Skills for Industry Competitiveness and Innovation Program (SICIP)
Finance Division, Ministry of Finance

COPYRIGHT

The Competency Standards for **Supervisory Management & Leadership Skills Development** is designed to guide the development of curricula, teaching materials, and assessment tools. It also serves as a framework for providing industry-aligned training, ensuring that individuals meeting the prescribed standards through assessments are qualified to secure relevant employment opportunities.

This document was originally developed under the **Skills for Employment Investment Program (SEIP)** and later reviewed and updated with the input from occupation-specific industry experts to be utilized in training initiatives under the **Skills for Industry Competitiveness and Innovation Program (SICIP)**. The document is owned by the Finance Division, Ministry of Finance, People's Republic of Bangladesh.

While public and private institutions are permitted to use the information from this standard for activities that benefit Bangladesh, other parties must seek prior permission from the document's owner for reproducing its content, either partially or entirely, in English or other languages.

INTRODUCTION:

The Skills for Industry Competitiveness and Innovation Program (SICIP) has the overall objective of developing a skilled workforce adept at handling new technologies, especially for emerging industries in Bangladesh. It will expand skills training and strengthen the development of the training ecosystem to address the skills requirements of the SICIP-selected industry sectors. The program aims to (i) increase the technology-oriented skilled workforce across emerging and priority sectors, (ii) promote inclusive skilling and upskilling opportunities for women and socially disadvantaged groups, (iii) incentivize industry-university partnerships to nurture innovation capacity and improve industry competitiveness, and (iv) foster skills for climate-resilient manufacturing processes and green technologies. The program is expected to benefit about 220,000 new and existing workers over a 6-year implementation period from 2024-2029.

The SICIP Program has, therefore, taken the initiative to enhance the employability and productivity of trainees by implementing market-responsive and job-focused training programs through public and private training providers. This will require the development of competency standards for each of the occupations/trades which will provide a structured framework in the learning process to guide training providers, ensure consistent training quality, and create an alignment between the skills provided by the training institutes and the needs of the industry.

The Competency Standard also suggests integration of YouTube or similar platforms or downloaded clips into classroom practice to ensure simulated creation of the contents so that learners are exposed to visual demonstrations before classroom instruction or practical session, which aligns with modern learning preference and supports flipped classroom models.

This competency standard is therefore developed to improve skills following the job roles and skill sets of the occupation and ensure that the required skills are aligned with industry requirements.

The document details the format, sequencing, wording, and layout of the Competency Standard for an occupation which comprises Units of Competence and its corresponding Elements.

OVERVIEW:

A **Competency Standard** is a written specification of the knowledge, skills, and attitudes required for the performance of a job or occupation or trade corresponding to the standard of performance required in the workplace.

Competency standard:

- provides a consistent and reliable set of components for training, recognizing, and assessing people's skills, and may also have optional support materials.
- enables industry-recognized qualifications to be awarded through direct assessment of workplace competencies
- encourages the development and delivery of flexible training that suits individual and industry requirements
- encourages learning and assessment in a work-related environment which leads to verifiable workplace outcomes.

Competency Standards are developed by a working group comprised of national and international process experts and the participation of experts from the industry to identify the competencies required of an occupation in a particular sector.

Competency Standards describe the skills, knowledge, and attitude needed to perform effectively in the workplace. Competency Standards acknowledge that people can achieve vocational and technical competency in many ways by emphasizing what the learner can do, not how or where they learned to do it.

With Competency Standards, assessment and training may be conducted at the workplace, at training organization, during regular work, or through work experience, work placement, work simulation or any combination of these.

A Unit of Competency describes a distinct work activity that would normally be undertaken by one person in accordance with industry standards.

Units of Competency are documented in a standard format that comprises:

- Reference to Industry Sector, Occupational Title and Occupational Description
- Unit code
- Unit title
- Unit descriptor
- Elements and performance criteria
- Variables and range statement
- Evidence guides

Together all the parts of a Unit of Competency:

- Describe a work activity
- Guide the assessor in determining whether the candidate is competent.

Competency Standard has been developed by a working group comprised of occupation-specific experts from the industry/institution, relevant consultants of SICIP.

The ensuing sections of this document comprise a description of the respective occupation with all the key components of a Unit of Competence:

- An overview of all Units of Competence for the occupation and their corresponding duration required for completion of training.
- The Competency Standards that include the Unit of Competency, Unit Descriptor, Elements and Performance Criteria, Range of Variables, Curricular Content Guide, and Assessment Evidence Guide.

Units & Elements at a Glance:**Generic Competencies (30 Hrs.)**

Code	Unit of Competency	Elements of Competency	Duration (Hours)
SICIP-LET-SML-01-G	Carry Out Workplace Interaction	1. Interpret Workplace Communication and Etiquette 2. Read and Understand Workplace Documents 3. Participate in Workplace Meetings and Discussions 4. Practice professional Ethics at Work	15
SICIP-LET-SML-02-G	Operate In a Team Environment	1. Identify Team Goals and Work Processes 2. Identify Own Role and Responsibilities within Team 3. Communicate and Co-Operate with Team Members 4. Practice Problem Solving Within the Team	15
Total Hour			30

Sector Specific Competencies (10 hrs.)

Code	Unit of Competency	Elements of Competency	Duration (Hours)
SICIP-LET-SML-01-S	Apply Green Practices in Leather Sector	1. Interpret Green Concepts 2. Minimize Resource Use in The Workplace 3. Implement Waste Management Practices	10
Total Hour			10

Occupation Specific Competencies (260 hrs.)

Code	Unit of Competency	Elements of Competency	Duration (hours)
SICIP-LET-SML-01-O	Interpret Supervisory Management and Leadership Skills	1. Identify principles of management. 2. Identify leadership attributes. 3. Identify soft skills. 4. Identify company policies and labour law 5. Identify supervisory roles and duties.	20
SICIP-LET-SML-02-O	Interpret the Manufacturing Process of Leather Goods and Footwear	1. Identify leather goods and footwear products. 2. Describe cutting operations. 3. Explain sewing and setting operations. 4. Describe lasting and assembling operations. 5. Explain finishing and packaging operations.	100
SICIP-LET-SML-03-O	Implement Quality Control and Assurance Techniques	1. Identify common defects. 2. Inspect materials and products. 3. Apply standard operating procedures (SOPs). 4. Record and report quality deviations.	20
SICIP-LET-SML-04-O	Apply Basic Industrial Engineering (IE) activities	1. Identify different types of line layout. 2. Perform work study process. 3. Prepare skills matrix for production line 4. Implement line balancing in production. 5. Prepare efficiency report	40
SICIP-LET-SML-05-O	Perform Effective Workplace	1. Carryout daily work allocation	40

Code	Unit of Competency	Elements of Competency	Duration (hours)
	Supervision	2. Carryout hourly monitoring task 3. Demonstrate fair conflict handling 4. Carryout team building techniques	
SICIP-LET-SML-06-O	Carry out Leadership in The Workplace	1. Demonstrate leadership skills. 2. Provide direction to team members. 3. Motivate and support team performance. 4. Solve workplace problems effectively. 5. Promote teamwork and cooperation.	20
SICIP-LET-SML-07-O	Apply ESG and Risk Management Practices	1. Identify ESG requirements. 2. Follow environmental and waste management rules. 3. Maintain social and ethical practices. 4. Identify risks and hazards. 5. Apply safety and emergency measures.	20
Total Hours			0 Hrs.

COMPETENCY STANDARD: SUPERVISORY MANEAGEMENT & LEADERSHIP SKILLS DEVELOPMENT

Generic Competencies

UNIT OF COMPETENCY: CARRY OUT WORKPLACE INTERACTION	Nominal Duration: 15 hrs.	Unit Code: SICIP-LET-SML-01-G
Unit Descriptor: This unit covers the skills, knowledge and attitudes required to carry out workplace interaction. It specifically includes the task of interpreting workplace communication and etiquette, Reading and understanding workplace documents, participating in workplace meetings and discussions and practicing professional ethics at work.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Interpret workplace communication and etiquette	1.1 Workplace codes of conduct are interpreted as per organizational guidelines. 1.2 Appropriate lines of communication are maintained with supervisors and colleagues. 1.3 Workplace interactions are conducted in a <u>courteous manner</u> to gather and convey information. 1.4 <u>Workplace procedures and matters</u> are comprehended.
2. Read and understand workplace documents	2.1 Workplace documents are interpreted correctly. 2.2 Visual information/symbols/signage are understood correctly and followed. 2.3 Specific and relevant information are accessed from <u>appropriate sources</u> . 2.4 Appropriate medium is used to transfer information and ideas.
3. Participate in workplace meetings and discussions	3.1 Team meetings are attended on time. 3.2 Meeting procedures and etiquette are followed. 3.3 Active participation is ensured, opinions are expressed and heard. 3.4 Inputs are provided and interpreted in line with the meeting purpose.
4. Practice professional ethics at work	4.1 Responsibilities as a team member are performed. 4.2 Tasks are performed in accordance with workplace procedures. 4.3 Confidentiality is maintained. 4.4 Inappropriate and conflicting situations are avoided.

