. 2.3 <u>Audit procedures</u> for social compliance are executed to assess compliance with ethical and legal requirements. 2.4 Social compliance audits are conducted, focusing on key areas workers' rights, fair wages, and safe working conditions. 2.5 Non-compliance issues are identified.
3. Document and maintain audit findings	3.1 Supporting evidence is collected by relevant documentation. 3.2 Records of audit findings are maintained ensuring proper storage and easy access for future audits. 3.3 Audit findings are reviewed and tracked. 3.4 Audit reports are generated for further action and compliance improvement.
4. Develop and implement corrective action plans (CAP)	4.1 Root cause analysis is conducted, ensuring that the underlying causes of non-compliance. 4.2 Corrective action plans (CAP) are developed based on root cause findings. 4.3 CAP implementation is executed with clear

	responsibilities and deadlines assigned. 4.4 Progress of CAPs is monitored and any barriers are addressed. 4.5 Documentation of CAPs is maintained and recorded for future reference and compliance audits.
5. Ensure compliance with buyer codes of conduct	5.1 Buyer codes of conduct are identified and understood. 5.2 Compliance with buyer standards is monitored meet the buyer's requirements. 5.3 Internal monitoring and self-assessments are conducted. 5.4 Non-compliance issues are ensured to resolve any discrepancies with the buyer's standards. 5.5 Training programs are implemented on the buyer's code of conduct. 5.6 Compliance documentation is maintained kept for future reference and buyer verification.

Range of Variables

Variable	Range (Includes but not limited to):
1. Types of audits	1.1 Internal 1.2 External
2. Audit procedures	2.1 Pre-audit planning 2.2 Documents review 2.3 Inspection and interview 2.4 Data analysis and evaluation 2.5 Reporting and corrective action 2.6 Post audit follows up 2.7 Stakeholder communication

Curricular Content Guide

1. Underpinning Knowledge	1.1 Identification of international labor standards. 1.2 Understanding AMFORI BSCI standards for ensuring ethical business practices. 1.3 Recognizing SEDEX standards for ensuring social compliance in supply chains. 1.4 Acknowledging SA8000 standard for promoting social accountability and the protection of workers' rights. 1.5 Identifying the Ethical Trading Initiative (ETI) Base Code for improving labor standards. 1.6 Identification of non-compliance issues. 1.7 Generation of audit reports for further action and compliance improvement. 1.8 Identification and understanding of buyer codes of conduct. 1.9 Ensuring resolution of non-compliance issues to address discrepancies with buyer standards.
---------------------------	--

2. Underpinning Skills	2.1. Applying SEDEX standards to ensure social compliance in supply chains. 2.2. Implementing the SA8000 standard to promote social accountability and protect workers' rights. 2.3. Applying the Ethical Trading Initiative (ETI) Base Code to improve labor standards. 2.4. Executing audit procedures for social compliance to assess ethical and legal standards. 2.5. Conducting social compliance audits focusing on workers' rights, fair wages, and safe working conditions. 2.6. Maintaining records of audit findings to ensure proper storage and easy future access. 2.7. Reviewing and tracking audit findings to ensure ongoing compliance improvements. 2.8. Generating audit reports to take corrective actions and improve compliance. 2.9. Conducting root cause analysis to ensure understanding of non-compliance issues. 2.10. Developing corrective action plans (CAP). 2.11. Conducting internal monitoring and self-assessments to ensure compliance. 2.12. Ensuring non-compliance issues are addressed and resolving discrepancies with buyer standards.
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincere and honest to duties 3.4 Environmental concerns 3.5 Eagerness to learn 3.6 Tidiness and timeliness 3.7 Respect for rights of peers and seniors in the workplace 3.8 Communication with peers, subordinates and seniors in the workplace
4 Resource Implications	4.1 Workplace (simulated or actual) 4.2 Projector 4.3 Stationery 4.4 Learning manual

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1 identified major social compliance standards 1.2 Implemented audit procedures for social compliance 1.3 documented and maintained audit findings 1.4 developed and implemented corrective action plans (CAP)
-----------------------------------	---

	1.5 ensured compliance with buyer codes of conduct
2. Methods of Assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical Demonstration 2.3 Oral Questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

