

COMPETENCY STANDARD

FOR

MERCHANDISING FOR FOOTWEAR & LEATHER GOODS SECTOR

(LEATHER GOODS & FOOTWEAR SECTOR)

Skills for Industry Competitiveness and Innovation Program (SICIP)
Finance Division, Ministry of Finance

COPYRIGHT

The Competency Standards for Merchandising for Footwear & Leather Goods Sector serve as a foundational document for the development of curricula, teaching materials, and assessment tools specifically tailored for the Leather Goods and Footwear sector. This document ensures that training activities align with industry requirements, enabling individuals who successfully meet the established standards through assessment to become qualified professionals in relevant roles within the sector.

Developed under the Skills for Industry Competitiveness and Innovation Program (SICIP), this document addresses the skills requirements critical for Merchandising for Footwear & Leather Goods Sector. It is owned by the Finance Division of the Ministry of Finance of the People's Republic of Bangladesh.

Public and private institutes may use the information contained in this competency standard for training activities benefitting Bangladesh.

Other interested parties must obtain permission from the owner of this document for reproduction of information in any manner in whole or in part of this Skills Standard, in English or other languages.

INTRODUCTION:

The Skills for Industry Competitiveness and Innovation Program (SICIP) has the overall objective of developing a skilled workforce adept at handling new technologies, especially for emerging industries in Bangladesh. It will expand skills training and strengthen the development of the training ecosystem to address the skills requirements of the SICIP-selected industry sectors. The program aims to (i) increase the technology-oriented skilled workforce across emerging and priority sectors, (ii) promote inclusive skilling and upskilling opportunities for women and socially disadvantaged groups, (iii) incentivize industry-university partnerships to nurture innovation capacity and improve industry competitiveness, and (iv) foster skills for climate-resilient manufacturing processes and green technologies. The program is expected to benefit about 220,000 new and existing workers over a 6-year implementation period from 2024-2029.

The SICIP Program has, therefore, taken the initiative to enhance the employability and productivity of trainees by implementing market-responsive and job-focused training programs through public and private training providers. This will require the development of competency standards for each of the occupations/trades which will provide a structured framework in the learning process to guide training providers, ensure consistent training quality, and create an alignment between the skills provided by the training institutes and the needs of the industry.

The Competency Standard also suggests integration of YouTube or similar platforms or downloaded clips into classroom practice to ensure simulated creation of the contents so that learners are exposed to visual demonstrations before classroom instruction or practical session, which aligns with modern learning preference and supports flipped classroom models.

This competency standard is therefore developed to improve skills following the job roles and skill sets of the occupation and ensure that the required skills are aligned with industry requirements.

The document details the format, sequencing, wording, and layout of the Competency Standard for an occupation which comprises Units of Competence and its corresponding Elements.

OVERVIEW:

A **Competency Standard** is a written specification of the knowledge, skills, and attitudes required for the performance of a job or occupation or trade corresponding to the standard of performance required in the workplace.

Competency standard:

- provides a consistent and reliable set of components for training, recognizing, and assessing people's skills, and may also have optional support materials.
- enables industry-recognized qualifications to be awarded through direct assessment of workplace competencies
- encourages the development and delivery of flexible training that suits individual and industry requirements
- encourages learning and assessment in a work-related environment which leads to verifiable workplace outcomes.

Competency Standards are developed by a working group comprised of national and international process experts and the participation of experts from the industry to identify the competencies required of an occupation in a particular sector.

Competency Standards describe the skills, knowledge, and attitude needed to perform effectively in the workplace. Competency Standards acknowledge that people can achieve vocational and technical competency in many ways by emphasizing what the learner can do, not how or where they learned to do it.

With Competency Standards, assessment and training may be conducted at the workplace, at training organization, during regular work, or through work experience, work placement, work simulation or any combination of these.

A Unit of Competency describes a distinct work activity that would normally be undertaken by one person in accordance with industry standards.

Units of Competency are documented in a standard format that comprises:

- Reference to Industry Sector, Occupational Title and Occupational Description
- Unit code
- Unit title
- Unit descriptor
- Elements and performance criteria
- Variables and range statement
- Evidence guides

Together all the parts of a Unit of Competency:

- Describe a work activity
- Guide the assessor in determining whether the candidate is competent.

Competency Standard has been developed by a working group comprised of occupation-specific experts from the industry/institution, relevant consultants of SICIP.

The ensuing sections of this document comprise a description of the respective occupation with all the key components of a Unit of Competence:

- An overview of all Units of Competence for the occupation and their corresponding duration required for completion of training.
- The Competency Standards that include the Unit of Competency, Unit Descriptor, Elements and Performance Criteria, Range of Variables, Curricular Content Guide, and Assessment Evidence Guide.

Units & Elements at a Glance:**Generic Competencies (30 Hrs.)**

Code	Unit of Competency	Elements of Competency	Duration (Hours)
SICIP-LET-MFL-01-G	Carry out workplace interaction	1. Interpret workplace communication and etiquette 2. Read and understand workplace documents 3. Participate in workplace meetings and discussions 4. Practice professional ethics at work	15
SICIP-LET-MFL-02-G	Operate in a team environment	1. Identify team goals and work processes 2. Identify own role and responsibilities within team 3. Communicate and co-operate with team members 4. Practice problem solving within the team	15
Total Hour			30 Hrs.

Sector Specific Competencies (20 hrs.)

Code	Unit of Competency	Elements of Competency	Duration (Hours)
SICIP-LET-MFL-01-S	Carry out measurements and calculations	1. Plan and prepare 2. Obtain measurements 3. Perform calculations	10
SICIP-LET-MFL-02-S	Apply green practices in LET sector	1. Interpret green concepts 2. Minimize resource use in the workplace 3. Implement waste management practices	10
Total Hour			20 Hrs.

Occupation Specific Competencies (250 hrs.)

Code	Unit of Competency	Elements of Competency	Duration (hours)
SICIP-LET-MFL-01-O	Interpret the fundamentals of merchandising	1. Explain the concept of merchandising in the leather and footwear sector. 2. Identify key functions in the merchandising process. 3. Explain the workflow of merchandising. 4. Identify departments involved in merchandising.	20
SICIP-LET-MFL-02-O	Identify footwear and leather goods products	1. Classify types of footwear and leather goods. 2. Identify materials used in production. 3. Describe product specifications and quality standards. 4. Explain production process.	30
SICIP-LET-MFL-03-O	Communicate effectively with buyers and suppliers	1. Interpret buyer inquiries and specifications. 2. Respond to buyer correspondence. 3. Coordinate with suppliers and production teams. 4. Maintain communication throughout order process. 5. Handle complaints and feedback.	50
SICIP-LET-MFL-04-O	Prepare and manage samples	1. Interpret buyer sample requirements. 2. Coordinate product development (PD) unit. 3. Ensure samples meet design and quality standards. 4. Submit sample for approval of buyer. 5. Record sample approval status and feedback.	25
SICIP-LET-MFL-05-O	Plan and monitor production order	1. Follow purchase orders. 2. Develop production schedule and delivery plan. 3. Monitor material sourcing and inventory. 4. Coordinate with production and quality teams. 5. Track production progress and delays. 6. Ensure timely shipment and documentation.	30
SICIP-LET-MFL-06-O	Prepare costing	1. Identify material, labor, and	60

Code	Unit of Competency	Elements of Competency	Duration (hours)
	and pricing for products	overhead costs. 2. Calculate product cost based on specifications. 3. Review and adjust costing with management.	
SICIP-LET-MFL-07-O	Maintain documentation and shipment process	1. Prepare export documents. 2. Coordinate packing, labeling, and shipment. 3. Ensure dispatch and delivery confirmation. 4. Maintain shipment tracking and records.	35
Total Hours			0 Hrs.