Range of variables:

Variables	Range (may include but not limited to)
1. Courteous manner	1.1 Effective questioning 1.2 Active listening 1.3 Speaking skills 1.4 Writing skill 1.5 Email etiquette
2. Workplace procedures and matters	1.6 Notes 1.7 Arranging a meeting 1.8 Agenda 1.9 Simple reports such as progress and incident reports 1.10 Job sheets 1.11 Operational manuals 1.12 Brochures and promotional material 1.13 Visual and graphic materials 1.14 Standards 1.15 OHS information 1.16 Signs
3. Appropriate sources	1.17 Human Resources (HR) Department 1.18 Managers 1.19 Supervisors 1.20 Management Information System (MIS)

Curricular Content Guide

1. Underpinning knowledge	1.1 Workplace codes of conduct 1.2 Workplace communication and etiquette 1.3 Workplace documents, signs and symbols 1.4 Meeting procedure and etiquette 1.5 Professional ethics 1.6 Responsibilities of team member
2. Underpinning skill	1.7 Demonstrating workplace communication and etiquette 1.8 Interpreting workplace instructions and symbols 1.9 Performing responsibilities of a team member 1.10 Demonstrating active participation in workplace meeting 1.11 Applying professional ethics at work
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincere and honest to duties 3.4 Environmental concerns 3.5 Eagerness to learn 3.6 Tidiness and timeliness 3.7 Respect for rights of peers and seniors in the workplace 3.8 Communication with peers, subordinates and seniors in the workplace
4. Resource implications	The following resources must be provided:

	1.1 Workplace (simulated or actual) 1.2 Projector 1.3 Learning manual
--	---

Assessment Evidence Guide

1. Critical aspects of competency	Assessment required evidence that the candidate: 1.1 Interpreted workplace communication and etiquette 1.2 Interpreted workplace instructions and symbols 1.3 Performed active participation in workplace meetings 1.4 Performed responsibilities of a team member
2. Methods of assessment	Competency should be assessed by: 1.5 Written test 1.6 Practical Demonstration 1.7 Oral Questioning 1.8 Portfolio (Optional)
3. Context of assessment	1.9 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 1.10 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

Unit of Competency: OPERATE IN A TEAM ENVIRONMENT	Nominal Duration: 15 hrs.	Unit Code: SICIP-LET-SML-02-G
Unit Descriptor: This unit covers the skills, knowledge and attitudes required to operate in a team environment. It specifically includes the task of identifying team goals and work processes, identifying own role and responsibilities within team, communicating and cooperating with team members and practicing problem solving within the team.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Identify team goals and work processes	1.1. Roles and objectives of the team are identified and interpreted. 1.2. Roles and responsibilities of team members are identified and interpreted.
2. Identify own role and responsibilities within team	2.1 Personal role and responsibilities are identified within the team environment. 2.2 Reporting relationships are interpreted within team and external to team.
3. Communicate and cooperate with team members	3.1 Other teammates' tasks are identified and support provided when requested. 3.2 The team is encouraged through <u>sharing information</u> or expertise, working together to solve problems, and putting team success first. 3.3 Views and opinions of other team members are interpreted and respected.
4. Practice problem solving within the team	4.1 Problems faced at the individual and team level are identified and showed insight into the root causes of the problems. 4.2 A range of solutions and courses of action are identified together with benefits, costs, and risks associated with each. 4.3 The good ideas of others to help develop solutions are recognized and advice sought from those who have solved similar problems. 4.4 It is looked beyond the obvious and not stopped at the first answers.

Range of variables:

Variables	Range (may include but not limited to)
------------------	---

1. Sharing information	1.1. Agenda 1.2. Minutes 1.3. progress and incident reports 1.4. Operational manuals 1.5. Visual and graphic materials 1.6. Emails and SMS 1.7. Phone directory 1.8. Policy, procedure and standards 1.9. OHS information
------------------------	---

Curricular Content Guide

1. Underpinning knowledge	1.1. Team goals and work processes 1.2. Roles and responsibilities of team members 1.3. Personal role and responsibilities 1.4. Sharing information 1.5. Views and opinions 1.6. Problem solving within the team
2. Underpinning skill	1.1. Identifying team goals and work processes 1.2. Identifying own role and responsibilities within team 1.3. Communicating and cooperating with team members 1.4. Practicing problem solving within the team
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincere and honest to duties 3.4 Eagerness to learn 3.5 Tidiness and timeliness 3.6 Environmental concerns 3.7 Respect for rights of peers and seniors at workplace 3.8 Communication with peers and seniors at workplace
4. Resource implications	The following resources must be provided: 4.1 Workplace (simulated or actual) 4.2 Projector 4.3 Stationery 4.4 Learning manual

Assessment Evidence Guide

1. Critical aspects of competency	Assessment required evidence that the candidate: 1.1 identified team goals and work processes 1.2 identified own role and responsibilities within team 1.3 communicated and cooperated with team members 1.4 practiced problem solving within the team
-----------------------------------	--

2. Methods of assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical Demonstration 2.3 Oral Questioning 2.4 Portfolio (Optional)
3. Context of assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

The Sector Specific Competencies

Unit of Competency: APPLY GREEN PRACTICES IN LEATHER SECTOR	Nominal Duration: 10 hrs.	Unit Code: SICIP-LET-SML-01-S
Unit Descriptor: This unit covers the skills, knowledge and attitudes required for apply green practices in leather sector. It specifically includes the tasks of interpreting green concepts, minimizing resources use in the workplace and implementing waste management practices.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Interpret green concepts	1.1 <u>Principles of green practices in Leather</u> manufacturing are explained. 1.2 Key terms and symbols in leather production processes are identified. 1.3 <u>Sources of environmental impacts</u> during leather manufacturing activities are identified. 1.4 Leather manufacturing activities use are explained. 1.5 <u>Ways of mitigating environmental impacts</u> in leather manufacturing are explained.
2. Minimize resources use in the workplace	2.1 Water, energy, and raw material consumption in leather manufacturing are documented. 2.2 <u>Recyclable and non-recyclable items</u> in leather production processes are identified. 2.3 Procedures to reduce resource consumption in leather manufacturing are implemented. 2.4 Sustainable alternatives in leather manufacturing are explored and applied.
3. Implement waste management practices	3.1 <u>Different types of waste in leather manufacturing</u> are identified. 3.2 Hazardous waste in leather production is disposed of according to environmental regulations. 3.3 Green habits to reduce waste in personal and professional life are practiced.

Range of Variables

Variable	Range
	May include but not limited to:
1. Principles of green practices in leather	1.1 Reducing energy consumption in leather manufacturing processes. 1.2 6R for waste management in leather production: 1.2.1 Refuse unnecessary materials and processes.