Unit of Competency: IMPLEMENT OCCUPATIONAL HEALTH AND SAFETY (OHS) PRACTICES	Nominal Duration: 70 Hrs.	Unit Code: SICIP-LET-CSL-03-O
Unit Descriptor: This unit covers the skills, knowledge and attitudes required to Implement Occupational Health and Safety (OHS) Practices. It specifically includes the tasks of understanding and applying OHS policies and procedures, following workplace safety standards and emergency response plans, identifying hazards in the workplace and conducting risk assessment and developing mitigation strategies.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Understand and apply OHS policies and procedures	1.1 <u>OHS policies</u> and procedures are understood ensuring awareness of health and safety regulations. 1.2 Risk assessments are identified and understood. 1.3 <u>Personal protective equipment (PPE)</u> is identified to mitigate risks. 1.4 <u>Workplace safety protocols</u> are interpreted to emergency response procedures. 1.5 OHS compliance is interpreted and understood to identify non-compliance.
2. Follow workplace safety standards and emergency response plans	2.1 <u>Workplace safety standards</u> are followed to safe handling of materials, machinery, and chemicals. 2.2 Safety protocols are followed to proper machine operation, material storage, and waste disposal. 2.3 Emergency response plans are understood and followed. 2.4 Emergency drills are participated ensuring readiness for emergency situations.
3. Identify hazards in the workplace	3.1 <u>Workplace hazards</u> are identified specific to the leather and footwear sector. 3.2 Chemical hazards are recognized to chemicals used in tanning, dyeing, and finishing processes. 3.3 Machine-related hazards are identified. 3.4 Ergonomic hazards are identified to minimize repetitive strain and support proper posture. 3.5 <u>Fire and explosion risks</u> are identified.
4. Conduct risk assessment and develop mitigation strategies	4.1 Risk levels are evaluated using a standardized risk matrix. 4.2 Preventive measures are outlined to minimize the risk of accidents or injuries. 4.3 <u>Mitigation strategies</u> are developed, focusing on reducing or eliminating identified risks.

	4.4 Corrective actions are established including emergency plans and first aid. 4.5 Documentation is maintained and recorded for future reference and compliance.
--	---

Range of Variables

Variable	Range (Includes but not limited to):
1. OHS policies	1.1 Risk assessment policy 1.2 Emergency response policy and procedures 1.3 Trauma and serious illness policy 1.4 Transmittable and non-transmittable policy 1.5 Accident and injury investigation policy
2. Personal protective equipment (PPE)	2.1 Apron 2.2 Face mask 2.1.1 Dust mask 2.1.2 Respiratory mask 2.1.3 N-95 mask 2.2 Safety hand gloves 2.3 Safety goggles 2.4 Ear plug and ear muff 2.5 Safety boots
3. Workplace safety protocols	3.1 Safety signage 3.2 Logout tagout 3.3 Safety instructions 3.4 Standard Operating Procedure (SOP) of machine 3.5 Safety training and awareness
4. Workplace safety standards	4.1 Structural safety 4.2 Fire safety 4.3 Electrical safety 4.4 Chemical safety 4.5 Waste disposal procedure
5. Workplace hazards	5.1 Physical 5.2 Chemical 5.3 Ergonomic 5.4 Environmental 5.5 Psychological 5.6 Biological
6. Fire and explosion risks	6.1 Solvents 6.2 Chemicals
7. Mitigation strategies	7.1 Elimination 7.2 Substitution 7.3 Engineering Controls 7.4 Administrative Controls 7.5 Personal Protective Equipment (PPE)

Curricular Content Guide

1. Underpinning Knowledge	1.1 Understanding of OHS policies and procedures to ensure awareness of health and safety regulations. 1.2 Identification and understanding of risk assessments. 1.3 Interpretation of workplace safety protocols and emergency response procedures. 1.4 Interpretation and understanding of OHS compliance to identify non-compliance. 1.5 Understanding and following emergency response plans. 1.6 Identification of workplace hazards specific to the leather and footwear sector. 1.7 Recognition of chemical hazards related to tanning, dyeing, and finishing processes. 1.8 Identification of machine-related hazards. 1.9 Recognition of ergonomic hazards to minimize repetitive strain and promote proper posture. 1.10 Identification of fire and explosion risks.
2. Underpinning Skills	2.1. Following workplace safety standards for the safe handling of materials, machinery, and chemicals. 2.2. Adhering to safety protocols for proper machine operation, material storage, and waste disposal. 2.3. Following emergency response plans to respond effectively to incidents. 2.4. Participating in emergency drills to ensure readiness for emergency situations. 2.5. Identifying workplace hazards specific to the leather and footwear sector. 2.6. Identifying machine-related hazards and ensuring proper safety measures are in place. 2.7. Evaluating risk levels using a standardized risk matrix to assess and prioritize workplace hazards. 2.8. Outlining preventive measures to minimize the risk of accidents or injuries in the workplace. 2.9. Developing mitigation strategies to reduce or eliminate identified risks. 2.10. Establishing corrective actions, including emergency plans and first aid procedures, to address identified risks. 2.11. Maintaining proper documentation.
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincere and honest to duties 3.4 Environmental concerns 3.5 Eagerness to learn 3.6 Tidiness and timeliness 3.7 Respect for rights of peers and seniors in the workplace

