

COMPETENCY STANDARD

FOR

**SUPPLY CHAIN MANAGEMENT FOR FOOTWEAR AND
LEATHER GOODS SECTOR**

(Leather and Footwear Sector)

Skills for Industry Competitiveness and Innovation Program (SICIP)
Finance Division, Ministry of Finance

COPYRIGHT

The Competency Standards for Supply Chain Management for Footwear & Leather Goods Sector serve as a foundational document for the development of curricula, teaching materials, and assessment tools specifically tailored for the Leather Goods and Footwear sector. This document ensures that training activities align with industry requirements, enabling individuals who successfully meet the established standards through assessment to become qualified professionals in relevant roles within the sector.

Developed under the Skills for Industry Competitiveness and Innovation Program (SICIP), this document addresses the skills requirements critical for Supply Chain Management for Footwear & Leather Goods Sector. It is owned by the Finance Division of the Ministry of Finance of the People's Republic of Bangladesh.

Public and private institutes may use the information contained in this competency standard for training activities benefitting Bangladesh.

Other interested parties must obtain permission from the owner of this document for reproduction of information in any manner in whole or in part of this Skills Standard, in English or other languages.

INTRODUCTION:

The Skills for Industry Competitiveness and Innovation Program (SICIP) has the overall objective of developing a skilled workforce adept at handling new technologies, especially for emerging industries in Bangladesh. It will expand skills training and strengthen the development of the training ecosystem to address the skills requirements of the SICIP-selected industry sectors. The program aims to (i) increase the technology-oriented skilled workforce across emerging and priority sectors, (ii) promote inclusive skilling and upskilling opportunities for women and socially disadvantaged groups, (iii) incentivize industry-university partnerships to nurture innovation capacity and improve industry competitiveness, and (iv) foster skills for climate-resilient manufacturing processes and green technologies. The program is expected to benefit about 220,000 new and existing workers over a 6-year implementation period from 2024-2029.

The SICIP Program has, therefore, taken the initiative to enhance the employability and productivity of trainees by implementing market-responsive and job-focused training programs through public and private training providers. This will require the development of competency standards for each of the occupations/trades which will provide a structured framework in the learning process to guide training providers, ensure consistent training quality, and create an alignment between the skills provided by the training institutes and the needs of the industry.

The Competency Standard also suggests integration of YouTube or similar platforms or downloaded clips into classroom practice to ensure simulated creation of the contents so that learners are exposed to visual demonstrations before classroom instruction or practical session, which aligns with modern learning preference and supports flipped classroom models.

This competency standard is therefore developed to improve skills following the job roles and skill sets of the occupation and ensure that the required skills are aligned with industry requirements.

The document details the format, sequencing, wording, and layout of the Competency Standard for an occupation which comprises Units of Competence and its corresponding Elements.

OVERVIEW:

A **Competency Standard** is a written specification of the knowledge, skills, and attitudes required for the performance of a job or occupation or trade corresponding to the standard of performance required in the workplace.

Competency standard:

- provides a consistent and reliable set of components for training, recognizing, and assessing people's skills, and may also have optional support materials.
- enables industry-recognized qualifications to be awarded through direct assessment of workplace competencies
- encourages the development and delivery of flexible training that suits individual and industry requirements
- encourages learning and assessment in a work-related environment which leads to verifiable workplace outcomes.

Competency Standards are developed by a working group comprised of national and international process experts and the participation of experts from the industry to identify the competencies required of an occupation in a particular sector.

Competency Standards describe the skills, knowledge, and attitude needed to perform effectively in the workplace. Competency Standards acknowledge that people can achieve vocational and technical competency in many ways by emphasizing what the learner can do, not how or where they learned to do it.

With Competency Standards, assessment and training may be conducted at the workplace, at training organization, during regular work, or through work experience, work placement, work simulation or any combination of these.

A Unit of Competency describes a distinct work activity that would normally be undertaken by one person in accordance with industry standards.

Units of Competency are documented in a standard format that comprises:

- Reference to Industry Sector, Occupational Title and Occupational Description
- Unit code
- Unit title
- Unit descriptor
- Elements and performance criteria
- Variables and range statement
- Evidence guides

Together all the parts of a Unit of Competency:

- Describe a work activity
- Guide the assessor in determining whether the candidate is competent.

Competency Standard has been developed by a working group comprised of occupation-specific experts from the industry/institution, relevant consultants of SICIP.

The ensuing sections of this document comprise a description of the respective occupation with all the key components of a Unit of Competence:

- An overview of all Units of Competence for the occupation and their corresponding duration required for completion of training.
- The Competency Standards that include the Unit of Competency, Unit Descriptor, Elements and Performance Criteria, Range of Variables, Curricular Content Guide, and Assessment Evidence Guide.

Units & Elements at a Glance:

Generic Competencies (30 Hrs.)

Code	Unit of Competency	Elements of Competency	Duration (Hours)
SICIP-LET-SCM-01-G	Carry Out Workplace Interaction	1. Interpret Workplace Communication and Etiquette 2. Read and Understand Workplace Documents 3. Participate in Workplace Meetings and Discussions 4. Practice Professional Ethics at Work	15
SICIP-LET-SCM-02-G	Operate In a Team Environment	1. Identify Team Goals and Work Processes 2. Identify Own Role and Responsibilities within Team 3. Communicate and Co-Operate with Team Members 4. Practice Problem Solving Within the Team	15
Total Hour			30 Hrs.

Sector Specific Competencies (20 hrs.)

Code	Unit of Competency	Elements of Competency	Duration (Hours)
SICIP-LET-SCM-01-S	Carry out measurements and calculations	1. Plan and prepare 2. Obtain measurements 3. Perform calculations	10
SICIP-LET-SCM-02-S	Apply green practices in LET sector	1. Interpret green concepts 2. Minimize resource use in the workplace 3. Implement waste management practices	10
Total Hour			20 Hrs.

Occupation Specific Competencies (250 hrs.)

Code	Unit of Competency	Elements of Competency	Duration (hours)
SICIP-LEA-SCM-01-O	Apply Basic Knowledge of Supply Chain Management for Footwear and Leather Goods Sector	1. Identify supply chain concepts and functions. 2. Explain material, information, and finance flow. 3. Identify key supply chain stakeholders. 4. Describe SCM roles in the leather and footwear industry. 5. Identify key performance indicators (KPIs).	15
SICIP-LEA-SCM-02-O	Manage Procurement and Sourcing Activities	1. Identify raw materials, components, and suppliers. 2. Analyze cost components and cost drivers. 3. Calculate direct and indirect costs. 4. Perform order management activities. 5. Maintain supplier performance records. 6. Ensure compliance with procurement policies and regulations.	40
SICIP-LEA-SCM-03-O	Apply Order Planning and Forecasting Techniques	1. Analyze historical sales data to forecast demand. 2. Plan orders and procurement schedules accordingly. 3. Monitor and control inventory 4. Align production plans with customer demand.	40
SICIP-LEA-SCM-04-O	Manage Production, Planning, and Manufacturing Operations	1. Plan production and delivery schedules. 2. Understand the manufacturing operations. 3. Follow standard operating procedures (SOPs). 4. Optimize raw material usage and minimize waste. 5. Review and update production plans as required.	60
SICIP-LEA-SCM-05-O	Apply Quality, Compliance, and Sustainability in Supply Chain	1. Identify buyer and supplier quality standards. 2. Inspect materials and finished products. 3. Ensure compliance with	30

		social and environmental standards. - Report and document non-conformance issues. - Promote sustainability across supply chain operations.	
SICIP-LEA-SCM-06-O	Control Inventory, Warehouse and Logistics Operations	- Identify types and levels of inventory. - Identify inventory control methods - Maintain and record stock movements. - Conduct stock audits and reconcile variances. - Manage logistics operations.	50
SICIP-LEA-SCM-07-O	Use Digital Tools and Communication in Supply Chain Management	- Use digital tools for tracking and monitoring of supply chain activities. - Communicate effectively with suppliers and buyers. - Coordinate supply chain data management activities.	15
Total:			0 Hrs.

COMPETENCY STANDARD: SUPPLY CHAIN MANAHEMENT FOR FOOTWEAR & LEATHER GOODS SECTOR

Generic Competencies

UNIT OF COMPETENCY: CARRY OUT WORKPLACE INTERACTION	Nominal Duration: 15 hrs.	Unit Code: SICIP-LET-SCM-01-G
Unit Descriptor: This unit covers the skills, knowledge and attitudes required to carry out workplace interaction. It specifically includes the task of interpreting workplace communication and etiquette, Reading and understanding workplace documents, participating in workplace meetings and discussions and practicing professional ethics at work.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Interpret workplace communication and etiquette	1.1 Workplace codes of conduct are interpreted as per organizational guidelines. 1.2 Appropriate lines of communication are maintained with supervisors and colleagues. 1.3 Workplace interactions are conducted in a <u>courteous manner</u> to gather and convey information. 1.4 <u>Workplace procedures and matters</u> are comprehended.
2. Read and understand workplace documents	2.1. Workplace documents are interpreted correctly. 2.2. Visual information/symbols/signage are understood correctly and followed. 2.3. Specific and relevant information are accessed from <u>appropriate sources</u> . 2.4. Appropriate medium is used to transfer information and ideas.
3. Participate in workplace meetings and discussions	3.1. Team meetings are attended on time. 3.2. Meeting procedures and etiquette are followed. 3.3. Active participation is ensured, opinions are expressed and heard. 3.4. Inputs are provided and interpreted in line with the meeting purpose.
4. Practice professional ethics at work	4.1 Responsibilities as a team member are performed. 4.2 Tasks are performed in accordance with workplace procedures. 4.3 Confidentiality is maintained. 4.4 Inappropriate and conflicting situations are avoided.