	1.2.2 Reduce resource consumption and waste generation. 1.2.3 Reuse materials within the production process. 1.2.4 Recycle materials for future use in leather manufacturing. 1.2.5 Recover usable resources from waste. 1.2.6 Repair damaged products or materials instead of discarding them. 1.3 Use of sustainable materials in leather production with low environmental impact. 1.4 Recycling of materials used in the leather manufacturing process. 1.5 Sustainable transportation methods for moving goods and materials within the leather sector.
2. Sources of environmental impacts	2.1 Air Pollution in leather Manufacturing 2.2 Water Pollution in leather Manufacturing 2.3 Soil Degradation in leather Manufacturing 2.4 Noise Pollution in leather Manufacturing 2.5 Waste Generation in leather Manufacturing 2.6 Resource Depletion in leather Manufacturing
3. Ways of mitigating environmental impacts	3.1 Utilizing energy-efficient equipment in leather production processes. 3.2 Adopting renewable energy sources for leather manufacturing operations. 3.3 Implementing site protection measures to prevent pollution and reduce environmental. 3.4 Using reusable materials in production processes. 3.5 Choosing sustainable materials with low environmental impact for garment production. 3.6 Using noise-reducing equipment and scheduling production work. 3.7 Optimizing logistics and delivery to reduce transportation emissions and improve overall supply chain efficiency.
4. Recyclable and non-recyclable items	4.1 Recyclable Items in leather Manufacturing 4.1.1 Metal components. 4.1.2 Wooden materials. 4.1.3 Fabric scraps and textile fibers. 4.1.4 Plastic items, including buttons, tags, and packaging materials. 4.2 Non-Recyclable Items in leather Manufacturing 4.2.1 Paints, coatings, and dyes. 4.2.2 Contaminated materials. 4.2.3 Treated wood and other materials.
5. Different types of waste in leather manufacturing	5.1 Fabric waste from cutting and trimming processes. 5.2 Wood waste from packaging or display materials. 5.3 Metal waste from trims, buttons, zippers, and other hardware.

	5.4 Textile waste, including scraps from garment production and defective products. 5.5 Plastic waste, such as packaging materials, labels, and plastic buttons. 5.6 Solid waste from chemical treatments or dyeing processes. 5.7 Packaging waste from raw materials and finished products.
--	--

Curricular Content Guide

1. Underpinning Knowledge	1.1 Principles of green practices in leather manufacturing. 1.2 Sources of environmental impacts. 1.3 Ways of mitigating environmental impacts 1.4 Recyclable and non-recyclable items 1.5 Different types of waste in leather manufacturing 1.6 Hazardous waste in leather production 1.7 Green habits to reduce waste
2. Underpinning Skills	2.1 Explaining principles of green practices in leather manufacturing 2.2 Identifying sources of environmental impacts 2.3 Explaining re-cyclable and non-recyclable items 2.4 Minimizing resources use in the workplace 2.5 Identifying different types of waste in leather manufacturing 2.6 Disposing hazardous waste in leather production 2.7 Practicing green habits to reduce waste
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincere and honest to duties 3.4 Environmental concerns 3.5 Eagerness to learn 3.6 Tidiness and timeliness 3.7 Respect for rights of peers and seniors in the workplace 3.8 Communication with peers, subordinates and seniors in the workplace
4. Resource Implications	4.1 Workplace (simulated or actual) 4.2 Projector 4.3 Stationery 4.4 Learning manual

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate:
-----------------------------------	--

	1.1 interpreted green concepts 1.2 minimized resources use in the workplace 1.3 implemented waste management practices
2. Methods of Assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical Demonstration 2.3 Oral Questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

The Occupation Specific Competencies

Unit of Competency: INTERPRET SUPERVISORY MANAGEMENT AND LEADERSHIP SKILLS	Nominal Duration: 20 Hrs.	Unit Code: SICIP-LET-SML-01-O
Unit Descriptor: This unit covers the skills, knowledge and attitudes required to interpret supervisory management and leadership skills. It specifically includes the task of identifying principles of management, identifying leadership attributes, identifying soft skills, identifying company policies and labour law and identifying supervisory roles and duties.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Identify principles of management.	1.1 The principles of management are identified and defined. 1.2 <u>The types of management</u> are recognized. 1.3 <u>The functions of management</u> are identified and described.
2. Identify leadership attributes.	2.1 <u>Leadership attributes</u> are identified. 2.2 The importance of each leadership attribute is explained. 2.3 Impact of leadership attributes on team performance and workplace culture is recognized. 2.4 Different <u>leadership styles</u> are described and recognized.
3. Identify soft skills.	3.1 <u>Soft skills</u> are identified. 3.2 Importance of each soft skill is explained. 3.3 Application of soft skills in professional settings is recognized. 3.4 Impact of soft skills on team performance and organizational effectiveness is understood.
4. Identify company policies and labour law	4.1 <u>Relevant company policies</u> are identified and documented. 4.2 <u>Labor laws</u> applicable to the leather and footwear sector are recognized and explained. 4.3 Employees' rights and responsibilities are interpreted according to company policies and labor law. 4.4 Compliance requirements for both company rules and legal regulations are monitored.
5. Identify supervisory roles and duties.	5.1 <u>Supervisory roles and duties</u> in the workplace are identified. 5.2 Reporting lines and authority levels are recognized. 5.3 Key tasks and oversight functions are documented.

	5.4 Supervisory roles and duties are compared with organizational requirements. 5.5 Observations on performance expectations are recorded.
--	--

Range of Variables

Variable	Range (Includes but not limited to):
1. The types of management	1.1 Top-level 1.2 Mid-level 1.3 First-level
2. The Functions of management	2.1 Planning 2.2 Organizing 2.3 Staffing 2.4 Leading 2.5 Controlling
3. Leadership attributes	3.1 Honesty 3.2 Decisiveness 3.3 Confidence 3.4 Responsibility 3.5 Empathy 3.6 Focus 3.7 Creativity 3.8 Commitment
4. Leadership styles	4.1 Autocratic 4.2 Democratic 4.3 Strategic 4.4 Transformational 4.5 Cross-cultural 4.6 Coaching 4.7 Situational
5. Soft skills	5.1 Communication 5.2 Conflict resolution 5.3 Critical thinking 5.4 Time management 5.5 Problem solving 5.6 Priority management 5.7 Stress management 5.8 Motivation
6. Relevant company policies	6.1 Wages and Salary Policy 6.2 Health and Safety Policy 6.3 Recruitment Policy 6.4 Training and Development Policy 6.5 Leave and Attendance Policy 6.6 Freedom of Association Policy 6.7 Disciplinary Policy 6.8 Performance Appraisal Policy

	6.9 CSR Policy 6.10 Environmental Compliance Policy
7. Labor laws	7.1 Bangladesh Labor Act, 2006 (amended 2013, 2018 and 2022) 7.2 Factories Act, 1965 7.3 Workers' Welfare Fund Act 7.4 Industrial Relations Act 7.5 National Fire Protection Act 7.6 Maternity Benefits Act 7.7 Child Labor (Prohibition and Regulation) Act 7.8 Occupational Safety and Health regulations
8. Supervisory roles and duties	8.1 Manage day-to-day operations and ensure production targets are met. 8.2 Conduct inspections at each stage to maintain quality standards. 8.3 Ensure all equipment is operational and properly maintained. 8.4 Oversee labeling, packaging, and shipping of products. 8.5 Track raw materials, supplies, and stock efficiently. 8.6 Upholding the workplace Discipline. 8.7 Guide staff, monitor performance, and address issues. 8.8 Enforce workplace safety, health regulations, and labor law adherence. 8.9 Reporting, Record production data, incidents, and maintenance logs. 8.10 Work with management to implement process and efficiency improvements. 8.11 Ensure adherence to environmental and social responsibility policies.

Curricular Content Guide

1. Underpinning Knowledge	1.1 Identify and define principles of management and their types. 1.2 Understand functions of management and associated authorities and responsibilities. 1.3 Identify key leadership attributes and their importance in team performance and workplace culture. 1.4 Interpret different leadership styles and their impact on organizational effectiveness. 1.5 Identify soft skills and understand their application in professional settings. 1.6 Recognize the impact of soft skills on team performance and organizational outcomes. 1.7 Identify relevant company policies and labor laws applicable to the leather and footwear sector. 1.8 Interpret employees' rights, responsibilities, and compliance requirements under company policies and
---------------------------	---

	labor law. 1.9 Identify supervisory roles, duties, reporting lines, and oversight responsibilities in the workplace.
2. Underpinning Skills	2.1 Performing identification and explanation of management principles and types. 2.2 Demonstrating recognition of management functions, authorities, and responsibilities. 2.3 Identifying leadership attributes and explaining their impact on team performance. 2.4 Recognizing different leadership styles and applying their concepts in workplace settings. 2.5 Identifying soft skills and demonstrating their application in professional environments. 2.6 Following company policies and labor law requirements relevant to the sector. 2.7 Interpreting employee rights, responsibilities, and compliance obligations. 2.8 Recording observations and documenting performance expectations.
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincere and honest to duties 3.4 Environmental concerns 3.5 Eagerness to learn 3.6 Tidiness and timeliness 3.7 Respect for rights of peers and seniors in the workplace 3.8 Communication with peers, subordinates and seniors in the workplace
4 Resource Implications	4.1 Workplace (simulated or actual) 4.2 Projector 4.3 Learning manual 4.4 Labor law

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1 identified principles of management. 1.2 identified leadership attributes. 1.3 identified soft skills. 1.4 identified company policies and labor law 1.5 identified supervisory roles and duties.
2. Methods of Assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical Demonstration 2.3 Oral Questioning

	2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by nationally certified assessor or occupation-specific industry expert.