COMPETENCY STANDARD: MERCHANDISING FOR FOOTWEAR & LEATHER GOODS SECTOR

Generic Competencies

UNIT OF COMPETENCY: CARRY OUT WORKPLACE INTERACTION	Nominal Duration: 15 hrs.	Unit Code: SICIP-LET-MFL-01-G
Unit Descriptor: This unit covers the skills, knowledge and attitudes required to carry out workplace interaction. It specifically includes the task of interpreting workplace communication and etiquette, Reading and understanding workplace documents, participating in workplace meetings and discussions and practicing professional ethics at work.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Interpret workplace communication and etiquette	1.1 Workplace codes of conduct are interpreted as per organizational guidelines. 1.2 Appropriate lines of communication are maintained with supervisors and colleagues. 1.3 Workplace interactions are conducted in a <u>courteous manner</u> to gather and convey information. 1.4 <u>Workplace procedures and matters</u> are comprehended.
2. Read and understand workplace documents	2.1. Workplace documents are interpreted correctly. 2.2. Visual information/symbols/signage are understood correctly and followed. 2.3. Specific and relevant information are accessed from <u>appropriate sources</u> . 2.4. Appropriate medium is used to transfer information and ideas.
3. Participate in workplace meetings and discussions	3.1. Team meetings are attended on time. 3.2. Meeting procedures and etiquette are followed. 3.3. Active participation is ensured, opinions are expressed and heard. 3.4. Inputs are provided and interpreted in line with the meeting purpose.
4. Practice professional ethics at work	4.1 Responsibilities as a team member are performed. 4.2 Tasks are performed in accordance with workplace procedures. 4.3 Confidentiality is maintained. 4.4 Inappropriate and conflicting situations are avoided.

Range of variables:

Variables	Range (may include but not limited to)
1. Courteous manner	1.1 Effective questioning 1.2 Active listening 1.3 Speaking skills 1.4 Writing skill 1.5 Email etiquette
2. Workplace procedures and matters	1.6 Notes 1.7 Arranging a meeting 1.8 Agenda 1.9 Simple reports such as progress and incident reports 1.10 Job sheets 1.11 Operational manuals 1.12 Brochures and promotional material 1.13 Visual and graphic materials 1.14 Standards 1.15 OHS information 1.16 Signs
3. Appropriate sources	1.17 Human Resources (HR) Department 1.18 Managers 1.19 Supervisors 1.20 Management Information System (MIS)

Curricular Content Guide

1. Underpinning knowledge	1.1 Workplace codes of conduct 1.2 Workplace communication and etiquette 1.3 Workplace documents, signs and symbols 1.4 Meeting procedure and etiquette 1.5 Professional ethics 1.6 Responsibilities of team member
2. Underpinning skill	1.7 Demonstrating workplace communication and etiquette 1.8 Interpreting workplace instructions and symbols 1.9 Performing responsibilities of a team member 1.10 Demonstrating active participation in workplace meeting 1.11 Applying professional ethics at work
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincere and honest to duties 3.4 Environmental concerns 3.5 Eagerness to learn 3.6 Tidiness and timeliness 3.7 Respect for rights of peers and seniors in the workplace 3.8 Communication with peers, subordinates and seniors in the workplace
4. Resource implications	The following resources must be provided:

	1.1 Workplace (simulated or actual) 1.2 Projector 1.3 Learning manual
--	---

Assessment Evidence Guide

1. Critical aspects of competency	Assessment required evidence that the candidate: 1.1 Interpreted workplace communication and etiquette 1.2 Interpreted workplace instructions and symbols 1.3 Performed active participation in workplace meetings 1.4 Performed responsibilities of a team member
2. Methods of assessment	Competency should be assessed by: 1.5 Written test 1.6 Practical Demonstration 1.7 Oral Questioning 1.8 Portfolio (Optional)
3. Context of assessment	1.9 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 1.10 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

Unit of Competency: OPERATE IN A TEAM ENVIRONMENT	Nominal Duration: 15 hrs.	Unit Code: SICIP-LET-MFL-02-G
Unit Descriptor: This unit covers the skills, knowledge and attitudes required to operate in a team environment. It specifically includes the task of identifying team goals and work processes, identifying own role and responsibilities within team, communicating and cooperating with team members and practicing problem solving within the team.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Identify team goals and work processes	1.1. Roles and objectives of the team are identified and interpreted. 1.2. Roles and responsibilities of team members are identified and interpreted.
2. Identify own role and responsibilities within team	2.1 Personal role and responsibilities are identified within the team environment. 2.2 Reporting relationships are interpreted within team and external to team.
3. Communicate and cooperate with team members	3.1 Other teammates' tasks are identified and support provided when requested. 3.2 The team is encouraged through <u>sharing information</u> or expertise, working together to solve problems, and putting team success first. 3.3 Views and opinions of other team members are interpreted and respected.
4. Practice problem solving within the team	4.1 Problems faced at the individual and team level are identified and showed insight into the root causes of the problems. 4.2 A range of solutions and courses of action are identified together with benefits, costs, and risks associated with each. 4.3 The good ideas of others to help develop solutions are recognized and advice sought from those who have solved similar problems. 4.4 It is looked beyond the obvious and not stopped at the first answers.

Range of variables:

Variables	Range (may include but not limited to)
------------------	---

1. Sharing information	1.1. Agenda 1.2. Minutes 1.3. progress and incident reports 1.4. Operational manuals 1.5. Visual and graphic materials 1.6. Emails and SMS 1.7. Phone directory 1.8. Policy, procedure and standards 1.9. OHS information
------------------------	---

Curricular Content Guide

1. Underpinning knowledge	1.1. Team goals and work processes 1.2. Roles and responsibilities of team members 1.3. Personal role and responsibilities 1.4. Sharing information 1.5. Views and opinions 1.6. Problem solving within the team
2. Underpinning skill	1.1. Identifying team goals and work processes 1.2. Identifying own role and responsibilities within team 1.3. Communicating and cooperating with team members 1.4. Practicing problem solving within the team
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincere and honest to duties 3.4 Eagerness to learn 3.5 Tidiness and timeliness 3.6 Environmental concerns 3.7 Respect for rights of peers and seniors at workplace 3.8 Communication with peers and seniors at workplace
4. Resource implications	The following resources must be provided: 4.1 Workplace (simulated or actual) 4.2 Projector 4.3 Stationery 4.4 Learning manual

Assessment Evidence Guide

1. Critical aspects of competency	Assessment required evidence that the candidate: 1.1 identified team goals and work processes 1.2 identified own role and responsibilities within team 1.3 communicated and cooperated with team members 1.4 practiced problem solving within the team
2. Methods of	Competency should be assessed by:

assessment	2.1 Written test 2.2 Practical Demonstration 2.3 Oral Questioning 2.4 Portfolio (Optional)
3. Context of assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

Sector Specific Competencies

Unit of Competency: CARRY OUT MEASUREMENTS AND CALCULATIONS	Nominal Duration: 10 hrs.	Unit Code: SICIP-LET-MFL-01-S
Unit Descriptor: This unit covers the skills, knowledge and attitudes required for carry out measurements and calculations. It specifically includes the task of planning and preparing, obtaining measurements and performing calculations.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Plan and prepare	1.1. Work instructions are confirmed and applied to the job in hand. 1.2. Materials to be measured are identified as per job specification. 1.3. Appropriate <u>measuring device</u> is identified and selected based on materials to be measured. 1.4. Specifications are obtained and verified from relevant <u>documents</u> .
2. Obtain measurements	2.1 Method of obtaining measurement is selected and applied. 2.2 <u>Measurements</u> are obtained using appropriate device in accordance with job requirement. 2.3 Measurements, including area, volume, tolerance and clearance limits, are confirmed and applied
3. Perform calculations	3.1 <u>Calculations</u> , using basic operations, for determining material requirement are taken. 3.2 Appropriate <u>formulas</u> for calculating quantities are selected. 3.3 Quantities are estimated from the calculation taken. 3.4 Material quantities are calculated, confirmed and recorded within tolerances.