Range of variables:

Variables	Range (may include but not limited to)
1. Courteous manner	1.1 Effective questioning 1.2 Active listening 1.3 Speaking skills 1.4 Writing skill 1.5 Email etiquette
2. Workplace procedures and matters	1.6 Notes 1.7 Arranging a meeting 1.8 Agenda 1.9 Simple reports such as progress and incident reports 1.10 Job sheets 1.11 Operational manuals 1.12 Brochures and promotional material 1.13 Visual and graphic materials 1.14 Standards 1.15 OHS information 1.16 Signs
3. Appropriate sources	1.17 Human Resources (HR) Department 1.18 Managers 1.19 Supervisors 1.20 Management Information System (MIS)

Curricular Content Guide

1. Underpinning knowledge	1.1 Workplace codes of conduct 1.2 Workplace communication and etiquette 1.3 Workplace documents, signs and symbols 1.4 Meeting procedure and etiquette 1.5 Professional ethics 1.6 Responsibilities of team member
2. Underpinning skill	1.7 Demonstrating workplace communication and etiquette 1.8 Interpreting workplace instructions and symbols 1.9 Performing responsibilities of a team member 1.10 Demonstrating active participation in workplace meeting 1.11 Applying professional ethics at work
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincere and honest to duties 3.4 Environmental concerns 3.5 Eagerness to learn 3.6 Tidiness and timeliness 3.7 Respect for rights of peers and seniors in the workplace 3.8 Communication with peers, subordinates and seniors in the workplace
4. Resource implications	The following resources must be provided: 1.1 Workplace (simulated or actual)

	1.2 Projector 1.3 Learning manual
--	--------------------------------------

Assessment Evidence Guide

1. Critical aspects of competency	Assessment required evidence that the candidate: 1.1 Interpreted workplace communication and etiquette 1.2 Interpreted workplace instructions and symbols 1.3 Performed active participation in workplace meetings 1.4 Performed responsibilities of a team member
2. Methods of assessment	Competency should be assessed by: 1.5 Written test 1.6 Practical Demonstration 1.7 Oral Questioning 1.8 Portfolio (Optional)
3. Context of assessment	1.9 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 1.10 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

Unit of Competency: OPERATE IN A TEAM ENVIRONMENT	Nominal Duration: 15 hrs.	Unit Code: SICIP-LET-SCM-02-G
Unit Descriptor: This unit covers the skills, knowledge and attitudes required to operate in a team environment. It specifically includes the task of identifying team goals and work processes, identifying own role and responsibilities within team, communicating and cooperating with team members and practicing problem solving within the team.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Identify team goals and work processes	1.1. Roles and objectives of the team are identified and interpreted. 1.2. Roles and responsibilities of team members are identified and interpreted.
2. Identify own role and responsibilities within team	2.1 Personal role and responsibilities are identified within the team environment. 2.2 Reporting relationships are interpreted within team and external to team.
3. Communicate and cooperate with team members	3.1 Other teammates' tasks are identified and support provided when requested. 3.2 The team is encouraged through <u>sharing information</u> or expertise, working together to solve problems, and putting team success first. 3.3 Views and opinions of other team members are interpreted and respected.
4. Practice problem solving within the team	4.1 Problems faced at the individual and team level are identified and showed insight into the root causes of the problems. 4.2 A range of solutions and courses of action are identified together with benefits, costs, and risks associated with each. 4.3 The good ideas of others to help develop solutions are recognized and advice sought from those who have solved similar problems. 4.4 It is looked beyond the obvious and not stopped at the first answers.

Range of variables:

Variables	Range (may include but not limited to)
------------------	---

1. Sharing information	1.1. Agenda 1.2. Minutes 1.3. progress and incident reports 1.4. Operational manuals 1.5. Visual and graphic materials 1.6. Emails and SMS 1.7. Phone directory 1.8. Policy, procedure and standards 1.9. OHS information
------------------------	---

Curricular Content Guide

1. Underpinning knowledge	1.1. Team goals and work processes 1.2. Roles and responsibilities of team members 1.3. Personal role and responsibilities 1.4. Sharing information 1.5. Views and opinions 1.6. Problem solving within the team
2. Underpinning skill	1.1. Identifying team goals and work processes 1.2. Identifying own role and responsibilities within team 1.3. Communicating and cooperating with team members 1.4. Practicing problem solving within the team
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincere and honest to duties 3.4 Eagerness to learn 3.5 Tidiness and timeliness 3.6 Environmental concerns 3.7 Respect for rights of peers and seniors at workplace 3.8 Communication with peers and seniors at workplace
4. Resource implications	The following resources must be provided: 4.1 Workplace (simulated or actual) 4.2 Projector 4.3 Stationery 4.4 Learning manual

Assessment Evidence Guide

1. Critical aspects of competency	Assessment required evidence that the candidate: 1.1 identified team goals and work processes 1.2 identified own role and responsibilities within team 1.3 communicated and cooperated with team members 1.4 practiced problem solving within the team
2. Methods of	Competency should be assessed by:

assessment	2.1 Written test 2.2 Practical Demonstration 2.3 Oral Questioning 2.4 Portfolio (Optional)
3. Context of assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

Sector Specific Competencies

Unit of Competency: CARRY OUT MEASUREMENTS AND CALCULATIONS	Nominal Duration: 10 hrs.	Unit Code: SICIP-LET-SCM-01-S
Unit Descriptor: This unit covers the skills, knowledge and attitudes required for carry out measurements and calculations. It specifically includes the task of planning and preparing, obtaining measurements and performing calculations.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Plan and prepare	1.1. Work instructions are confirmed and applied to the job in hand. 1.2. Materials to be measured are identified as per job specification. 1.3. Appropriate <u>measuring device</u> is identified and selected based on materials to be measured. 1.4. Specifications are obtained and verified from relevant <u>documents</u> .
2. Obtain measurements	2.1 Method of obtaining measurement is selected and applied. 2.2 <u>Measurements</u> are obtained using appropriate device in accordance with job requirement. 2.3 Measurements, including area, volume, tolerance and clearance limits, are confirmed and applied
3. Perform calculations	3.1 <u>Calculations</u> , using basic operations, for determining material requirement are taken. 3.2 Appropriate <u>formulas</u> for calculating quantities are selected. 3.3 Quantities are estimated from the calculation taken. 3.4 Material quantities are calculated, confirmed and recorded within tolerances.

Range of Variables

Variable	Range
	May include but not limited to:
1. Measuring device	1.1 Measuring tape 1.2 Steel rule 1.3 Calculator 1.4 Sets square
2. Documents	2.1. Technical manuals

	2.2. Specifications 2.3. Sketches 2.4. Drawings 2.5. Charts 2.6. Photographs
3. Measurements	3.1. Length 3.2. Width 3.3. Weight 3.4. Tolerance
4. Calculations	4.1 Addition 4.2 Subtraction 4.3 Multiplication 4.4 Division 4.5 Area 4.6 Volume 4.7 Circumference 4.8 Cubic meter 4.9 Volumetric weight
5. Formulas	5.1 Fractions 5.2 Percentages 5.3 Mixed numbers 5.4 Conversions 5.5 Scales

Curricular Content Guide

1. Underpinning Knowledge	1.1 Measuring devices 1.2 Measurements 1.3 Simple calculation techniques 1.4 Appropriate formulas 1.5 Estimating quantities
2. Underpinning Skills	2.1 Identifying appropriate measuring devices 2.2 Carrying out measurements for appropriate device 2.3 Performing calculations using appropriate formulas
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincere and honest to duties 3.4 Environmental concerns 3.5 Eagerness to learn 3.6 Tidiness and timeliness 3.7 Respect for rights of peers and seniors in workplace 3.8 Communication with peers, sub-ordinates and seniors in workplace
4. Resource Implications	4.1 Workplace (simulated or actual) 4.2 Map/globe 4.3 Projector 4.4 Stationery 4.5 Learning manual.