Unit of Competency: INTERPRET THE MANUFACTURING PROCESS OF LEATHER GOODS AND FOORWEAR	Nominal Duration: 100 Hrs.	Unit Code: SICIP-LET-SML-02-O
Unit Descriptor: This unit covers the skills, knowledge and attitudes required to interpret the manufacturing process of leather goods and footwear. It specifically includes the tasks of identifying leather goods and footwear products, describing cutting operations, explaining sewing and setting operations, describing lasting and assembling operations, explaining finishing and packaging operations.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Identify leather goods and footwear products	1.1 <u>Leather goods</u> are identified and listed. 1.2 <u>Footwear products</u> are identified and listed. 1.3 Product types and categories are recognized. 1.4 Materials and components used in each product are observed. 1.5 Features and functions of products are described.
2. Describe cutting operations	2.1 <u>Cutting operations in leather goods production</u> are observed and described. 2.2 <u>Cutting operations in footwear production</u> are observed and described. 2.3 <u>Tools and machines used for cutting</u> are identified. 2.4 Methods for cutting different materials are explained. 2.5 Safety precautions during cutting are noted and applied.
3. Explain sewing and setting operations	3.1 <u>Sewing and setting operations</u> are observed and explained. 3.2 <u>Machines and tools used in sewing and setting</u> are identified. 3.3 Techniques for stitching and assembling components are described. 3.4 Safety precautions during sewing and setting are noted and followed.
4. Describe lasting and assembling operations	4.1 <u>Lasting and assembling operations</u> are observed and described. 4.2 <u>Machines and tools used in lasting and assembling</u> are identified. 4.3 Safety precautions during lasting and assembling are noted and applied. 4.4 Workflow and sequence of operations are documented.
5. Explain finishing and	4.1 <u>Finishing and packaging operations</u> are observed

packaging operation	and explained.
	4.2 <u>Tools and equipment used for finishing and packaging</u> are identified.
	4.3 Techniques for polishing, trimming, and final assembly are described.
	4.4 Safety precautions during finishing and packaging are noted and applied.

Range of Variables

Variable	Range (Includes but not limited to):
1. Leather goods	1.1 Wallets 1.2 Belts 1.3 Handbags / Purses 1.4 Briefcases 1.5 Jackets / Coats 1.6 Gloves 1.7 Shoes (if categorized as leather goods) 1.8 Luggage / Travel bags 1.9 Key holders / Accessories 1.10 Wallet chains / Small leather items
2. Footwear products	2.1 Casual Shoes 2.2 Formal Shoes 2.3 Sports / Athletic Shoes 2.4 Sandals 2.5 Boots 2.6 Slippers / Flip-flops / Clogs 2.7 Safety Shoes / Industrial Footwear 2.8 Moccasins / Loafers 2.9 Children's Shoes 2.10 Orthopedic / Comfort Shoes
3. Cutting operations in leather goods production	3.1 Leather / synthetic inspection and selection 3.2 Pattern making and knife preparation 3.3 Layering leather / synthetic spreading leather on the table 3.4 Manual/machine cutting using knives or rotary cutters 3.5 Die cutting / Press cutting for components 3.6 Trimming and edge finishing of cut pieces 3.7 Sorting and organizing cut components for assembly
4. Cutting operations in footwear production	4.1 Leather or material inspection and selection 4.2 Pattern making and knife preparation 4.3 Spreading material on cutting table 4.4 Manual cutting using knives or scissors 4.5 Die cutting / Press cutting for soles, uppers, and components 4.6 Trimming and edge finishing of cut pieces 4.7 Sorting and organizing cut components for stitching and

	assembly
5. Tools and machines used for cutting	5.1 Utility knives / Craft knives 5.2 Scissors / Shears 5.3 Rotary cutters 5.4 Cutting mats 5.5 Skiving machine 5.6 Crimping machine 5.7 Clicker press / Die cutting machine 5.8 Travel head cutting machine 5.9 Leather splitting machine (for thickness adjustment before cutting) 5.10 Laser cutting machine 5.11 Embossing machine 5.12 Band knives / Bandsaw (for thicker materials) 5.13 Punch tools (for holes and small shapes)
6. Sewing and setting operations	6.1 Leather Goods Sewing & Setting Operations 6.1.1 Stitching cut components together (manual or machine stitching) 6.1.2 Edge stitching and topstitching for finishing 6.1.3 Attaching linings and reinforcements 6.1.4 Installing hardware (zippers, buckles, snaps, rivets) 6.1.5 Gluing and pressing components where required 6.1.6 Checking seam alignment and strength 6.1.7 Setting straps, handles, or decorative elements 6.2 Footwear Sewing & Setting Operations 6.2.1 Stitching upper components together (vamp, quarters, linings) 6.2.2 Attaching linings and reinforcements inside the shoe 6.2.3 Setting eyelets, hooks, or other hardware 6.2.4 Attaching insoles and sock linings 6.2.5 Sewing decorative or functional topstitching 6.2.6 Checking seam quality, alignment, and durability 6.2.7 Preparing the upper for lasting operations
7. Machines and tools used in sewing and setting	7.1 Machines 7.1.1 Lockstitch sewing machine 7.1.2 Chainstitch sewing machine 7.1.3 Post-bed / Cylinder-bed sewing machine (for curved or thick parts) 7.1.4 Buttonhole / Eyelet sewing machine 7.1.5 Overlock / Serger machine (for edges and linings) 7.1.6 Auto thread cutter sewing machine

	7.1.7 Pattern sewing machine 7.1.8 Bar tack machine (reinforcement stitching) 7.1.9 Industrial embroidery machine (decorative stitching) 7.2 Hand Tools / Setting Tools 7.2.1 Awls (for punching stitching holes) 7.2.2 Hammers / Mallets 7.2.3 Stitching chisels / Pricking irons 7.2.4 Needles and thread for hand sewing 7.2.5 Pliers (for hardware setting) 7.2.6 Rivet and snap setters 7.2.7 Clamps and presses for gluing or setting components
8. Lasting and assembling operations	8.1 Insert last and insole. 8.2 Toe lasting / Strobel, hand lasting, side lasting and heel lasting. 8.3 Priming and gluing. 8.4 Attaching midsoles and outsoles using stitching, cementing, or injection molding. 8.5 Buffing / ruffing. 8.6 Sole pressing. 8.7 Fixing the heel component securely in place. 8.8 Cutting excess material and smoothing edges. 8.9 Adding laces, eyelets, buckles, or decorative components. 8.10 Checking alignment, fit, and construction quality before finishing.
9. Machines and tools used in lasting and assembling	9.1 Machines 9.1.1 Lasting machines (manual or hydraulic) 9.1.2 Sole attaching / Cementing machines 9.1.3 Injection molding machines (for outsoles) 9.1.4 Heel attaching machines 9.1.5 Toe lasting machine 9.1.6 Sole press machine 9.1.7 Heat seater machine 9.1.8 Chiller machine 9.1.9 Hammering machine 9.1.10 Edge trimming machines 9.1.11 Stitching machines for sole attachment (e.g., Goodyear welting machines) 9.1.12 Heat press / Hot press machines 9.2 Hand Tools / Setting Tools 9.2.1 Hammers / Mallets 9.2.2 Pincers / Pliers 9.2.3 Lasting pliers 9.2.4 Edge knives / Trimming tools 9.2.5 Awls (for alignment or stitching holes)