Range of Variables

Variable	Range
	May include but not limited to:
1. Measuring device	1.1 Measuring tape 1.2 Steel rule 1.3 Calculator 1.4 Sets square
2. Documents	2.1. Technical manuals

	2.2. Specifications 2.3. Sketches 2.4. Drawings 2.5. Charts 2.6. Photographs
3. Measurements	3.1. Length 3.2. Width 3.3. Weight 3.4. Tolerance
4. Calculations	4.1 Addition 4.2 Subtraction 4.3 Multiplication 4.4 Division 4.5 Area 4.6 Volume 4.7 Circumference 4.8 Cubic meter 4.9 Volumetric weight
5. Formulas	5.1 Fractions 5.2 Percentages 5.3 Mixed numbers 5.4 Conversions 5.5 Scales

Curricular Content Guide

1. Underpinning Knowledge	1.1 Measuring devices 1.2 Measurements 1.3 Simple calculation techniques 1.4 Appropriate formulas 1.5 Estimating quantities
2. Underpinning Skills	2.1 Identifying appropriate measuring devices 2.2 Carrying out measurements for appropriate device 2.3 Performing calculations using appropriate formulas
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincere and honest to duties 3.4 Environmental concerns 3.5 Eagerness to learn 3.6 Tidiness and timeliness 3.7 Respect for rights of peers and seniors in workplace 3.8 Communication with peers, sub-ordinates and seniors in workplace
4. Resource Implications	4.1 Workplace (simulated or actual) 4.2 Map/globe 4.3 Projector 4.4 Stationery 4.5 Learning manual.

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1 planed and prepared 1.2 obtained measurements 1.3 performed calculations
2. Methods of Assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical Demonstration 2.3 Oral Questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

Unit of Competency: APPLY GREEN PRACTICES IN LET SECTOR	Nominal Duration: 10 hrs.	Unit Code: SICIP-LET-MFL-02-S
Unit Descriptor: This unit covers the skills, knowledge and attitudes required for apply green practices in LET sector. It specifically includes the tasks of interpreting green concepts, minimizing resources use in the workplace and implementing waste management practices.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Interpret green concepts	1.1 <u>Principles of green practices in LET (Ready-Made Garment)</u> manufacturing are explained. 1.2 Key terms and symbols in LET production processes are identified. 1.3 <u>Sources of environmental impacts</u> during LET manufacturing activities are identified. 1.4 LET manufacturing activities use are explained. 1.5 <u>Ways of mitigating environmental impacts</u> in LET manufacturing are explained.
2. Minimize resources use in the workplace	2.1 Water, energy, and raw material consumption in LET manufacturing are documented. 2.2 <u>Recyclable and non-recyclable items</u> in LET production processes are identified. 2.3 Procedures to reduce resource consumption in LET manufacturing are implemented. 2.4 Sustainable alternatives in LET manufacturing are explored and applied.
3. Implement waste management practices	3.1 <u>Different types of waste in LET manufacturing</u> are identified. 3.2 Hazardous waste in LET production is disposed of according to environmental regulations. 3.3 Green habits to reduce waste in personal and professional life are practiced.

Range of Variables

Variable	Range
	May include but not limited to:
1. Principles of green practices in LET (Ready-Made Garment)	1.1 Reducing energy consumption in LET manufacturing processes. 1.2 6R for waste management in LET production: 1.2.1 Refuse unnecessary materials and processes. 1.2.2 Reduce resource consumption and waste

	generation. 1.2.3 Reuse materials within the production process. 1.2.4 Recycle materials for future use in LET manufacturing. 1.2.5 Recover usable resources from waste. 1.2.6 Repair damaged products or materials instead of discarding them. 1.3 Use of sustainable materials in LET production with low environmental impact. 1.4 Recycling of materials used in the LET manufacturing process. 1.5 Sustainable transportation methods for moving goods and materials within the LET sector.
2. Sources of environmental impacts	2.1 Air Pollution in LET Manufacturing 2.2 Water Pollution in LET Manufacturing 2.3 Soil Degradation in LET Manufacturing 2.4 Noise Pollution in LET Manufacturing 2.5 Waste Generation in LET Manufacturing 2.6 Resource Depletion in LET Manufacturing
3. Ways of mitigating environmental impacts	3.1 Utilizing energy-efficient equipment in LET production processes. 3.2 Adopting renewable energy sources for LET manufacturing operations. 3.3 Implementing site protection measures to prevent pollution and reduce environmental. 3.4 Using reusable materials in production processes. 3.5 Choosing sustainable materials with low environmental impact for garment production. 3.6 Using noise-reducing equipment and scheduling production work. 3.7 Optimizing logistics and delivery to reduce transportation emissions and improve overall supply chain efficiency.
4. Recyclable and non-recyclable items	4.1 Recyclable Items in LET Manufacturing 4.1.1 Metal components. 4.1.2 Wooden materials. 4.1.3 Fabric scraps and textile fibers. 4.1.4 Plastic items, including buttons, tags, and packaging materials. 4.2 Non-Recyclable Items in LET Manufacturing 4.2.1 Paints, coatings, and dyes. 4.2.2 Contaminated materials. 4.2.3 Treated wood and other materials.
5. Different types of waste in LET manufacturing	5.1 Fabric waste from cutting and trimming processes. 5.2 Wood waste from packaging or display materials. 5.3 Metal waste from trims, buttons, zippers, and other hardware. 5.4 Textile waste, including scraps from garment production

	and defective products.
	5.5 Plastic waste, such as packaging materials, labels, and plastic buttons.
	5.6 Solid waste from chemical treatments or dyeing processes.
	5.7 Packaging waste from raw materials and finished products.

Curricular Content Guide

1. Underpinning Knowledge	1.1 Principles of green practices in LET (Ready-Made Garment) manufacturing. 1.2 Sources of environmental impacts. 1.3 Ways of mitigating environmental impacts 1.4 Recyclable and non-recyclable items 1.5 Different types of waste in LET manufacturing 1.6 Hazardous waste in LET production 1.7 Green habits to reduce waste
2. Underpinning Skills	2.1 Explaining principles of green practices in LET manufacturing 2.2 Identifying sources of environmental impacts 2.3 Explaining re-cyclable and non-recyclable items 2.4 Minimizing resources use in the workplace 2.5 Identifying different types of waste in LET manufacturing 2.6 Disposing hazardous waste in LET production 2.7 Practicing green habits to reduce waste
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincere and honest to duties 3.4 Environmental concerns 3.5 Eagerness to learn 3.6 Tidiness and timeliness 3.7 Respect for rights of peers and seniors in the workplace 3.8 Communication with peers, subordinates and seniors in the workplace
4. Resource Implications	4.1 Workplace (simulated or actual) 4.2 Projector 4.3 Stationery 4.4 Learning manual

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1 interpreted green concepts
-----------------------------------	--

	1.2 minimized resources use in the workplace 1.3 implemented waste management practices
2. Methods of Assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical Demonstration 2.3 Oral Questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

Occupation Specific Competencies

Unit of Competency: INTERPRET THE FUNDAMENTALS OF MERCHANDISING	Nominal Duration: 20 Hrs.	Unit Code: SICIP-LET-MFL-01-O
Unit Descriptor: This unit covers the skills, knowledge and attitudes required to interpret the fundamentals of merchandising. It specifically includes the tasks of explaining the concept of merchandising in the leather and footwear sector, identifying key functions in the merchandising process, explaining the workflow of merchandising and identifying departments involved in merchandising.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Explain the concept of merchandising in the leather and footwear sector.	1.1 Concept and definition of merchandising are explained. 1.2 Importance of merchandising in the leather and footwear sector is described. 1.3 Functions and objectives of merchandising are identified and explained. 1.4 <u>Roles and responsibilities of a merchandiser</u> are outlined. 1.5 <u>Key terminologies</u> related to merchandising are defined and explained.
2. Identify key functions in the merchandising process.	1.1 <u>Key functions of the merchandising process</u> are identified and listed. 1.2 Order placement and follow-up procedures are explained. 1.3 Communication and coordination roles in merchandising are outlined. 1.4 Documentation and record-keeping requirements are identified.
3. Explain the workflow of merchandising.	3.1 <u>Merchandising workflow</u> is described step by step. 3.2 Flow of activities from order inquiry to shipment is explained. 3.3 Coordination between departments and buyers is outlined. 3.4 Documentation used in the workflow is described.
4. Identify departments involved in merchandising.	4.1 <u>Departments involved in merchandising</u> are identified and listed. 4.2 Roles of production, design, quality, and marketing departments are explained. 4.3 Functions of sourcing and procurement departments

	are described.
4.4	Responsibilities of sales and export departments are outlined.
4.5	Coordination between departments is explained.