	3.8 Communication with peers, subordinates and seniors in the workplace
4 Resource Implications	4.1 Workplace (simulated or actual) 4.2 Projector 4.3 Stationery 4.4 Learning manual

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1 understand and apply OHS policies and procedures 1.2 followed workplace safety standards and emergency response plans 1.3 identified hazards in the workplace 1.4 conducted risk assessment and develop mitigation strategies
2. Methods of Assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical Demonstration 2.3 Oral Questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

Unit of Competency: MANAGE ENVIRONMENTAL PRACTICES IN CHEMICAL AND WASTE MANAGEMENT	Nominal Duration: 50 Hrs.	Unit Code: SICIP-LET-CSL-04-O
Unit Descriptor: This unit covers the skills, knowledge and attitudes required to manage environmental practices in chemical and waste management. It specifically includes the task of assessing environmental management issues in industry, implementing chemical management practices, managing waste disposal and recycling systems and monitoring and reporting on environmental management performance.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Assess environmental management issues in industry	1.1 <u>Environmental management issues</u> are identified. 1.2 Resource consumption is assessed in the manufacturing process. 1.3 <u>Environmental risks</u> are identified ensuring appropriate ventilation and filtration systems are in place. 1.4 Sustainability initiatives are considered to reduce environmental impact.
2. Implement chemical management practices	2.1 Safety data sheets (SDS) are made available for all chemicals. 2.2 Chemicals are labeled and stored to safety standards. 2.3 Chemical inventory is maintained according to <u>international standards</u> . 2.4 Chemical waste is managed, with regulations followed for proper disposal. 2.5 Training on chemical handling is conducted for all relevant staff. 2.6 Regulatory compliance and environmental standards are maintained.
3. Manage waste disposal and recycling systems	3.1 <u>Types of wastes</u> are identified according to their properties and disposal requirements. 3.2 Waste segregation is implemented in leather and footwear industry. 3.3 Waste disposal systems are managed according to regulations. 3.4 Recycling systems are implemented and processed appropriately as per Global Recycled Standard (GRS). 3.5 Waste handling procedures are followed to when managing both hazardous and non-hazardous waste. 3.6 Waste management records are maintained and kept for regulatory compliance and auditing purposes.

4. Monitor and report on environmental management performance	4.1 Environmental data is analyzed in accordance with established procedures. 4.2 Environmental corrective action plans (ECAP) are prepared and documented based on data analysis. 4.3 Environmental reports are prepared that summarize key data findings and corrective actions. 4.4 Environmental performance is monitored regularly to ensure compliance with relevant regulations. 4.5 Corrective actions are reported and communicated to relevant stakeholders in a timely manner.
---	--

Range of Variables

Variable	Range (Includes but not limited to):
1. Environmental management issues	1.1 Environmental Impact Assessment (EIA) 1.2 Environmental Management Plan (EMP)
2. Environmental risks	2.1 Air pollution 2.2 Noise 2.3 Temperature
3. International standards	3.1 Zero Discharge Hazardous Chemical (ZDHC) 3.2 Global Harmonize Symbols (GHS)
4. Types of wastes	4.1 Hazardous 4.1.1 Adhesive and glue 4.1.2 Solvent 4.1.3 Cleaning agent 4.1.4 Heavy metals 4.1.5 Volatile organic compounds (VOCs) 4.2 Non-hazardous 4.3.1 Leather and synthetics materials trimmings 4.3.2 Packaging materials 4.3.3 Certain production waste 4.3.4 Post-consumer footwear

Curricular Content Guide

1. Underpinning Knowledge	1.1 Identification of environmental management issues. 1.2 Identification of environmental risks. 1.3 Consideration of sustainability initiatives to reduce environmental impact. 1.4 Safety Data Sheets (SDS) for all chemicals. 1.5 Identification of types of waste according to their properties and disposal requirements. 1.6 Adherence to waste handling procedures for both hazardous and non-hazardous waste. 1.7 Documentation of Environmental Corrective Action Plans (ECAP) based on data analysis. 1.8 Environmental reports summarizing key data findings and corrective actions.
---------------------------	--