	9.2.6 Clamps / Vices (for pressing glued parts) 9.2.7 Brushes or rollers (for applying adhesives)
10. Finishing and packaging operations	Finishing Operations 10.1 Smoothing edges, removing excess material. 10.2 Applying polish, paint, or coatings to enhance appearance. 10.3 Water repellents, protective coatings, or embossing. 10.4 Securing loose threads or stress points. 10.5 Checking for defects, alignment, and overall appearance. 10.6 Removing dust, glue residues, or dirt from the product. 10.7 Anti-mold treatment. 10.8 Adding logos, labels, or brand marks. Packaging Operations 10.9 Placing products neatly in boxes or protective wraps. 10.10 Using cartons, bags, or protective covers for shipment. 10.11 Applying product, size, or barcode labels. 10.12 Ensuring correct quantities per package. 10.13 Sealing boxes or shrink-wrapping for protection. 10.14 Organizing boxes for transportation. 10.15 Scanning. 10.16 Ensuring products and packaging meet standards before delivery.
11. Tools and equipment used for finishing and packaging	Finishing Tools & Equipment 11.1 Buffing machines / Edge polishing machines 11.2 Spray guns / Brushes (for dyeing, painting, or coating) 11.3 Heat presses (for embossing or branding) 11.4 Hand burnishers / Polishing cloths 11.5 Cutting knives / Scissors (for trimming) 11.6 Stitching or reinforcing tools (awls, needles, thread) 11.7 Cleaning brushes / Air blowers Packaging Tools & Equipment 11.8 Cartons / Boxes / Protective bags 11.9 Tape dispensers / Sealing machines 11.10 Shrink wrap machines / Heat sealers 11.11 Label printers / Barcode printers 11.12 Weighing scales 11.13 Anti-mold pack 11.14 Pallets / Trolleys for handling and dispatch 11.15 Stretch film / Wrapping materials

Curricular Content Guide

1. Underpinning Knowledge	1.1 Identify leather goods and footwear products, their types, features, and materials used.
---------------------------	--

	1.2 Understand cutting operations in leather goods and footwear production. 1.3 Identify and describe sewing and setting operations, including machines, tools, and techniques. 1.4 Understand safety measures during sewing and setting processes. 1.5 Explain lasting and assembling operations, associated tools, workflow, and safety precautions. 1.6 Describe finishing and packaging operations, tools, techniques, and safety measures. 1.7 Interpret inventory management practices.
2. Underpinning Skills	1.1 Performing identification and categorization of leather goods and footwear products. 1.2 Observing and describing cutting operations and applying safety precautions. 1.3 Demonstrating techniques for sewing and setting operations using appropriate tools and machines. 1.4 Following lasting and assembling procedures while applying safety measures. 1.5 Applying finishing and packaging techniques to ensure product quality and presentation. 1.6 Recording workflow, sequence of operations, and operational observations accurately. 1.7 Monitoring stock levels, reorder points, and maintaining accurate inventory records.
2. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincere and honest to duties 3.4 Environmental concerns 3.5 Eagerness to learn 3.6 Tidiness and timeliness 3.7 Respect for rights of peers and seniors in the workplace 3.8 Communication with peers, subordinates and seniors in the workplace
4 Resource Implications	4.1 Workplace (simulated or actual) 4.2 Projector 4.3 Stationery 4.4 Learning manual 4.5 Leather goods 4.6 Footwear

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1 identified leather goods and footwear products. 1.2 described cutting operations.
-----------------------------------	--

	1.3 explained sewing and setting operations. 1.4 described lasting and assembling operations. 1.5 explained finishing and packaging operations. 1.6 interpreted inventory management practices.
2. Methods of Assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical Demonstration 2.3 Oral Questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

Unit of Competency: IMPLEMENT QUALITY CONTROL AND ASSURANCE TECHNIQUES	Nominal Duration: 20 Hrs.	Unit Code: SICIP-LET-SML-03-O
Unit Descriptor: This unit covers the skills, knowledge and attitudes required to implement quality control and assurance techniques. It specifically includes identifying common defects, inspecting materials and products, applying standard operating procedures (SOPs) and recording and reporting quality deviations.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Identify common defects.	1.1 <u>Common defects in leather goods</u> are identified and documented. 1.2 <u>Common defects in footwear products</u> are identified and documented. 1.3 Defective items are inspected visually and compared with quality standards. 1.4 Causes of defects related to materials, machines, or workmanship are recorded. 1.5 Defects are classified according to severity and production stage. 1.6 Findings are reported to relevant personnel for corrective action.
2. Inspect materials and products.	2.1 Materials used in production are identified and inspected for quality. 2.2 Products at various stages are inspected against specifications and standards. 2.3 Defective or non-conforming materials and products are detected and recorded. 2.4 Inspection results are documented accurately for traceability. 2.5 Observations are compared with quality benchmarks and standards. 2.6 Issues detected during inspection are reported to relevant personnel.
3. Apply standard operating procedures (SOPs).	3.1 Standard Operating Procedures (SOPs) are understood and explained. 3.2 SOPs are followed consistently during all relevant work activities. 3.3 Work processes are performed in compliance with established SOPs. 3.4 Deviations from SOPs are identified and reported. 3.5 SOPs are maintained and updated as required.

	3.6 Compliance with SOPs is monitored and documented.
4. Record and report quality deviations.	4.1 Basic quality tools are identified and used for inspection purposes. 4.2 Quality deviations in materials and products are recorded accurately. 4.3 Records are maintained according to established procedures. 4.4 Deviations from quality standards are documented with relevant details. 4.5 Quality reports are generated systematically and reviewed. 4.6 Reports are submitted to relevant personnel for corrective action. 4.7 Causes of identified quality deviations are analyzed and documented. 4.8 Corrective actions are taken based on the analysis.

Range of Variables

Variable	Range (Includes but not limited to):
1. Common defects in leather goods	1.1 Cutting Department 1.1.1 Misaligned patterns 1.1.2 Uneven or inaccurate cuts 1.1.3 Wastage of leather 1.1.4 Scratches or cuts on leather surface 1.2 Skiving/Preparation Department 1.2.1 Uneven skiving thickness 1.2.2 Torn or weakened edges 1.2.3 Wrinkles or creases on leather 1.3 Stitching/Sewing Department 1.3.1 Loose, skipped, or uneven stitches 1.3.2 Thread breakage 1.3.3 Misalignment of parts during sewing 1.4 Assembling/Adhesive Department 1.4.1 Glue marks on visible surfaces 1.4.2 Improper bonding of components 1.4.3 Warping or deformation after adhesive application 1.5 Finishing Department 1.5.1 Uneven coloring or staining 1.5.2 Surface cracks or scratches 1.5.3 Poor edge finishing 1.5.4 Improper embossing or stamping
2 Common defects in footwear products	2.1 Cutting Department 2.1.1 Misaligned patterns or templates 2.1.2 Uneven or inaccurate cuts 2.1.3 Leather or fabric scratches 2.1.4 Wastage of material

	2.2 Stitching/Sewing Department 2.2.1 Loose, skipped, or uneven stitches 2.2.2 Thread breakage 2.2.3 Misalignment of upper components 2.3 Lasting Department 2.3.1 Poor shaping of the upper over the last 2.3.2 Uneven tension or wrinkles 2.3.3 Misalignment between upper and sole 2.4 Sole Preparation and Attaching Department 2.4.1 Uneven sole thickness 2.4.2 Improper bonding or sole detachment 2.4.3 Glue marks on visible surfaces 2.5 Finishing Department 2.5.1 Surface scratches, scuffs, or cracks 2.5.2 Color inconsistency or staining 2.5.3 Poor edge finishing or polishing
3 Basic quality tools	3.1 Check Sheets 3.2 Control Charts 3.3 Pareto Analysis 3.4 Cause-and-Effect (Fishbone/Ishikawa) Diagram 3.5 Flowcharts 3.6 Histogram 3.7 Scatter Diagram 3.8 5 Whys Analysis 3.9 Process Mapping 3.10 Inspection Gauges and Measuring Tools (rulers, calipers, micrometers)

Curricular Content Guide

1. Underpinning Knowledge	1.1 Identify common defects in leather goods and footwear and document them. 1.2 Understand causes of defects related to materials, machines, or workmanship. 1.3 Interpret defect classification according to severity and production stage. 1.4 Inspect materials and products against quality standards and specifications. 1.5 Identify and record non-conforming or defective materials and products. 1.6 Understand deviations from SOPs and report them appropriately. 1.7 Record and report quality deviations using basic quality tools and established procedures.
2. Underpinning Skills	2.1 Performing identification and documentation of common defects in leather goods and footwear. 2.2 Inspecting materials and products at various stages against quality standards.