Range of Variables

Variable	Range (Includes but not limited to):
1. Roles and responsibilities of a merchandiser	1.1 Develop new footwear and leather products. 1.2 Source materials and accessories. 1.3 Prepare and check product samples. 1.4 Manage buyer orders and follow up on production. 1.5 Prepare costing and negotiate prices. 1.6 Ensure product quality and timely delivery. 1.7 Communicate with buyers and suppliers. 1.8 Maintain production and shipment records. 1.9 Monitor market trends and customer needs.
2. Key terminologies	2.1 SKU – Product code. 2.2 Sampling – Making product samples. 2.3 Lead Time – Time from order to delivery. 2.4 MOQ – Minimum order quantity. 2.5 MCQ – Minimum Color Quantity. 2.6 Costing – Calculating product cost. 2.7 ETD – Estimated Time of Delivery 2.8 ETA – Estimate Time of Arrival. 2.9 FOB – Free on Board. 2.10 CO – Country of Origin. 2.11 BL – Bill of Lading. 2.12 CMT – Cost of Manufacturing. 2.13 LOP – Labor Overhead Profit. 2.14 PL – Packing List 2.15 CI – Commercial Invoice 2.16 PI – Proforma Invoice 2.17 BOM – List of materials. 2.18 Tech Pack – Product details and specs. 2.19 TNA – Production schedule. 2.20 QC – Quality checking process. 2.21 Logistics – Shipping and delivery.
3. Key functions of the merchandising process	3.1 Business development 3.2 Sampling 3.3 Material Sourcing 3.4 Costing 3.5 Order Management 3.6 Production Planning 3.7 Production Follow-up 3.8 Quality Control 3.9 Documentation 3.10 Logistics

4. Merchandising workflow	4.1 Product Concept & Design 4.2 Material Sourcing 4.3 Sampling & Sample Approval 4.4 Costing & Quotation 4.5 Order Confirmation 4.6 Production Planning 4.7 Production Monitoring 4.8 Quality Inspection 4.9 Packing & Dispatch 4.10 Delivery & Feedback
5. Departments involved in merchandising	5.1 Design / Product Development 5.2 Sourcing / Procurement 5.3 Production / Manufacturing 5.4 Quality Control (QC) 5.5 Planning / Merchandising 5.6 Logistics / Shipping 5.7 Marketing / Sales 5.8 Finance / Costing

Curricular Content Guide

1. Underpinning Knowledge	1.1. Identify the concept and definition of merchandising in the leather and footwear sector. 1.2. Understand the importance, objectives, and functions of merchandising in production and sales. 1.3. Interpret the key roles and responsibilities of a merchandiser in coordinating business operations. 1.4. Identify key functions of the merchandising process. 1.5. Interpret the workflow of merchandising from order inquiry to shipment and delivery. 1.6. Identify the types of documentation and records maintained throughout the merchandising process. 1.7. Understand the roles and functions of different departments involved in merchandising. 1.8. Interpret the importance of inter-departmental coordination.
2. Underpinning Skills	2.1. Applying knowledge of merchandising functions, objectives, and key terminologies. 2.2. Performing identification and explanation of major roles and responsibilities of a merchandiser. 2.3. Applying communication and coordination skills to manage buyer and departmental interactions effectively. 2.4. Demonstrating organizational skills in handling documentation, records, and order follow-ups. 2.5. Applying analytical skills to interpret the merchandising workflow from inquiry to shipment. 2.6. Performing collaboration and teamwork when

	coordinating among production, sourcing, and marketing departments. 2.7. Demonstrating attention to detail in managing the flow of merchandising activities and processes. 2.8. Applying problem-solving skills to address issues within merchandising operations efficiently.
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincere and honest to duties 3.4 Environmental concerns 3.5 Eagerness to learn 3.6 Tidiness and timeliness 3.7 Respect for rights of peers and seniors in the workplace 3.8 Communication with peers, subordinates and seniors in the workplace
4 Resource Implications	4.1 Workplace (simulated or actual) 4.2 Computer/laptop/notebook 4.3 Internet 4.4 Projector 4.5 Stationary 4.6 Learning manual

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment must evidence that the candidate: 1.1 explained the concept of merchandising in the leather and footwear sector. 1.2 identified key functions in the merchandising process. 1.3 explained the workflow of merchandising. 1.4 identified departments involved in merchandising.
2. Methods of Assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical Demonstration 2.3 Oral Questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by nationally certified assessor or occupation-specific industry expert.

Unit of Competency: IDENTIFY FOOTWEAR AND LEATHER GOODS PRODUCTS	Nominal Duration: 30 Hrs.	Unit Code: SICIP-LET-MFL-02-O
Unit Descriptor: This unit covers the skills, knowledge and attitudes required to identify footwear and leather goods products. It specifically includes the tasks of classifying types of footwear and leather goods, identifying materials used in production, describing product specifications and quality standards and explaining production process.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Classify types of footwear and leather goods.	1.1 <u>Types of footwear</u> are identified and classified by design and use. 1.2 <u>Types of leather goods</u> are identified and categorized by function and material. 1.3 Characteristics of different footwear styles are described. 1.4 Characteristics of different leather goods are described.
2. Identify materials used in production.	2.1 <u>Materials used in footwear production</u> are identified and categorized. 2.2 <u>Materials used in leather goods production</u> are identified and classified. 2.3 Characteristics and properties of materials are described. 2.4 Quality standards of footwear and leather goods materials are recognized.
3. Describe product specifications and quality standards.	3.1 <u>Product specifications for footwear</u> are described. 3.2 <u>Product specifications for leather goods</u> are described. 3.3 Quality standards and parameters are identified and explained. 3.4 Specifications are compared with production requirements. 3.5 Non-conformities with specifications are identified and reported.
4. Explain production process.	4.1 <u>Product process for footwear and leather goods</u> is explained. 4.2 Design and prototyping processes are described step by step. 4.3 Material selection and sampling stages are outlined.

Range of Variables

Variable	Range (Includes but not limited to):
1. Types of footwear	1.1 Formal shoes 1.2 Sports shoes 1.3 Sandals 1.4 Boots 1.5 Slippers 1.6 Safety shoes 1.7 Sneakers 1.8 Heels 1.9 Moccasin
2. Types of leather goods	2.1 Bags 2.2 Wallets 2.3 Belts 2.4 Purses 2.5 Gloves 2.6 Key cases 2.7 Watch straps 2.8 Folders 2.9 Luggage 2.10 Card holders
3. Materials used in footwear production	3.1 Leather 3.2 Synthetic leather 3.3 Textile/fabric 3.4 Nylon 3.5 Micro fiber 3.6 Fur 3.7 Mesh 3.8 Rubber 3.9 EVA (Ethylene Vinyl Acetate) 3.10 PU (Polyurethane) 3.11 PVC (Polyvinyl Chloride) 3.12 Phylon 3.13 TPR (Thermo Plastic Rubber) 3.14 Foam 3.15 Insole board 3.16 Thread 3.17 Adhesive/glue
4. Materials used in leather goods production	4.1 Leather 4.2 Synthetic leather 4.3 Fabric or textile lining 4.4 Foam or padding 4.5 Thread 4.6 Adhesive/glue 4.7 Metal fittings (zippers, buckles, rivets) 4.8 Plastic fittings