2. Underpinning Skills	2.1 Assessing resource consumption in the manufacturing process. 2.2 Considering sustainability initiatives to reduce environmental impact. 2.3 Making Safety Data Sheets (SDS) available for all chemicals. 2.4 Labeling and storing chemicals to safety standards. 2.5 Maintaining chemical inventory according to international standards. 2.6 Managing chemical waste with proper disposal regulations followed. 2.7 Maintaining regulatory compliance and environmental standards. 2.8 Implementing waste segregation in the leather and footwear industry. 2.9 Managing waste disposal systems according to regulations. 2.10 Processing recycling systems as per Global Recycled Standard (GRS). 2.11 Following waste handling procedures for hazardous and non-hazardous waste. 2.12 Maintaining waste management records for regulatory compliance and auditing. 2.13 Reporting and communicating corrective actions to stakeholders.
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincere and honest to duties 3.4 Environmental concerns 3.5 Eagerness to learn 3.6 Tidiness and timeliness 3.7 Respect for rights of peers and seniors in the workplace 3.8 Communication with peers, subordinates and seniors in the workplace
4 Resource Implications	4.1 Workplace (simulated or actual) 4.2 Projector 4.3 Learning manual

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1 assessed environmental management issues in industry 1.2 implemented chemical management practices 1.3 managed waste disposal and recycling systems 1.4 monitored and reported on environmental management performance
-----------------------------------	--

2. Methods of Assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical Demonstration 2.3 Oral Questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

Unit of Competency: MANAGE INDUSTRIAL RELATIONS & EMPLOYEE WELFARE	Nominal Duration: 30 Hrs.	Unit Code: SICIP-LET-CSL-05-O
Unit Descriptor: This unit covers the skills, knowledge and attitudes required to manage industrial relations & employee welfare. It specifically includes the task of facilitate worker representation and participation, implementing grievance handling procedures, resolving workplace disputes and ensure harmony, implementing employee welfare initiatives and understanding employment life cycle.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Facilitate worker representation and participation	1.1 <u>Worker representatives</u> are identified and selected. 1.2 Regular meetings are held, providing a platform for workers to discuss issues. 1.3 Communication channels are maintained as per Bangladesh labor law. 1.4 Participation in decision-making is facilitated. 1.5 Feedback mechanisms are implemented and participated in solving workplace problems.
2. Implement grievance handling procedures	2.1 Grievance mechanism procedures are defined. 2.2 Grievances are received and logged ensuring proper documentation and acknowledgment of the issue. 2.3 Investigations are conducted to assess the nature of the grievance and identify root causes. 2.4 Corrective actions are proposed and implemented. 2.5 Feedback is provided to the employee. 2.6 Records of grievances and resolutions are maintained for future reference and auditing.
3. Resolve workplace disputes and ensure harmony	3.1 Workplace disputes are identified and assessed. 3.2 Conflict resolution strategies are applied to resolve disputes. 3.3 Mediation and negotiation are facilitated. 3.4 Resolution outcomes are documented. 3.5 The dispute is formally resolved and all parties are satisfied. 3.6 Follow-up is conducted and addressed.
4. Implement employee welfare initiatives	4.1 Employee welfare policies are identified aligning with the provisions of the Bangladesh Labor Law 2006 and Bangladesh Labor Rules 2015. 4.2 <u>Welfare benefits</u> are provided as required in the labor laws. 4.3 <u>Workplace facilities</u> are ensured in accordance with

	legal requirements. 4.4 Health and safety measures are implemented, ensuring that employees work in a safe environment. 4.5 Compliance with labor law is monitored, ensuring adherence to legal requirements.
5. Understand employment life cycle	5.1 Employment life cycle stages are understood. 5.2 Recruitment and hiring procedures are identified. 5.3 Training and development process is understood for new employee. 5.4 Employer and employee relationship is interpreted. 5.5 Safe work environment and disciplinary action are described. 5.6 Exit processes are managed with compliance to labor laws.