	2.3 Applying visual inspection techniques to detect defective or non-conforming items. 2.4 Following standard operating procedures (SOPs) consistently during work activities. 2.5 Monitoring compliance with SOPs and reporting deviations as required. 2.6 Using basic quality tools to support inspection and evaluation processes. 2.7 Documenting quality deviations, generating reports, and submitting them for corrective action. 2.8 Analyzing causes of quality deviations and applying corrective measures to maintain product standards.
3. Underpinning Attitudes	3.1. Commitment to occupational health and safety 3.2. Promptness in carrying out activities 3.3. Sincere and honest to duties 3.4. Environmental concerns 3.5. Eagerness to learn 3.6. Tidiness and timeliness 3.7. Respect for rights of peers and seniors in the workplace 3.8. Communication with peers, subordinates and seniors in the workplace
4. Resource Implications	4.1 Workplace (simulated or actual) 4.2 Projector 4.3 Learning manual 4.4 Standard operating procedures (SOPs)

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1 identified common defects. 1.2 Inspected materials and products. 1.3 applied standard operating procedures (SOPs). 1.4 recorded and reported quality deviations.
2. Methods of Assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical Demonstration 2.3 Oral Questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

Unit of Competency: APPLY BASIC INDUSTRIAL ENGINEERING (IE) ACTIVITIES	Nominal Duration: 40 Hrs.	Unit Code: SICIP-LET-SML-04-O
Unit Descriptor: This unit covers the skills, knowledge and attitudes required to apply basic industrial engineering (IE) activities. It specifically includes the tasks of identifying different types of line layout, performing work study process, preparing skills matrix for production line, implementing line balancing in production and preparing efficiency report.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Identify different types of line layout.	1.1 <u>Different types of production line layouts</u> are identified and listed. 1.2 Features of each layout type are observed and recorded. 1.3 Advantages and disadvantages of various line layouts are analyzed. 1.4 Layout suitability is evaluated based on product type and workflow. 1.5 Existing layouts are compared with recommended standards. 1.6 Selected line layout is implemented in the production area.
2. Perform work study process.	2.1 <u>Work study process</u> is performed to analyze and improve productivity. 2.2 Method study is conducted to identify the most efficient way of performing tasks. 2.3 Current work methods are observed, recorded, and evaluated. 2.4 <u>Time study</u> is carried out to measure task duration accurately. 2.5 Standard time for each operation is calculated and documented. 2.6 Findings from method and time studies are analyzed for process improvement. 2.7 Results are reported and used to establish performance benchmarks.
3. Prepare skills matrix for production line	3.1 <u>Skills variables</u> required for the production line are identified and listed. 3.2 Skill weights are determined based on task importance and complexity. 3.3 Skill levels and grades are defined according to standards.

	3.4 Multi-skilled criteria are identified. 3.5 Data on worker competencies are collected and recorded. 3.6 Skills matrix is prepared showing workers' proficiency across tasks. 3.7 Completed skills matrix is reviewed and updated for accuracy and use in workforce planning.
4. Implement line balancing in production.	4.1 Principles and objectives of line balancing are understood and explained. 4.2 Work tasks and process steps are analyzed for balance and efficiency. 4.3 <u>Standard line balancing methods</u> are applied to distribute workload evenly. 4.4 Real-time line balancing adjustments are implemented during production. 4.5 Idle time and bottlenecks are identified and minimized. 4.6 Production flow is monitored to ensure smooth operation. 4.7 Line balancing results are reviewed and documented for continuous improvement.
5. Prepare efficiency report	6.1 Data on machine performance and production output are collected accurately. 6.2 Overall Equipment Effectiveness (OEE) is calculated based on availability, performance, and quality. 6.3 Overall Working Efficiency (OWE) is measured to evaluate labor and process productivity. 6.4 Collected data are analyzed to identify performance gaps and improvement areas. 6.5 Efficiency results are summarized and documented in a standard report format. 6.6 <u>Reports</u> are reviewed with relevant personnel for validation and decision-making. 6.7 Recommendations for improving OEE and OWE are included in the final efficiency report.

Range of Variables

Variable	Range (Includes but not limited to):
1. Different types of production line layouts	1.1 Product layout 1.2 Process layout 1.3 Hybrid layout 1.4 Fixed position layout
2. Work study process	2.1 Time study 2.2 Method study
3. Time study	3.1 Manual 3.2 Stop watch 3.3 Pre-determined Motion Time System (PMTS)
4. Skills variables	4.1 Standard time

	4.2 Standard Minute Value (SMV) 4.3 Quality
5. Standard line balancing methods	5.1 Standard 5.2 Real time
6. Reports	6.1 Manual (Spreadsheet) 6.2 Software

Curricular Content Guide

1. Underpinning Knowledge	1.1. Identify types of production line layouts and recognize their features, advantages, and disadvantages. 1.2. Interpret layout suitability based on product type, workflow, and production standards. 1.3. Understand and perform work study processes, including method and time studies. 1.4. Identify skills required for production line tasks and prepare a skills matrix showing worker proficiency. 1.5. Understand principles and objectives of line balancing and apply methods to evenly distribute workload. 1.6. Collect and analyze machine performance and production data to calculate OEE and OWE.
2. Underpinning Skills	2.1. Observing, recording, and analyzing features, advantages, and disadvantages of line layouts. 2.2. Performing work study processes, including method study and time study, to improve productivity. 2.3. Collecting and recording worker competency data to prepare a skills matrix. 2.4. Applying line balancing principles to distribute workload evenly and minimize bottlenecks. 2.5. Monitoring production flow and making real-time adjustments to ensure smooth operations. 2.6. Collecting and analyzing machine and labor performance data to prepare efficiency reports. 2.7. Documenting results and recommendations for continuous improvement in production efficiency.
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincere and honest to duties 3.4 Environmental concerns 3.5 Eagerness to learn 3.6 Tidiness and timeliness 3.7 Respect for rights of peers and seniors in the workplace 3.8 Communication with peers, subordinates and seniors in the workplace
4 Resource Implications	4.1 Workplace (simulated or actual) 4.2 Computer/laptop/notebook

	4.3 Projector 4.4 Learning manual 4.5 Skills matrix sample
--	--

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment must evidence that the candidate: 1.1 identified different types of line layout. 1.2 performed work study process. 1.3 prepared skills matrix for production line 1.4 implemented line balancing in production. 1.5 prepared efficiency report
2. Methods of Assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical Demonstration 2.3 Oral Questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by nationally certified assessor or occupation-specific industry expert.

Unit of Competency: PERFORM EFFECTIVE WORKPLACE SUPERVISION	Nominal Duration: 40 Hrs.	Unit Code: SICIP-LET-SML-05-O
Unit Descriptor: This unit covers the skills, knowledge and attitudes required to perform effective workplace supervision. It specifically includes the task of carrying out daily work allocation, carrying out hourly monitoring task, demonstrating fair conflict handling and carrying out team building techniques.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Carryout Daily Work Allocation	1.1 Daily production/coordination meeting is conducted, ensuring all relevant team members. 1.2 Daily attendance, productivity and <u>quality records</u> are maintained. 1.3 Daily machine breakdown records are logged, capturing details of machine malfunctions. 1.4 Daily accident and incident reports are documented. 1.5 Daily Production Planning and Inventory Control (PPIC) records are updated. 1.6 Material demand from the store department is identified and communicated. 1.7 Achievement against target is monitored.
2. Carryout Hourly Monitoring Task	2.1 Production process is monitored hourly according to the established plan and schedule. 2.2 <u>Performance data</u> is recorded during the monitoring process. 2.3 Issues or deviations from the plan are identified and reported. 2.4 Equipment and machinery are checked hourly to ensure they are functioning properly. 2.5 Worker performance and workflow are observed.
3. Demonstrate Fair Conflict Handling	3.1 Conflicts are identified by recognizing early signs of disagreement between individuals or teams. 3.2 Underlying causes of the conflict are assessed by gathering perspectives. 3.3 Communication is facilitated, allowing all parties. 3.4 Neutrality is maintained, ensuring that personal biases. 3.5 A fair resolution is proposed, focusing on mutual respect that is acceptable to all parties.
4. Carryout Team Building Techniques	4.1 <u>Team-building activities</u> are organized. 4.2 Clear goals and roles are defined to ensure each team member understands their responsibilities.