	4.9 Lining material 4.10 Interlining or reinforcement materials
5. Product specifications for footwear	5.1 Style and design 5.2 Size chart 5.3 Grading 5.4 Upper material type 5.5 Lining material 5.6 Insole and outsole material 5.7 Measurement chart 5.8 Color and shade
6. Product specifications for leather goods	6.1 Design and style 6.2 Dimensions and shape 6.3 Leather type and grade 6.4 Lining material 6.5 Trims and accessories 6.6 Color and shade 6.7 Functionality (pockets, straps, closures)
7. Production process for footwear and leather goods	7.1 Concept & Design 7.2 Material Selection 7.3 Prototype / Sample Making 7.4 Sample Testing 7.5 Consumption and Costing 7.6 Production Planning 7.7 Quality Control 7.8 Packaging & Labeling 7.9 Delivery & Market Launch

Curricular Content Guide

1. Underpinning Knowledge	1.1 Identify and classify different types of footwear and leather goods based on design, use, and material. 1.2 Understand the characteristics and functions of various footwear styles and leather goods products. 1.3 Identify and categorize materials used in footwear and leather goods production. 1.4 Interpret the properties, characteristics, and quality standards of production materials. 1.5 Identify how specifications align with production requirements and recognize non-conformities. 1.6 Interpret the step-by-step production process for footwear and leather goods manufacturing. 1.7 Identify how material selection and production processes influence overall product quality.
2. Underpinning Skills	2.1 Performing identification and classification of different types of footwear and leather goods. 2.2 Applying observation skills to describe characteristics and functions of various designs and materials. 2.3 Demonstrating understanding of material properties

	and their suitability for specific products. 2.4 Applying knowledge of product specifications and quality standards in production activities. 2.5 Performing comparison of specifications with actual production outputs to detect non-conformities. 2.6 Applying technical understanding of footwear and leather goods production processes.
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincere and honest to duties 3.4 Environmental concerns 3.5 Eagerness to learn 3.6 Tidiness and timeliness 3.7 Respect for rights of peers and seniors in the workplace 3.8 Communication with peers, subordinates and seniors in the workplace
4 Resource Implications	4.1 Workplace (simulated or actual) 4.2 Computer/laptop/notebook 4.3 Internet 4.4 Projector 4.5 Stationary 4.6 Learning manual

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment must evidence that the candidate: 1.1 classified types of footwear and leather goods. 1.2 identified materials used in production. 1.3 described product specifications and quality standards. 1.4 explained production process.
2. Methods of Assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical Demonstration 2.3 Oral Questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by nationally certified assessor or occupation-specific industry expert.

Unit of Competency: COMMUNICATE EFFECTIVELY WITH BUYERS AND SUPPLIERS	Nominal Duration: 50 Hrs.	Unit Code: SICIP-LET-MFL-03-O
Unit Descriptor: This unit covers the skills, knowledge and attitudes required to communicate effectively with buyers and suppliers. It specifically includes the tasks of interpreting buyer inquiries and specifications, responding to buyer correspondence, coordinating with suppliers and production teams, maintaining communication throughout order process and handling complaints and feedback.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Interpret buyer inquiries and specifications.	1.1 <u>Buyer inquiries and specifications</u> are identified and understood. 1.2 Product requirements and design details are interpreted as per buyer instructions. 1.3 Technical drawings, samples, and measurements are interpreted. 1.4 Clarifications are sought from buyers to ensure correct understanding. 1.5 Key information from buyer specifications is documented for production reference.
2. Respond to buyer correspondence.	2.1 <u>Buyer correspondence</u> is received and acknowledged. 2.2 Queries and requests from buyers are reviewed and interpreted. 2.3 Responses are prepared according to company communication guidelines. 2.4 Relevant departments are informed to ensure proper follow-up. 2.5 Records of buyer correspondence are documented and stored.
3. Coordinate with suppliers and production teams.	3.1 Communication with suppliers and production teams is established and maintained. 3.2 <u>Order details, materials, and timelines</u> are shared clearly with concerned parties. 3.3 Production requirements and updates are coordinated as per buyer needs. 3.4 Issues related to materials or production delays are communicated. 3.5 Feedback from suppliers and production teams is collected and reviewed. 3.6 Coordination records are maintained for monitoring

	progress and accountability.
4. Maintain communication throughout order process.	4.1 <u>Continuous communication</u> with buyers and suppliers is maintained during the order process. 4.2 Order status and production updates are shared regularly. 4.3 Changes in specifications or delivery schedules are communicated promptly. 4.4 Feedback from buyers and suppliers is received and recorded. 4.5 All correspondence is tracked to ensure clarity and transparency. 4.6 Communication records are maintained for order monitoring and future reference.
5. Handle complaints and feedback.	5.1 <u>Complaints and feedback</u> from buyers and suppliers are received and acknowledged promptly. 5.2 Issues are reviewed and analyzed to identify causes and solutions. 5.3 Appropriate actions are taken to resolve complaints effectively. 5.4 Feedback is communicated to relevant departments for improvement. 5.5 Resolutions and follow-up actions are documented for record-keeping. 5.6 Professionalism and courtesy are maintained throughout all communications.

Range of Variables

Variable	Range (Includes but not limited to):
1. Buyer inquiries and specifications	1.1 Product style and design requirements 1.2 Material and component specifications 1.3 Color, shade, and finish preferences 1.4 Size, fitting, and dimension details 1.5 Quantity and order volume 1.6 Packaging and labeling instructions 1.7 Delivery timelines and deadlines 1.8 Quality standards and testing requirements 1.9 Compliance and certification requirements 1.10 Payment terms, and lead time
2. Buyer correspondence	2.1. Order confirmation emails 2.2. Sample submission and approval letters 2.3. Production updates and status reports 2.4. Quality inspection reports 2.5. Shipping and delivery notifications 2.6. Payment reminders and invoices 2.7. Inquiry responses 2.8. Pricing and negotiations

	2.9. Complaint handling and resolution 2.10. Contract and agreement communication 2.11. Feedback and follow-up messages
3. Order details, materials, and timelines	3.1 Style description 3.2 Quantity and sizes 3.3 Material types (leather, lining, accessories) 3.4 Color and finish specifications 3.5 Production start and end dates 3.6 Packing and labeling instructions 3.7 Shipping details and delivery schedule 3.8 Quality requirements
4. Continuous communication	4.1 Emails 4.2 Phone calls 4.3 Video conferencing 4.4 Instant messaging (WhatsApp, WeChat, Teams) 4.5 Reports and updates 4.6 Meetings (in-person or virtual) 4.7 Buyer portals or dashboards 4.8 Letters or official correspondence 4.9 Social media messaging (if applicable) 4.10 Follow-up reminders
5. Complaints and feedback	5.1 Product defects or faults 5.2 Delayed delivery 5.3 Incorrect orders or quantities 5.4 Material or color mismatch 5.5 Packaging issues 5.6 Quality standard deviations 5.7 Communication gaps 5.8 Payment or invoice issues 5.9 Suggestions for improvement 5.10 Customer satisfaction reviews

Curricular Content Guide

1. Underpinning Knowledge	1.1 Identify and interpret buyer inquiries, specifications, and product requirements accurately. 1.2 Understand how to read and analyze technical drawings, samples, and measurements. 1.3 Interpret the importance of seeking clarification from buyers. 1.4 Interpret coordination methods between suppliers, production teams, and buyers to ensure smooth workflow. 1.5 Identify communication protocols for sharing updates, order progress, and changes in requirements. 1.6 Understand how to handle buyer and supplier complaints effectively through analysis and resolution. 1.7 Interpret the importance of maintaining
---------------------------	--

	professionalism, transparency, and documentation throughout the communication process.
2. Underpinning Skills	2.1. Performing accurate interpretation of buyer inquiries, specifications, and technical details. 2.2. Applying communication skills to respond clearly and professionally to buyer correspondence. 2.3. Applying organizational skills to maintain accurate records of communication, feedback, and updates. 2.4. Performing problem-solving and analytical skills to handle complaints and identify practical solutions. 2.5. Applying time management skills to ensure timely responses and order progress updates. 2.6. Following company communication protocols to maintain professionalism and transparency.
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincere and honest to duties 3.4 Environmental concerns 3.5 Eagerness to learn 3.6 Tidiness and timeliness 3.7 Respect for rights of peers and seniors in the workplace 3.8 Communication with peers, subordinates and seniors in the workplace
4 Resource Implications	4.1 Workplace (simulated or actual) 4.2 Projector 4.3 Stationery 4.4 Learning manual