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1 planed and prepared 1.2 obtained measurements 1.3 performed calculations
2. Methods of Assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical Demonstration 2.3 Oral Questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

Unit of Competency: APPLY GREEN PRACTICES IN LET SECTOR	Nominal Duration: 10 hrs.	Unit Code: SICIP-LET-SCM-02-S
Unit Descriptor: This unit covers the skills, knowledge and attitudes required for apply green practices in LET sector. It specifically includes the tasks of interpreting green concepts, minimizing resources use in the workplace and implementing waste management practices.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Interpret green concepts	1.1 <u>Principles of green practices in LET (Ready-Made Garment)</u> manufacturing are explained. 1.2 Key terms and symbols in LET production processes are identified. 1.3 <u>Sources of environmental impacts</u> during LET manufacturing activities are identified. 1.4 LET manufacturing activities use are explained. 1.5 <u>Ways of mitigating environmental impacts</u> in LET manufacturing are explained.
2. Minimize resources use in the workplace	2.1 Water, energy, and raw material consumption in LET manufacturing are documented. 2.2 <u>Recyclable and non-recyclable items</u> in LET production processes are identified. 2.3 Procedures to reduce resource consumption in LET manufacturing are implemented. 2.4 Sustainable alternatives in LET manufacturing are explored and applied.
3. Implement waste management practices	3.1 <u>Different types of waste in LET manufacturing</u> are identified. 3.2 Hazardous waste in LET production is disposed of according to environmental regulations. 3.3 Green habits to reduce waste in personal and professional life are practiced.

Range of Variables

Variable	Range
	May include but not limited to:
1. Principles of green practices in LET (Ready-Made Garment)	1.1 Reducing energy consumption in LET manufacturing processes. 1.2 6R for waste management in LET production: 1.2.1 Refuse unnecessary materials and processes. 1.2.2 Reduce resource consumption and waste

	generation. 1.2.3 Reuse materials within the production process. 1.2.4 Recycle materials for future use in LET manufacturing. 1.2.5 Recover usable resources from waste. 1.2.6 Repair damaged products or materials instead of discarding them. 1.3 Use of sustainable materials in LET production with low environmental impact. 1.4 Recycling of materials used in the LET manufacturing process. 1.5 Sustainable transportation methods for moving goods and materials within the LET sector.
2. Sources of environmental impacts	2.1 Air Pollution in LET Manufacturing 2.2 Water Pollution in LET Manufacturing 2.3 Soil Degradation in LET Manufacturing 2.4 Noise Pollution in LET Manufacturing 2.5 Waste Generation in LET Manufacturing 2.6 Resource Depletion in LET Manufacturing
3. Ways of mitigating environmental impacts	3.1 Utilizing energy-efficient equipment in LET production processes. 3.2 Adopting renewable energy sources for LET manufacturing operations. 3.3 Implementing site protection measures to prevent pollution and reduce environmental. 3.4 Using reusable materials in production processes. 3.5 Choosing sustainable materials with low environmental impact for garment production. 3.6 Using noise-reducing equipment and scheduling production work. 3.7 Optimizing logistics and delivery to reduce transportation emissions and improve overall supply chain efficiency.
4. Recyclable and non-recyclable items	4.1 Recyclable Items in LET Manufacturing 4.1.1 Metal components. 4.1.2 Wooden materials. 4.1.3 Fabric scraps and textile fibers. 4.1.4 Plastic items, including buttons, tags, and packaging materials. 4.2 Non-Recyclable Items in LET Manufacturing 4.2.1 Paints, coatings, and dyes. 4.2.2 Contaminated materials. 4.2.3 Treated wood and other materials.
5. Different types of waste in LET manufacturing	5.1 Fabric waste from cutting and trimming processes. 5.2 Wood waste from packaging or display materials. 5.3 Metal waste from trims, buttons, zippers, and other hardware. 5.4 Textile waste, including scraps from garment production

	and defective products. 5.5 Plastic waste, such as packaging materials, labels, and plastic buttons. 5.6 Solid waste from chemical treatments or dyeing processes. 5.7 Packaging waste from raw materials and finished products.
--	--

Curricular Content Guide

1. Underpinning Knowledge	1.1 Principles of green practices in LET (Ready-Made Garment) manufacturing. 1.2 Sources of environmental impacts. 1.3 Ways of mitigating environmental impacts 1.4 Recyclable and non-recyclable items 1.5 Different types of waste in LET manufacturing 1.6 Hazardous waste in LET production 1.7 Green habits to reduce waste
2. Underpinning Skills	2.1 Explaining principles of green practices in LET manufacturing 2.2 Identifying sources of environmental impacts 2.3 Explaining re-cyclable and non-recyclable items 2.4 Minimizing resources use in the workplace 2.5 Identifying different types of waste in LET manufacturing 2.6 Disposing hazardous waste in LET production 2.7 Practicing green habits to reduce waste
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincere and honest to duties 3.4 Environmental concerns 3.5 Eagerness to learn 3.6 Tidiness and timeliness 3.7 Respect for rights of peers and seniors in the workplace 3.8 Communication with peers, subordinates and seniors in the workplace
4. Resource Implications	4.1 Workplace (simulated or actual) 4.2 Projector 4.3 Stationery 4.4 Learning manual

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1 interpreted green concepts
-----------------------------------	---

	1.2 minimized resources use in the workplace 1.3 implemented waste management practices
2. Methods of Assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical Demonstration 2.3 Oral Questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

The Occupation Specific Competencies

Unit of Competency: APPLY BASIC KNOWLEDGE OF SUPPLY CHAIN MANAGEMENT FOR FOOTWEAR AND LEATHER GOODS SECTOR	Nominal Duration: 15 Hrs.	Unit Code: SICIP-LEA-SCM-01-O
Unit Descriptor: This unit covers the knowledge, skills and attitude required to apply basic knowledge of supply chain management for footwear and leather goods sector. It specifically includes the tasks of identifying supply chain concepts and functions, explaining material, information and finance flow, identifying key supply chain stakeholders, describing SCM roles in the leather and footwear industry and identifying key performance indicators (KPIs).		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Identify supply chain concepts and functions.	1.1. <u>Concepts of supply chain management</u> are identified and described. 1.2. <u>Functions of supply chain management</u> are outlined according to industry practices. 1.3. <u>Key stages of the supply chain process</u> are identified. 1.4. Information related to supply chain management is reviewed and interpreted from reliable sources. 1.5. Examples from the footwear and leather goods sector are analyzed to explain supply chain functions.
2. Explain material, information, and finance flow.	2.1 Flow of materials, information, and finance is explained with relevant examples. 2.2 Movement of raw materials and finished goods is described according to supply chain stages. 2.3 Information flow between suppliers, manufacturers, and buyers is interpreted accurately. 2.4 Financial transactions and documentation processes are explained as per organizational procedures. 2.5 Linkages among material, information, and finance flows are analyzed to ensure supply chain efficiency. 2.6 Any disruptions in the flow are identified and reported for corrective action.
3. Identify key supply chain stakeholders.	3.1 <u>Key stakeholders</u> involved in the supply chain are identified accurately. 3.2 <u>Roles and responsibilities of each stakeholder</u> are described clearly. 3.3 Relationships between suppliers, manufacturers, buyers, and logistics partners are outlined.

	3.4 Stakeholder interactions and dependencies are analyzed within the supply chain network. 3.5 Stakeholder information is documented as per organizational procedures.
4. Describe SCM roles in the leather and footwear industry.	4.1 <u>Roles of supply chain management (SCM)</u> in the leather and footwear industry are described clearly. 4.2 Importance of SCM in ensuring product quality, cost efficiency, and timely delivery is identified. 4.3 Coordination between production, merchandising, and logistics departments is outlined. 4.4 Industry-specific SCM challenges and practices are analyzed. 4.5 The contribution of SCM to competitiveness and sustainability is discussed.
5. Identify key performance indicators (KPIs).	5.1 <u>Key performance indicators (KPIs)</u> for supply chain performance are identified. 5.2 <u>Methods</u> for measuring and monitoring supply chain performance are explained. 5.3 Data required for KPI evaluation are collected and reviewed. 5.4 Supply chain performance results are interpreted to identify areas for improvement.