	4.3 Group discussions and problem-solving activities are facilitated. 4.4 Individual strengths and weaknesses are recognized. 4.5 Positive feedback and recognition are provided to motivate team members and reinforce teamwork. 4.6 Conflict resolution techniques are applied.
--	--

Range of Variables

Variable	Range (Includes but not limited to):
1. Quality records	1.1 Rejection 1.2 Repair 1.3 Re-control 1.4 Process control 1.5 Acceptable Quality Level (AQL) 1.6 Inspections
2. Performance data	2.1 Productivity 2.2 Rejection record 2.3 Quality 2.4 Efficiency
3. Team-building activities	3.1 Group problem-solving sessions 3.2 Daily team huddles or briefings 3.3 Friendly production challenges or contests 3.4 Joint quality improvement projects 3.5 Recognition and reward programs 3.6 Brainstorming sessions for process improvement 3.7 Outdoor or recreational team events 3.8 Peer mentoring and support initiatives

Curricular Content Guide

1. Underpinning Knowledge	1.1 Identify procedures for daily work allocation. 1.2 Understand documentation of machine breakdowns, accidents, incidents, and PPIC updates. 1.3 Interpret material demand and communicate requirements to relevant departments. 1.4 Understand hourly monitoring of production processes, equipment, workflow, and worker performance. 1.5 Identify deviations from plans and report issues promptly. 1.6 Interpret conflict situations, recognize early signs, and assess underlying causes. 1.7 Understand team-building methods.
2. Underpinning Skills	2.1 Performing daily work allocation by conducting meetings and updating production records. 2.2 Recording attendance, productivity, quality, and machine breakdowns accurately. 2.3 Monitoring production processes and equipment

	performance hourly. 2.4 Observing worker performance and workflow to identify deviations or issues. 2.5 Applying fair conflict handling by assessing causes, facilitating communication, and proposing resolutions. 2.6 Demonstrating neutrality and maintaining professionalism during conflict resolution. 2.7 Organizing and facilitating team-building activities to enhance collaboration. 2.8 Applying problem-solving and conflict resolution techniques to maintain team efficiency.
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincere and honest to duties 3.4 Environmental concerns 3.5 Eagerness to learn 3.6 Tidiness and timeliness 3.7 Respect for rights of peers and seniors in the workplace 3.8 Communication with peers, subordinates and seniors in the workplace
4 Resource Implications	4.1 Workplace (simulated or actual) 4.2 Projector 4.3 Learning manual 4.4 Checklist sheet

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1 carried out daily work allocation 1.2 carried out hourly monitoring task 1.3 demonstrated fair conflict handling 1.4 carried out team building techniques
2. Methods of Assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical Demonstration 2.3 Oral Questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

Unit of Competency: CARRY OUT LEADERSHIP IN THE WORKPLACE	Nominal Duration:	Unit Code: SICIP-LET-SML-06-O
--	--------------------------	---

	20 Hrs.	
Unit Descriptor: This unit covers the skills, knowledge and attitudes required to carry out leadership in the workplace. It specifically includes the task of demonstrating leadership skills, providing direction to team members, motivating and supporting team performance, solving workplace problems effectively and promoting teamwork and cooperation.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Demonstrate leadership skills.	1.1 <u>Leadership qualities and behaviors</u> are demonstrated in the workplace. 1.2 Team goals and expectations are clearly communicated. 1.3 Guidance and motivation are provided to team members. 1.4 Conflicts and challenges are managed effectively. 1.5 Decisions are made based on sound judgment and fairness. 1.6 Positive work culture and collaboration are encouraged. 1.7 Feedback from team performance is reviewed for improvement.
2. Provide direction to team member.	2.1 Work objectives and priorities are clearly communicated to team members. 2.2 Tasks and responsibilities are assigned according to skill and capability. 2.3 Instructions and guidance are provided to ensure understanding. 2.4 Support and resources are made available to complete tasks. 2.5 Progress of team members is monitored and feedback is given. 2.6 Adjustments to direction are made based on performance and needs. 2.7 Team alignment with organizational goals is maintained.
3. Motivate and support team performance	3.1 Individual and group achievements are acknowledged and appreciated. 3.2 Support is provided to overcome work-related challenges. 3.3 Opportunities for skill development are identified and shared. 3.4 <u>Constructive feedback</u> is given to improve team performance.

	3.5 Team spirit and cooperation are promoted in the workplace. 3.6 Performance outcomes are reviewed and used for continuous improvement.
4. Solve workplace problems.	4.1 Workplace problems are identified and analyzed. 4.2 Possible causes of problems are investigated and recorded. 4.3 Alternative solutions are developed and evaluated. 4.4 The most effective solution is selected and implemented. 4.5 Team members are involved in the <u>problem-solving process</u>. 4.6 Outcomes of the solution are monitored and reviewed.
5. Promote teamwork and cooperation.	5.1 Teamwork and cooperation are encouraged among team members. 5.2 Open communication and mutual respect are maintained. 5.3 Roles and responsibilities are shared to achieve common goals. 5.4 Collaborative problem-solving is practiced within the team. 5.5 Conflicts are resolved through discussion and understanding. 5.6 Team achievements are recognized and celebrated. 5.7 <u>Continuous improvement</u> in team collaboration is supported.

Range of Variables

Variable	Range (Includes but not limited to):
1. Leadership qualities and behaviors	1.1 Communication 1.2 Integrity 1.3 Confidence 1.4 Accountability 1.5 Empathy 1.6 Decision-making 1.7 Teamwork 1.8 Motivation 1.9 Adaptability
2. Constructive feedback	2.1 Specific 2.2 Clear 2.3 Objective 2.4 Timely 2.5 Respectful 2.6 Action-oriented 2.7 Supportive 2.8 Balanced (positive and corrective)
3. Problem-solving	3.1 Identify the problem

process	3.2 Analyze the cause 3.3 Generate possible solutions 3.4 Evaluate options 3.5 Choose the best solution 3.6 Implement the solution 3.7 Review the results
4. Continuous improvement	4.1 Identify improvement areas 4.2 Analyze current processes 4.3 Develop solutions 4.4 Implement changes 4.5 Sustain the positive changes 4.6 Measure results 4.7 Standardize successful practices 4.8 Plan Do Check and Act (PDCA)

Curricular Content Guide

1. Underpinning Knowledge	1.1 Identify leadership qualities and behaviors in the workplace. 1.2 Understand how to communicate team goals, expectations, and work objectives. 1.3 Interpret methods to provide guidance, motivation, and resources to team members. 1.4 Recognize and manage conflicts and workplace challenges effectively. 1.5 Understand techniques to motivate, support, and develop team performance. 1.6 Identify workplace problems, analyze causes, and implement effective solutions involving the team. 1.7 Promote teamwork, cooperation, open communication, and mutual respect among team members. 1.8 Recognize and celebrate team achievements while encouraging continuous improvement.
2. Underpinning Skills	2.1 Demonstrating leadership by guiding, motivating, and supporting team members. 2.2 Communicating work objectives, priorities, and expectations clearly. 2.3 Assigning tasks according to skills and monitoring progress effectively. 2.4 Applying constructive feedback to improve individual and team performance. 2.5 Encouraging teamwork, cooperation, and a positive work culture. 2.6 Involving team members in problem-solving and decision-making processes. 2.7 Maintaining open communication, mutual respect, and

	collaboration among team members.
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincere and honest to duties 3.4 Environmental concerns 3.5 Eagerness to learn 3.6 Tidiness and timeliness 3.7 Respect for rights of peers and seniors in the workplace 3.8 Communication with peers, subordinates and seniors in the workplace
4 Resource Implications	4.1 Workplace (simulated or actual) 4.2 Projector 4.3 Learning manual

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1 demonstrated leadership skills. 1.2 provided direction to team members. 1.3 motivated and supported team performance. 1.4 solved workplace problems effectively. 1.5 promoted teamwork and cooperation.
2. Methods of Assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical Demonstration 2.3 Oral Questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