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1 interpreted buyer inquiries and specifications. 1.2 responded to buyer correspondence. 1.3 coordinated with suppliers and production teams. 1.4 maintained communication throughout order process. 1.5 handled complaints and feedback.
2. Methods of Assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical Demonstration 2.3 Oral Questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

Unit of Competency: PREPARE AND MANAGE SAMPLES	Nominal Duration: 25 Hrs.	Unit Code: SICIP-LET-MFL-04-O
Unit Descriptor: This unit covers the skills, knowledge and attitudes required prepare and manage samples. It specifically includes the tasks of interpreting buyer sample requirements, coordinating product development (PD) unit, ensuring samples meet design and quality standards, submitting sample for approval of buyer and recording sample approval status and feedback.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Interpret buyer sample requirements.	1.1 <u>Buyer sample requirements</u> are identified and understood. 1.2 Product details, design, and material specifications are interpreted. 1.3 Reference samples, drawings, and measurements are understood for clarity. 1.4 Clarifications on sample requirements are interpreted from buyers when necessary. 1.5 <u>Key specifications</u> are identified for use in sample preparation. 1.6 Buyer expectations are illustrated to the production and design teams.
2. Coordinate with product development (PD) unit	2.1 Sample development requirements are communicated to the production development (PD) unit. 2.2 Materials, components, and design details are provided as per buyer specifications. 2.3 Progress of sample development is monitored and updates are recorded. 2.4 Issues during sample production are identified and resolved promptly. 2.5 Coordination between merchandising and production teams is maintained.
3. Ensure samples meet design and quality standards.	3.1 Completed samples are inspected against design and quality specifications. 3.2 Materials, color, size, fittings and finishing are checked for accuracy. 3.3 Defects or deviations from buyer requirements are identified and reported. 3.4 <u>Necessary corrections</u> are coordinated with the production development team. 3.5 Quality assurance procedures are followed to ensure compliance.

	3.6 Approved samples are documented and prepared for buyer review.
4. Submit sample for approval of buyer.	4.1 Completed samples are packaged and prepared for buyer submission. 4.2 <u>Required documents and specifications</u> are attached for review. 4.3 Samples are dispatched to buyers within the agreed timeline. 4.4 Buyer feedback and approval status are received and recorded. 4.5 Necessary modifications are arranged based on buyer comments. 4.6 Final approved samples are documented for production reference.
5. Record sample approval status and feedback.	5.1 Sample approval status from buyers is received and recorded. 5.2 Feedback and comments from buyers are documented systematically. 5.3 Records of approved, rejected, or modified samples are maintained. 5.4 Feedback is communicated to the production and design teams. 5.5 Historical data on sample approvals is organized for reference and analysis. 5.6 Documentation is updated regularly to reflect changes or corrective actions.

Range of Variables

Variable	Range (Includes but not limited to):
1. Buyer sample requirements	1.1 Sample types 1.1.1 Proto 1.1.2 Line close 1.1.3 Approval 1.1.4 CS sample 1.1.5 SMS sample 1.1.6 Pre-production sample 1.1.7 Shipment sample 1.2 Approved design sketches or tech packs 1.3 Material and component specifications 1.4 Color and finish details 1.5 Size and fitting requirements 1.6 Quantity of samples needed 1.7 Packaging and labeling instructions 1.8 Production timeline for samples 1.9 Quality and workmanship standards 1.10 Compliance and certification requirements 1.11 Feedback and approval process

2. Key specifications	2.1 Product style and design 2.2 Materials used (leather, lining, accessories) 2.3 Color and shade 2.4 Size and fitting 2.5 Stitching and finishing quality 2.6 Hardware and trims 2.7 Packaging and labeling requirements 2.8 Quantity and order volume 2.9 Quality and testing standards
3. Necessary corrections	3.1 Adjust design or style as per buyer feedback 3.2 Correct material or color mismatches 3.3 Fix size or fitting issues 3.4 Repair stitching or finishing defects 3.5 Replace faulty hardware or accessories 3.6 Update packaging and labeling 3.7 Revise quantity or order details 3.8 Ensure compliance with quality standards 3.9 Address sample approval comments 3.10 Document corrections and notify buyer
4. Required documents and specifications	4.1 Purchase order (PO) 4.2 Tech pack or design specifications 4.3 Material and component list (BOM sheet) 4.4 Sample approval forms 4.5 Production schedule or TNA (Time & Action) 4.6 Quality control checklist 4.7 Packaging and labeling instructions 4.8 Shipment and delivery documents 4.9 Compliance certificates 4.10 Payment and invoice details

Curricular Content Guide

1. Underpinning Knowledge	1.1 Identify and interpret buyer sample requirements. 1.2 Understand how to read reference samples, drawings, and measurements for accurate interpretation. 1.3 Interpret communication methods for clarifying buyer expectations before sample development. 1.4 Identify coordination procedures with the Product Development (PD) unit. 1.5 Understand how to monitor sample production, resolve issues, and maintain coordination between teams. 1.6 Interpret inspection techniques to verify that samples meet design and quality standards. 1.7 Identify steps for submitting samples to buyers with required documentation and within agreed timelines. 1.8 Understand how to record, review, and act upon buyer feedback and approval status.
2. Underpinning Skills	2.1 Performing accurate interpretation of buyer sample

	requirements, drawings, and specifications. 2.2 Applying communication skills to clarify buyer expectations with the product development team. 2.3 Applying analytical skills to inspect and verify samples against quality and design standards. 2.4 Performing problem-solving to identify, report, and correct deviations or defects in samples. 2.5 Applying documentation skills to maintain accurate records of sample approvals, feedback, and changes. 2.6 Following quality assurance and compliance procedures during sample inspection and approval. 2.7 Applying attention to detail and organizational skills to track feedback and update records for future reference.
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincere and honest to duties 3.4 Environmental concerns 3.5 Eagerness to learn 3.6 Tidiness and timeliness 3.7 Respect for rights of peers and seniors in the workplace 3.8 Communication with peers, subordinates and seniors in the workplace
4 Resource Implications	4.1 Workplace (simulated or actual) 4.2 Projector 4.3 Learning manual

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1 interpreted buyer sample requirements. 1.2 coordinated product development (PD) unit. 1.3 ensured samples meet design and quality standards. 1.4 submitted sample for approval of buyer. 1.5 recorded sample approval status and feedback.
2. Methods of Assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical Demonstration 2.3 Oral Questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

Unit of Competency: PLAN AND MONITOR PRODUCTION ORDER	Nominal Duration: 30 Hrs.	Unit Code: SICIP-LET-MFL-05-O
Unit Descriptor: This unit covers the skills, knowledge and attitudes required to plan and monitor production order. It specifically includes the tasks of following purchase orders, developing production schedule and delivery plan, monitoring material sourcing and inventory, coordinating with production and quality teams, tracking production progress and delays & ensuring timely shipment and documentation.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Follow purchase orders.	1.1 Purchase orders are received and reviewed for accuracy and completeness. 1.2 <u>Order details</u> are recorded and followed. 1.3 Production schedules are aligned with purchase order requirements. 1.4 Materials and resources required for the order are identified and arranged. 1.5 Progress of order fulfillment is monitored against the purchase order. 1.6 Updates and confirmations regarding order status are communicated to relevant personnel.
2. Develop production schedule and delivery plan.	2.1 Production requirements from purchase orders are reviewed and analyzed. 2.2 <u>Production schedule and delivery plan</u> is developed based on order quantities and timelines. 2.3 Schedules and plans are communicated to relevant production and merchandising teams. 2.4 Adjustments to schedules are made based on changes in orders or production capacity.
3. Monitor material sourcing and inventory.	3.1 Materials required for production orders are identified according to specifications. 3.2 <u>Material sourcing process</u> is recognized as per order requirements. 3.3 Inventory levels are monitored regularly to ensure sufficient stock. 3.4 Material delivery timelines are tracked and recorded. 3.5 Shortages, delays, or quality issues in materials are identified and reported. 3.6 Coordination with suppliers is maintained to ensure timely replenishment.
4. Coordinate with	4.1 Production and quality teams are informed about order