Range of Variables

Variable	Range (Includes but not limited to):
1. Worker representatives	1.1 Freedom of Association (FoA) 1.2 Participation Committee (PC) 1.3 Social dialog
2. Welfare benefits	2.1 Health and safety 2.2 Provident fund 2.3 Gratuity 2.4 Maternity benefits 2.5 Injury compensation 2.6 Group insurance
3. Workplace facilities	3.1 Pure drinking water 3.2 Sanitation 3.3 Medical and child care facilities 3.4 Canteen and dining
4. Employment life cycle stages	4.1 Recruitment 4.2 Training and development 4.3 Reward and punishment 4.4 Performance appraisal

Curricular Content Guide

1. Underpinning Knowledge	1.1 Identification and selection of worker representatives. 1.2 Feedback mechanisms and participation in solving workplace problems. 1.3 Definition of grievance mechanism procedures. 1.4 Conducting investigations to assess the nature of grievances and identify root causes. 1.5 Maintenance of records of grievances and resolutions for future reference and auditing. 1.6 Identification and assessment of workplace disputes.
---------------------------	--

	1.7 Identification of employee welfare policies. 1.8 Understanding the stages of the employment life cycle. 1.9 Identification of recruitment and hiring procedures. 1.10 Understanding the training and development process for new employees. 1.11 Interpretation of employer and employee relationships.
2. Underpinning Skills	2.1 Holding regular meetings to provide a platform for workers to discuss issues. 2.2 Maintaining communication channels as per Bangladesh labor law. 2.3 Facilitating participation in decision-making processes. 2.4 Implementing feedback mechanisms and participating in solving workplace problems. 2.5 Receiving and logging grievances, ensuring proper documentation and acknowledgment. 2.6 Conducting investigations to assess the nature of grievances and identify root causes. 2.7 Implementing corrective actions based on grievance findings. 2.8 Maintaining records of grievances and resolutions for future reference and auditing. 2.9 Applying conflict resolution strategies to resolve disputes. 2.10 Providing welfare benefits as required by labor laws. 2.11 Managing exit processes in compliance with labor laws.
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincere and honest to duties 3.4 Environmental concerns 3.5 Eagerness to learn 3.6 Tidiness and timeliness 3.7 Respect for rights of peers and seniors in the workplace 3.8 Communication with peers, subordinates and seniors in the workplace
4 Resource Implications	4.1 Workplace (simulated or actual) 4.2 Projector 4.3 Learning manual

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1 facilitated worker representation and participation 1.2 implemented grievance handling procedures 1.3 resolved workplace disputes and ensure harmony 1.4 implemented employee welfare initiatives 1.5 understood employment life cycle
2. Methods of	Competency should be assessed by:

Assessment	2.1 Written test 2.2 Practical Demonstration 2.3 Oral Questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

End of the Competency Standard

Workshop/Lab Facility Standard

Course Name:	Compliance & Sustainability for Footwear & Leather Goods Sector
Number of Trainees:	20

Course-wise Training Space (Theoretical Classroom, Workshop/ Lab/Classroom cum Workshop):

- Classroom – 350 sft (33 sqm)
- Workshop/ lab – 800 sft (75 sqm) OR
- Classroom cum workshop – 1000 sft (93 sqm)

Major Training Equipment and Training Facilities:

S.N.	Major Equipment and Training facilities	Required facilities
1.	Computer/Laptops	01
2.	Multimedia projector & screen	01
3.	Scanner	01
4.	Printer	01
5.	First aid box	03
6.	Lux meter	03
7.	Noise level meter	03
8.	Fire extinguisher (water, foam, CO ₂ , powder)	08
9.	Smoke or heat detector	05
10.	Rubbermaid recycling bins	05
11.	Water testing kits	03
12.	Air quality testing kits	03

The following conditions must be fulfilled –

- The institute shall not use the same facilities for any other projects/organizations offering a similar course.
- The institute must provide sufficient evidence to prove ownership of the proposed training equipment.

The list denotes the minimum training equipment and facility required to effectively conduct training for a specific course. Additionally, the institute must ensure that all other necessary training tools, equipment, and furniture are available to meet the requirement of competency standards (CS) provided by SICIP.

For the operation of training course on Compliance & Sustainability for Footwear & Leather Goods Sector the institute must ensure the availability of at least 80% of the major training equipment and training facilities (according to the CS) to be eligible for SICIP training delivery. If the score is below 80%, the remaining equipment and facilities need to be installed before the commencement of the training.

The institute will also provide all other hand tools and power tools as per CS for 20 trainees. Also, they will arrange adequate seating arrangement and classroom setup for the 20 trainees.