Range of Variables

Variable	Range (Includes but not limited to):
1. Concepts of supply chain management	1.1 Reduce cost 1.2 Improve responsiveness 1.3 Enhance product quality 1.4 Build competitive advantage
2. Functions of supply chain management	2.1 Product design and development 2.2 Procurement and sourcing 2.3 Production and manufacturing 2.4 Inventory management 2.5 Logistic and distribution 2.6 Quality control 2.7 Demand forecasting and sales planning 2.8 Customer service management 2.9 Sustainability and compliance
3. Key stages of the supply chain process	3.1 Forecasting and resource allocation 3.2 Procuring materials and suppliers 3.3 Producing goods 3.4 Logistic and distribution 3.5 Handling returns and recycling
4. Key stakeholders	4.1 Internal: 4.1.1 Procurement 4.1.2 Production

	4.1.3 Inventory 4.1.4 Logistics 4.1.5 Sales 4.2 External: 4.2.1 Suppliers 4.2.2 Distributors 4.2.3 Retailers 4.2.4 Customers 4.2.5 Regulators
5. Roles and responsibilities of each stakeholder	5.1 Internal: 5.1.1 Procurement – Source materials and manage orders 5.1.2 Production – Manufacture products efficiently 5.1.3 Inventory – Track and manage stock 5.1.4 Logistics – Deliver products on time 5.1.5 Sales – Forecast demand and handle customers 5.2 External: 5.2.1 Suppliers – Provide quality materials 5.2.2 Distributors – Deliver to retailers/customers 5.2.3 Retailers – Sell products and give feedback 5.2.4 Customers – Receive products and provide feedback 5.2.5 Regulators – Ensure compliance with laws and standards
6. Roles of supply chain management (SCM)	6.1 Planning and forecasting 6.2 Order fulfillment 6.3 Supplier and vendor management 6.4 Procurement and sourcing 6.5 Production scheduling 6.6 Inventory management 6.7 Transportation and logistics 6.8 Warehousing and storage 6.9 Customer service management 6.10 Performance monitoring and improvement
7. Key performance indicators (KPIs)	7.1 Lead time 7.2 On-time delivery 7.3 Inventory turnover 7.4 Cost efficiency
8. Methods	8.1 KANBAN 8.2 5s 8.3 Demand driven 8.4 Continues flow 8.5 Just-in-time

Curricular Content Guide

1. Underpinning Knowledge	1.1 Identify and understand the key concepts, functions, and stages of supply chain management. 1.2 Interpret supply chain processes and their relevance to the leather goods and footwear sector. 1.3 Understand the flow of materials, information, and finance throughout the supply chain. 1.4 Identify linkages and dependencies among material, information, and financial flows for process efficiency. 1.5 Interpret the roles and responsibilities of key supply chain stakeholders, including suppliers, manufacturers, and logistics partners. 1.6 Understand the role of supply chain management in ensuring quality, cost efficiency, and timely delivery. 1.7 Identify coordination mechanisms between production, merchandising, and logistics departments. 1.8 Identify key performance indicators (KPIs)
2. Underpinning Skills	2.1 Performing accurate preparation and verification of export documents according. 2.2 Applying attention to detail to ensure completeness and correctness of shipping and customs paperwork. 2.3 Applying organizational and recordkeeping skills. 2.4 Performing communication skills to update buyers and logistics partners on dispatch and delivery status. 2.5 Applying problem-solving skills to address discrepancies, delays, or documentation errors. 2.6 Demonstrating understanding of export procedures, labeling standards, and compliance requirements. 2.7 Applying time management skills. 2.8 Performing monitoring and tracking of shipment progress.
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincere and honest to duties 3.4 Environmental concerns 3.5 Eagerness to learn 3.6 Tidiness and timeliness 3.7 Respect for rights of peers and seniors in the workplace 3.8 Communication with peers, subordinates and seniors in the workplace
4 Resource Implications	4.1 Workplace (simulated or actual) 4.2 Computer/laptop/notebook 4.3 Flow chart 4.4 Materials

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1 identifying supply chain concepts and functions. 1.2 explaining material, information, and finance flow. 1.3 identifying key supply chain stakeholders. 1.4 describing SCM roles in the leather and footwear industry. 1.5 identifying key performance indicators (KPIs).
2. Methods of Assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical Demonstration 2.3 Oral Questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

Unit of Competency: MANAGE PROCUREMENT AND SOURCING ACTIVITIES	Nominal Duration: 40 Hrs.	Unit Code: SICIP-LEA-SCM-02-O
Unit Descriptor: This unit covers the knowledge, skills and attitude required to manage procurement and sourcing activities. It specifically includes the tasks of identifying raw materials components and suppliers, analysing cost components and cost drivers, calculating direct and indirect costs, performing orders management activities, maintaining supplier performance records and ensuring compliance with procurement policies and regulations.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Identify raw materials, components, and suppliers.	1.1. <u>Raw materials and components</u> required for production are identified and listed. 1.2. Suitable suppliers for each material and component are identified and evaluated. 1.3. Material specifications and quality standards are reviewed and documented. 1.4. Supplier capabilities, reliability, and delivery schedules are assessed. 1.5. Procurement requirements are communicated to relevant departments. 1.6. Supplier information is recorded and maintained for reference and tracking. 1.7. Approved supplier lists are updated regularly to ensure availability of required materials.
2. Analyze cost components and cost drivers.	2.1. Cost components for raw materials, components, and procurement activities are identified and documented. 2.2. <u>Cost drivers</u> affecting material prices and procurement efficiency are recognized. 2.3. Cost data from suppliers and past procurement records are reviewed. 2.4. Variations in costs are monitored and reported to relevant personnel. 2.5. <u>Cost analysis findings</u> are recorded to support decision-making and negotiation.
3. Calculate direct and indirect costs.	3.1. <u>Direct costs</u> are identified and calculated. 3.2. <u>Indirect costs</u> are determined accurately. 3.3. Cost data from relevant departments and records are reviewed. 3.4. Total direct and indirect costs are computed for each procurement or production activity. 3.5. Cost calculations are verified for accuracy and

	completeness. 3.6 Cost data is used to support pricing, budgeting, and procurement decisions.
4 Perform order management activities.	4.1 Purchase orders are received, recorded, and reviewed for accuracy. 4.2 Supplier confirmations and order acknowledgments are obtained and documented. 4.3 <u>Order progress</u> is monitored. 4.4 Changes or updates to orders are communicated to suppliers and relevant departments. 4.5 <u>Discrepancies or issues in orders</u> are identified and resolved promptly. 4.6 Records of all order management activities are maintained systematically. 4.7 Follow-up actions are coordinated to ensure timely fulfillment of orders.
5 Maintain supplier performance records.	5.1 <u>Supplier performance criteria</u> are identified and documented. 5.2 Supplier performance data is collected regularly from procurement and production activities. 5.3 Performance results are analyzed against agreed standards and KPIs. 5.4 <u>Deviations or issues in supplier performance</u> are recorded and communicated. 5.5 Performance reports are maintained systematically for each supplier. 5.6 Historical performance records are reviewed to support sourcing decisions. 5.7 Updates to supplier performance records are applied promptly to ensure accuracy.
6 Ensure compliance with procurement policies and regulations.	6.1 <u>Relevant procurement policies</u>, procedures, and regulatory requirements are identified and documented. 6.2 Procurement activities are monitored to ensure adherence to policies and regulations. 6.3 Supplier contracts and agreements are reviewed for compliance. 6.4 <u>Deviations or non-compliance issues</u> are identified and reported promptly. 6.5 Corrective actions are implemented to address compliance gaps. 6.6 Compliance records are maintained systematically for audit and reference purposes. 6.7 Updates to procurement policies and regulations are communicated to relevant personnel.

Range of Variables

Variable	Range (Includes but not limited to):
1. Raw materials and components	1.1 Types of raw materials in footwear and leather goods 1.2 Leather 1.3 Fabrics 1.4 Foam/Padding 1.5 Threads 1.6 Adhesives/Glues 1.7 Soles/Rubber 1.8 Hardware/Accessories 1.9 Dyes/Finishes 1.10 Insoles/Linings 1.11 Reinforcements/Labels
2 Cost drivers	2.1 Raw materials 2.2 Labor 2.3 Machinery and equipment 2.4 Energy and utilities 2.5 Transportation and logistics 2.6 Quality standards 2.7 Tariff or tax
3 Cost analysis findings	3.1 Bill of Materials (BOM) 3.2 Consumption of materials 3.3 Cost breakdown analysis 3.3.1 Material cost contribution 3.3.2 Labor cost contribution 3.3.3 Overhead cost impact 3.3.4 Finance and commercial cost 3.3.5 Transportation and logistics cost 3.3.6 Energy and utility expenses 3.3.7 Profit margin analysis 3.4 Absolute best cost analysis 3.5 High-cost production stages 3.6 Cost of defects and rework 3.7 Opportunities for cost reduction
4 Direct costs	4.1 Materials 4.2 Labor 4.3 Production
5 Indirect costs	5.1 Overheads 5.2 Utilities 5.3 Finance cost
6 Order progress	6.1 Production 6.2 Delivery timelines
7 Discrepancies or issues in orders	7.1 Incorrect quantity 7.2 Color or shade variations 7.3 Material or component errors 7.4 Packaging mistakes 7.5 Late delivery

	7.6 Damaged products 7.7 Missing documentation 7.8 Non-compliance with buyer specifications
8 Supplier performance criteria	8.1 Quality 8.2 Delivery 8.3 Reliability 8.4 Responsiveness
9 Deviations or issues in supplier performance	9.1 Late deliveries 9.2 Poor material quality 9.3 Incorrect specifications 9.4 Inconsistent supply 9.5 Packaging errors 9.6 Non-compliance with standards 9.7 Communication gaps 9.8 Frequent order cancellations 9.9 Inadequate documentation 9.10 Failure to meet contractual terms
10 Relevant procurement policies	10.1 Supplier selection policy 10.2 Ethical sourcing policy 10.3 Quality assurance policy 10.4 Environmental and sustainability policy 10.5 Conflict of interest policy 10.6 Payment and contract policy 10.7 Compliance and audit policy
11 Deviations or non-compliance issues	11.1 Quality standard deviations 11.2 Delayed delivery 11.3 Use of unauthorized materials 11.4 Incomplete documentation 11.5 Breach of safety rules 11.6 Labor or ethical violations 11.7 Environmental regulation breaches 11.8 Incorrect labeling or packaging 11.9 Quantity mismatch 11.10 Contract term violations