production and quality teams.	requirements and timelines. 4.2 Progress of production is monitored and any deviations are reported. 4.3 Quality checks and standards are communicated and enforced during production. 4.4 <u>Issues affecting production or quality</u> are identified and resolved. 4.5 Updates from production and quality teams are recorded for tracking purposes.
5. Track production progress and delays.	5.1 Production progress is monitored against the planned schedule. 5.2 Production report is monitored as per schedule. 5.3 Delays or deviations from the schedule are identified and recorded. 5.4 Reasons for production delays are analyzed and documented. 5.5 Corrective actions are coordinated to address delays and maintain timelines. 5.6 Records of production progress and delays are maintained for future reference.
6. Ensure timely shipment and documentation.	6.1 <u>Shipment schedules</u> are reviewed and aligned with delivery deadlines. 6.2 Completed products are prepared and checked for quality compliance before shipment. 6.3 <u>Required documentation</u> is prepared accurately. 6.4 Shipment instructions are communicated to logistics or courier teams. 6.5 Timely dispatch of products is ensured according to the delivery plan. 6.6 Records of shipments and documentation are maintained for accountability and reference.

Range of Variables

Variable	Range (Includes but not limited to):
1. Order details	1.1 Orders quantities 1.2 Specifications 1.3 Brand details 1.4 Shipment destination 1.5 Packing methods 1.6 Delivery timelines 1.7 Payment methods
2. Production schedule and delivery plan	2.1 Start and end dates for production 2.2 Product preparation timeline 2.3 Material procurement schedule 2.4 Manufacturing stages and deadlines 2.5 Quality inspection checkpoints

	2.6 Packing and labeling timeline 2.7 Shipping and logistics schedule 2.8 Delivery deadlines to buyer 2.9 Contingency plans for delays 2.10 Coordination with suppliers and production teams
3. Material sourcing process	3.1 Identify required materials and components 3.2 Select potential suppliers 3.3 Request quotations and samples 3.4 Evaluate supplier quality and reliability 3.5 Negotiate price and terms 3.6 Approve sample materials 3.7 Place purchase orders 3.8 Track delivery schedules 3.9 Inspect materials upon arrival
4. Issues affecting production or quality	4.1 Material defects or shortages 4.2 Equipment or machinery breakdowns 4.3 Inadequate workforce skills 4.4 Delays in sample approvals 4.5 Poor stitching or finishing quality 4.6 Color or shade mismatches 4.7 Packaging errors 4.8 Non-compliance with buyer specifications 4.9 Inefficient production workflow
5. Shipment schedules	5.1 Production completion date 5.2 Packing and labeling completion 5.3 Quality inspection date 5.4 Handover to logistics/transport 5.5 Customs clearance date 5.6 Shipping departure date 5.7 Estimated transit time 5.8 Arrival at port or destination 5.9 Delivery to buyer
6. Required documentation	6.1 Invoices 6.2 Packing lists 6.3 Inspection report or Quality No Objection Certificate (NOC) 6.4 Shipment order 6.5 Shipping forms

Curricular Content Guide

1. Underpinning Knowledge	1.1 Identify and interpret purchase orders accurately to ensure completeness and proper follow-up. 1.2 Understand how to align production schedules and resource planning with purchase order requirements. 1.3 Interpret methods for developing production schedules and delivery plans. 1.4 Identify processes for monitoring material sourcing,
---------------------------	---

	inventory levels, and supplier coordination. 1.5 Understand how to track material delivery timelines and handle shortages, delays, or quality issues. 1.6 Interpret coordination procedures between merchandising, production, and quality teams for smooth operations. 1.7 Identify methods for monitoring production progress, recording deviations, and analyzing causes of delays.
2. Underpinning Skills	2.1. Performing accurate review and interpretation of purchase orders and production requirements. 2.2. Applying organizational skills to plan and align production schedules with delivery timelines. 2.3. Applying inventory management skills. 2.4. Performing analytical skills to track production progress, identify delays, and determine root causes. 2.5. Applying problem-solving skills to address production or material-related issues efficiently. 2.6. Applying time management skills to ensure on-time order fulfillment and shipment. 2.7. Following quality assurance and communication procedures.
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincere and honest to duties 3.4 Environmental concerns 3.5 Eagerness to learn 3.6 Tidiness and timeliness 3.7 Respect for rights of peers and seniors in the workplace 3.8 Communication with peers, subordinates and seniors in the workplace
4 Resource Implications	4.1 Workplace (simulated or actual) 4.2 Projector 4.3 Stationery 4.4 Learning manual

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1 followed purchase orders. 1.2 developed production schedule and delivery plan. 1.3 monitored material sourcing and inventory. 1.4 coordinated with production and quality teams. 1.5 tracked production progress and delays. 1.6 ensured timely shipment and documentation.
2. Methods of Assessment	Competency should be assessed by:

	2.1 Written test 2.2 Practical Demonstration 2.3 Oral Questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

Unit of Competency: PREPARE COSTING AND PRICING FOR PRODUCTS	Nominal Duration: 60 Hrs.	Unit Code: SICIP-LET-MFL-06-O
Unit Descriptor: This unit covers the skills, knowledge and attitudes required to prepare costing and pricing for products. It specifically includes the tasks of identifying material, labor and overhead costs, calculating product cost based on specifications and reviewing & adjusting costing with management.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Identify material, labor, and overhead costs.	1.1 <u>Material, labor, and overhead cost components</u> are identified and classified. 1.2 Costs for raw materials and components are identified. 1.3 Direct and indirect labor costs are explained. 1.4 Overhead expenses, including utilities and production support, are interpreted. 1.5 Cost data is identified and maintained for reference.
2. Calculate product cost based on specifications.	2.1 Product specifications and material requirements are reviewed and confirmed. 2.2 Consumption of materials and components required for production are calculated. 2.3 Labor and overhead costs are applied according to standard rates. 2.4 <u>Total product cost</u> is computed by combining material, labor, and overhead expenses. 2.5 Cost calculations are verified and recorded for accuracy and completeness. 2.6 Adjustments are made based on changes in specifications or production methods.
3. Review and adjust costing with management.	3.1 Costing reports are reviewed with management for accuracy and completeness. 3.2 Variations in material, labor, or overhead costs are identified and analyzed. 3.3 Proposed adjustments to product costing are discussed and approved. 3.4 Revised costs are applied to pricing and production plans. 3.5 Documentation of adjusted costs is maintained for reference. 3.6 Feedback from management is incorporated into future costing procedures. 3.7 Costing adjustments are communicated to relevant departments for implementation.

Range of Variables

Variable	Range (Includes but not limited to):
1. Material, labor, and overhead cost components	1.1 Raw material cost 1.2 Direct labor cost 1.3 Indirect labor cost 1.4 Factory rent and utilities 1.5 Machine maintenance cost 1.6 Depreciation cost 1.7 Transportation cost 1.8 Administrative overhead 1.9 Quality control cost
2. Total product cost	2.1 Direct material cost 2.2 Direct labor cost 2.3 Factory overhead cost 2.4 Profit margin 2.5 Commercial cost or banking charge

Curricular Content Guide

1. Underpinning Knowledge	1.1 Identify and classify material, labor, and overhead cost components in production. 1.2 Understand how to determine direct and indirect labor costs and interpret overhead expenses. 1.3 Interpret cost data and maintain accurate records for reference and analysis. 1.4 Understand methods to apply standard labor and overhead rates in cost computation. 1.5 Interpret procedures for verifying, recording, and adjusting cost calculations for accuracy. 1.6 Identify how to review and analyze costing reports with management for validation. 1.7 Understand how to adjust and approve revised costs for pricing and production planning.
2. Underpinning Skills	2.1 Performing identification and classification of material, labor, and overhead cost components. 2.2 Applying analytical skills to calculate total product cost based on specifications and standard rates. 2.3 Applying attention to detail when reviewing cost variations and ensuring accurate documentation. 2.4 Performing communication and coordination skills to discuss and adjust costing with management. 2.5 Applying problem-solving skills to identify reasons for cost fluctuations and propose adjustments. 2.6 Applying decision-making and analytical thinking.
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincere and honest to duties