Unit of Competency: APPLY ESG AND RISK MANAGEMENT PRACTICES	Nominal Duration: 20 Hrs.	Unit Code: SICIP-LET-SML-07-O
Unit Descriptor: This unit covers the skills, knowledge and attitudes required to apply ESG and risk management practices. It specifically includes the task of identifying ESG requirements, following environmental and waste management rules, maintaining social and ethical practices, identifying risks and hazards and applying safety and emergency measures.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Identify ESG Requirements.	1.1 ESG (Environmental, Social, and Governance) requirements are identified and documented. 1.2 Relevant laws, regulations, and industry standards are recognized. 1.3 <u>Organizational ESG policies</u> and procedures are reviewed. 1.4 Stakeholder expectations related to ESG are interpreted. 1.5 ESG risks and compliance obligations are analyzed. 1.6 Observations are recorded to support ESG planning and implementation. 1.7 Findings are communicated to relevant personnel for action.
2. Follow Environmental and waste management rules.	2.1 <u>Environmental regulations and waste management rules</u> are identified and reviewed. 2.2 Workplace practices are aligned with environmental and waste management requirements. 2.3 Waste disposal procedures are followed according to guidelines. 2.4 <u>Pollution prevention measures</u> are applied during operations. 2.5 Compliance with environmental standards is monitored regularly. 2.6 Deviations or non-compliance are detected and reported. 2.7 Records of environmental and waste management activities are maintained.
3. Maintain social and ethical practices.	3.1 <u>Social and ethical guidelines</u> are identified and understood. 3.2 Workplace practices are aligned with ethical standards and policies. 3.3 Employee rights and responsibilities are respected and upheld.

	3.4 Fair treatment and non-discrimination are ensured in all operations. 3.5 Community and stakeholder expectations are considered in decision-making. 3.6 Ethical breaches or concerns are reported and addressed promptly. 3.7 Records of social and ethical practices are maintained for accountability.
4. Identify risks and hazards.	4.1 <u>Workplace risks and hazards</u> are identified and listed. 4.2 Potential sources of accidents or harm are observed and documented. 4.3 Safety data and incident records are reviewed to detect risks. 4.4 Risks are classified according to severity and likelihood. 4.5 Hazards related to equipment, materials, and processes are recognized. 4.6 Records of identified risks and hazards are maintained for monitoring.
5 Apply safety and emergency measures.	5.1 <u>Safety procedures and emergency protocols</u> are identified and understood. 5.2 Safety signs, warnings, and instructions are followed. 5.3 Emergency measures, including evacuation and first aid, are applied when needed. 5.4 Equipment and work areas are checked to ensure safe conditions. 5.5 Incidents and safety breaches are reported promptly. 5.6 Records of safety and emergency measures are maintained and reviewed.

Range of Variables

Variable	Range (Includes but not limited to):
1. Organizational ESG policies	1.1 Environmental policy 1.2 Waste management policy 1.3 Energy conservation policy 1.4 Chemical safety policy 1.5 Labor rights policy 1.6 Health and safety policy 1.7 Equality policy 1.8 Ethical sourcing policy 1.9 Social responsibility policy 1.10 Compliance policy
2. Environmental regulations and waste management rules	2.1 Environment Act 2.2 Waste Management Rules 2.3 Pollution Control Rules 2.4 ETP Guidelines 2.5 Chemical Safety Rules

	2.6 Solid Waste Rules 2.7 Air and Water Quality Standards
3. Pollution prevention measures	3.1 Wastewater treatment 3.2 Air emission control 3.3 Solid waste segregation 3.4 Chemical spill prevention 3.5 Energy efficiency practices 3.6 Use of eco-friendly materials 3.7 Noise reduction measures
4. Social and ethical guidelines	4.1 Fair labor practices 4.2 No child or forced labor 4.3 Equal opportunity and non-discrimination 4.4 Safe and healthy workplace 4.5 Freedom of association 4.6 Fair wages and working hours 4.7 Community engagement and development
5. Workplace risks and hazards	5.1 Chemical exposure 5.2 Fire and electrical hazards 5.3 Machine and equipment accidents 5.4 Slips, trips, and falls 5.5 Ergonomic strain and repetitive motion injuries 5.6 Dust and fume inhalation 5.7 Noise pollution 5.8 Sharp tools and cutting hazards 5.9 Poor lighting and ventilation 5.10 Waste handling risks
6. Safety procedures and emergency protocols	6.1 Fire safety procedures 6.2 Chemical spill response 6.3 First aid and medical emergency response 6.4 Machine shutdown and lockout procedures 6.5 Evacuation plan and assembly points 6.6 Use of personal protective equipment (PPE) 6.7 Electrical safety measures 6.8 Incident reporting and investigation

Curricular Content Guide

1. Underpinning Knowledge	1.1 Identify ESG (Environmental, Social, and Governance) requirements and relevant laws, regulations, and industry standards. 1.2 Interpret organizational ESG policies and stakeholder expectations to ensure compliance. 1.3 Understand ESG risks, obligations, and methods to document findings for planning and implementation. 1.4 Identify environmental and waste management rules and apply workplace practices to meet requirements. 1.5 Interpret pollution prevention measures and monitor
---------------------------	---

	compliance with environmental standards. 1.6 Identify social and ethical guidelines and align workplace practices with ethical standards. 1.7 Understand employee rights, fair treatment, and non-discrimination principles in the workplace. 1.8 Identify workplace risks and hazards, classify them, and maintain records for monitoring.
2. Underpinning Skills	2.1 Applying environmental and waste management rules in workplace operations. 2.2 Demonstrating social and ethical practices, including fairness and non-discrimination. 2.3 Observing and recording ESG-related risks, hazards, and compliance obligations. 2.4 Following pollution prevention and workplace safety measures. 2.5 Applying emergency procedures, first aid, and safety protocols when needed. 2.6 Monitoring compliance with environmental, social, and governance standards. 2.7 Reporting deviations, ethical breaches, hazards, and incidents accurately. 2.8 Maintaining records to support ESG, safety, and ethical accountability.
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincere and honest to duties 3.4 Environmental concerns 3.5 Eagerness to learn 3.6 Tidiness and timeliness 3.7 Respect for rights of peers and seniors in the workplace 3.8 Communication with peers, subordinates and seniors in the workplace
4 Resource Implications	4.1 Workplace (simulated or actual) 4.2 Projector 4.3 Learning manual 4.4 Organizational ESG policies

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1 identified ESG requirements 1.2 followed environmental and waste management rules 1.3 maintained social and ethical practices 1.4 identified risks and hazards 1.5 applied safety and emergency measures
2. Methods of Assessment	Competency should be assessed by:

	2.1 Written test 2.2 Practical Demonstration 2.3 Oral Questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

End of the Competency Standard

Workshop/Lab Facility Standard

Course Name:	Supervisory Management & Leadership Skills Development
Number of Trainees:	20

Course-wise Training Space (Theoretical Classroom, Workshop/ Lab/Classroom cum Workshop):

- Classroom – 350 sft (33 sqm)
- Workshop/ lab – 800 sft (75 sqm) OR
- Classroom cum workshop – 1000 sft (93 sqm)

Major Training Equipment and Training Facilities:

S.N	Major Equipment and Training facilities	Required facilities
1.	Computer/Laptops	01
2.	Multimedia projector & screen	01
3.	Scanner	01
4.	Printer	01
5.	Flip Charts	01
6.	PA System / Microphone	01
7.	Leather Goods/Footwear Samples (with defective product)	25
8.	Simulated/actual production floor (Cutting, sewing, lasting and assembling)	01
9.	Performance Management / Leadership Simulation Software	01

The following conditions must be fulfilled –

- The institute shall not use the same facilities for any other projects/organizations offering a similar course.
- The institute must provide sufficient evidence to prove ownership of the proposed training equipment.

The list denotes the minimum training equipment and facility required to effectively conduct training for a specific course. Additionally, the institute must ensure that all other necessary training tools, equipment, and furniture are available to meet the requirement of competency standards (CS) provided by SICIP.

For the operation of training course on Supervisory Management & Leadership Skills Development the institute must ensure the availability of at least 80% of the major training equipment and training facilities (according to the CS) to be eligible for SICIP training delivery. If the score is below 80%, the remaining equipment and facilities need to be installed before the commencement of the training.

The institute will also provide all other hand tools and power tools as per CS for 20 trainees. Also, they will arrange adequate seating arrangement and classroom setup for the 20 trainees.