Curricular Content Guide

1. Underpinning Knowledge	1.1 Identify raw materials, components, and suitable suppliers according to production requirements. 1.2 Interpret cost components and key cost drivers affecting procurement and material prices. 1.3 Identify methods for analyzing and documenting cost data to support negotiation and decision-making. 1.4 Interpret procedures for managing purchase orders, tracking progress, and resolving order discrepancies. 1.5 Identify methods for monitoring and evaluating supplier performance. 1.6 Interpret procurement policies, procedures, and
---------------------------	--

	regulations to ensure compliance and accountability.
2. Underpinning Skills	2.1 Performing identification and evaluation of raw materials, components, and reliable suppliers. 2.2 Applying analytical skills to assess supplier capabilities, cost factors, and material specifications. 2.3 Applying organizational and documentation skills to manage supplier records and procurement data. 2.4 Performing order management tasks. 2.5 Applying problem-solving skills to address supply chain or order-related issues effectively. 2.6 Applying compliance awareness to ensure adherence to procurement policies and regulations. 2.7 Following communication and coordination skills.
3. Underpinning Attitudes	3.1. Commitment to occupational health and safety 3.2. Promptness in carrying out activities 3.3. Sincere and honest to duties 3.4. Environmental concerns 3.5. Eagerness to learn 3.6. Tidiness and timeliness 3.7. Respect for rights of peers and seniors in the workplace 3.8. Communication with peers, subordinates and seniors in the workplace
4. Resource Implications	4.1 Workplace (simulated or actual) 4.2 Raw materials 4.3 Calculators

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1 identified raw materials, components, and suppliers. 1.2 analyzed cost components and cost drivers. 1.3 calculated direct and indirect costs. 1.4 performed order management activities. 1.5 maintained supplier performance records. 1.6 ensured compliance with procurement policies and regulations.
2. Methods of Assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical Demonstration 2.3 Oral Questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by nationally certified assessor or occupation-specific industry expert.

Unit of Competency: APPLY ORDER PLANNING AND FORECASTING TECHNIQUES	Nominal Duration: 40 Hrs.	Unit Code: SICIP-LEA-SCM-03-O
Unit Descriptor: This unit covers the knowledge, skills and attitude required to apply order planning and forecasting techniques. It specifically includes the tasks of analyzing historical sales data to forecast demand, planning orders and procurement schedules accordingly, monitoring and controlling inventory and aligning production plans with customer demand.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Analyze historical sales data to forecast demand.	1.1 Historical sales data is collected and verified for accuracy. 1.2 Trends, patterns, and seasonality in past sales are analyzed. 1.3 <u>Relevant factors affecting demand</u> are considered. 1.4 <u>Forecasting models or methods</u> are applied to estimate future demand. 1.5 Forecast results are reviewed and validated for reliability. 1.6 Demand forecasts are documented and communicated to relevant teams. 1.7 Updates to forecasts are made based on new data or changing market conditions.
2. Plan orders and procurement schedules accordingly.	2.1 Forecasted demand and historical sales data are reviewed and analyzed. 2.2 <u>Production and procurement requirements</u> are identified based on demand forecasts. 2.3 Orders and procurement schedules are planned to align with production timelines. 2.4 Material requirements, quantities, and delivery dates are documented accurately. 2.5 Supplier lead times and capacities are considered in scheduling. 2.6 Procurement schedules are communicated to suppliers and relevant departments. 2.7 Adjustments to orders and schedules are applied as required to ensure timely availability of materials.
3. Monitor and control inventory.	3.1 <u>Inventory levels of raw materials</u> , components, and finished goods are monitored regularly. 3.2 <u>Stock movements</u> are recorded accurately. 3.3 Discrepancies between physical stock and records are identified and investigated. 3.4 Inventory replenishment is planned based on usage

	patterns and lead times. 3.5 Stock rotation and storage practices are followed to minimize damage and obsolescence. 3.6 Reports on inventory status are prepared and communicated to relevant personnel. 3.7 <u>Inventory control measures</u> are reviewed and updated to maintain accuracy and efficiency.
4. Align production plans with customer demand.	4.1 Customer demand forecasts and orders are reviewed and interpreted. 4.2 Production requirements are assessed and compared with available resources. 4.3 <u>Coordination with procurement, production, and logistics teams</u> is maintained to ensure alignment. 4.4 Deviations from planned production are identified and corrective actions are applied. 4.5 Production plan updates are documented and communicated to relevant departments. 4.6 Continuous monitoring is conducted to ensure production remains aligned.

Range of Variables

Variable	Range (Includes but not limited to):
1. Relevant factors affecting demand	1.1 Market conditions 1.2 Promotions 1.3 Seasonality
2. Forecasting models or methods	2.1 Quantitative forecasting 2.2 Qualitative forecasting
3. Production and procurement requirements	3.1 Production plan 3.2 Capacity plan 3.3 Production schedule 3.4 Purchase requisition 3.5 Purchase order and lead time 3.6 Supplier selection 3.7 Procurement schedule
4. Inventory levels of raw materials	4.1. Open inventory 4.2. Purchase quantity 4.3. Closing inventory
5. Stock movements	5.1. Stock-in (receiving) 5.2. Stock-out (issuing) 5.3. Stock transfer 5.4. Stock return 5.5. Stock adjustment 5.6. Stock audit or verification
6. Inventory control measures	6.1. Reorder level system 6.2. ABC analysis 6.3. Economic Order Quantity 6.4. FIFO (First In, First Out) and LIFO (Last In, First Out)

	6.5. Safety stock maintenance 6.6. Just-in-Time (JIT) 6.7. Regular stock audits 6.8. Inventory tracking system
7. Coordination with procurement, production, and logistics teams	7.1. Regular communication and meetings 7.2. Sharing production and delivery schedules 7.3. Aligning material requirements and timelines 7.4. Monitoring order progress and updates 7.5. Resolving delays or supply issues 7.6. Coordinating dispatch and shipment activities 7.7. Ensuring documentation and record accuracy

Curricular Content Guide

1. Underpinning Knowledge	1.1 Identify methods for collecting, verifying, and analyzing historical sales data to forecast demand. 1.2 Interpret forecasting models and methods used to estimate and validate future demand. 1.3 Identify procedures for planning procurement schedules. 1.4 Interpret inventory monitoring techniques to maintain accurate stock levels and records. 1.5 Identify procedures for replenishment, stock rotation, and minimizing obsolescence. 1.6 Understand how to align production planning with customer demand and available resources. 1.7 Interpret methods for continuous monitoring, communication, and corrective action.
2. Underpinning Skills	2.1 Performing data collection, verification, and analysis. 2.2 Applying analytical and mathematical skills. 2.3 Demonstrating planning and coordination skills. 2.4 Applying documentation and organizational skills. 2.5 Performing inventory monitoring and control. 2.6 Applying attention to detail in updating demand forecasts and production plans. 2.7 Performing evaluation and reporting skills to maintain accuracy.
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincere and honest to duties 3.4 Environmental concerns 3.5 Eagerness to learn 3.6 Tidiness and timeliness 3.7 Respect for rights of peers and seniors in the workplace 3.8 Communication with peers, subordinates and seniors in the workplace
4 Resource Implications	4.1 Workplace (simulated or actual)

	4.2 Computer/laptop/notebook
	4.3 Raw materials

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1 analyzed historical sales data to forecast demand. 1.2 planed orders and procurement schedules accordingly. 1.3 monitored and control inventory 1.4 aligned production plans with customer demand.
2. Methods of Assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical Demonstration 2.3 Oral Questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

Unit of Competency: MANAGE PRODUCTION PLANNING AND MANUFACTURING OPERATIONS	Nominal Duration: 60 Hrs.	Unit Code: SICIP-LEA-SCM-04-O
Unit Descriptor: This unit covers the knowledge, skills and attitude required to manage production planning and manufacturing. It specifically includes the tasks of planning production and delivery schedules, understanding the manufacturing operations, following standard operating procedures (SOPs), optimizing raw material usage and minimize waste and reviewing and updating production plans as required.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Plan production and delivery schedules.	1.1. Production requirements and delivery deadlines are identified. 1.2. Production and delivery schedules are developed based on customer demand and capacity. 1.3. <u>Resource requirements</u> are planned. 1.4. Schedule feasibility is reviewed and approved by management. 1.5. Production and delivery plans are communicated to relevant departments. 1.6. Adjustments to schedules are made to address delays or changes in demand.
2. Understand the manufacturing operations.	2.1. <u>Key manufacturing processes for footwear</u> are identified and described. 2.2. <u>Key manufacturing processes leather goods</u> are identified and described. 2.3. <u>Machines used in footwear and leather goods manufacturing</u> are recognized.
3. Follow standard operating procedures (SOPs).	3.1. Relevant standard operating procedures (SOPs) are reviewed and understood. 3.2. <u>SOPs for each production activity</u> are followed accurately. 3.3. Deviations from SOPs are identified and reported promptly. 3.4. Compliance with SOPs is monitored regularly during operations. 3.5. Updates or revisions to SOPs are applied and documented. 3.6. SOP adherence is maintained to ensure safety, quality, and efficiency.
4. Optimize raw material usage and minimize waste.	4.1 Raw material requirements are reviewed and calculated accurately.