	3.4 Environmental concerns 3.5 Eagerness to learn 3.6 Tidiness and timeliness 3.7 Respect for rights of peers and seniors in the workplace 3.8 Communication with peers, subordinates and seniors in the workplace
4. Resource Implications	4.1 Workplace (simulated or actual) 4.2 Projector 4.3 Learning manual

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1 identified material, labor, and overhead costs. 1.2 calculated product cost based on specifications. 1.3 reviewed and adjusted costing with management.
2. Methods of Assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical Demonstration 2.3 Oral Questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

Unit of Competency: MAINTAIN DOCUMENTATION AND SHIPMENT PROCESS	Nominal Duration: 35 Hrs.	Unit Code: SICIP-LET-MFL-07-O
Unit Descriptor: This unit covers the skills, knowledge and attitudes required to maintain documentation and shipment process. It specifically includes the tasks of preparing export documents, coordinating packing, labeling and shipment, ensuring dispatch and delivery confirmation and maintaining shipment tracking and records.		

Elements and Performance Criteria:

(Terms in the performance criteria that are written in **bold and underlined** are elaborated in the range of variables).

Elements of Competency	Performance Criteria
1. Prepare export documents.	1.1 Export requirements and buyer instructions are reviewed and interpreted. 1.2 <u>Necessary documents</u> are prepared accurately. 1.3 Documentation complies with buyer, company, and regulatory standards. 1.4 All supporting documents, such as shipping and customs papers, are verified and attached. 1.5 Export documents are submitted to relevant authorities or logistics partners on time. 1.6 Copies of all documents are maintained for record-keeping and future reference. 1.7 Any discrepancies or errors in documentation are identified and corrected promptly.
2. Coordinate packing, labeling, and shipment.	2.1 Packing requirements and buyer specifications are reviewed and interpreted. 2.2 Products are packed according to quality and shipment standards. 2.3 Labels and markings are applied correctly as per buyer and regulatory requirements. 2.4 Coordination with logistics and warehouse teams is maintained to ensure timely shipment. 2.5 Shipment schedules are monitored and any delays are addressed promptly. 2.6 Documentation for packed goods is prepared and verified before dispatch. 2.7 Records of packing, labeling, and shipment are maintained for reference and accountability.
3. Ensure dispatch and delivery confirmation.	3.1 Shipment dispatch is confirmed according to the delivery schedule. 3.2 Delivery documents and tracking details are verified and recorded. 3.3 Buyers are informed of shipment status and expected delivery dates.

	3.4 Discrepancies or delays in delivery are identified and addressed promptly. 3.5 Records of dispatch and delivery confirmations are maintained for accountability. 3.6 Follow-up actions are taken to ensure timely resolution of any delivery issues.
4. Maintain shipment tracking and records.	4.1 Shipment tracking information is recorded and updated regularly. 4.2 Delivery progress is monitored against the planned schedule. 4.3 Discrepancies or delays in shipment are identified and documented. 4.4 Communication with logistics providers and buyers is maintained for updates. 4.5 Shipment records, including invoices, tracking numbers, and delivery confirmations, are organized systematically. 4.6 Historical shipment data is maintained for reference and audit purposes.

Range of Variables

Variable	Range (Includes but not limited to):
1. Necessary documents	1.1 Invoices 1.2 Packing lists 1.3 Certificates 1.4 Loading plan

Curricular Content Guide

1. Underpinning Knowledge	1.1 Identify export documentation requirements and interpret buyer, company, and regulatory standards. 1.2 Understand how to prepare, verify, and submit export documents accurately and on time. 1.3 Interpret packing, labeling, and shipment requirements according to buyer specifications. 1.4 Identify coordination procedures with logistics and warehouse teams to ensure timely shipment. 1.5 Interpret processes for confirming dispatch and delivery in line with shipment schedules. 1.6 Identify how to communicate shipment status, delivery timelines, and discrepancies to buyers. 1.7 Interpret methods for organizing, maintaining, and auditing shipment and delivery documentation.
2. Underpinning Skills	2.1 Performing accurate preparation and verification of export documents according. 2.2 Ensuring completeness and correctness of shipping and customs paperwork. 2.3 Applying organizational and recordkeeping skills to

	maintain accurate shipment and export documentation. 2.4 Performing communication skills to update buyers and logistics partners on dispatch and delivery status. 2.5 Applying problem-solving skills to address discrepancies, delays, or documentation errors promptly. 2.6 Applying time management skills to ensure timely submission and delivery of shipments. 2.7 Performing monitoring and tracking of shipment progress.
3. Underpinning Attitudes	3.1 Commitment to occupational health and safety 3.2 Promptness in carrying out activities 3.3 Sincere and honest to duties 3.4 Environmental concerns 3.5 Eagerness to learn 3.6 Tidiness and timeliness 3.7 Respect for rights of peers and seniors in the workplace 3.8 Communication with peers, subordinates and seniors in the workplace
4. Resource Implications	4.1 Workplace (simulated or actual) 4.2 Projector 4.3 Learning manual

Assessment Evidence Guide

1. Critical Aspects of Competency	Assessment required evidence that the candidate: 1.1 prepared export documents. 1.2 coordinated packing, labeling, and shipment. 1.3 ensured dispatch and delivery confirmation. 1.4 maintained shipment tracking and records.
2. Methods of Assessment	Competency should be assessed by: 2.1 Written test 2.2 Practical Demonstration 2.3 Oral Questioning 2.4 Portfolio (Optional)
3. Context of Assessment	3.1 Competency assessment must be done in an assessment/training center or in an actual or simulated work place after completion of the training. 3.2 Assessment should be done by a nationally certified assessor or occupation-specific industry expert.

End of the Competency Standard

Workshop/Lab Facility Standard

Course Name:	Merchandising for Footwear & Leather Goods Sector
Number of Trainees:	25

Course-wise Training Space (Theoretical Classroom, Workshop/ Lab/Classroom cum Workshop):

- Classroom – 350 sft (33 sqm)
- Workshop/ lab – 800 sft (75 sqm) OR
- Classroom cum workshop – 1000 sft (93 sqm)

Major Training Equipment and Training Facilities:

S.N.	Major Equipment and Training facilities	Required facilities
1.	Computer/Laptops	01
2.	Multimedia projector & screen	01
3.	Scanner	01
4.	Printer	01
5.	Material Swatches and Trims	As required
6.	Show board for footwear	05 set
7.	Measuring Tools (Measuring Tape, Caliper, Ruler)	25
8.	Leather goods and Footwear sample	10
9.	Shoe last	07
10.	Working Table (Minimum 6 feet)	05
11.	Sample BOM sheet (Tech-pack)	10
12.	Pattern board	100
13.	Footwear pattern	05 set
14.	Calculator	10
15.	Sample Display Rack	02
16.	Product Sample Cabinet	02
17.	Leather Swatch Book	01
18.	Color Shade Card and Pantone Book	01

The following conditions must be fulfilled –

- The institute shall not use the same facilities for any other projects/organizations offering a similar course.
- The institute must provide sufficient evidence to prove ownership of the proposed training equipment.

The list denotes the minimum training equipment and facility required to effectively conduct training for a specific course. Additionally, the institute must ensure that all other necessary training tools, equipment, and furniture are available to meet the requirement of competency standards (CS) provided by SICIP.

For the operation of training course on Merchandising for Footwear & Leather Goods Sector the institute must ensure the availability of at least 80% of the major training equipment and

training facilities (according to the CS) to be eligible for SICIP training delivery. If the score is below 80%, the remaining equipment and facilities need to be installed before the commencement of the training.

The institute will also provide all other hand tools and power tools as per CS for 25 trainees. Also, they will arrange adequate seating arrangement and classroom setup for the 25 trainees.