	4.2 Material usage is monitored during production to minimize waste. 4.3 Methods for efficient cutting, handling, and storage of materials are applied. 4.4 <u>Waste generation points</u> are identified and corrective measures are implemented. 4.5 Rejection and wastage materials are segregated and recorded for reuse or disposal. 4.6 Material consumption data is documented and analyzed for optimization. 4.7 Recommendations for reducing material waste are communicated to relevant personnel.
5. Review and update production plans as required.	5.1 Production plans are reviewed regularly against actual progress and customer demand. 5.2 Variations in resources, materials, or capacity are identified and assessed. 5.3 <u>Planning parameters</u> are adjusted and applied as required. 5.4 Revised production plans are communicated to relevant departments and personnel. 5.5 Impacts of plan changes on delivery timelines and resource allocation are evaluated. 5.6 Records of production plan updates are maintained for reference. 5.7 Continuous monitoring ensures that production plans remain aligned with operational goals.

Range of Variables

Variable	Range (Includes but not limited to):
1. Resource requirements	1.1. Materials 1.2. Machines 1.3. Manpower 1.4. Methods
2. Key manufacturing processes for footwear	2.1 Pattern making 2.2 Lamination 2.3 Cutting 2.4 Skiving and splitting 2.5 Components preparation and fusing 2.6 Marking printing 2.7 Stitching/sewing 2.8 Lasting 2.9 Sole attaching 2.10 Finishing 2.11 Quality inspection 2.12 Packing and labeling
3. Key manufacturing processes leather	3.1 Pattern making

goods	3.2 Cutting 3.3 Skiving and splitting 3.4 Preparation and fusing 3.5 Marking and printing 3.6 Stitching/sewing 3.7 Edge finishing 3.8 Hardware and accessory attachment 3.9 Quality inspection 3.10 Packing and labeling
4. Machines used in footwear and leather goods manufacturing	4.1. Cutting machines 4.2. Skiving machines 4.3. Lamination machine 4.4. Stitching/sewing machines 4.5. Lasting machines 4.6. Sole attaching machines 4.7. Edge finishing machines 4.8. Embossing/printing machines 4.9. Heat press machines 4.10. Polishing and buffing machines
5. SOPs for each production activity	5.1. Cutting SOP 5.2. Preparation and Printing SOP 5.3. Stitching/Sewing SOP 5.4. Quality Inspection SOP 5.5. Lasting SOP 5.6. Finishing and packing SOP
6. Waste generation points	6.1. Material cutting and trimming 6.2. Skiving and splitting operations 6.3. Stitching and sewing defects 6.4. Lasting and sole attaching errors 6.5. Embossing, printing, or embossing mistakes 6.6. Quality rejection at inspection
7. Planning parameters	7.1. Production targets 7.2. Material requirements 7.3. Workforce allocation 7.4. Machine and equipment availability 7.5. Lead times for raw materials 7.6. Inventory levels 7.7. Production schedule and timelines

Curricular Content Guide

1. Underpinning Knowledge	1.1 Identify production requirements, delivery deadlines, and plan schedules. 1.2 Understand how to allocate resources effectively for production and delivery planning. 1.3 Interpret key manufacturing processes and machinery used in footwear and leather goods production.
---------------------------	---

	1.4 Identify methods for monitoring compliance with SOPs and reporting deviations for corrective action. 1.5 Interpret techniques for optimizing raw material usage and minimizing production waste. 1.6 Identify procedures for reviewing, adjusting, and updating production plans.
2. Underpinning Skills	2.1 Performing production and delivery planning based on customer demand, capacity, and resources. 2.2 Applying analytical and organizational skills to develop, review, and adjust production schedules effectively. 2.3 Performing material management skills to calculate requirements and minimize raw material waste. 2.4 Applying problem-solving skills to identify and correct inefficiencies or deviations in production. 2.5 Applying documentation and reporting skills to maintain accurate production and material usage records. 2.6 Performing continuous monitoring and improvement.
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincere and honest to duties 3.4 Environmental concerns 3.5 Eagerness to learn 3.6 Tidiness and timeliness 3.7 Respect for rights of peers and seniors in the workplace 3.8 Communication with peers, subordinates and seniors in the workplace
4 Resource Implications	4.1 Workplace (simulated or actual) 4.2 Computer/laptop/notebook 4.3 Production planning software 4.4 SOPs 4.5 Calculator

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1 planned production and delivery schedules. 1.2 understood the manufacturing operations. 1.3 followed standard operating procedures (SOPs). 1.4 optimized raw material usage and minimize waste. 1.5 reviewed and updated production plans as required.
2. Methods of Assessment	Competency should be assessed by:

	2.1 Written test 2.2 Practical Demonstration 2.3 Oral Questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

Unit of Competency: APPLY QUALITY, COMPLIANCE, AND SUSTAINABILITY IN SUPPLY CHAIN	Nominal Duration: 30 Hrs.	Unit Code: SICIP-LEA-SCM-05-O
Unit Descriptor: This unit covers the knowledge, skills and attitude required to apply quality compliance and sustainability in supply chain. It specifically includes the tasks of identifying buyer and supplier quality standards, inspecting materials and finished products, ensuring compliance with social and environmental standards, reporting and documenting non-conformance issues and promoting sustainability across supply chain operations.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Identify buyer and supplier quality standards.	1.1 <u>Buyer and supplier quality standards</u> are identified and documented. 1.2 Product and process requirements are reviewed against specified standards. 1.3 <u>Relevant quality certifications</u> and benchmarks are verified. 1.4 Gaps between organizational practices and required standards are assessed. 1.5 Records of quality standards and compliance references are maintained for future use.
2. Inspect materials and finished products.	2.1 Incoming materials and finished products are inspected according to quality standards. 2.2 <u>Inspection checklists</u> and <u>sampling methods</u> are followed. 2.3 Defective or non-conforming items are identified and separated. 2.4 Inspection results are recorded and documented properly. 2.5 <u>Quality issues</u> are reported to the relevant department for corrective action. 2.6 Inspection records are maintained for traceability and audit purposes.
3. Ensure compliance with social and environmental standards.	3.1 <u>Social and environmental compliance requirements</u> are identified and interpreted. 3.2 Workplace practices are monitored to ensure compliance with labor laws and ethical standards. 3.3 <u>Waste management and pollution control measures</u> are implemented as per regulations. 3.4 Use of sustainable materials and processes is encouraged and documented. 3.5 Compliance reports and audit findings are reviewed and

	maintained for verification.
4. Report and document non-conformance issues.	4.1 <u>Non-conformance issues</u> are identified and recorded. 4.2 <u>Root causes of non-conformance</u> are analyzed and noted. 4.3 Reports on non-conformance findings are prepared and submitted to relevant authorities. 4.4 Corrective and preventive actions are documented and tracked. 4.5 Records of non-conformance cases are maintained for future reference.
5. Promote sustainability across supply chain operations.	5.1 <u>Sustainable practices</u> in procurement, production, and logistics are identified and applied. 5.2 Resource efficiency and waste reduction measures are implemented. 5.3 Use of eco-friendly materials and processes is encouraged. 5.4 Stakeholders are informed about sustainability goals and initiatives. 5.5 Sustainability performance is monitored and reported regularly.

Range of Variables

Variable	Range (Includes but not limited to):
1. Buyer and supplier quality standards	1.1 Incoming material standards - IQC 1.2 In-line process standards 1.3 Acceptable Quality Level (AQL) - Final inspection 1.4 Product testing standards 1.5 Buyer specification and standards
2. Relevant quality certifications	2.1 ISO 9001 - Quality Management System 2.2 SATRA Certification - Footwear and leather testing 2.3 OEKO-TEX Standard 100 - Harmful substance testing 2.4 LWG (Leather Working Group) Certification - Sustainable leather production 2.5 Global Recycled Standard (GRS) - Certification for recycled materials
3. Inspection checklists	3.1 Visual inspection checklist 3.1.1 Packaging 3.1.2 Physical appearance 3.1.3 Measurement and dimension (size and color shades) 3.2 Product testing standards checklist 3.2.1 Functional testing 3.2.2 Non-destructive testing 3.2.3 Material traceability
4. Sampling methods	4.1 Random Sampling - Items are selected randomly from a batch.

	4.2 Acceptance Sampling (AQL) - Samples are inspected based on Acceptable Quality Level criteria.
5. Quality issues	5.1 Material Defects 5.2 Color Variation 5.3 Stitching Defects 5.4 Outsole Issues 5.5 Machine Problems 5.6 Shape and Fit Issues 5.7 Size missing 5.8 Glue/Bonding Defects 5.9 Odor Problems 5.10 Packaging Errors
6. Social and environmental compliance requirements	6.1 BSCI – Business Social Compliance Initiative 6.2 ISO 14001 – Environmental Management System 6.3 LWG – Leather Working Group Environmental Standards 6.4 SEDEX – Supplier Ethical Data Exchange 6.5 NIRAPON 6.6 Higg Index – Sustainability Performance Measurement 6.7 RoHS – Restriction of Hazardous Substances
7. Waste management and pollution control measures	7.1 Effluent Treatment Plants (ETP) 7.2 Solid Waste Segregation 7.3 Chemical Waste Management 7.4 Recycling and Reuse of Materials 7.5 Hazardous Waste Disposal 7.6 Water Conservation Practices 7.7 Air Emission Control (e.g., dust and fume extraction) 7.8 Hazardous Chemical Substitution 7.9 Energy Efficiency Measures
8. Non-conformance issues	Critical 8.1 Safety hazards 8.2 Chemical or toxic substance violations 8.3 Severe structural defects affecting use Major 8.4 Material defects 8.5 Stitching defects 8.6 Shape and fit issues 8.7 Color mismatch Minor 8.8 Surface blemishes or scratches 8.9 Minor odor 8.10 Small packaging or labeling errors 8.11 Minor cosmetic imperfections
9. Root causes of non-conformance	9.1 Poor Material Quality 9.2 Inadequate Manufacturing Processes 9.3 Human Error / Operator Mistakes 9.4 Machine or Equipment Malfunction

	9.5 Improper Storage or Handling of Materials 9.6 Insufficient Training or Skill Gaps 9.7 Design or Specification Errors 9.8 Supplier Quality Issues 9.9 Inconsistent Inspection or Testing
10. Sustainable practices	10.1 Eco-friendly tanning 10.2 Water recycling 10.3 Energy efficiency 10.4 Waste reduction 10.5 Recycled materials 10.6 ZDHC compliance 10.7 Sustainable sourcing 10.8 Carbon footprint reduction 10.9 Eco-friendly packaging

Curricular Content Guide

1. Underpinning Knowledge	1.1 Identify and understand buyer and supplier quality standards, certifications, and benchmarks. 1.2 Interpret product and process requirements in line with specified quality expectations. 1.3 Understand methods for inspecting incoming materials and finished goods. 1.4 Identify procedures for recording inspection results, reporting defects, and maintaining traceability. 1.5 Interpret social and environmental compliance standards, including labor laws and ethical practices. 1.6 Identify methods for documenting and reporting non-conformance issues and applying corrective actions. 1.7 Interpret how sustainability principles can be integrated across procurement, production, and logistics.
2. Underpinning Skills	2.1 Performing identification and documentation of buyer and supplier quality standards and certifications. 2.2 Applying analytical skills to review product and process requirements against specified benchmarks. 2.3 Demonstrating inspection skills to evaluate materials and finished goods. 2.4 Applying attention to detail in recording, reporting, and maintaining quality inspection data. 2.5 Performing problem-solving and root cause analysis to address non-conformance issues effectively. 2.6 Applying knowledge of social, environmental, and sustainability standards. 2.7 Applying organizational skills to maintain quality and compliance documentation for audits and reference.
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincere and honest to duties

	3.4 Environmental concerns 3.5 Eagerness to learn 3.6 Tidiness and timeliness 3.7 Respect for rights of peers and seniors in the workplace 3.8 Communication with peers, subordinates and seniors in the workplace
4 Resource Implications	4.1 Workplace (simulated or actual) 4.2 Computer/laptop/notebook 4.3 Buyer and supplier quality standards

Assessment Evidence Guide

1. Critical Aspects of Competency	1.1 identified buyer and supplier quality standards. 1.2 inspected materials and finished products. 1.3 ensured compliance with social and environmental standards. 1.4 reported and document non-conformance issues. 1.5 promoted sustainability across supply chain operations.
2. Methods of Assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical Demonstration 2.3 Oral Questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

Unit of Competency: CONTROL INVENTORY, WAREHOUSE, AND LOGISTICS OPERATIONS	Nominal Duration: 50 Hrs.	Unit Code: SICIP-LEA-SCM-06-O
Unit Descriptor: This unit covers the knowledge, skills and attitude required to control inventory warehouse and logistics operations. It specifically includes the tasks of identifying types and levels of inventory, identifying inventory control methods, maintaining and recording stock movements, conducting stock audits and reconcile variances and managing logistics operations.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Identify types and levels of inventory.	1.1 <u>Types of inventories</u> and <u>levels of inventory</u> are identified and classified. 1.2 Inventory items are categorized based on usage and demand. 1.3 Stock levels are reviewed against production and sales requirements. 1.4 Minimum and maximum inventory limits are determined. 1.5 Records of inventory types and quantities are maintained accurately.
2. Identify inventory control methods	2.1 Common <u>inventory control methods</u> are identified and described. 2.2 Suitable control techniques are selected based on inventory type. 2.3 Reorder levels and safety stock requirements are determined. 2.4 Inventory monitoring procedures are documented and maintained.
3. Maintain and record stock movements.	3.1 Stock movements are tracked and recorded accurately. 3.2 Incoming and outgoing materials are verified against documents. 3.3 <u>Stock registers</u> or digital systems are updated regularly. 3.4 <u>Discrepancies</u> in stock records are identified and reported. 3.5 Inventory data is maintained following organizational procedures.
4. Conduct stock audits and reconcile variances.	4.1 Physical inventory is compared with recorded stock levels. 4.2 Discrepancies or variances are identified and

	investigated. 4.3 <u>Stock audits</u> are conducted according to schedule and procedures. 4.4 Reconciliation of stock records is performed accurately. 4.5 Audit findings and corrective actions are documented for reference.
5. Manage logistics operations.	5.1 Logistics requirements for materials, components, and finished goods are identified. 5.2 Transportation and delivery plans are coordinated with suppliers and internal teams. 5.3 <u>Shipment activities</u> are scheduled, tracked, and monitored for timely delivery. 5.4 <u>Documents of logistics operations</u> are maintained accurately. 5.5 Delays, damages, or discrepancies in logistics are reported and corrective actions are applied.

Range of Variables

Variable	Range (Includes but not limited to):
1. Types of inventories	1.1 Raw Materials Inventory 1.2 Work-in-Progress (WIP) Inventory 1.3 Finished Goods Inventory 1.4 Maintenance, Repair, and Operations (MRO) Inventory 1.5 Transit or Pipeline Inventory
2. levels of inventory	2.1 Maximum Inventory - The highest stock level to avoid overstocking 2.2 Optimum Inventory - Ideal stock level to meet demand efficiently 2.3 Minimum Inventory - The lowest stock level to avoid shortages 2.4 Re-order Level - Stock level at which a new order should be placed 2.5 Safety Stock - Extra inventory kept to prevent stockouts due to uncertainties.
3. Inventory control methods	3.1 First in First Out (FIFO) 3.2 Last in First Out (LIFO) 3.3 Just-in-Time (JIT) 3.4 ABC analysis
4. Stock registers	4.1 Material receiving register 4.2 Material issue register 4.3 Raw material stock register 4.4 BIN card 4.5 Finished goods stock register
5. Discrepancies	5.1 Shortage of stock 5.2 Excess stock

	5.3 Damaged goods 5.4 Wrong item received 5.5 Mislabeling or wrong documentation 5.6 Stock misplacement 5.7 Expired or obsolete materials 5.8 Theft or pilferage
6. Stock audits	6.1 Periodic Audit 6.2 Physical Audit 6.3 Random Audit
7. Shipment activities	7.1 Import activities 7.2 Export activities 7.3 INCOTERMS
8. Documents of logistics operations	8.1 Commercial invoice 8.2 Packing list 8.3 Bill of lading 8.4 Certificate of origin

Curricular Content Guide

1. Underpinning Knowledge	1.1 Identify types and levels of inventory and understand how they relate to production and sales requirements. 1.2 Interpret methods for categorizing inventory items based on usage, demand, and stock levels. 1.3 Identify common inventory control methods and select suitable techniques based on inventory type. 1.4 Interpret the importance of reorder levels, safety stock, and regular monitoring procedures. 1.5 Identify procedures for conducting stock audits, reconciling variances, and documenting corrective actions. 1.6 Interpret logistics requirements and coordinate transportation, delivery, and shipment activities.
2. Underpinning Skills	2.1 Performing identification and classification of inventory types, levels, and usage patterns. 2.2 Applying analytical skills to determine reorder levels, safety stock, and optimal inventory limits. 2.3 Applying observation and verification skills to ensure accuracy during stock receipts and dispatches. 2.4 Performing stock audits and reconciliation to detect and resolve variances effectively. 2.5 Demonstrating coordination and planning skills to manage transportation and delivery schedules. 2.6 Applying documentation and organizational skills. 2.7 Following standard procedures and control methods.
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincere and honest to duties 3.4 Environmental concerns

	3.5 Eagerness to learn 3.6 Tidiness and timeliness 3.7 Respect for rights of peers and seniors in the workplace 3.8 Communication with peers, subordinates and seniors in the workplace
4 Resource Implications	4.1 Workplace (simulated or actual) 4.2 Computer/laptop/notebook 4.3 Stock register

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1 identified types and levels of inventory. 1.2 identified inventory control methods 1.3 maintained and record stock movements. 1.4 conducted stock audits and reconcile variances. 1.5 managed logistics operations.
2. Methods of Assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical Demonstration 2.3 Oral Questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

Unit of Competency: USE DIGITAL TOOLS AND COMMUNICATION IN SUPPLY CHAIN MANAGEMENT	Nominal Duration: 15 Hrs.	Unit Code: SICIP-LEA-SCM-07-O
Unit Descriptor: This unit covers the knowledge, skills and attitude required to use digital tools and communication in supply chain management. It specifically includes the tasks of using digital tools for tracking and monitoring of supply chain activities, communicating effectively with suppliers and buyers and coordinating supply chain data management activities.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Use digital tools for tracking and monitoring of supply chain activities.	1.1. <u>Appropriate digital tools and software</u> for supply chain tracking are identified. 1.2. Supply chain activities are monitored using digital systems. 1.3. Data from digital tools is recorded and analyzed for accuracy. 1.4. Reports on supply chain performance are generated using digital platforms. 1.5. Access to digital tracking tools is managed according to organizational policies. 1.6. Digital records are maintained securely for future reference and audits.
2. Communicate effectively with suppliers and buyers.	2.1 Communication requirements with suppliers and buyers are identified and clarified. 2.2 Messages and updates are conveyed using <u>appropriate channels</u> and formats. 2.3 Correspondence is responded to in a timely and professional manner. 2.4 Feedback and <u>inquiries from suppliers and buyers</u> are recorded and addressed. 2.5 Communication records are maintained systematically for reference and accountability.
3. Coordinate supply chain data management activities.	3.1 <u>Supply chain data requirements</u> are identified and documented. 3.2 Collection, entry, and verification of supply chain data are performed accurately. 3.3 Data from procurement, production, and logistics activities are consolidated and analyzed. 3.4 Updates and corrections to supply chain records are applied promptly. 3.5 Access to supply chain data is controlled and maintained securely.

	3.6 Reports and dashboards are generated to support decision-making.
	3.7 Coordination with relevant departments is maintained to ensure data consistency and integrity.

Range of Variables

Variable	Range (Includes but not limited to):
1. Appropriate digital tools and software	1.1 SAP Supply Chain Management (SAP SCM) 1.2 Oracle NetSuite 1.3 Microsoft Office 1.4 Enterprise Resource Planning (ERP) 1.5 Warehouse management (WMS)
2. Appropriate channels	2.1 Email 2.2 Telephone / Mobile Calls 2.3 Video Conferencing (Zoom, Microsoft Teams, Google Meet) 2.4 Supply Chain Management Software Notifications (ERP alerts) 2.5 Instant Messaging for quick updates (WhatsApp and WeChat) 2.6 Official Letters / Memos 2.7 Supplier Portals / Dashboards 2.8 Meetings (In-person or Virtual)
3. Inquiries from suppliers and buyers	3.1 Product specifications and quality standards 3.2 Pricing and payment terms 3.3 Order confirmation and lead times 3.4 Delivery schedules and shipping details 3.5 Stock availability and inventory status 3.6 Sample requests 3.7 Production capacity and capability 3.8 Compliance with environmental and social standards 3.9 Returns, replacements, or warranty claims 3.10 Documentation requirements (invoices, certificates, customs papers)
4. Supply chain data requirements	4.1 Supplier details (contacts, certifications, locations) 4.2 Product specifications and Bill of Materials (BOM) 4.3 Inventory levels (raw materials, WIP, finished goods) 4.4 Order status and history 4.5 Production schedules and capacities 4.6 Shipment and delivery information 4.7 Payment documents 4.8 Quality inspection and compliance reports 4.9 Pricing and cost data 4.10 Demand forecasts and sales data 4.11 Returns, rejections, and non-conformance records
5. Reports	5.1 Inventory Report (Raw Materials, WIP, Finished

	Goods) 5.2 Purchase Order Report 5.3 Production Status Report 5.4 Delivery / Shipment Report 5.5 Supplier Performance Report 5.6 Quality Inspection / Non-Conformance Report 5.7 Sales and Demand Forecast Report 5.8 Cost and Pricing Report 5.9 Returns and Rejection Report 5.10 Compliance and Sustainability Report
--	---

Curricular Content Guide

1. Underpinning Knowledge	1.1 Identify appropriate digital tools and software used for tracking and monitoring supply chain activities. 1.2 Interpret organizational policies for managing secure access to digital platforms and records. 1.3 Identify effective communication methods and channels for interacting with suppliers and buyers. 1.4 Interpret procedures for accurate collection, entry, and verification of supply chain data. 1.5 Identify methods for consolidating and analyzing data from procurement, production, and logistics functions. 1.6 Understand how to maintain data security, accuracy, and consistency across departments. 1.7 Interpret the importance of data-driven reporting and coordination.
2. Underpinning Skills	2.1 Applying data entry, analysis, and reporting skills. 2.2 Applying organizational and documentation skills. 2.3 Performing data management and verification. 2.4 Applying problem-solving skills to identify and correct errors or inconsistencies in supply chain data. 2.5 Demonstrating coordination and teamwork to ensure data integrity across departments. 2.6 Applying digital literacy to generate reports and dashboards supporting supply chain decision-making. 2.7 Following security and access control protocols to protect digital data.
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincere and honest to duties 3.4 Environmental concerns 3.5 Eagerness to learn 3.6 Tidiness and timeliness 3.7 Respect for rights of peers and seniors in the workplace 3.8 Communication with peers, subordinates and seniors in the workplace

4. Resource Implications	4.1 Workplace (simulated or actual) 4.2 Computer/laptop/notebook 4.3 Digital tools and software 4.4 Communication channels 4.5 Reports
--------------------------	--

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1 used digital tools for tracking and monitoring of supply chain activities. 1.2 communicated effectively with suppliers and buyers. 1.3 coordinated supply chain data management activities.
2. Methods of Assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical Demonstration 2.3 Oral Questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

End of the Competency Standard

Workshop/Lab Facility Standard

Course Name:	Supply Chain Management for Footwear and Leather Goods Sector
Number of Trainees:	25

Course-wise Training Space (Theoretical Classroom, Workshop/ Lab/ Classroom cum Workshop):

- Classroom – 350 sft (33 sqm)
- Workshop/ lab – 800 sft (75 sqm)
- OR
- Classroom cum workshop – 1000 sft (93 sqm)

Major Training Equipment and Training Facilities:

S.N	Major Equipment and Training facilities	Required facilities
1.	Computer/Laptops	01
2.	Multimedia projector & screen	01
3.	Scanner	01
4.	Printer	01
5.	Computer/laptop with planning software (focusing on order management)	05
6.	Material Swatches and Trims	As required
7.	Display board for footwear	05 set
8.	Leather goods and Footwear sample	10
9.	Shoe last	05
10.	Thickness gauge	05
11.	Measurement tape	05
12.	Working Table (Minimum 6 feet)	05
13.	Sample BOM sheet (Tech-pack)	10
14.	Sample PI, PO and LC sheet	10
15.	Sample Shipping Documents (Invoice packing list, BL, CO)	10
16.	Sample Display Rack	02
17.	Color Shade Card and Pantone Book	01

The following conditions must be fulfilled –

- The institute shall not use the same facilities for any other projects/organizations offering a similar course.
- The institute must provide sufficient evidence to prove ownership of the proposed training equipment.

The list denotes the minimum training equipment and facility required to effectively conduct training for a specific course. Additionally, the institute must ensure that all other necessary training tools, equipment, and furniture are available to meet the requirement of competency standards (CS) provided by SICIP.

For the operation of training course on Supply Chain Management for Footwear and Leather Goods Sector the institute must ensure the availability of at least 80% of the major training

equipment and training facilities (according to the CS) to be eligible for SICIP training delivery. If the score is below 80%, the remaining equipment and facilities need to be installed before the commencement of the training.

The institute will also provide all other hand tools and power tools as per CS for 25 trainees. Also, they will arrange adequate seating arrangement and classroom setup for the 25 trainees.
